The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, the distinguished majority leader has stated his responsibility. He has stated what the administration would like to see this afternoon; namely, a vote on the President's veto of the disapproval resolution.

The distinguished majority leader has stated the problems that he faces. He has laid his cards out on the table. We have both talked with our colleagues privately.

So we both know pretty well what the situation is. We all know that the administration delayed until they felt confident that they had the votes to uphold the President's veto. That is the administration's prerogative to do so. I do not like the veto. But in talking with the White House last night, I was told quite candidly that they did not have the votes at that time, but they hoped to have the votes by this morning. I indicated to the White House that the distinguished majority leader had said to me in a colloquy that it was his hope that we could have a vote on the veto by noon or early in the afternoon today. The White House indicated that they hoped that to be the case, but that if they did not have the votes to sustain by noon, the veto message would be later in coming.

So having been around here a little while, I understand that language. Now they have the votes. From their point of view, I certainly can see the situation as they do. The distinguished majority leader, being the loyal, dedicated majority leader that he is, would like to have that vote on the override today.

If I were in his position and viewed the matter as he does, I would in all likelihood want to have the vote at this late hour also.

We who oppose this sale feel that we have a justifiable case to try to override this vote. I need not attempt at this moment to state that case. Others have stated it, and there will be time for us to fully state it later—on another day, I hope.

I compliment Senator CRANSTON, who has with great commitment, dedication, and acumen opposed this sale from the beginning, and has, in regard to this particular issue, been the one on whom we have placed responsibility for counting and rounding up the votes. Most of our Senators are waiting to vote. Some have had to leave. Senator DECONCINI has had to leave town, as the distinguished majority leader has already stated, because of the death of Senator DECONCINI's father.

So we have lost a few Senators, not many, but every vote counts in this situation.

This is a matter of great importance and to the interests of the United States. After all, that should be our first interest, and our main goal.

It is not a matter so much as to who can win or who cannot win in this vote. It is not just another political game. That is not it. There are other

issues and times in which U.S. interests are not so deeply involved and so deeply impacted as in this instance.

We see this matter differently. Some will see it one way, and some the other. The point is that, because of the late hour we are losing Senators who are opposed to the arms sale.

The adjournment resolution has not yet been brought up, but the recess will begin at close of business today.

So we, who feel strongly about the resolution of disapproval, having supported it, and who feel just as strongly about the need to override the Presidential veto, are willing to wait until a time when Senators on both sides of the issue and on both sides of the aisle are all here. They are not here now. Until this afternoon we had the votes to override. We are not willing to cast our lot at this moment. We are not willing to subject the best interests of the United States, as we see it, to a vote now.

Once the veto message is brought in the door, except by unanimous consent, spread upon that journal, and stated by the clerk, we have no alternative but to stay on that business until it is completed. There is no timeframe. It does not have to be within 1 hour, 1 day, or 1 week, or 1 month.

We are willing on this side to agree to vote at a time certain, or no later than a time certain on Wednesday next, and in the meantime, we are agreeable to bringing up other matters. So we are willing to have an agreement so that Senators may know that this vital issue will not be voted on until Wednesday, June 4.

But under the circumstances, may I say to the distinguished majority leader, and through him to the White House, that we are prepared to debate this matter at length if the measure is brought in before the Senate at this time. He can adjourn the Senate, and in the meantime, it would not be prejudicial to either side or any Senator's rights. He could adjourn the Senate over. Barring that, he can bring it up before the Senate, and offer a cloture motion. But that, too, under rule XXII, has its liabilities and problems for both sides. A motion to refer could be made to the Committee on Foreign Relations, but that is debatable. But the distinguished majority leader could move to table that.

So really what the majority leader is faced with, in the final analysis, is, there will be no votes today.

□ 1740

There are some of us who are prepared to talk about this veto at length now. That is not intended as a threat. But we prefer to enter into a consent agreement to delay the vote. While the White House may have difficulty understanding the arcane rules and procedures here in the Senate, nevertheless the majority leader has to be bound by those rules and precedents, and I am bound by the same. I am confident the majority leader will impress upon the White House the situation as it is.

Mr. CRANSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. First, I want to thank the distinguished minority leader for his remarks about my efforts with regard to this issue. I am grateful for his hard work also on the issue.

Let me say that I am delighted that the leaders are reaching an agreement on when we should proceed to vote on this matter.

Delay has been a strategy used by one side or the other rather obviously depending on how they thought the vote might occur at any particular time. The people who support the arms sales were considering putting this over until June so that they would have maximum time to work on those they would like to switch and vote with them. We have been ready to vote until today. But now, when it turns out to be to the advantage of those favoring the sale to vote today, it is to the disadvantage of those who oppose the sale.

We would lose today. We would lose because six people are absent, five of whom voted against the sale when we voted it down, and the sixth who would have voted against the sale had that Member been present. There were no absentees on the other side. So that puts us at a distinct disadvantage.

Incidentally, of those who are absent, four are Republicans and two are Democrats.

I have no idea how this vote will come out in June, but I think there should be an opportunity for all Senators to know when the vote will come so that all who are concerned will have a maximum opportunity to be present. We will be delighted to vote at that time, and we will hope that we will win. We will work to win. We will, of course, accept the verdict and not engage in any delaying tactics at that time. We are perfectly willing to enter into an agreement to vote at a time certain after we return.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I think the RECORD clearly reflects that if the message were brought in and read into the RECORD, there would be no vote this evening. I think that is fairly clear. If I could force a vote, I would. But obviously, as I understand, we have at least three here, and I assume others, who are prepared to talk.

And I think, because of outside circumstances, many colleagues will be gone on both side of the aisle.

Since it is clear that the President would probably prevail this afternoon, the strategy apparently is to delay, in hopes that maybe there will be some changes made, or some who would now vote for the President will change their mind, or there will be more people present and maybe one or two more votes to sustain the veto when we return.

I am not 100 percent certain whether we have the votes now. I hope that we have the votes to sustain the President's veto.

I remind my colleagues, of the 73 votes in support of the resolution, I did not support it, 26 Republicans did.

I would hope this will not become a totally partisan matter. It almost is at this point, almost a solid block on the other side opposing the President. In my view, that does not send the appropriate signal to our friend, the State of Israel, or the moderate Arab States in that part of the world. I do believe that even though there has been no concerted effort by certain groups to make this a political issue, it has become highly politicized. It is now sort of a struggle between the President of the United States and the Democrats in the Senate.

I am not certain that is the way foreign policy should be conducted.

In any event, it is clear we are not going to be able to vote tonight.

Mr. GOLDWATER. Will the Senator yield?

Mr. DOLE. I am happy to yield?

Mr. GOLDWATER. I listened to the remarks of the minority leader. I understood him to say that there might be unanimous consent to vote next Wednesday. Has that been discussed?

Mr. CRANSTON. A week from Wednesday.

Mr. DOLE. The 4th of June.

Mr. GOLDWATER. A unanimous consent to vote on this next Wednesday, is that true?

Mr. DOLE. We have not propounded that request. That was one suggested, for Wednesday or Thursday. I am advised that Wednesday would not be a good day. It would more apt to be on a Thursday, if we can obtain that consent. If somebody objects, obviously, that is something else.

Mr. METZENBAUM. The Senator from Arizona is referring to next Wednesday.

Mr. DOLE. If it is on Wednesday, it would be on the 4th of June, which would be a week from next Wednesday.

Mr. GOLDWATER. That would be June 4. I would have to object to that. I have some very important committee business that day. We will fill that day from 7 o'clock until probably after dinner. I think we ought to vote tonight, frankly. That is what the majority party is for. We are supposed to

run this place, but I am beginning to think we do not.

If you suggest the 4th, I am going to object.

Mr. DOLE. I think the 4th is not a good day, come to think of it. [Laughter.]

That is for a number of reasons. One was just stated. And I beleive I indicated it would not be good from the President's standpoint.

Mr. BYRD. Mr. President, if the 4th cannot be agreed to, I would be happy for us to try to have it on the 5th at some hour, if that would be more convenient for the distinguished Senator from Arizona and others.

Mr. DOLE. Mr. President, unless somebody wishes to speak, I am going to suggest the absence of a quorum.

Mr. CRANSTON. I would like to speak for just one moment.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. I would simply like to state that this is not a partisan issue as far as this Senator is concerned. It is not supposed to be a partisan issue and it should not be viewed in partisan terms. I believe that a majority of Republicans voted against the sale. I know that a majority of Democrats voted against the sale. I know that many Republicans are still against the sale as are many Democrats.

I would like to simply point out that my principal coleader in the effort thus far is one of today's absentees, ROBERT PACKWOOD, of Oregon, who is not here because they just had a primary in his State. He would like to be here when we vote. That is one reason for waiting until he can be here, to help out when we do vote.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

□ 1830

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL THANKS TO ANN K. HALDEMAN

Mr. DOLE. Mr. President, before adjourning, I want to take a moment to say a special thanks to Ann K. Haldeman, who is today leaving her post as an assistant in the Republican cloakroom.

Ann has been an integral member of the cloakroom staff for more than 3 years. Her dedication, intelligence, and sunny disposition have earned her many, many friends—both Senators and staff.

We wish her the very best of luck as she ventures home to California and in whatever endeavor she follows in the future.

Mr. BOSCHWITZ. Mr. President, if the leader will yield——

Mr. DOLE. I am happy to yield.

Mr. BOSCHWITZ. I join in the comment that Ann has a very sunny disposition, and she will be very much missed in the cloakroom. Her competence, her followup, and her reliability—all one has to do is call and ask her—is always at a very high level, and will be missed.

Mr. DOLE. I thank this distinguished Senator from Minnesota.

Mr. CRANSTON addressed the Chair.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from California.

TAX REFORM

Mr. CRANSTON. Mr. President, when the Senate debates tax reform, among the most difficult issues the Senate will face will be assessing and modifying the Finance Committee's recommendations as to how all American taxpayers will make the transition from today's Tax Code to tomorrow's tax reform plan.

As the Senate settles down to debate the tax reform bill, we will see that the substantive changes in the overall bill which will be made need not be divisive nor destructive of the package.

Many of our constituents know that they can learn to do business under the new law, because they believe that ultimately the Congress of the United States is not going to pass a tax reform bill which treats them unfairly.

But they ask only for a chance to make the transition, so that they have the chance to adapt to the new law.

That is reasonable.

It is fair.

And it makes good economic and political sense.

I, for one, will be working to assure fair transition rules for investors in real estate.

There are ways to work out transitions for these taxpayers and businesses adversely impacted by the tax reform plan which will pay for themselves fairly, moderately, and in consistency with the tax reform plan.

Among the various proposals which have been suggested to me and which I am studying are combinations of "grandfathering" periods up to 10 or 12 years from date of investment, caps on deductions, and other limitations proportionate to a fair return on investment.

A reasonable goal would be to design transition provisions which return to the investor a fair rate rather than a return based solely upon tax-advantaged values under current law.

I think it highly unfair for the Senate to repeal laws we passed to induce investors to make investments and thereby to turn a once-profitable investment into a losing proposition. We should not use the taxing power wantonly to invite and then to destroy private investment in housing and real estate.

The case for fairness is well stated by a Californian who is a typical investor in a low-income housing tax shelter who wrote me as follows:

> The Government, in effect, said it wanted low-income housing, but that it didn't want to pay for it itself. Knowing that the private sector would not provide it as things stood because of negligible return on such an investment, it provided tax writeoffs as the incentive to invest. Since the Government controlled the rents (as the only way to insure that the projects would continue to be for low-income tenants, who could not afford market rates), the tax incentives were the only way for a private investor to achieve a reasonable return.

Mr. President, all the pejoratives about real estate tax shelters will not change those facts one bit.

We have a moral obligation to treat these investors fairly. I urge Senators to keep an open mind and to join in the process of developing a consensus on how the Senate will meet its obligation for a fair transition from current tax law to reformed tax law.

Mr. President, the record also will show that in 1981 many spokespeople for the real estate industry warned against shortening depreciation for real estate to 15 years. They said at the time that overly rapid depreciation would result in overbuilding. And that result is exactly what we have seen in commercial construction—not, I stress, in housing construction.

The 1981 tax bill was an excess. We've been engaged ever since in rolling back what was done in the burst of enthusiasm for Reaganomics. The Packwood-27 bill is simply the last step in taking back what Congress and President Reagan gave away in 1981. This is necessary to do. But in the process of doing in the name of tax reform what could not otherwise be done, let us not unfairly tax investments made in reliance on earlier tax legislation.

□ 1840

Many of those investments were made for a solid social purpose, to help provide low-cost and moderate-income housing for, in many cases, working Americans who can no longer afford housing under today's circumstances without such help.

If we do not find some way to continue to provide, let me add, some incentive for the building of low-cost and moderate-income housing, we will have a housing crisis in this country.

Mr. President, I yield the floor.

ADJOURNMENT OF THE HOUSE FROM MAY 22, 1986 TO JUNE 3, 1986, AND ADJOURNMENT OF THE SENATE FROM MAY 21, 1986 TO JUNE 2, 1986

Mr. DOLE. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 144) providing for an adjournment of the House from May 22, 1986 to June 3, 1986, and for an adjournment of the Senate from May 21, 1986 to June 2, 1986.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. BYRD. Mr. President, I do not have any objection. I just want to make certain it has the usual recall paragraph in it.

The PRESIDING OFFICER. The resolution does have the recall paragraph.

Mr. BYRD. Then I have no objection.

Mr. DOLE. I ask that the concurrent resolution be read.

The PRESIDING OFFICER. The clerk will read the concurrent resolution.

The assistant legislative clerk read as follows:

Resolved by the Senate (the House of Representatives concurring), That when the House adjourns on Thursday, May 22, 1986, pursuant to a motion made by the Majority Leader of the House, or his designee, in accordance with this resolution, it stand adjourned until 12 o'clock meridian on Tuesday, June 3, 1986, and that when the Senate adjourns on Wednesday, May 21, 1986, pursuant to a motion made by the Majority Leader of the Senate, or his designee, in accordance with this resolution, it stand adjourned until 2 o'clock p.m. on Monday, June 2, 1986, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution.

SEC. 2. The Speaker of the House, after consultation with the Minority Leader of the House, and the Majority Leader of the Senate, after consultation with the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 144) was agreed to.

Mr. BYRD. Mr. President, I thank the distinguished majority leader, I thank the Chair, and I thank the clerk for the reading of the concurrent resolution for the Record.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRESIDENTIAL VETO OF RESOLUTION OF DISAPPROVAL OF SAUDI ARABIA ARMS SALE

Mr. DOLE. Mr. President, there is a messenger at the door.

The PRESIDING OFFICER. The Senate will receive a message from the President of the United States.

Pursuant to article I, section 7 of the Constitution, the Chair announces the President of the United States has returned Senate Joint Resolution 316 together with his objections, which will be entered as a part of the Journal, and which the clerk will read.

The assistant legislative clerk read as follows:

To the Senate of the United States:

I am returning herewith without my approval S.J. Res. 316, a resolution that would halt the proposed sale of defensive missiles to Saudi Arabia.

The U.S. defense relationship with Saudi Arabia was started by President Roosevelt in 1943 and endorsed by every President since. I cannot permit the Congress to dismantle this longstanding policy, damage our vital strategic, political and economic interests in the Middle East and undermine our balanced policy in that region.

The American people and their representatives should understand that this sale is in our interests. It is not just a favor to our friends in Saudi Arabia. Moreover, it is not being done at anyone's expense.

The security of Israel remains a top priority of this administration. This sale will not endanger Israel's defenses, a fact that is underscored by Israel's decision not to oppose the sale.

Stability of the oil-rich Persian Gulf is another goal of great importance. In a region living in the shadow of the tragic and gruesome Iran-Iraq war, and threatened by religious fanaticism at its worst, we cannot afford to take stability for granted. Saudi willingness to stand up to Iranian threats has been key in preventing the spread of chaos. It has been Saudi Arabia's confidence in our commitment to its security that has allowed it to stand firm.

But Saudi Arabia produces no weapons of its own and we have not sold the Saudis new arms in almost 2 years. If we suddenly shut off that supply, it will weaken our own credibility, as well as the Saudis' ability to defend themselves. It would send the worst possible message as to America's dependability and courage.

Behind the scenes, the Saudis have aided the effort to combat terrorism, which is as much, if not more, of a threat to them as it is to us. Recently, they refused Qadhafi's requests for aid. Several times in recent months, they have been instrumental in offsetting unjust criticism of the United States and preventing radical states from undertaking joint action against our country.

The Saudis have proven their friendship and good will. They have assisted our efforts to support responsible governments in Egypt, Jordan, and Sudan. They have worked quietly in the search for peace in Lebanon, in the Arab-Israeli conflict, and in the Iran-Iraq war. They also provide impressive assistance to the government of Pakistan and to Afghan refugees.

In the long run this sale will be good for America, good for Israel, good for Saudi Arabia, and good for the cause of peace.

I ask members of both parties to sustain this veto and to join me in protecting our country's vital interest.

RONALD REAGAN.

THE WHITE HOUSE, *May 21, 1986.*

□ 1845

Mr. DOLE. Mr. President, I ask unanimous consent that the veto message to accompany Senate Joint Resolution 316, the Saudi arms sale, received from the President today, be temporarily laid aside; that the Senate proceed to its consideration at 10 a.m. on Thursday, June 5; and that time for debate on the veto message be limited to 4 hours to be equally divided, in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, and of course, I will not object, but for the RECORD "in the usual form" in this instance would mean the time for debate be equally divided between the majority and minority leaders or their designees; is that correct?

Mr. DOLE. That is correct.

Mr. BYRD. I thank the Chair.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I further ask unanimous consent that the vote occur at 2 p.m. on Thursday on the question: "Shall the joint resolution pass, the objection of the President of the United States to the contrary notwithstanding?"

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I ask unanimous consent to include in the RECORD at this point a letter directed to me received from

the President today, May 21, concerning the modification of the original sale to Saudi Arabia with reference to the Stinger missile.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, May 21, 1986.

Hon. ROBERT DOLE,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR BOB: For the past two weeks, I have shared your concern for our ability to gain necessiry congressional support for the Saudi missile sale in its present configuration. Yesterday I met with the Saudi Ambassador to the United States, His Royal Highness Prince Bandar bin Sultan, to discuss this issue. Prince Bandar informed me that the Saudi Government, recognizing the particular sensitivity of Stingers being transferred to any country and the importance of the sale to the security of the Persian Gulf area, has decided to withdraw its request for Stingers.

Today I am signing a message to the Senate vetoing S.J. Res. 316, which would disapprove the sale of all missiles included in this notification: AIM-9L, AIM-9P, Harpoon, and Stinger. If my veto is sustained, I will proceed with the sale but will not include the 200 Stinger launcher systems and the 600 missile reloads. A subsequent Saudi renewal of their request for Stingers would require the submission of another notification of the sale to the Congress in accordance with Section 36(b) of the Arms Export Control Act.

It is my sincere hope that with this modification of the Saudi request, the Congress will agree to this sale. It remains a vital and timely symbol of U.S. security commitments in the Middle East.

Sincerely,

RONALD REAGAN.

Mr. BYRD. Mr. President, before the distinguished majority leader turns to another subject, I wish to thank the majority leader and to thank the Members of the Senate on both sides of the aisle for their patience and their forbearance and for the consideration of the problems on both sides of the aisle and on both sides of the question. I also wish to commend again the distinguished minority whip, Mr. CRANSTON, for his perseverance, his persuasive efforts, and his commitment in this matter. I am glad that the Senate has been able to reach a resolution that has been agreeable to both sides of the aisle which will permit this important matter to be decided at a time when all Senators, I am certain, will have a better opportunity than at this point to be present to cast their votes thereon.

□ 1900

Mr. DOLE. Mr. President, I thank the distinguished minority leader.

I have indicated to Don Regan, the Chief of Staff, that I know the President would like to have had this matter disposed of this evening, as would the majority leader, the Presiding Officer [Mr. CHAFEE], and others, but that was not to be. I think they understand that.

I indicated that there would be absentees on both sides. This would give them sufficient notice. There may be other absentees, there may be illness or other reasons why Senators could not be here.

At any rate, this matter is locked in. This matter will be laid to rest on Thursday, June 5, at 2 p.m.

I think there was some concern about Senators during the recess period being bombarded by both sides; but, in any event, that would not be without precedent.

So it seems to me that we have resolved the matter as best we could.

ORDER FOR CONSIDERATION OF S. 1965, HIGHER EDUCATION ACT OF 1965, ON JUNE 2

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 1965, a bill to reauthorize and revise the Higher Education Act of 1965, and for other purposes, at 3 p.m. on Monday, June 2, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I have indicated to the distinguished minority leader that there will be debate only on Monday; there will not be votes. The agreement holds that there will be no votes after 6, and if any rollcall votes are requested, they will be put over until Tuesday.

Mr. BYRD. I thank the majority leader for stating that there will be no rollcall votes, I do this especially on behalf of Mr. PELL. Mr. PELL has not made this a condition. Mr. PELL never does that. But out of respect for Mr. PELL and his great dedication to the subject matter of this act, I feel honor bound to try to protect him.

I again thank the distinguished majority leader for his statement that there will be no rollcall votes on this matter on Monday.

Mr. DOLE. Mr. President, I ask unanimous consent that if any rollcall votes are ordered, they be postponed until Tuesday, June 3, at a time to be agreed upon by the minority leader and the majority leader.

The PRESIDING OFFICER. Without objection, it is ordered.

NATIONAL TOURISM WEEK

Mr. PRESSLER. Mr. President, I take this opportunity to encourage my colleagues to join me in recognizing May 18-25, 1986, as National Tourism Week.

Many people are surprised to learn that travel and tourism is the third largest retail or service industry in the United States, exceeded only by automobile and food sales. Tourism is a $260 billion industry which employs almost 5 million people in our country. At the State level, travel and tourism is the first, second, or third largest employer in 41 States.

The impact of this activity is accentuated by the fact that the industry is still rapidly growing—the 2.9 million new travel- and tourism-related jobs created in the past 10 years represent 18 percent of the total increase in employment. For every two jobs added in the travel and tourism industry, another job is created in businesses supplying related goods and services. It is clear that the breadth and variety of businesses involved in the travel and tourism industry is enormous.

Primary travel-related businesses include intercity bus, rail passenger and air passenger carriers, eating and drinking establishments, hotels and motels, campgrounds and trailer parks, car rental firms, oceangoing cruise lines, amusement and recreation services, and others.

However, the volume of goods and services required by these primary travel and tourism enterprises creates a vast interrelated constituency. People who travel need a mode of transportation, a place to visit, shelter, and food. They seek entertainment, recreation, and souvenirs. They require a wide variety of other kinds of assistance along their way: Automotive repairs, services for the handicapped, medical attention, security, et cetera.

In order to fully realize the contribution the travel and tourism industry can make to a State or national economy, I believe more cooperation and coordination is necessary. Kay Steuerwald, a member of my U.S. Senate Travel and Tourism Industry Advisory Council, and president of the Mountain Co. at Mount Rushmore National Memorial in South Dakota, issued a relevant challenge recently. She told local travel and tourism promoters to "get political" or miss the economic boat.

I challenge my colleagues today to "get political" about travel and tourism as well. This enormous and expanding industry, and the goods and services industries that complement it, arguably comprise one of the most important and influential economic forces in nearly every one of our home States. I believe no one in the Congress can afford to ignore this fact.

I challenge each of my colleagues to embark upon a timely expedition to discover the full extent of the travel and tourism industry and its related support industries in their own home States.

As chairman of the Business, Trade, and Tourism Subcommittee, I welcome the opportunity to assist Senators in this endeavor through any of the following services:

First, the coordination of a statewide tourism/business conference to explore the interrelationships between travel and tourism and other businesses in your State;

Second, information on possibilities for growth or other assistance that is available through the U.S. Travel and Tourism Administration [USTTA] and private national travel and tourism organizations;

Third, suggestions of industry experts who are available to address local travel- and tourism-related groups; and

Fourth, other travel- and tourism-related activities.

By supporting the continuation of USTTA, we stand to multiply the fiscal impacts of international tourism and to ensure that "have not" States are given an opportunity to share the wealth with those States that can afford impressive promotional budgets.

In addition, USTTA provides us with the ability to compete for the International visitor's dollar in a world where each nation is increasingly anxious to improve its own balance of trade. Developing countries especially recognize the importance of earning foreign exchange, and competition between developed nations is also escalating. Canada alone will spend over $40 million, or $1.62 per capita, on national tourism promotion in 1986. We will spend a little over $11 million in the United States—less than 3 cents per capita.

How important is the "export" of travel and tourism to the U.S. balance of payments? The Office of the U.S. Trade Representative and the Department of Commerce note that, in 1985, tourism exports represented 25 percent of the $45 billion generated by all services experts. This perkentage has been higher, however, and it can be improved if we allow USTTA to continue its efforts.

USTTA is striving to increase the U.S. world market share from its present level of 11 percent to at least 13 or 14 percent. No other agency is in a position to accomplish what USTTA does through its international negotiations to break down travel barriers, and through the sophisticated cooperative advertising marketing initiatives carried out by its 10 overseas offices.

I recently introduced S. 2307, along with 17 cosponsors, to reauthorize funding for this important agency for 1987, 1988, and 1989. During this 1986 National Tourism Week, I would invite my colleagues to join me in cosponsoring this legislation.

In summary, I would say that time is of the essence. The competition for the travel and tourism dollar is fierce. You can help your State reap the economic benefits of travel and tourism by providing it with all the relevant information and assistance that is available. You can help the United States reap the benefits from increasing its share in the world travel and tourism market by supporting the continued authorization of funding for USTTA.

I look forward to working with my colleagues in seeking to accomplish both of these objectives as we observe this year's National Tourism Week and look to the days that follow.

AN AMERICAN SUCCESS STORY

Mr. PRESSLER. Mr. President, I recently had the distinguished honor of addressing the graduating class of the Vietnamese-American Entrepreneur Training Program [VETP] at Georgetown University. The 42 graduating students, along with their instructors, should serve as an inspiration to all of us.

The goal of the Vietnamese-American Entrepreneur Training Program is to build on the experience and education of new immigrant Americans by training these individuals to enter the mainstream of American business and generate opportunities for others. Most of these students have been well educated in Vietnam, but lack the understanding of how to transfer these skills to American business. Through this bilingual program, students are able to learn approximately 1 year's worth of material in 4 months. They are instructed in accounting, finance, marketing, and taxation for small businesses.

Equally important to this program are its sponsors—the people and institutions that care enough to reach out and help these special Americans. I want to commend Georgetown University for sponsoring this one-of-a-kind program, and the Fairfax County Department of Manpower Services and Howard University's Small Business Development Center which have provided funding and support for the Vietnamese-American Entrepreneur Training Program. The people at these institutions have made a difference. Because of their involvement, these new Americans will receive valuable training making it possible for them to own a small business.

Mr. President, one man in particular deserves a lion's share of the credit for this program. Pho Ba Long, the VETP director, is that man. I met Pho Ba Long in 1967 while I was serving in Vietnam. He was then dean of the School of Business and Government at Da Lat University. He and his family came to America in 1975 and have truly become an American success story.

Long's wife Clare has a master's degree in business administration. His oldest son, Hong-Phong, will graduate from Georgetown's School of Foreign Service this spring. Le Thu graduated from Marymount College and is beginning a job at the Department of Commerce shortly. Hong-Lan, the third son, will graduate from the U.S. Air Force Academy next May. Hong-Quant is in his second year at the University of Virginia studying engineering. Long-Chau and Hong-Ming, the youngest two children, are 16 and 13 years old. This is an impressive educational background for any family. Yet, the Longs achieved this against great odds—the children did not speak English. They had to master the difficult English language and adjust to a new culture.

Pho Ba Long's total dedication to the VETP Program can be seen in a recent letter he wrote about the program. I ask unanimous consent that Pho Ba Long's letter be placed in the RECORD at the conclusion of my statement.

The people and institutions which have devoted their time and talent to the Vietnamese-American Entrepreneur Training Program receive little recognition for their services. That is why I wanted to take this opportunity to pay tribute to them. The Vietnamese people have a proverb, "If the people are rich, the country is strong." And as one of the students said at graduation, "Together we and our friends are making out people rich, ourselves rich, our community prosperous, and this country stronger."

HISTORIC PRESERVATION

Mr. HOLLINGS. Mr. President, I would like to offer my congratulations to Mrs. Frances Ravenel Smythe Edmunds of Charleston, SC. Mrs. Edmunds has for years been in the forefront of the historic preservation movement. Recently, the Historic Charleston Foundation honored Mrs. Edmunds by naming their new education center the "Frances R. Edmunds Center for Historic Preservation."

Mrs. Edmunds, who retired from her position as executive director of the foundation in July 1985, has been responsible for many of the successes of the foundation. She developed the revolving preservation fund which has restored more than 100 homes in Charleston's Old and Historic District. She lobbied for height and tourism management ordinances, and also supported the ordinance which prevents owners from allowing old buildings to deteriorate.

Mr. President, I could go on and on about Mrs. Edmunds' honors, but instead ask unanimous consent to submit for the RECORD and article from the News and Courier which does that. She deserves to be congratulated and commended for a job superbly done. Charleston has been very lucky to have such a supportive friend and member of the community.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DREAM OF HISTORIC PRESERVATION CENTER BECOMES REALITY

(By Frank P. Jarrell)

The little columned building at the corner of Meeting and Chalmers streets was erected in the early 1930s. It was a pretty fancy place, especially for a gasoline station.

Today, the building still stands, but the fuel it dispenses is a different mix. The little brick building is the Frances R. Edmunds Center for Historic Preservation, the dispensing point for the education programs of the Historic Charleston Foundation.

The center honors Frances Ravenel Smythe Edmunds who retired in July 1985 as executive director of the foundation. Although it has been operating since March, the formal opening will be Tuesday, at an invitation-only ceremony.

Lawrence A. Walker, president of the foundation's board of trustees, says, "The center is an idea that Mrs. Edmunds conceived a long time ago as something that would be unique in the country. It would be a center for preservationists, a place with a good reference library, a source of material that might not be otherwise readily available. In addition, it would sponsor seminars on preservation techniques as well as be a part of the education posture of the community by having programs for schoolchildren."

Planning for the center started about a decade ago. Six years ago, the organization started searching for a site. The result was the old filling station, which has been renovated. "It's not only a good location, but good for the community. What we did was help maintain the one-story profile at that very important corner shared by the Fireproof Building (headquarters of the South Carolina Historical Society), Hibernian Hall and Washington Park. The center basically precludes anyone putting some sort of high-rise there."

By naming the center for Mrs. Edmunds, the foundation honors one of the city's leaders, a nationally recognized pioneer and expert in historic preservation. Walker says: "I recently attended a hearing of the Coastal Council, which Frances also attended. When she got up to talk, there was loud applause from the audience—not just when she was finished. I think that's a very good indication of the appreciation that a large segment of our community has for what Frances has contributed for the 30-odd years she has been involved."

Richard W. Salmons, chairman of the foundation's education committee, says: "Frances has been Mrs. Preservation for decades and the building is a continuing step in the bolstering of preservation by the foundation. In the past, we've done a lot of buying and refixing, but this center is a different slant, toward training and education. . . . It's only right that it should be named for her."

Mrs. Edmunds joined the foundation when it was incorporated in April 1947. After having filled several positions, she was named director in 1955, after the foundation acquired the Nathaniel Russell House, one of its first major properties.

In 1958, she developed the foundation's revolving preservation fund. Using private donations, the foundation purchased endangered houses to sell to buyers who would agree to restore them without destroying their architectural integrity. More than 100 homes have been restored in the city's Old and Historic District because of the fund.

During her tenure, Mrs. Edmunds supported the city's ordinance preventing owners from allowing old buildings to deteriorate, promoted the extension of the Old and Historic District, and lobbied for height and tourism management ordinances.

She also helped develop several supporting programs, including operations of Historic Charleston Reproductions, the Festival of Houses and two house museums—the Russell and Edmondston-Alston houses.

Mrs. Edmunds, a Charlestonian, attended St. Timothy's School in Maryland and graduated from the College of Charleston in 1939.

Because of her work, the National Trust for Historic Preservation awarded her the Louise duPont Crowninshield Award. She has also received the U.S. Interior Department's Conservation Service Award, the Historical Savannah Foundation Award, the Realtor Appreciation Award of the Greater Charleston Board of Realtors and was named to the Charleston Federation of Women's Clubs' Hall of Fame. In addition, she is a life member of the Historic Charleston Foundation's board of trustees.

Mrs. Edmunds says the center should be a way to show residents and visitors "what we've achieved in Charleston. We've never had a base for a full education program before."

The building itself, "is a type of preservation, although I seriously doubt it would qualify as that now. In fact, it was one of the motivating factors in our passing the first preservation ordinance in America."

Before Charleston's historic district was established, she explains, corner buildings were being torn down to make way for filling stations. When the center was originally built, as a service station, details of the Gabriel Manigault House, which once stood at George and Meeting streets, were incorporated in the construction. "I really don't think that would be called preservation today," Mrs. Edmunds says, laughing.

R. Angus Murdoch, who replaces Mrs. Edmunds as the foundation's executive director, says the education center purpose is twofold: specific and general. Specific education concerns the research materials and preservation seminars. The general education applies to visitors who just walk in. "The tourists are always walking in, so it's also a visitors information center. Although that wasn't a large theme in the planning, we knew it would happen."

Murdoch says the foundation projects that 100,000-125,000 people will use the center each year. "The exhibits inside are designed so people can interact on a number of levels, detailed or not. If you want to read it all, the exhibit is almost a book on the history of Charleston preservation."

SYRIA AND INTERNATIONAL TERRORISM

Mr. HELMS. Mr. President, press reports today indicate that Italy's interrogation of the one surviving terrorist involved in the attack on the Rome airport last December has brought an admission that Syria is directly implicated in the attack. According to the Leslie H. Gelb article in today's New York Times, Mohammed Sarham has admitted that Syrian agents trained him, and accompanied him on his journey from the Bekaa region of Lebanon to Damascus through Belgrade, and then on to Rome.

This admission comes on the heels of the British reports of a Syrian role in the aborted attempt to blow up an El Al airliner in London.

Mr. President, this evidence put forward by our allies has apparently shaken our own intelligence community and the State Department in their campaign to portray Syria as a "stabilizing influence" in the Middle East. I strongly supported President Reagan in his air strike against the terrorist training centers in Libya, because Libya obviously plays a role in staging international terrorist operations. But I deeply believe that Libya is merely the front operation for the much more fundamental involvement of Syria and Iran.

Instead of directly facing the deep involvement of Syria in international terrorism, the State Department has taken the approach of covering up for Syrian terrorist activities and portraying Syria as a positive factor in Middle East politics. Of course, just the opposite is true.

Mr. President, I have been deeply concerned for the last year that, in the wake of the hijacking of TWA flight 847, Syria has been portrayed as having had a positive influence. At the time, however, Lebanon was punished with threats of closing its national airport.

Mr. President, Iran and Syria, both of whom are officially categorized by our Government as states sponsoring terrorism, were intimately involved in the planning and execution of the hijacking of TWA 847. The hijacking, of course, commenced at the Athens airport and not the Beirut airport. While it is true that there have been, and are now, serious security problems at the Beirut airport, punishing the Lebanese people and their government for a hijacking in which neither the people nor their government was involved was counterproductive and avoided the real issue of Syrian and Iranian involvement.

On June 27, 1985, I went into some detail on this floor about the involvement of Iran and Syria in international terrorism and their involvement in the TWA 847 hijacking. On April 15 of this year, I discussed the operations of Libya, Syria, and Iran in joint terrorist operations.

Syria and Iran should not be rewarded with specious rhetoric about rapprochement and new relations. We should not forget that Syria is in military control of the Bekaa Valley and provides not only protection for but also material assistance and counseling for Shi'ite terrorist groups and the Iranian revolutionary guards stationed there.

We should not forget that the Syrian dictatorship is not only highly

unstable but also guilty of massive human rights violations against its own people. It is a fact that Mr. Assad's minority Alawite dictatorship systematically suppresses the human rights of the majority of the population. The Syrian dictatorship is a well-known Soviet client state which has relentlessly advanced Soviet interests in the region. In fact, without Soviet backing the Syrian dictatorship would collapse.

THE SYRIAN FACTOR IN THE MIDDLE EAST

Mr. President, it may be useful for my colleagues to review the rise to power of Hafez Assad and the dictatorship of the Alawite minority. I have put together a summary with the assistance of Middle East experts.

Mr. President, the following table illustrates the religious composition of Syria's population as estimated for 1985. Senators will note the minority position of the Alawites who number about 10 percent of the total population. Yet the Alawites, by using Mr. Assad and his military supporters, have imposed a dictatorship on the country.

Religious Composition of Syria's Population, 1985

Estimated total resident population	10,000,000
Orthodox Muslims	7,150,000
Native Sunni Arabs	5,700,000
Kurds	900,000
Palestinian Arabs	300,000
Turkomans	150,000
Circassians	100,000
Heterodox Muslims	2,000,000
Alawis	1,350,000
Druzes	300,000
Ismailis	200,000
Ithna 'ashari (Imami, Mutawali) Shiis	150,000
Christians:	
Orthodox denominations:	
Melkite (Greek)	330,000
Armenian Apostolic	130,000
Syrian (Jacobites)	110,000
Catholic demominations:	
Greek Catholics	90,000
Syrian Catholics	30,000
Armenian Catholics	20,000
Maronites	20,000
Nestorian (Assyrian)	20,000
Roman Catholics	10,000
Chaldeans	10,000
Protestant denominations	30,000
Others (Yazidis, Bahais, Jews, etc.)	50,000

After Syrian independence in 1946, the Alawites, who had been traditionally at the economic and social fringe, became members of secular Socialist parties which promised them increased economic and social status. The Baath ("Renaissance") Party recruited heavily among the Alawites. In 1963, the Baath Party seized power in Syria and the Alawites then had their political vehicle.

In 1966, the Alawites led a radical rural based Baath faction in the military which then displaced Sunni Baathist officers. Mr. Assad, then Minister of Defense, became the leader of subgroup within this faction and in 1970 launched a coup against Baathist rival factions. Mr. Assad, for public relations purposes and to mask Alawite domination, appointed some Sunnis to high-profile public officers.

Mr. Assad's power base began to narrow in the overall Baath organization including both civilian and military. It then narrowed even further within the military wing of the Baath Party until his base finally ended with support only from Alawite military officers. Not surprisingly, his Alawite background came under increasing attack by militant orthodox Sunni leaders. By the late 1970's there was widespread resentment of Alawite minority domination, rampant corruption, and economic policies which favored rural and Alawite interests over those of the urban Sunni and other non-Alawite Syrians.

Basing itself upon this increasing resentment of the Mr. Assad dictatorship, the Sunni Moslem Brotherhood organization launched a series of guerrilla attacks which culminated with an armed rising in the city of Hama in 1982. Mr. Assad, utilizing his most virulent shock troops called the Saraya al-Difa ("defense companies") which were commanded by his brother Rifat, massacred at least 20,000 men, women, and children in the city of Hana.

The Muslim Brotherhood has since joined with other opposition groups in forming the National Alliance for the Liberation of Syria. Whether this front will gather enough support to topple the Mr. Assad dictatorship is an open question at this time.

Mr. Assad's health is widely known to be poor. He suffered from a heart attack in November 1983 and dropped out of sight for several months. This occasioned some internal struggles for power which included moves by his brother Rifat. Mr. Assad also reportedly has serious diabetic and other afflictions. The problem succession internally within his own ruling group, not to mention the very real potential of an opposition coup, could very well plunge Syria into violent internal chaos. Given Mr. Assad's support of international terrorism, this outcome might well be beneficial to the Western world.

THE SYRIAN IMPERIAL CONCEPT: "GREATER SYRIA"

Mr. President, if Mr. Assad's dictatorship were concerned only with ruthless subjugation of the Syrian people, that would be bad enough. But if we are to understand why Mr. Assad is conducting a campaign of international terrorism against the United States and the West, it is necessary to understand the underlying motivation. The Baathist ideology is not only relentlessly expansionist, but based in Arab racism.

The central psychological factors driving Syrian foreign policy under Mr. Assad's dictatorship are the geopolitical concept of a "greater Syria" and pathologic hatred of Israel. In 1920, modern Syria was carved out of the Ottoman Empire which collapsed in the wake of World War I. Britain and France divided the Mesopotamian Basin into spheres of influence with Syria falling into the French sphere and "Trans-Jordan," Palestine, Lebanon, and Iraq falling into a British sphere.

Since ancient times, within the Mesopotamian Basin there has been a struggle for power and influence between Damascus and Baghdad. This is reflected today in political rivalry between Syria and Iraq within the Arab world. The concept of greater Syria, or Pan-Syrianism, in a geographic sense includes today's Syria, Lebanon, Israel (referred to by the Syrian regime as "southern Syria"), Jordan, Iraq, and parts of Turkey. This accounts for Mr. Assad's manipulation of events in the region toward the objective of the creation of a modern-day greater Syria encompassing the areas I have just described.

It should be noted that the concept of greater Syria is not based on Muslim fundamentalism, but on pan-Arabism. In other words, the Baath ideology demands that the Arab States within the historic Syrian claim should unite on the basis of their common Arabic heritage. Arab Christians are welcome within the secular Baath party, but Jews are excluded by definition. In what would seem to be a paradox, Iran, though a Muslim nation, is not an Arab nation, and is not an object of Syrian aggression. Thus the secular Baath regime in Syria can easily have a pragmatic cooperation with Iran for international terrorism.

On the other hand, the concept of greater Syria in the political sense requires the complete destruction of Israel as well as dominance within the Arab world and confrontation with the Western World. Israel lies within the geographic boundaries of the area marked out for acquisition, and as a Jewish state is totally incompatible with Pan-Arabism. There is no escaping the logical consequences of the Pan-Syrian ideology as long as it serves as the basis of action for the current, or any future, regime in Damascus.

Mr. President, the Department of State refuses to recognize this fact and continues to treat Mr. Assad as some sort of positive factor in Middle Eastern politics. Indeed, Mr. Assad's role for the Department of State is central in its conception of how to deal with the Middle East in spite of well-documented Syrian support of international terrorism and the complete failure of the State Department concept that

Syria could be bought with Saudi Arabian money and oil.

As a result of grave miscalculations by the State Department with respect to Syria, innocent American citizens have been murdered in Syrian-supported terrorist attacks. Of course, this line of policy is nothing new. It is merely a continuation of Kissinger's failed Middle East "shuttle diplomacy" in which Mr. Assad played a central role as Henry's "friend." The United States-mediated 1974 Syrian-Israeli disengagement agreement, for example, enabled Mr. Assad to recover some of the territory in the strategic Golan Heights which Damascus lost to Israel during the 1967 war. Today, the State Department has encouraged and facilitated Syrian domination of Lebanon as a stabilizing factor in the Middle East.

The State Department has also downplayed the Syrian role in international terrorism and its direct connection with the TWA 847 hijacking and the more recent Rome and Vienna airport massacres.

In a report prepared by the Senate Subcommittee on Security and Terrorism in June 1985 entitled "State Sponsored Terrorism," the committee found that Syrian diplomats recruit terrorist trainees, pass weapons through the Syrian diplomatic pouch, and furnish passports and safehouses for international terrorists. It is no secret that Syria harbors and provides safe haven for numerous terrorist groups in Damascus.

Among the international terrorist groups based in Damascus are: The Popular Front for the Liberation of Palestine, the Democratic Front for the Liberation of Palestine, and the National Salvation Front. This latter terrorist umbrella organization is composed of the Abu Musa faction from Arafat's Fatah, the Popular Front for the Liberation of Palestine-General Command, the Popular Struggle Front, the Palestinian Liberation Front, and the Saiqa.

Mr. President, I commend the distinguished Senator from Alabama [Mr. DENTON] for his great leadership in unmasking international terrorism in the hearings of his subcommittee.

Aside from the many terrorist groups operating from inside Syria, it must not be forgotten that numerous terrorist organizations operate out of the Syrian-controlled Bekaa Valley in Lebanon. These terrorist groups include the Iranian Revolutionary Guards, the fanatic Shiite Hisbollah, and the variety of groups that undertake terrorist operations under the name of the Islamic Jihad. The State Department has yet to explain to the Congress, let alone to the American people, just how Syrian is a stabilizing factor in Lebanon in light of its massive direct and indirect support of international terrorism. One wonders how the State Department explains this to its own employees based in the Middle East and subject to Syrian-backed terrorist attacks such as those against our embassy in Lebanon in April 1983.

KISSINGER, THE MIDDLE EAST, AND DETENTE

Mr. President, the brutal Syrian occupation of a large part of Lebanon and its move toward hegemony over Lebanon is, as I indicated earlier, the result of the Kissinger Middle East policy of a decade ago. How quickly we seem to forget the days of the so-called shuttle diplomacy which led directly to the chaos and bloodshed we now see in Lebanon and the buildup of international terrorist operations we confront the world over. Can anyone honestly say that Syria has been or is or will be a "stabilizing force" in the Middle East? This is precisely the illusion that the State Department has sought to create.

Mr. President, the fact of the matter is that the Syrian dictatorship actively promotes chaos in Lebanon and terrorism around the world in an attempt to deflect the massive internal opposition to its rule in Syria and to promote its geopolitical program of geographic and political conquest and empire in the Middle East. Of course, this fits in neatly with the Soviet regional strategy which aims at the strategic encirclement of the Arabian peninsula and the destabilization of all moderate governments in the area. In this context, Israel's very survival is seriously threatened as well.

A blunt question emerges: Is the State Department on the side of the United States and the West or do its policies facilitate Soviet regional objectives in the Middle East? Over the last several years, it has become fashionable in State Department policy to think in terms of negotiated regional settlements to which the Soviet Union should play a role. For example, the State Department has conducted talks at the highest levels with Soviet counterparts on Central America, Southern Africa, Afganistan, and the Middle East.

THE PRESISTENCE OF DR. KISSINGER'S THEORIES

Mr. President, the concept of involving the Soviet Union in negotiated regional settlements is nothing new. We have seen it all before in the theories of Dr. Henry Kissinger and in the bitter fruit of his practice.

The concept of involving the Soviet Union in negotiated regional settlements is central to Dr. Kissinger's academic writing as well as to his diplomatic activity. In Dr. Kissinger's theorizing, the Soviet Union should be recognized as a "legitimate" power that could be assuaged and satisfied through diplomatic negotiations along the lines of the Old World "sphere of influence" policy of the former European imperial power brokers, such as Metternich and Bismark, who captivated Dr. Kissinger at Harvard.

The decade of the 1970's, therefore, opened with Dr. Kissinger's concept of "détente" with the Soviet Empire. According to his so-called grand design, the containment doctrine, which the State Department promoted in the post-World War II era, would be replaced with the new approach called "détente." Of course, the earlier "containment doctrine" was fatally flawed itself because it handed the initiative over to the enemy, the Soviet Union. American foreign policy became merely reactive on a case-by-case basis while awaiting the great day when the supposedly "contained" Soviet Union would "mellow."

But Dr. Kissinger's new approach—détente—involved the idea that a legitimate international order simply meant the acceptance of a set of rules of conduct that were respected by all powers. The question arises, however, whether the legitimacy of an international order, conceived as a consensus on rules of conduct, synonymous with stability and ultimately with peace. Détente with the Soviet Union was Dr. Kissinger's instrument to achieve the so-called legitimate international order.

Dr. Kissinger's paradigm, however, was fundamentally flawed. The missing element is an ethic of a peaceful order which involves more than just an agreement on a set of rules. Dr. Kissinger's system was empty of moral content and, therefore, is irrelevant to the great issues of our times which center on the values and principles fundamental to the preservation of a way of life basic to our civilization.

Mr. President, we were told that détente involved interdependency, deterrence, and arms control. The atmosphere of détente, however, has swayed Western psychology toward a downgrading of the Soviet threat, cutting defense budgets, and disrupting alliances. The world power balance, or the "correlation of forces" as the Soviets call it, was further tipped in the Soviets' favor.

Mr. President, the dynamics of the détente process have led to a demoralization of the West during the last decade. The Soviets have acted with relative impunity in subjugating the brave Afghan nation; in further repressing the Polish nation and the nations of eastern Europe; in attempting to assassinate the Pope in Rome; in bringing violence and devastation to the New World, particularly in Central America; in spreading war and misery on the African continent; in fomenting bloodshed and conflict in the Middle East; in murdering a plane load of innocent men, women, and children aboard the Korean 007 plane flight; and, in spreading international terrorism across the face of the Earth.

Dr. Kissinger's détente rested on the thesis that the dominating affect of greater interdependency would restrain Soviet behavior. Have the Soviets been "restrained" over the last decade? In spite of billions of dollars of credits and loans, in spite of billions of dollars' worth of Western technology, in spite of innumerable exchanges across a broad range of fields, the Soviet empire has not been restrained in the least.

Mr. President, nothing has changed with the foreign policy of the State Department since the departure of Dr. Kissinger. Indeed, many of his devotees and proteges hold positions of high trust in this administration. They are transfixed and mesmerized by Dr. Kissinger's grand design which they all too eagerly pursue for lack of any of their own concepts based upon a traditional understanding of American purpose and diplomacy. No one can deny the hidden and now more overt push over the last 5 years by the State Department to move into a new phase of détente. The agenda is the same as it was under Dr. Kissinger: arms control, East-West trade, and regional issues.

THE STATE DEPARTMENT AND SYRIA

As for regional issues, it is the same agenda in the Middle East. For this reason, Syria is still the darling of the State Department policy planners. The overall concept is still the same: Syria will be the stabilizing force and a deal on a regional level, in a sphere of influence Old-World-style, will be worked out with the Soviet Empire. Of course the "settlement" or deal will not be to United States advantage nor, for that matter, to Israel's advantage. The deal will not even be to the advantage of Arab moderates who, essentially, will be thrown to the dogs and languish under the influence of Syrian, Iranian, and Libyan dictators and fanatics acting in the service of the Soviet Union. Nevertheless, the State Department will bend every effort to carry forward its regional strategy because the Soviet Empire must be appeased and the "process of negotiations" held sacrosanct.

Mr. President, as I mentioned earlier, it is no secret that Syria is deeply involved in international terrorism and fully cooperates with the Soviet KGB as well as with the terrorist infrastructures established by Khomeini of Iran and Qadhafi of Libya. It is high time that the United States, as well as our allies and friends, undertake not only a policy to isolate the Mr. Assad dictatorship in Syria but also undertake a policy of active measures against the Mr. Assad dictatorship with a view to its ultimate destruction and the liberation of the Syrian nation.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Emery, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE UNITED STATES-JAPAN COOPERATIVE MEDICAL SCIENCE PROGRAM—MESSAGE FROM THE PRESIDENT—PM-145

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 5(h) of the International Health Research Act of 1960 (Public Law 86-610), I transmit herewith the Nineteenth Annual Report of the U.S.-Japan Cooperative Medical Science Program for the period of July 1984 to July 1985.

RONALD REAGAN.

THE WHITE HOUSE, *May 21, 1986.*

VETO MESSAGE ON S.J. RES. 316, SAUDI ARMS SALES DISAPPROVAL—MESSAGE FROM THE PRESIDENT—PM-146

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States:

To the Senate of the United States:

I am returning herewith without my approval S.J. Res. 316, a resolution that would halt the proposed sale of defensive missiles to Saudi Arabia.

The U.S. defense relationship with Saudi Arabia was started by President Roosevelt in 1943 and endorsed by every President since. I cannot permit the Congress to dismantle this long-standing policy, damage our vital strategic, political and economic interests in the Middle East and undermine our balanced policy in that region.

The American people and their representatives should understand that this sale is in our interests. It is not just a favor to our friends in Saudi Arabia. Moreover, it is not being done at anyone's expense.

The security of Israel remains a top priority of this administration. This sale will not endanger Israel's defenses, a fact that is underscored by Israel's decision not to oppose this sale.

Stability of the oil-rich Persian Gulf is another goal of great importance. In a region living in the shadow of the tragic and gruesome Iran-Iraq war, and threatened by religious fanaticism at its worst, we cannot afford to take stability for granted. Saudi willingness to stand up to Iranian threats has been key in preventing the spread of chaos. It has been Saudi Arabia's confidence in our commitment to its security that has allowed it to stand firm.

But Saudi Arabia produces no weapons of its own and we have not sold the Saudis new arms in almost 2 years. If we suddenly shut off that supply, it will weaken our own credibility, as well as the Saudis' ability to defend themselves. It would send the worst possible message as to America's dependability and courage.

Behind the scenes, the Saudis have aided the effort to combat terrorism, which is as much, if not more, of a threat to them as it is to us. Recently, they refused Qadhafi's requests for aid. Several times in recent months, they have been instrumental in offsetting unjust criticism of the United States and preventing radical states from undertaking joint action against our country.

The Saudis have proven their friendship and good will. They have assisted our efforts to support responsible governments in Egypt, Jordan, and Sudan. They have worked quietly in the search for peace in Lebanon, in the Arab-Israeli conflict, and in the Iran-Iraq war. They also provide impressive assistance to the government of Pakistan and to Afghan refugees.

In the long run this sale will be good for America, good for Israel, good for Saudi Arabia, and good for the cause of peace.

I ask members of both parties to sustain this veto and to join me in protecting our country's vital interest.

RONALD REAGAN.

THE WHITE HOUSE, *May 21, 1986.*

MESSAGES FROM THE HOUSE

At 12:24 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 173. A bill to settle and adjust the claim of the Tehran American School for $13,333.94.

The message also announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 2416. An act to revise further the limitation applicable to chapter 37 of title 38, United States Code, for fiscal year 1986, for the purpose of implementing any order issued by the President for such fiscal year under any law providing for the sequestration of new loan guarantee commitments.

The message further announced that the House insists upon its amendment to the concurrent resolution (S. Con. Res. 120) setting forth the congressional budget for the U.S. Government for the fiscal years 1987, 1988, and 1989, disagreed to by the Senate; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. GRAY of Pennsylvania, Mr. WRIGHT, Mr. DERRICK, Mr. WILLIAMS, Mr. WOLPE, Mr. RUSSO, Mr. JENKINS, Mr. LEATH of Texas, Mr. SCHUMER, Mrs. BOXER, Mr. MACKAY, Mr. SLATTERY, Mr. LATTA, Mr. KEMP, Mrs. MARTIN of Illinois, Ms. FIEDLER, Mr. GRADISON, Mr. LOEFFLER, Mr. MACK, and Mr. GOODLING as managers of the conference on the part of the House.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2971. An act granting the consent of the Congress to the amendments to the Susquehanna River Basin Compact;

H.R. 4434. An act to amend the act entitled "An act granting a charter to the General Federation of Women's Clubs";

H.R. 4529. An act to authorize appropriations for the United States Mint for fiscal year 1987, and for other purposes;

H.R. 4530. An act to amend the Department of Defense Authorization Act, 1985, to provide that members of the Commission on Merchant Marine and Defense shall not be considered to be Federal employees for certain purposes, to extend the deadline for reports of the Commission, and to extend the availability of funds appropriated to the Commission; and

H.R. 4588. An act to authorize appropriations for the Administrative Conference of the United States, and for other purposes.

The message further announced that pursuant to the provisions of section 4(b) of Public Law 94-201, the Speaker appoints to the Board of Trustees of the American Folklife Center in the Library of Congress for a term ending March 3, 1992, the following from private life: Mr. Russell W. Fridley of St. Paul, MN, and Ms. Judith McCulloh of Urbana, IL.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 173. An act to settle and adjust the claim of the Tehran American School for $13,333.94.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 1:59 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 1027. An act for the relief of Kenneth David Franklin.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1291. An act for the relief of Ray A. Bonney.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1291. An act for the relief of Ray A. Bonney; to the Committee on Armed Services.

H.R. 2971. An act granting the consent of the Congress to the amendments to the Susquehanna River Basin Compact; to the Committee on the Judiciary.

H.R. 4434. An act to amend the act entitled "An act granting a charter to the General Federation of Women's Clubs"; to the Committee on the Judiciary.

H.R. 4529. An act to authorize appropriations for the U.S. Mint for fiscal year 1987, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 4588. An act to authorize appropriations for the Administrative Conference of the United States, and for other purposes; to the Committee on the Judiciary.

MEASURE HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent:

H.R. 4530. An act to amend the Department of Defense Authorization Act, 1985, to provide that members of the Commission on Merchant Marine and Defense shall not be considered to be Federal employees for certain purposes, to extend the deadline for reports of the Commission, and to extend the availability of funds appropriated to the Commission.

MEASURE PLACED ON THE CALENDAR

The Committee on the Judiciary was discharged from the further consideration of the following bill; which was placed on the calendar:

H.R. 3773. An act to amend the Stevenson-Wydler Technology Innovation Act of 1980 to promote technology transfer by authorizing Government-operated laboratories to enter into cooperative research agreements and by establishing a Federal Laboratory Consortium for Technology Transfer within the National Science Foundation, and for other purposes.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, May 21, 1986, she had presented to the President of the United States the following enrolled bill:

S. 173. An act to settle and adjust the claim of the Tehran American School for $13,333.94.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-3202. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 155 of the Omnibus Budget Reconciliation Act of 1981 and the United States Grain Standards Act to recover the costs of carrying out the provisions of the United States Grain Standards Act, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

EC-3203. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, a report on suspension and debarment of defense contractors; to the Committee on Armed Services.

EC-3204. A communication from the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend title 10, United States Code, to permit the involuntary order to active duty of a member of the reserve components of the Armed Forces of the United States missing, detained, or interned in a foreign country against his will, or held captive by a hostile force; to the Committee on Armed Services.

EC-3205. A communication from the Comtroller General of the United States, transmitting, pursuant to law, a report entitled "Hazardous Waste: DOD's Efforts to Improve Management of Generation, Storage, and Disposal"; to the Committee on Armed Services.

EC-3206. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan, guarantee, and insurance transactions supported by Eximbank during April 1986 to Communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EC-3207. A communication from the Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report entitled "Annual Energy Review 1985"; to the Committee on Energy and Natural Resources.

EC-3208. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Social Security Act and related laws to make adjustments in benefits, improve administration, and make corrections and clarifications in the old-age, survivors, and disability insurance program, to make adjustments in benefits under the supplemental security income program, and for other purposes; to the Committee on Finance.

EC-3209. A communication from the Secretary of Health and Human Resources, transmitting, pursuant to law, the annual report on public advisory committees established under section 1114(f) of the Social Security Act 1985; to the Committee on Finance.

EC-3210. A communication from the Administrator of the Office of Juvenile Justice and Delinquency Prevention, Department of Justice, transmitting, pursuant to law, the report of the Attorney General's Advisory Board on Missing Children; to the Committee on Judiciary.

EC-3211. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations for the Library Services and Construction Act—State-Administered Program and Direct Grant Programs for Indian Tribes and Hawaiian Natives, Foreign Language Materials Acquisition, and Literacy; to the Committee on Labor and Human Resources.

EC-3212. A communication from the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, and exhibiting the exact condition of all public moneys received, paid out, and remaining in my possession from October 1, 1985, through March 31, 1986; ordered to lie on the table.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-729. A resolution adopted by the Mayor and Council of the Borough of Woodstown, New Jersey favoring an amendment to the 16th amendment to the Constitution relating to taxation; to the Committee on the Judiciary.

POM-730. A joint resolution adopted by the Legislature of the State of Maine; to the Committee on Labor and Human Resources.

"JOINT RESOLUTION MEMORIALIZING THE PRESIDENT AND THE CONGRESS OF THE UNITED STATES TO ESTABLISH AN EMERGENCY BOARD TO SETTLE THE RAILROAD WORKERS' STRIKE IN MAINE

"We, Your Memorialists, the Senate and House of Representatives of the State of Maine in the One Hundred and Twelfth Legislative Session, now assembled, most respectfully request and petition the President of the United States and the Congress of the United States, as follows:

"Whereas, during the protracted railroad workers' strike, resulting from irreconciliable differences between Guilford Transportation Industries, Inc., and members of the Brotherhood of Maintenance of Way Employees; and

"Whereas, mounting safety problems exist, resulting from trains carrying toxic material passing through rural and urban countryside, which threatens the safety of the citizenry; and

"Whereas, the economic situation has worsened and the railroad strike is having a direct and detrimental effect on Maine business and industries, to the extent that one large paper company has laid off a substantial number of employees; and

"Whereas, the harmful effect of the railroad workers is as substantial as the harm on Maine's industry as a whole, causing a detrimental economic and psychological impact on almost 1,000 railroad workers; and

"Whereas, this group of Maine union members, a union consisting of only 110 employees, has provided the impetus for a possible nationwide strike; now, therefore, be it

Resolved: That We, your Memorialists, respectfully request and petition that the state governments of all states affected and the Federal Government apply pressure on the Guilford Transportation Industries, Inc., to bargain in good faith with the respective unions involved in this dispute, and to reach an agreement in order to resolve this difficult and tension-filled situation; and be it further

Resolved: That copies of this Memorial, duly authenticated by the Secretary of State, be transmitted to the Honorable Ronald W. Reagan, President of the United States, the Honorable George Bush, President of the Senate, and the Honorable Thomas P. O'Neill, Jr., Speaker of the House of Representatives of the Congress of the United States, and each Member of the Senate and House of Representatives in the Congress of the United States from this State; the United States Department of Transportation; and the New England Governors."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources, with amendments:

S. 1793. A bill to amend the Public Health Service Act to establish a grant program to develop improved systems of caring for medical technology dependent children in the home, and for other purposes (Rept. No. 99-306).

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment:

S. 2057. A bill to establish the President's Council on Health Promotion and Disease Prevention (Rept. No. 99-307).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

H.R. 237. An act to amend the Fair Debt Collection Practices Act to provide that any attorney who collects debts on behalf of a client shall be subject to the provisions of such Act.

By Mr. ANDREWS, from the Select Committee on Indian Affairs, without amendment:

H.R. 1904. An act to provide for the use and distribution of funds appropriated in satisfaction of judgments awarded to the Chippewas of the Mississippi in Docket Numbered 18-S before the Indian Claims Commission (Rept. No. 99-309).

By Mr. GARN, from the Committee, on Banking, Housing, and Urban Affairs, without amendment:

S.J. Res. 353. An original joint resolution to provide for the extension of certain programs relating to housing and community development, and for other purposes.

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Report to accompany the bill (S. 1225) to amend the Atomic Energy Act of 1954, as amended, to establish a comprehensive, equitable, reliable, and efficient mechanism for full compensation of the public in the event of an accident resulting from activities undertaken under contract with the Department of Energy or activities undertaken by Nuclear Regulatory Commission licensees involving nuclear materials (with additional and minority views) (Rept. No. 99-310).

By Mr. DURENBERGER, from the Select Committee on Intelligence, without amendment:

S. 2477. An original bill to authorize appropriations for fiscal year 1987 for intelligence activities of the United States Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes; referred jointly to the Committees on Armed Services, the Judiciary, Foreign Relations, and Governmental Affairs for the 30-day time period provided in section 3(b) of Senate Resolution 400, 94th Congress, provided that the Committee on the Judiciary be restricted to the consideration of title V and section 603, the Committee on Foreign Relations be restricted to the consideration of title VI, and the Committee on Governmental Affairs be restricted to the consideration of sections 401 and 409, provided that if any of said Committees fails to report said bill within the 30-day time limit, such committee shall be automatically discharged from further consideration of said bill in accordance with section 3(b) of Senate Resolution 400, 94th Congress. (Rept. No. 99-307).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

Christopher Hicks, of Maryland, to be General Counsel of the Department of Agriculture;

Peter C. Myers, of Missouri, to be Deputy Secretary of Agriculture.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

David F. Goldberg, of Illinois, to be a Director of the Securities Investor Protection Corporation for a term expiring December 31, 1986.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DURENBERGER from the Select Committee on Intelligence:

S. 2477. An original bill to authorize appropriations for fiscal year 1987 for intelligence activities of the U.S. Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes; referred jointly to the Committees on Armed Services, the Judiciary, Foreign Relations, and Governmental Affairs for the 30-day time period provided in section 3(b) of Senate Resolution 400, 94th Congress, provided that the Committee on the Judiciary be restricted to the consideration of title V and section 603, the Committee on Foreign Relations be restricted to the consideration of title VI, and the Committee on Governmental Affairs be restricted to the consideration of sections 401 and 409, provided that if any of said committees fails to report said bill within the 30-day time limit, such committee shall be automatically discharged from further consideration of said bill in accordance with section 3(b) of Senate Resolution 400, 94th Congress.

By Mr. DECONCINI:

S. 2478. A bill relating to the tariff treatment of meat products processed abroad from cattle of U.S. origin; to the Committee on Finance.

By Mr. TRIBLE (for himself, Mr. WEICKER, Mr. BUMPERS, Mr. DANFORTH, Mr. CHILES, Mr. RUDMAN, Mr. LEVIN, Mr. COCHRAN, Mr. SASSER, Mr. MATTINGLY, Mr. DIXON, Mr. NICKLES, Mr. NUNN, Mr. D'AMATO, Mr. BAUCUS, Mr. GRASSLEY, Mr. HARKIN, Mr. KERRY, Mr. ZORINSKY, Mr. MOYNIHAN, and Mr. BOREN):

S. 2479. A bill to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BUMPERS:

S. 2480. A bill to enhance the readiness and fighting capability of the Armed Forces of the United States through the implementation of more combat-capable procurement policies, and for other purposes; to the Committee on Armed Services.

By Mr. METZENBAUM (for himself, Mr. GORTON, Mr. KENNEDY, Mr. BINGAMAN, and Mr. STAFFORD):

S. 2481. A bill to amend the Clayton Act regarding antitrust enforcement, and for other purposes; to the Committee on the Judiciary.

By Mr. DECONCINI:

S. 2482. A bill to require the Secretary of Health and Human Services to establish a Medicare demonstration project for veterans; to the Committee on Finance.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 2483. A bill to amend the Fire Island National Seashore Act of 1964; to the Committee on Energy and Natural Resources.

By Mr. DURENBERGER:

S. 2484. A bill to amend the Internal Revenue Code of 1954 to allow individuals not eligible for employer sponsored health plans or Federal health programs a refundable credit against income tax for qualified health insurance premiums, and to allow a deduction for health insurance premiums of self-employed individuals; to the Committee on Finance.

By Mr. DURENBERGER:

S. 2485. A bill to amend the Internal Revenue Code of 1954 to include in gross income and impose social security taxes on certain employer contributions to accident or health plans, to allow individuals a credit against income tax for certain health insurance premiums, and for other purposes; to the Committee on Finance.

By Mr. DURENBERGER:

S. 2486. A bill to amend the Internal Revenue Code of 1954 to include in gross income employer contributions to accident or health plans, to allow individuals a nonitemized deduction for certain accident and health insurance costs, to allow individuals who itemize, a portion of the remainder of such costs, to raise the threshold for deductible medical expenses to 10 percent of adjusted gross income, and for other purposes; to the Committee on Finance.

By Mr. BINGAMAN (for himself, Mr. ROCKEFELLER, Mr. MATSUNAGA, Mr. GLENN, Mr. BURDICK, Mr. MELCHER, Mr. BYRD, and Mr. BOREN):

S. 2487. A bill to provide grants to States for fellowships for individuals who have outstanding ability, demonstrate an interest in a teaching career, and will teach in areas of the State in which there is a shortage of quality elementary or secondary school teachers or in fields of study in which there is a shortage of quality elementary or secondary school teachers, or both, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. BRADLEY (for himself and Mr. LAUTENBERG):

S. 2488. A bill to amend the Tariff Schedules of the United States to provide for the temporary suspension of the duty on nonbenzenoid vinyl acetate-vinyl chloride-ethylene terpolymer, containing by weight less than 50-percent derivatives of vinyl acetate; to the Committee on Finance.

By Mr. KENNEDY (for himself, Mr. GRASSLEY, Mr. HEINZ, Mr. METZENBAUM, Mr. GLENN, and Mr. ROCKEFELLER):

S. 2489. A bill to improve the training of physicians in geriatrics; to the Committee on Labor and Human Resources.

By Mr. LAUTENBERG (for himself and Mr. BRADLEY):

S. 2490. A bill to provide a 5-year suspension of the duty on silk yarn; to the Committee on Finance.

By Mr. GARN (for himself, and Mr. PROXMIRE) (by request):

S. 2491. A bill to facilitate the provision of additional financial resources to the Federal Savings and Loan Insurance Corporation; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HEINZ (for himself, Mr. BRADLEY, and Mr. BURDICK):

S. 2492. A bill to amend title XIX of the Social Security Act to permit States, at their option, to provide Medicaid coverage for poor elderly or disabled individuals and to provide medical assistance for poor, Medicare beneficiaries in meeting Medicare cost-sharing requirements; to the Committee on Finance.

By Mr. STEVENS:

S. 2493. A bill to amend chapter 2 of title 39, United States Code, with respect to appointment, pay, and status of the Postmaster General and the Deputy Postmaster General, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BRADLEY (for himself, Mr. HEINZ, and Mr. GLENN):

S. 2494. A bill to amend title XVIII of the Social Security Act to modify the limitations on payment for home health services under the Medicare program to conform regulations; to assure that all legitimate costs are taken into account in calculating such limitations; to provide affected parties an opportunity to comment on revisions in Medicare policies; and to require discharge planning procedures; to the Committee on Finance.

By Mr. KENNEDY:

S. 2495. A bill to amend the Food Stamp Act of 1977, the Child Nutrition Act of 1966, and the National School Lunch Act to improve the availability of benefits under such acts, to provide for a program for nutrition monitoring and research, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. WALLOP (for himself, Mr. GRASSLEY, and Mr. DECONCINI):

S. 2496. A bill to authorize the President to award congressional gold medals to Drs. Andrei Sakharov and Yelena Bonner for the great personal sacrifice they have made to further the causes of human rights and world peace; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. SIMON (for himself and Mr. ROCKEFELLER):

S. 2497. A bill to provide for the collection of data regarding certain insurance matters, to make such data available to the States for use in making policy decisions and determinations with respect to the insurance industry, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. KENNEDY (for himself, Mr. WEICKER, Mr. PROXMIRE, Mr. SPECTER, Mr. BIDEN, Mr. SARBANES, Mr. CRANSTON, Mr. KERRY, Mr. LEVIN, Mr. BRADLEY, Mr. HART, Mr. RIEGLE, Mr. METZENBAUM, Mr. LEAHY, Mr. LAUTENBERG, Mr. HARKIN, and Mr. SIMON):

S. 2498. A bill to prohibit loans to, other investments in, and certain other activities with respect to, South Africa, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. RIEGLE:

S. 2499. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to increase the benefit payable with respect to the death of a public safety officer, and for other purposes; to the Committee on the Judiciary.

By Mr. GRAMM:

S. 2500. A bill to require the President to initiate negotiations with Mexico for the purpose of entering a Free Trade Area agreement; to the Committee on Finance.

By Mr. DANFORTH:

S. 2501. A bill to extend for 3 years the existing suspension of duty on triphenyl phosphate; to the Committee on Finance.

By Mr. ABDNOR (for himself, Mr. HELMS and Mr. EAST):

S. 2502. A bill entitled the "Workers Freedom of Choice Act"; to the Committee on Labor and Human Resources.

By Mr. CRANSTON:

S. 2503. A bill to clear certain impediments to the licensing of the vessel Wanderbird for employment in the coastwise and fisheries trades; to the Committee on Commerce, Science, and Transportation.

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2504. A bill to authorize certain transfers affecting the Pueblo of Santa Ana in New Mexico, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. GARN:

S. 2505. A bill for relief of Michael J. Smith; to the Committee on Armed Services.

By Mr. HECHT (for himself and Mr. LAXALT):

S. 2506. A bill to establish a Great Basin National Park in the State of Nevada and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. METZENBAUM:

S.J. Res. 352. Joint resolution to designate the week beginning September 7, 1986, as "Gaucher's Disease Awareness Week"; to the Committee on the Judiciary.

By Mr. GARN:

S.J. Res. 353. An original joint resolution to provide for the extension of certain programs relating to housing and community development, and for other purposes; from the Committee on Banking, Housing, and Urban Affairs; placed on the calendar.

By Mr. CHILES (for himself, Mr. BURDICK, Mr. ZORINSKY, Mr. HOLLINGS, Mr. BRADLEY, Mr. HECHT, Mr. ABDNOR, Mr. STENNIS, Mr. MATTINGLY, Mr. LONG, Mr. NUNN, Mr. BUMPERS, Mr. DOLE, Mr. MOYNIHAN, Mr. LEVIN, Mr. THURMOND, Mr. DECONCINI, Mr. COHEN, and Mr. CRANSTON):

S.J. Res. 354. Joint resolution to designate the week of October 5, 1986, through Octo-

ber 11, 1986, as "National Drug Abuse Education and Prevention Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. WALLOP (for himself, Mr. MATTINGLY, Mr. MCCLURE, Mr. QUAYLE, Mr. WARNER, Mr. HECHT, Mr. HELMS, Mr. SYMMS, Mr. GOLDWATER, Mr. GARN, Mrs. HAWKINS, Mr. HOLLINGS, Mr. TRIBLE, Mr. GRAMM, Mr. MURKOWSKI, Mr. ARMSTRONG, Mr. LAXALT, Mr. THURMOND, Mr. EAST, Mr. HATCH, Mr. WILSON, Mr. RUDMAN, Mr. GORTON, Mr. DENTON, Mr. CHAFEE, Mr. GRASSLEY, and Mr. LUGAR):

S. Res. 412. A resolution to thank the Honorable Margaret Thatcher; to the Committee on Foreign Relations.

By Mr. DENTON (for himself, Mr. ABDNOR, Mr. BOREN, Mr. BUMPERS, Mr. BURDICK, Mr. BYRD, Mr. COCHRAN, Mr. DECONCINI, Mr. DIXON, Mr. DOLE, Mr. DURENBERGER, Mr. EAST, Mr. GOLDWATER, Mr. GRASSLEY, Mr. HATCH, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mrs. KASSEBAUM, Mr. KASTEN, Mr. LAXALT, Mr. LEVIN, Mr. LUGAR, Mr. MCCLURE, Mr. MURKOWSKI, Mr. PRESSLER, Mr. ROTH, Mr. SIMPSON, Mr. STAFFORD, Mr. STENNIS, Mr. SYMMS, Mr. THURMOND, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, Mr. WILSON, Mr. ZORINSKY, and Mr. CRANSTON):

S. Res. 413. Resolution to recognize the devotion of Bob Hope to the United States on his eighty-third birthday; considered and agreed to.

By Mr. MURKOWSKI (for himself, Mr. DECONCINI, Mr. THURMOND, Mr. DENTON, Mr. BOSCHWITZ, Mr. ABDNOR and Mr. CRANSTON):

S. Res. 414. Resolution expressing the sense of the Senate regarding the resumption of technical meetings with the government of the Socialist Republic of Vietnam on the issues of the repatriation of remains of American servicemen, joint excavations of crash sites and investigation of so-called "live sighting" reports; to the Committee on Foreign Relations.

By Mr. DOLE (for himself and Mr. BYRD):

S. Res. 415. Resolution to direct the Senate Legal Counsel to represent Senator Trible and his staff, and to authorize the testimony of such staff in the case of Commonwealth of Virginia V. Scott Bonner Bento, et al; considered and agreed to.

By Mr. DECONCINI (for himself and Mr. MURKOWSKI):

S. Con. Res. 143. Concurrent resolution expressing the sense of the Congress on the resumption of the United Nations High Commissioner for Refugees Orderly Departure Program for Vietnam; to the Committee on Foreign Relations.

By Mr. DOLE:

S. Con. Res. 144. Concurrent resolution providing for an adjournment of the House from May 22, 1986 to June 3, 1986, and for an adjournment of the Senate from May 21, 1986 to June 2, 1986; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DECONCINI:

S. 2478. A bill relating to the tariff treatment of meat products processed abroad from cattle of U.S. origin; to the Committee on Finance.

TARIFF TREATMENT OF MEAT PROCESSED ABROAD FROM U.S. CATTLE

● Mr. DECONCINI. Mr. President, the cattle feeding industry in Arizona and southern California is in dire economic straits due to the lack of slaughter facilities in the region. Slaughterhouses in both Phoenix and Los Angeles are almost gone, overrun by urban sprawl. Since 1976 the productive slaughter plants in the Southwest have gone from approximately 36 plants to only 6. At the same time, feeding numbers have gone from 1,200,000 head of cattle annually to only 650,000. Now all these feedyards continue to operate, but the slaughterhouses are gone. In response to this problem, I am introducing a companion bill to H.R. 4744 sponsored by Congressman THOMAS of California. This legislation would enable a group of individual cattle feeders in both States, in cooperation with Mexican and U.S. slaughter and distributor partners, to construct a meat slaughterhouse on the United States-Mexican border at San Luis, Sonora, Mexico.

When fully operational, this plant would utilize 2,000 head of cattle per day, and would support many cattle ranches and numerous feed lots in both Arozona and California. Such a plant would help the cattle sector, the feed producing sector, as well as the feeding and service sectors. It is estimated that such a plant will pump nearly $2 million daily into the depressed economy of cattle purchases, as well as all the other related service industries. Additionally, this plant will provide 600 jobs per shift, and the plant, after the first 2 years, will operate two shifts per day.

Under current provisions of U.S. tariff law, special tariff treatment is accorded to U.S. products assembled abroad. The U.S. Customs Service has ruled that the walking of U.S. cattle into Mexico for disassembly, with the meat products being returned to the United States, does not qualify for such treatment under current tariff provisions. This bill would amend the Tariff Schedules of the United States to provide the duty free return of slaughtered and processed U.S. produced beef; and would technically amend the Meat Import Act of 1964 to exempt such products from quota, since the beef is of U.S. origin I believe that these changes are necessary to address what has become an emergency situation that is affecting the long-term survival of the cattle feeding industry in Arizona and California.

Mr. President, I request that the full text of this bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2478

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subpart B of part 1 of schedule 8 of the Tariff Schedules of the United States is amended—

(1) by inserting at the end of the headnotes to such subpart the following new headnote:

"5. For purposes of item 805.30, a bovine is of United States origin if it—

"(a) was calved in the United States, or

"(b) was in the United States continuously during the 90-day period before the date of its exportation."; and

(2) by inserting in numerical sequence the following new item having the same degree of identification as item 805.00:

"805.30	Meat and meat products, hides, tallow, offal, and other products of slaughter, of bovines of United States origin exported in condition ready for slaughter and not advanced in value other than by slaughter and further processing.	Free	Free".

SEC. 2. The Meat Import Act of 1979 (93 Stat. 1291) is amended—

(1) by striking out the semicolon at the end of subparagraph (A) and inserting ", except for articles provided for under item 805.30;"; and

(2) by striking out the period at the end of subparagraph (C) and inserting ", except for articles provided for under item 805.30.".●

By Mr. TRIBLE (for himself, Mr. WEICKER, Mr. BUMPERS, Mr. DANFORTH, Mr. CHILES, Mr. RUDMAN, Mr. LEVIN, Mr. COCHRAN, Mr. SASSER, Mr. MATTINGLY, Mr. DIXON, Mr. NICKLES, Mr. NUNN, Mr. D'AMATO, Mr. BAUCUS, Mr. GRASSLEY, Mr. HARKIN, Mr. KERRY, Mr. ZORINSKY, and Mr. MOYNIHAN):

S. 2479. A bill to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes; to the Committee on Governmental Affairs.

PROMPT PAYMENT AMENDMENTS

Mr. TRIBLE. Mr. President, today, along with Senators WEICKER, BUMPERS, DANFORTH, CHILES, RUDMAN, LEVIN, COCHRAN, SASSER, MATTINGLY, DIXON, NICKLES, NUNN, D'AMATO, BAUCUS, GRASSLEY, HARKIN, KERRY, ZORINSKY, and MOYNIHAN, I am introducing the Prompt Payment Amendments of 1986. The purpose of this legislation is straightforward: to ensure that the Federal Government pays its bills on time.

In response to severe problems in receiving payment for goods and services, Congress enacted the Prompt Payment Act of 1982, Public Law 97-177. This law requires the Federal Government to pay its bills on time and pay interest when payments are late.

Since implementation of the act, payments to Government contractors have improved. Overall, the Government's bill paying practices are far better.

However, significant problems persist. In a regrettably large number of instances, either through inefficiency or outright subterfuge, Federal agencies circumvent the requirements of the Prompt Payment Act.

Agencies have prevented the payment clock from running by delaying acceptance or invoice certification. Far too many invoices are "lost" by the Government, requiring contractors to expend additional time and effort resubmitting invoices.

In addition, rather than paying promptly, the agencies purposely delay payment until the last possible moment. Agencies have refused to pay the legally mandated interest and early payment discounts are taken long after the discount period has expired. Moreover, the Prompt Payment Act has been misconstrued as not applying to progress payments.

Such practices violate the letter and spirit of the law. Payment problems adversely affect contractors doing business with the Federal Government, particularly small businesses which often face grave financial difficulties when payment is late. No firm wants to encounter the financial problems created by late payments, so fewer and fewer firms opt for Government work. In short, we all lose.

The legislation I am introducing today corrects these problems. First, the bill defines receipt of invoice more precisely. The head of an agency is deemed to receive an invoice when, first, the payment office actually receives a proper invoice, or second, 5 days after the property is actually delivered, or third, final performance of a service is actually completed. This change is likely to result in fewer so-called lost invoices.

Second, the 15-day grace period is phased out. The grace period was included in the Prompt Payment Act at the request of the Office of Management and Budget to assist the implementation of prompt payments. This 15-day period is unnecessary now that agencies have experience with the act and have streamlined their payment procedures.

Third, the interest payment provisions are strengthened. Interest penalties should be paid without requiring contractors to make a specific request. If interest penalties are not made, the agency will be required to pay a penalty amounting to the original interest payment.

Fourth, while it was intended that the act apply to progress payments and retained amounts under construction contracts, some agencies have refused to construe the language of the act properly. Therefore, my legislation specifies that these payments are subject to the Prompt Payment Act.

I believe that these provisions will ensure that the Prompt Payment Act meets its objective of making the Government a reliable and efficient billpayer. The Federal Government has improved its bill paying practices, but it can do better. I ask my colleagues to join with me in order to enact the prompt payment amendments of 1986 in a timely manner.

Mr. President, I ask unanimous consent that the text of the bill be printed in the CONGRESSIONAL RECORD.

Mr. President, I ask unanimous consent that the Small Business Committee National Advisory Council's recent resolution on implementation of the Prompt Payment Act be included in the RECORD. In addition, the Small Business Legislative Council has endorsed the provisions of my bill and I ask unanimous consent that their letter be included in the RECORD as well.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2479

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Prompt Payment Amendments of 1986".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(1) the billpaying practices of most Federal Government agencies have substantially improved after three years of implementation of the Prompt Payment Act (codified in chapter 39 of title 31, United States Code), and the improvement has resulted in fairer treatment of contractors who furnish supplies, services, or construction to the Federal Government, especially small businesses;

(2) the substantial improvement in such billpaying practices permits the gradual elimination of certain grace periods which afford the Government additional time to pay its bills without incurring interest penalties otherwise due and which are subject to abuse if not effectively controlled;

(3) the provisions of the Prompt Payment Act require clarification to assure that the Act's protections apply to certain contract payments excluded from coverage as a result of the manner in which Federal Government agencies have implemented such provisions;

(4) the requirement that agencies automatically pay required interest penalties with delinquent payments needs to be strengthened;

(5) the Federal Government agencies have implemented the provisions the agencies to take discounts for early payment months after the expiration of the discount period specified in the contractor's invoice;

(6) late payments owed to contractors for supplies delivered or services performed have been made without an interest penalty because of the unlimited time afforded agencies to formally accept the contractor's performance; and

(7) many of the most persistent and vexatious billpaying problems faced by contractors in dealing with the Federal Government are caused by a failure of the system of Government-wide procurement regulations to implement the provisions of the Prompt Payment Act.

DEFINITIONS AND APPLICATION

SEC. 3. (a) Section 3901(a)(4) of title 31, United States Code, is amended to read as follows:

"(4) the head of the agency is deemed to receive an invoice on the later of—

"(A) the date on which the designated payment office or finance center of the agency actually receives a proper invoice; or

"(B) on the fifth day after the date on which the property is actually delivered or final performance of a service is actually completed in accordance with the terms of the contract, unless the contract specifies a longer period for agency acceptance of the property to be delivered or the service to be performed.".

(b)(1) Section 3901 of such title is further amended by adding at the end the following new subsection (c):

"(c) This chapter applies to the United States Postal Service. However, the Postmaster General shall be responsible for issuing the implementing procurement regulations, solicitation provisions, and contract clauses as part of the Postal Contracting Manual.".

(2) Section 410(b) of title 39, United States Code, is amended by inserting after clause (8) the following new clause (9):

"(9) Chapter 39 of title 31.".

INTEREST PENALTIES: REDUCTIONS IN GRACE PERIOD; INCREASED PENALTIES

SEC. 4. (a) Section 3902(b)(3) of title 31, United States Code, is amended to read as follows:

"(3) when the item is not an item referred to in clauses (1) and (2) of this subsection, before the 8th day after the required payment date (if the solicitation for the contract under which the pavement is due was issued before October 1, 1988).".

(b) Section 3902 of such title is further amended by redesignating subsections (c) through (e) as subsections (d) through (f), respectively, and by inserting after subsection (b) the following new subsection (c):

"(c)(1) Any amount of an interest penalty which exceeds $1.00 and is due a business concern under this section shall be paid without regard to whether the business concern has requested payment of such penalty.

"(2) if a business concern—

"(A) is due an interest penalty;

"(B) is not paid the interest penalty in a payment made by an agency; and

"(C) makes a written demand, after the expiration of the 15-day period beginning on the date such payment is made, that the agency pay such a penalty,

such business concern shall be entitled to receive an interest penalty equal to twice the amount of the interest payment that would otherwise be due.".

INTEREST PENALTIES ON PROGRESS PAYMENTS AND RETAINED AMOUNTS UNDER CONSTRUCTION CONTRACTS

SEC. 5. Section 3903 of title 31, United States Code, is amended by redesignating clauses (4) and (5) as clauses (5) and (6), respectively, and by inserting after clause (3) the following new clause (4):

"(4) in the case of a construction contract, provide for the payment of interest on—

"(A) any progress payments due under the contract; and

"(B) any amounts which have been retained during the performance of the contract and are due to be released to the contractor after final acceptance of the construction,

if not paid to the contractor by the required payment date;".

LIMITATIONS ON DISCOUNT PAYMENTS

SEC. 6. Section 3904 of title 31, United States Code, is amended by inserting after the first sentence the following: "For the purpose of the preceding sentence, the specified time shall be calculated from the date the invoice under the contract is received by the designated payment office or finance center until the date of payment.".

REPORTS

SEC. 7. Section 3905(a) of title 31, United States Code, is amended to read as follows:

"(a)(1) By the 60th day after the end of the fiscal year, the head of each agency shall submit to the Director of the Office of Management and Budget a report on the agency's payment practices, including a description of the extent to which these practices satisfy the requirements of this chapter.

"(2) In addition to such other information as may be required by the Director, the report required by paragraph (1) shall include—

"(A) the number, amounts, and frequency of interest penalty payments, and the reasons such payments were not avoided by prompt payment; and

"(B) the number, dollar value, and frequency of invoices paid after the required payment date without payment of an interest penalty, and the reasons no obligation to pay an interest penalty was incurred with respect to such invoices.".

IMPLEMENTATION THROUGH THE FEDERAL ACQUISITION REGULATION

SEC. 8. (a) The single system of Government-wide procurement regulations, as defined in section 3(4) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(4)), shall be modified to provide appropriate solicitation provisions and contract clauses that implement chapter 39 of title 31, United States Code, and the regulations prescribed under section 3903 of such title.

(b) The solicitation provisions and contract clauses required by subsection (a) shall include the following matters:

(1) Authority for a contracting officer to specify for a contract or class of contracts a specific payment period, which—

(A) in the case of payments due for commercial items or services, is similar to the payment period or periods permitted in prevailing private industry contracting practices;

(B) in the case of payments due for noncommercial items and services, does not exceed 30 days unless the circumstances of the procurement action require a longer period for payment; and

(C) in the case of progress payments due under construction contracts, does not exceed 7 days, unless the contracting officer determines that the prevailing practice in private construction contracts requires a longer payment period.

(2) A conclusive presumption that the Federal Government has accepted property or services by the fifth day after the date on which the property is delivered or final performance of the services is completed in accordance with the other terms and conditions of the contract, unless the circumstances of the procurement require a longer period for acceptance by the Federal Government and such longer period is specified in the contract.

(3) The limitation that the Federal Government may take a discount offered by a contractor for early payment by the Federal Government only in accordance with the time limits specified by the contractor.

(4) The requirements of section 3902(c) of title 31, United States Code.

(c) The regulations required by subsection (a) shall be published as proposed regulations for public comment as provided in section 22 of the Office of Federal Procurement Policy Act (41 U.S.C. 420) within 120 days of the date of the enactment of this Act.

EFFECTIVE DATES

SEC. 9. (a) The amendments made by sections 3(a), 4, 5, and 6 shall apply to payments under contracts awarded during or after the first fiscal quarter which begins more than 90 days after the date of the enactment of this Act.

(b) The amendments made by section 3(b) shall apply to payments under contracts awarded on or after October 1, 1987.

(c) The amendment made by section 7 shall apply to the report required by section 3905(a) of title 31, United States Code, for each fiscal year beginning after September 30, 1986.

RESOLUTION OF NATIONAL ADVISORY COUNCIL ON IMPLEMENTATION OF THE PROMPT PAYMENT ACT

Whereas, the members of the National Advisory Council to the Senate Committee on Small Business, having considered the Federal agency implementation of the Prompt Payment Act, Public Law 97-177, during the three years since it became effective on October 1, 1982, have found that the objectives of the legislation and the intent of Congress are not being fully attained;

Whereas, some Federal agencies continue to make payments beyond the payment date specified in its contracts or beyond the times specified in the Act, without the payment of interest;

Whereas, some Federal agencies are abusing the fifteen day "grace period" provided in the Act by failing to initiate payment action on contractors' invoices until the expiration of thirty days;

Whereas, some Federal agencies are delaying payments to small business contractors by rejecting their invoices as "improper" after the fifteen days provided by the Act;

Whereas, some Federal agencies are delaying payments to small business contractors by refusing formal acceptance of supplies, services or construction so as to delay the start of the payment periods mandated by the Act, after which interest must be paid;

Whereas, some Federal agencies are failing to automatically pay interest due to small business contractors, rather requiring them to make a demand for payment of interest contrary to the Act's self-enforcing intent;

Whereas, these problems with agency implementation of the Act are placing substantial financing burdens on small business government contractors, and acting as an obstacle to small business participation in the Federal procurement market, thus denying the Government the advantages of the competition, industry, and innovation provided by many small businesses;

Therefore, be it resolved, That, the National Advisory Council to the Senate Committee on Small Business calls upon the Congress, especially the Senate and House Committees on Small Business, the Senate Governmental Affairs Committee, and the House Government Operations Committee which were instrumental in the passage of the Prompt Payment Act, to:

1. conduct oversight hearings on the implementation of the Prompt Payment Act though OMB Circular A-125, the Federal Acquisition Regulation, and the implementing regulations of individual Federal agencies; and

2. to consider modifications to the Prompt Payment Act that will address demonstrated implementational abuses by some Federal agencies and assure attainment of Congressional intent and objectives in passing the Act.

SMALL BUSINESS LEGISLATIVE COUNCIL,
Washington, DC, May 15, 1986.

Hon. LOWELL WEICKER,
Chairman, Committee on Small Business, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: We wish to convey to you the Small Business Legislative Council's, endorsement of the legislation introduced by Senator Trible, entitled the "Prompt Payment Act Amendments of 1986."

The Small Business Legislative Council (SBLC) is a permanent coalition of eighty-eight trade associations representing over four million small businesses. Our sole mission is to represent the interests of small business in national policy matters.

The original Prompt Payment Act, Public Law 97-177, was an important landmark in the relationship between the government and small business contractors. It greatly improved the government's payment practices by requiring the payment of interest on late payments. As we said then, and has been demonstrated by the experience of the last three years, if the legislation works as it is designed, the government will not incur tremendous financial burdens as agencies have improved their payment systems. However, as is frequently the case, agencies found "loopholes" which allow them to circumvent the intention of the law.

Now that we have had a three year shakedown, it is the time to tighten up the law and to clear up the ambiguities.

Therefore, on behalf of our organization we would like to endorse the Prompt Payment Act Amendments of 1986 and urge the Senate to pass this important legislation.

Sincerely,

JOHN S. SATAGAJ,
President.

● Mr. DIXON. Mr. President, I am pleased to be an original cosponsor of the Prompt Payment Act Amendments of 1986.

Businesses, especially small businesses, often incur a significant amount of expense in providing for products or services under contract with Federal agencies. It seems only fair that the obligations of these agencies are settled on a timely basis so as to minimize the accounts receivable interval.

While the Prompt Payment Act has substantially improved the Government's paying practice, problems still remain. The legislation we are introducing today provides the modifications necessary to close existing loopholes and insure that our small businesses receive contract payments in a timely fashion. We have similar provisions in Illinois law, and I am glad to report that these procedures work well in my State. We should do the same at the Federal level.●

● Mr. D'AMATO. Mr. President, I rise today to join my distinguished colleague from Virginia as an original cosponsor of the Prompt Payment Act Amendments of 1986. This legislation amends the Prompt Payment Act, Publc Law 97-177, to correct the abusive practices of some Government agencies and to assure the implementation of congressional intent and objectives.

The Prompt Payment Act established payment terms for Government contractors providing supplies, services, or construction to Federal agencies if the individual contract did not specify a specific payment term. This law was necessary to correct the abusive payment practices of some Federal Government agencies; long delays in paying its contractors is injurious to a business enterprise, especially a small business. Therefore, it became necessary to assure that businesses were paid in a timely manner or that interest penalties be paid for late payments.

Mr. President, although the Prompt Payment Act has tremendously increased the timeliness of payments, some agencies continue to delay payment by exploiting the act's purposes. The Prompt Payment Act Amendments of 1986 would correct the abuse in a reasonable manner.

Mr. President, I urge my colleagues to act expeditiously on this legislation.●

● Mr. MOYNIHAN. Mr. President, I am pleased to join my distinguished colleague from Virginia [Mr. TRIBLE], and the other cosponsors of S. 2479, The Prompt Payment Act Amendments of 1986.

Four years ago, Congress passed the Prompt Payment Act (Public Law 97-177) in an attempt to ensure that contractors who perform a service for the Federal Government are paid on time, or receive an interest penalty for late payment. I was an original cosponsor of that measure, too.

Today we are introducing legislation to correct the problems that have emerged during the implementation of the original act. This new legislation would reduce the grace period for late payment allowed the Federal Government from 15 to 8 days, and would double the interest penalty due if a contractor must request payment of the penalty by the Government. The amendments we are proposing to Public Law 97-177 would also provide for payment of interest on late progress payments due under a construction contract.

This legislation also requires the head of each agency to submit an annual report to the Director of the Office of Management and Budget on the agency's payment practices: The number, amounts, and frequency of interest penalty payments, and the reasons for late payment; and, the number, dollar value, and frequency of invoices paid after the required payment date without payment of an interest penalty, and the reasons no interest penalty was incurred.

Just as the Federal Government expects services or products to be delivered in a timely fashion by the businesses with which it contracts, so too does the Government have a responsibility to make prompt payment on its obligations. I am hopeful that hearings will soon be held on this legislation, and that any difficulties experienced by businesses in receiving prompt payment by Federal agencies will be resolved.●

By Mr. BUMPERS:

S. 2480. A bill to enhance the readiness and fighting capability of the

Armed Forces of the United States through the implementation of more combat-capable procurement policies, and for other purposes; to the Committee on Armed Services.

(The statement of Mr. BUMPERS and the text of the legislation appear earlier on in today's RECORD.)

By Mr. METZENBAUM (for himself, Mr. GORTON, Mr. KENNEDY, Mr. Bingaman, and Mr. STAFFORD):

S. 2481. A bill to amend the Clayton Act regarding antitrust enforcement, and for other purposes; to the Committee on the Judiciary.

ANTITRUST IMPROVEMENT ACT

● Mr. METZENBAUM. Mr. President, today I am introducing legislation to allow State attorneys general to sue on behalf of indirect purchasers, and in some cases, indirect sellers, in antitrust cases. This bill represents a limited reversal of the result in the Supreme Court's 1977 opinion in the *Illinois Brick* case. I am pleased to be joined by Senators GORTON, KENNEDY, BINGAMAN, and STAFFORD as original cosponsors.

In *Illinois Brick*, the Supreme Court held that the antitrust laws did not allow persons who did not buy directly from the defendant to sue in an antitrust case. The result of this decision is a major inequity in the law. If consumers pay higher prices because food manufacturers have fixed prices, they cannot sue because they have not purchased directly from the manufacturer. If all the automakers in the United States fix prices, the only ones who can sue are the dealers.

There is no doubt that persons who purchase indirectly from price fixers can be harmed substantially by having to pay higher prices. Yet the law provides them no remedy. If the direct purchaser decides to sue, he or she can collect all the damages from higher prices even if the direct purchaser was able to pass on all or part of the higher prices to others, In these cases, the direct purchaser may receive a windfall far in excess of his own injury. If the direct purchaser decides not to sue, for example, because of a close business relationship with the price fixer, there is no remedy at all. Consumers are injured but the persons who have violated the antitrust laws pay nothing.

Prior to the decision in *Illinois Brick*, hundreds of millions of dollars in illegal overchargers were recovered in treble damage actions under the Sherman and Clayton Acts by States and consumers. In just one case, involving sales of tetraclycline, over $100 million was recovered by States and consumers of the products after a number of pharmaceutical companies had been charged with price fixing. There is little doubt that consumers today are substantially overcharged by some price-fixing conspiracies with no way of seeking redress.

The Court in *Illinois Brick*, decided that allowing claims by indirect purchasers presented three types of problems: First, a reduction in deterrence based on the fact that each person in the distribution chain had less incentive to sue since his damages were only a portion of the overcharge; second, the possibility a defendant would be subject to multiple recovery if he could be sued by both direct and indirect purchasers for the same violation; and third, the complexity of determining the damages incurred by purchasers at difference levels of the distribution chain.

The bill I am introducing deals with each of these problems. First, the bill allows suits only by State attorneys general on behalf of their States and individuals in their States. This bill is similar to the approach taken by the senior Senator from Washington in the amendment he filed earlier this Congress entitled the Taxpayer Antitrust Enforcement Act of 1985. In 1976 Congress authorized the State attorneys general to sue parens patriae in order to recover on behalf of consumers in their States. This bill builds on that principle. By limiting the indirect purchaser or seller claims to those made by State attorneys general, the bill insurers that claims will be brought only by responsible State officials. Consequently, the possibility of frivolous or insignificant claims is virtually eliminated. The claims that will be brought will be limited to cases where consumers have suffered significant harm from higher prices.

There is little possibility that deterrence will be reduced if this bill is enacted. Potential price fixers will know that they can be sued by direct purchasers, as now, and in addition by State attorneys general on behalf of indirect purchasers. Indirect purchaser suits will typically be brought where thousands of consumers have been harmed and damages are substantial. Under current law, manufacturers may not have to pay compensation at all if direct purchasers do not sue, even in the case of a major price-fixing scheme. The bill would allow the manufacturer to be sued by the State attorney general whether or not a direct purchaser files a claim. Under these circumstances, deterrence will be greater not less.

Second, the bill is careful to insure that defendants do not have to pay twice for the same injury. In any case where an indirect purchaser or seller makes a claim, the defendant has the opportunity to raise a "pass on" defense to a claim by a direct purchaser. This defense allows the damages owed by the defendant to be reduced if it is shown that the direct purchaser has passed on some or all of his damages to the person making the indirect claim. In addition, as discussed further below, the bill provides rules for allocating damages and special procedures to prevent multiple recovery.

Third, the bill limits indirect seller suits to those brought by State attorneys general on behalf of farmers or ranchers who sell agricultural products. In the case of these products, there is a particular potential for injury through price-fixing conspiraces by those in the distribution chain who do not deal directly with the original producers. Farmers typically sell their products to handlers who set prices competitively. Prices fluctuate depending on the supply of products brought to market and the demand for the product by buyers downstream in the distribution chain. However, other levels of the distribution chain can be much less competitive due to higher concentration in the market and business practices which facilitate price fixing. Consequently, it is particularly unfair to farmers and ranchers to preclude any ability on their part to recover for injuries because they do not deal directly with those engaging in antitrust violations.

Fourth, under the bill, claims by indirect purchasers or sellers must be based on a conspiracy to fix prices, such as price fixing among competitors, vertical price fixing, bid rigging, or similar agreements. This limitation would insure that indirect claims are allowed in the case of the most egregious and harmful violations, while limiting them to cases where the problem of allocating damages is least difficult.

Finally, the bill requires any indirect purchaser or seller bringing suit to provide public notice of the allegations of his suit and, if possible, a description of the direct purchasers who may have been injured. Similarly, direct purchasers or sellers who bring suit must provide reasonable notice to the State attorneys general of their allegations, for example, by notifying the National Association of State Attorneys General.

The bill provides the following rules for allocating damages:

First, in a case where the direct purchaser initiates a suit, the indirect purchaser or seller suit must be brought within 6 months and must be joined with the pending action. Consequently, all parties would be before the court.

Second, in a case where the indirect purchaser initiates the suit and a direct purchaser or seller brings a subsequent action, the defendant has the right to require consolidation of the actions. As in the first case, all parties would then be before the court.

Third, in a case where there are both indirect and direct claims, the recovery of the direct purchaser or seller is reduced by the amount that the in-

direct purchaser or seller shows is properly attributable to it. The indirect purchaser or seller has the burden of showing that any overcharge or underpayment was passed on by the direct purchaser or seller.

Fourth, in a case where there is no claim based on direct purchases or sales, the recovery of the indirect purchaser or seller is equivalent to the total overpayment or undercharge less the amount the defendant shows has not been passed on to the indirect purchaser or seller. In any subsequent claim by a direct purchaser or seller, the defendant would be entitled to deduct from the damages he owes any amounts recovered by the indirect purchaser or seller.

The result of these rules is that in the great majority of cases, the claims would be consolidated and the court would have the opportunity to consider evidence regarding the proper allocation of damages in the same proceeding. Since any claim based on indirect purchases or sales would have to be brought in the same action within 6 months, the parties would not be faced with the problem of determining the proper damages while facing the uncertainty of future claims based on indirect purchases or sales.

The fact is that, in most antitrust cases, no claim based on indirect purchases or sales would be brought at all. Prior to the Illinois Brick decision, there were a small number of such cases though they were very significant for the consumers affected. However, they were overwhelmingly exceeded by standard direct purchaser claims. In the cases where State attorneys general would bring a claim based on indirect purchases, almost all of them are likely to be heard in a consolidated proceeding with direct claims. Consequently, the court will be able to manage the litigation and determine the proper allocation of damages.

CONCLUSION

The Illinois Brick decision created a major inequity in current law. The rule announced in that case means persons can suffer major economic losses from criminal price fixing with no means of seeking redress. Our American legal system should not tolerate such a result.

Legislation to overturn the Illinois Brick decision is strongly supported by the State attorneys general as well as many consumer organizations, farmers, and ranchers. This bill would overturn the unfairness of current law without creating undue complexity in litigation or unfairness to defendants.

I ask unanimous consent that a copy of the bill and a resolution of the National Association of Attorneys General be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2481

Be it enacted by the Senate and House of Representatives of the United States of Amercia in Congress assembled, That this Act may be cited as the "Antitrust Improvement Act of 1986".

SEC. 2. Section 4C(a)(1) of the Clayton Act is amended by adding between the first and second sentences thereof the following: "In any civil action alleging a contract, combination, or conspiracy to fix, maintain, or stabilize prices, a claim for damages may be based on indirect purchases. In the case of a civil action on behalf of producers of agricultural products, a claim for damages may be based on indirect sales in addition to any other claim permitted.".

SEC. 3. Section 4C of the Clayton Act is amended by adding at the end thereof the following:

"(e)(1)(A) If a State attorney general asserts a claim for damages based on indirect purchases or sales pursuant to subsection (a)(1), the defendant shall be entitled to allege, as a partial or complete defense to a claim by a direct purchaser or seller based on the same or substantially the same alleged conduct, that some or all of what would otherwise constitute the direct purchaser's or seller's damages were passed on by the direct purchaser or seller to persons on whose behalf the claim for damages from indirect purchases or sales was brought.

"(B) In the case of a claim based on indirect purchases or sales, the award shall be treble the amount of the overcharge or underpayment shown by the indirect purchaser or seller to be properly allocable to it (in addition to costs and attorneys' fees): *Provided,* That in the case where no claim by a direct purchaser or seller is pending, the defendant shall have the burden of establishing that the total overcharge or underpayment was not passed on to the indirect purchaser or seller.

"(C) The amount awarded to a plaintiff for a claim based on direct or indirect purchases or sales shall not duplicate amounts previously awarded to a direct or indirect purchaser or seller for the same overcharge or underpayment based on proof in fact of such injury.

"(2)(A) Any person entitled to maintain an action pursuant to subsection (a)(1), alleging injury from indirect purchases or sales, may intervene in any action under section 4 alleging injury from direct purchases or sales based on the same or substantially the same alleged conduct, if a request for such intervention is made within six months after the date of the filing of the initial action. The failure to request intervention in a pending action by any person alleging injury from indirect purchases or sales, within such time, shall constitute a bar to a claim by such person for injury from indirect purchases or sales based on the same or substantially the same alleged conduct.

"(B) Any person initiating an action under section 4 may intervene in any action under subsection (a)(1) which alleges injury from indirect purchases or sales based on the same or substantially the same alleged conduct.

"(C) Upon a request made by the defendant, the court shall order the consolidation of any pending actions pursuant to subsection (a)(1) alleging injury from indirect purchases or sales and any other action under section 4 based on the same or substantially the same alleged contract, combination, or conspiracy.

"(3) Upon the initiation of any action pursuant to subsection (a)(1) alleging injury from indirect purchases or sales, the State attorney general shall provide reasonable public notice of the allegations of the suit and, to the extent possible, a general description of any direct purchasers who may be entitled to maintain an action under section 4.

"(4) Upon the initiation of any action pursuant to section 4 alleging a contract, combination, or conspiracy to fix, maintain, or stabilize prices, the plaintiff shall provide reasonable notice of the allegations of the suit to the State attorneys general.".

RESOLUTION XI—ILLINOIS BRICK

Whereas, the United States Supreme Court held in *Illinois Brick* v. *Illinois* that only direct purchasers of price-fixed items may sue the antitrust violator and that all who purchased on an indirect basis through a middleman are precluded from recovering damages; and

Whereas, the states spend billions of dollars each year in the procurement of goods and services for state and local governments on an indirect basis, and under *Illinois Brick* they are unable to recover tax dollars from price-fixers and other antitrust violators from whom they purchased indirectly; and

Whereas, the effectiveness of the parens patriae provision of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 may be severely diminished by *Illinois Brick*;

Whereas, legislation is pending in the United States Congress that would have the effect of overruling *Illinois Brick*;

Now, therefore, be it resolved, that the National Association of Attorneys General:

1. Reaffirms its strong support for federal legislation to reverse the effects of *Illinois Brick Co.* v. *Illinois* so that state Attorneys General may pursue fully price fixing and bid rigging cases under the Sherman Act; and

2. Commends United States Senators Slade Gorton, Warren Rudman, John Danforth, Robert Stafford, Thomas Eagleton, and Jeff Bingaman for their efforts to bring such legislation to the floor of the Senate for consideration by the entire Senate; and

3. Authorizes the Executive Director and General Counsel of this Association to transmit these views to the Administration, the Congress, and other interested individuals.●

● Mr. KENNEDY. Mr. President, I am pleased to cosponsor legislation to address the most egregious problems caused by the Supreme Court's 1977 decision in the case of Illinois Brick Co. versus Illinois, which held that indirect purchasers cannot sue price-fixers.

In the real world, this means that States, counties, and cities might pay millions of dollars in illegally high prices for roads, buildings, or bread for consumption in State institutions, yet could not recover that money even though the price-fixing scheme is later exposed and established. For example, suppose a group of cement manufacturers conspire to fix the price of materials they sell to highway construction contractors, who in turn pass on the higher cost of those illegal prices to State and local government agencies which must pay more for public roads. Under Illinois Brick, the high-

way construction contractors may sue the cement manufacturers for price fixing. But the State and cities, and the taxpayers who must ultimately foot the bill, are out of luck. Since they are "indirect purchasers," not directly dealing with the price fixers, Illinois Brick bars their suit to recover damages.

As a result of Illinois Brick, States had to drop or settle suits involving millions of dollars, and they refrained from bringing many others. The Attorney General of West Virginia, then president of the National Association of Attorneys General, testified in connection with a previous Illinois Brick bill that all of the States combined had lost the opportunity to recover $750 million in cases that were pending at the time Illinois Brick was decided. And then Assistant Attorney General for Antitrust John Shenefield told the committee that Illinois Brick would block recovery by the United States of some $200 million in pending cases. These estimates do not include the opportunity costs of cases which have not been brought because of the Illinois Brick bar to such suits. At a time of critical Federal deficits and sharp reductions in Federal aid to States, it is irresponsible to preclude recovery by governmental entities of illegal overcharges.

Opponents of legislation have argued that the direct purchasers will sue, and thereby provide adequate enforcement for deterrence of others. However, in many cases, where it is quite easy to pass on the increased prices to the next purchaser in the chain, direct purchasers will have more to lose by alienating a supplier, than they have to gain by an expensive lawsuit.

The Illinois Brick case is a good example. The builders simply passed on to local governments the overcharges they paid to cement block manufacturers who had fixed prices. The end result is that price fixing in many cases will go unpunished and the consumers, or the taxpayers, in the case of government purchases will not be compensated for their loss. In short, the Illinois Brick decision stands the antitrust law on its head because it prevents recovery by the persons actually injured.

When Congress first passed the Sherman Act, almost 100 years ago, the sponsors made clear that they sought to protect the consumers, who were the real victims because they paid the increased prices passed on by middlemen. When the government makes proprietary purchases, it is the "consumer." But the ultimate victim is the taxpayer, who must pay higher taxes or accept fewer services when tight budgets are drained by illegal overcharges.

This bill is not a complete reversal of Illinois Brick. It is limited to the clearest and most compelling aspect of the Illinois Brick problem—its impact on government proprietary and parens patriae suits. It is supported by the National Association of Attorneys General. I urge my colleagues to adopt this bill.●

By Mr. DECONCINI:

S. 2482. A bill to require the Secretary of Health and Human Services to establish a Medicare demonstration project for veterans; to the Committee on Finance.

MEDICARE DEMONSTRATION PROJECT FOR VETERANS

● Mr. DECONCINI. Mr. President, I am introducing legislation today to establish a 2- to 3-year Medicare demonstration project for veterans which will not require the allocation of additional Federal funds. The project will be administered by the Secretary of the Department of Health and Human Services.

This project will permit 15 to 25 participating non-Federal acute care hospitals to offer inpatient and outpatient hospital services at no out-of-pocket expense to veterans 65 years and older, by waiving the Medicare deductible and coinsurance. These hospitals will not claim the waived deductibles or coinsurance as a loss, therefore the Federal Government will not be responsible for covering any of the waived fees.

I am initiating this demonstration project due to the success of a similar program called "MED VET," initiated by the Valley View Community Hospital in Arizona. MED VET permits a Medicare-eligible veteran to enroll in the program by showing a current Medicare card and proof of veteran status. If the veteran ever needs hospital care, it will be provided without any charges to the patient, although the hospital retains the right to bill supplementary insurance, if available.

Perhaps the best way to describe how the program has benefited the community is to let the participants speak for themselves. The following article, published in the Peoria Times on September 6, 1985, describes one person's experience:

TO THE EDITOR:

About five months ago, I attended the monthly meeting of the Post 94 American Legion in Sun City West. The guest speaker was a lady representing Valley View Community Hospital in Youngtown.

She explained a new health program called "MED VET," which entitles all veterans to be treated at Valley View on the same scale as Veterans Hospital. All hospital-related services will be paid by Medicare if the person qualifies for Medicare.

At 10 a.m. on June 22, my 69th birthday, I had strong chest pains. I called my son Stan and asked him to take me to Valley View. I felt like I was having a heart attack.

Within six minutes I was in the emergency room being treated, which I believe saved my life.

I was a patient at Valley View for 10 days and the treatment I received was excellent.

After discharge from the hospital my cardiologist prescribed medication to be taken three times per day for the rest of my life. One's own physician may treat him at Valley View.

As the former service officer of Post 94 American Legion, I feel it is the duty of all the veterans organizations (especially in the Sun City, Peoria, El Mirage, Surprise, and Youngtown areas) to inform each member of this program offered at Valley View.

I also urge the newspapers to print more about this program for the benefit of their families. They don't have to be members of any organization, but have to have their Honorable Discharge and be on Medicare.—Rudolph J. Stobierski.

The veterans in Arizona are proud of this program, which was conceived by the administrator of Valley View Community Hospital, Larry Mullins, a veteran himself. As Post Commander Ken McLaughlin wrote in appreciation:

On behalf of VFW Peoria Post 2135 and unanimous approval of the comrades, especially those that have utilized the MED VET Program, we pledge to you, Valley View Community Hospital and the MED VET Program, our fullest support.

Several benefits of the program are apparent: The older veteran can receive affordable care within his or her community, hospital facilities are used more efficiently, and the program can be used to inform veterans of important health care information.

Although four other hospitals in Arizona, Florida, and California have adopted MED VET, and 20 other hospitals would like to initiate it, a snafu in current law makes it difficult for hospitals to offer this type of program. Interpretation of current Medicare-Medicaid Fraud and Abuse Amendments could imply that waivers of deductibles and coinsurance, even though the hospital does not want to collect the money from the patient or Medicare, may be improper. Current law does not give the Secretary of Health and Human Services the discretionary authority to determine if waivers, in certain cases, are beneficial and should be allowed.

Under the proposed demonstration project, MED VET will continue, in Arizona and elsewhere, while simultaneously evaluating the effect of the program on the Medicare system. The utilization of inpatient and outpatient services by veterans enrolled in this Medicare demonstration project will be compared to the use of such services by regular Medicare patients. This should incur no extra cost since data regarding admissions and length of stay are already collected as part of the Medicare Program.

The demonstration project will be evaluated by the Secretary of Health and Human Services. Representatives of veterans' service organizations will be afforded the opportunity to com-

ment on the project before a final report is submitted by the Secretary to the Committee on Finance in the Senate and the Committee on Ways and Means in the House of Representatives.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2482

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MEDICARE DEMONSTRATION PROJECT FOR VETERANS.

(a) ESTABLISHMENT.—The Secretary of Health and Human Services (in this section referred to as the "Secretary") shall develop and carry out a demonstration project in which participating non-Federal subsection (d) hospitals, as defined in section 1886(d)(1)(B) of Social Security Act, waive the right to payment for any deductibles and coinsurance amounts imposed under parts A and B of title XVIII of such Act with respect to inpatient and outpatient hospital services provided to veterans (as defined in section 101(2) of title 38, United States Code) who are eligible for benefits under such parts.

(b) PARTICIPATION.—The demonstration project shall include not less than 15, nor more than 25, of those hospitals that agree to particpate in the demonstration project and to follow the following guidelines:

(1) Any medicare-eligible veteran is eligible to participate upon verification of his or her veterans status and medicare eligibility.

(2) The hospital agrees to waive the right to payment for any deductibles and coinsurance amounts imposed under parts A and B of title XVIII of the Social Security Act with respect to inpatient and outpatient services furnished to eligible veterans.

(3) The hospital reserves the right to bill private medical insurers, where applicable.

(4) Other physician financial considerations are a matter to be decided independently between the physician and the patient.

To the greatest extent possible, participating hospitals shall be located in the various regions of the United States.

(c) DURATION.—The demonstration project shall be initiated not later than 45 days after the date of the enactment of this Act and shall continue for not less than two, nor more than three, years.

(d) STUDY.—The Secretary shall compare the utilization of inpatient and outpatient hospital services by veterans participating in the demonstration project (including the frequency of admission and length of stay) with that of other medicare-eligible individuals, and shall evaluate the effect of such project on expenditures under title XVIII of such Act.

(e) TREATMENT OF WAIVERS.—Waiver by a participating hospital of the right to payment for any deductible or coinsurance amount imposed under title XVIII of the Social Security Act with respect to inpatient and outpatient hospital services provided to a medicare-eligible veteran shall not constitute a violation of section 1877 of such Act.

(f) INFORMATION.—The Secretary may require hospitals participating in the demonstration project to submit such information as the Secretary determines necessary to make the comparisons and evaluations required under subsection (d).

(g) REPORT.—Not later than 90 days after the close of the demonstration project, the Secretary shall report the results of the study required to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate. The Secretary shall provide representatives of appropriate veterans' service organizations with an opportunity to comment on the demonstration project and these comments shall be included in the Secretary's report.●

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 2483. A bill to amend the Fire Island National Seashore Act of 1964; to the Committee on Energy and Natural Resources.

FIRE ISLAND NATIONAL SEASHORE AMENDMENTS

Mr. MOYNIHAN. Mr. President, I rise today along with my distinguished colleague, the junior senator from New York, Mr. D'AMATO, to introduce an amendment to the Fire Island National Seashore legislation enacted into law 22 years ago. This bill is identical to a bill being introduced in the House today by Representatives THOMAS DOWNEY and WILLIAM CARNEY, within whose districts the seashore lies.

The bill we are introducing today is very small and very simple, but it is very important to the residents and homeowners of Fire Island. Fire Island National Seashore, though a Federal enclave, incorporates several towns and a fair amount of private property. As a protected seashore, the zoning regulations of the towns must conform with those set by the Secretary of the Interior, given to protect Federal resources. Following the lead of the Congress in enacting the Coastal Zone Management Act of 1972, New York enacted its own coastal management act in 1981. Since that time the residents of Fire Island have worried about conforming with duplicative and sometimes contradictory coastal zoning regulations set by the State and Federal Governments. This arrangement is unfair and overly burdensome to those residents and must be changed.

The Congress made clear its intent that regulation within the seashore remain the joint activity of the Federal Government and the towns in the last round of Fire Island amendments 2 years ago. We noted the intent of the Congress in the House committee report to the Fire Island Seashore amendments of 1984. Unfortunately, we did not write the intent into the amendment itself in the last round. We must do so now.

If this amendment is not adopted, homeowners on Fire Island Seashore will be subject to two different and potentially conficting sets of regulations of the State and Federal Governments. This bill does not preclude State involvement with regulation of private property altogether, rather, it merely affirms that in the case of conflicting regulations, those developed through the Federal-town government mechanism will prevail.

In again tightening the Fire Island National Seashore Act of 1964, this bill will retain an equitable means of protecting both the rights of private property owners, and the public resources of the seashore. I urge that this small matter be expeditiously considered by the appropriate committee, as it is essential to the residents of the seashore.

Mr. D'AMATO. Mr. President, I rise today with my colleague from New York, Senator MOYNIHAN, to introduce legislation to amend the Fire Island National Seashore Act (P.L. 88-587). The bill we are introducing today is identical to legislation being proposed in the House of Representatives by Congressmen BILL CARNEY and TOM DOWNEY, whose districts include the area coverd by this bill.

This legislation is designed to reaffirm Congress' intent when the Fire Island National Seashore Act was first passed. Specifically, we are reaffirming that the regulation of private property within the seashore remain a joint activity between the Federal Government and the local government, rather than to allow an intervening level of State regulation.

This legislation is needed so that homeowners in the area will not be subject to two different and potentially conflicting sets of policies and regulations. The regulatory mechanism combines the zoning authority of the towns to protect the health, welfare, and safety of individuals with the Secretary of the Interior's responsibility to protect the park resources and the environment. It is important to note that this bill does not preclude State involvement with regard to regulation of property within the seashore. It merely affirms that, in the case of conflicting regulations, those developed through the Federal-town government mechanism will prevail.

Mr. President, I believe this legislation represents an equitable means of protecting both the rights of private property owners and the public resources of the seashore. I urge my colleagues to join in supporting this legislation.

By Mr. DURENBERGER:

S. 2484. A bill to amend the Internal Revenue Code of 1954 to allow individuals not eligible for employer-sponsored health plans or Federal health programs a refundable credit against income tax for qualified health insurance premiums, and to allow a deduction for health insurance premiums of self-employed individuals; to the Committee on Finance.

S. 2485. A bill to amend the Internal Revenue Code of 1954 to include in gross income and impose social security taxes on certain employer contributions to accident or health plans, to allow individuals a credit against income tax for certain health insurance premiums, and for other purposes; to the Committee on Finance.

S. 2486. A bill to amend the Internal Revenue Code of 1954 to include in gross income and employer contributions to accident or health plans, to allow individuals a nonitemized deduction for certain accident and health insurance costs, to allow individuals who itemize, a portion of the remainder of such costs, to raise the threshold for deductible medical expenses to 10 percent of adjusted gross income, and for other purposes; to the Committee on Finance.

PRIVATE HEALTH INSURANCE LEGISLATION

● Mr. DURENBERGER. Mr. President, I rise today to introduce a package of three bills. These bills represent alternative approaches to modify Federal tax policy to promote the expansion of private health insurance and to reform the manner in which the Federal Government subsidizes employer-paid health insurance.

INTRODUCTION

Mr. President, over the past 6 years I have been striving with many of my colleagues to reform the Nation's health care system. Our goal has been to provide all Americans access to cost-effective, quality health care. The best means to accomplish this goal is to provide Americans the means and incentives to choose between health benefit plans, and through these choices to bring forces to bear on the health system to provide real value for the services rendered.

The Federal Tax Code excludes employer-paid health benefit plan premiums from both business payroll and employee income taxation. This tax exclusion had enabled 146 million Americans to obtain employer-paid health plan coverage. However, with no limit on the amount of the premium which can be excluded from taxable income, employees have little incentive to move away from expensive and inefficient plans.

This problem is reflected by the recently reported experience of Chrysler Motors. In 1982, Chrysler was paying more than $300 million for employee health insurance premiums; $300 million on which no Federal taxes were paid.

To their credit, Lee Iacocca and others at Chrysler became alarmed at the rising cost of the health benefits and asked one simple question: What were they—and the Federal Government—getting for their $300 million. The answer was, nobody knew. When they undertook a major study to find the answer, Chrysler was shocked to learn:

First, Chrysler-insured employees, retirees and dependents, received more than 1 million laboratory tests at a cost of $12 million, more than 5 tests for every man, woman, and child insured.

Second, Blue Cross/Blue Shield payments per dermatologist were more than double those for the average practitioner, and 25 percent greater than the average payment for chest surgeons. Per capita, dermatologists grabbed more of the Michigan Blue Cross/Blue Shield insurance dollars than any other specialist.

Third, in the Detroit area, the cost for the average length of stay at hospitals used by Chrysler ranged from $3,028 up to $6,077—a 100 percent spread.

Fourth, variations were just as wide between the fees physicians charged for the same services as well as in the tests and x rays they prescribed for the same diagnoses.

Fifth, the single most costly medical procedure Chrysler paid for was the $4 million doctors billed the company for visits to hospitalized patients.

Sixth, prescription drugs were overused and sometimes abused, and there were repeated errors and excess charges in hospital bills.

Mr. President, I am not shocked at what Chrysler learned. These findings of high costs, extremely variable charges, inefficiency, and abuse are predictable outcomes of corporate and Federal tax policies providing open-ended, price-insensitive subsidies for health insurance. To deal with these problems, Chrysler and, increasingly, other firms have implemented new policies that require competition among their health service suppliers and price sensitive decisionmaking on the part of their employees. It is high time the Federal Government recognized its complicity in creating this flawed system and reformed its policy of providing an open-ended, price-insensitive subsidy for employer-paid health plan coverage.

At the same time that the current policy promotes inefficiency, it leaves 63 million Americans under the age of 65 with no Federal subsidy of any kind for private health insurance. Mr. President, 37 million of these Americans, more than half of them children, are uninsured for all or part of the year.

We can be very proud that over 60 percent of our population is protected against the high costs of illness and injury through employer-sponsored health benefit plans. We cannot, however, allow ourselves to be blinded by this apparent success since it is limited to only those Americans who happen to work for an employer who provides health insurance benefits. Neither should we be paralyzed into inaction by the uncertainty that any change in the current tax treatment of health benefits may create. We are already in the throes of the most important reform of the tax code in a generation, and the inequities of the current tax exclusion should not be left out.

Mr. President, the challenge before us is to use this opportunity of tax reform to bring equity and fairness to the way the Federal Government subsidizes health plan coverage. This is why I am introducing these alternative proposals today.

THE TAX EXCLUSION AND HEALTH PLAN INCENTIVES

Since 1954 the Federal tax code has provided a double subsidy for health insurance bought for employees by employers. The employer's taxable income is reduced by the amount of the health insurance premiums paid, and the employee excludes the dollar value of the health insurance premium from his or her taxable income. So, workers who receive employer-paid health plan benefits have ready access to doctors and hospitals whenever they need it, and American taxpayers will pay $35.2 billion in 1987 to provide this protection to about 146 million people.

In addition, through flexible spending accounts, salary reduction and other applications of section 125 of the Internal Revenue Code—cafeteria plans—employees can arrange to have a substantial part of their out-of-pocket medical expenses paid with tax-free dollars. This subsidy will cost taxpayers $7.7 million in 1987.

Mr. President, together these two Federal subsidies will cost the American taxpayer $42.9 billion in 1987.

It makes good sense for society to subsidize individual decisions to buy health care coverage. Tax subsidies for health insurance have encouraged the spread of private coverage, thus protecting people from financial hardship and the public from carrying their burden. On the other hand, uninsured people often postpone health care until they are so ill they need to be hospitalized. Thus, they incur larger costs than necessary which leads to personal financial hardship and, for many, dependence on the social welfare safety net.

These advantages of a publicly subsidized but essentially private system of insurance through employment are important and need to be maintained. The reliance on open-ended third party coverage for medical expenses, however, has resulted in problems as well: unnecessarily generous benefit packages, increasing demand for services, inappropriate utilization, and skyrocketing costs.

Employees have struggled to come to grips with these problems over the past decade, and they have implemented some changes designed to increase the efficiency of this system. Employer-paid health plan premiums began

rising faster than inflation in the 1950's. In 1950 health insurance premiums represented just 0.95 percent of disposable income. By 1960 this ratio had risen to 2.13 percent, by 1970 to 2.87 percent, and in 1983 health insurance premiums equaled 4.80 percent of disposable income. During the 1970's, when this increase in the cost of health insurance relative to disposable income was greatest, employers became concerned that employer-paid health benefit plans were providing inflationary incentives to the health insurance industry. For this reason, many employers advocated letting employees buy their own health coverage out of cash compensation. Because employers could not easily convert to the latter system, they began to use other means to encourage their employees to be more cost conscious in their selection of health plans and use of health services. This initially took the form of cost-sharing through higher deductibles and employee copayments for services utilized. More recently, employers have required policies to include utilization review mechanisms and surgical second opinion provisions.

Still, Mr. President, for 146 million Americans covered by employer-paid health benefit plans, our system of private health care services financed by employer-employee arrangements works well. The Federal subsidy for this system is in the national interest. It has enabled the private sector to finance health care at less total cost to the Federal Treasury than would a centralized national health service. This subsidy will continue to benefit our Nation in the future if we follow-through on the midcourse corrections that employers—and now Medicare and, in some States, Medicaid—have started on the payment side. But American business needs to take at least four more steps to complete the midcourse correction and, with the help of changes in Federal tax policy, put us on a course of affordable, high quality health care for all our citizens.

These changes include:

First, provide all employees with choices of health plans and make equal contribution to each plan. Each plan should require some cost sharing, and provide taxable rebates or other benefits to those selecting low cost plans.

Second, provide that each plan has a minimum benefit which includes catastrophic coverage.

Third, establish tough specifications for health plans to meet to be included among employer-sponsored choices so as to ensure quality care and employee satisfaction, plus restraint on health plan costs increases.

Fourth, limit the employer dollars that will be paid for employee group health plan coverage to an amount which is compatible with the tradition of "insurance" or "financial risk" rather than third-party payment-in-full for all services.

Mr. President, the Federal Government also has an important role to play in continuing private health insurance system reform. There are four things seriously wrong with the way our tax laws now treat health insurance and employer-paid health benefits: the inequity of the subsidy, the rapidly increasing cost of the subsidy to the Federal treasury, the inherent cost-increasing incentives of the subsidy, and the linkage between employment and insurance required by the subsidy.

EQUITY AND FAIRNESS CONCERNS

Mr. President, the present tax treatment of health insurance is blatantly unfair. It subsidizes people who need help the least, and it does nothing for those who need help the most.

The tax subsidy is generous to the rich. Mr. Lee Iacocca, chairman of the board of Chrysler Motors, the same Chrysler Motors that was shocked to discover the inefficiency and abuse present in their health benefit plans, earned $1.6 million in salary and bonus last year, and over $11 million when deferred compensation is counted, and received $3,300 in tax free health benefits. It is unconscionable to me that a man making $1.6 million a year should receive an open-ended, tax free health benefit while millions of Americans receive no Federal subsidy at all. Tax subsidies are nonexistent for millions of people who need help the most: the part-time employed, the intermittently employed, the self-employed, the unemployed, and those in businesses where employers do not provide health insurance. If these people can get health insurance at all, they pay much higher premiums, get fewer benefits, and pay for it with net-after-tax dollars.

Mr. President, these are people whose decisions to buy health insurance are greatly influnced by its cost and their incomes. From 1978–83 health insurance premiums for policies offered by commercial insurance companies increased by 102 percent, and over the same time period premiums for Blue Cross/Blue Shield policies increased by 101 percent. While Government and large business employers have the ability to keep up with the raising cost of health insurance even in hard times—for example, Chrysler—small businesses, and self-employed people cannot.

Consider the situation of a typical farmer in Minnesota or any other farming region. Since farmers are not employees of companies offering employer-sponsored health insurance, they cannot exclude the monthly premium for a health benefit plan from their taxable income. The cost of insurance for family coverage in a non-group policy for a farmer aged 35 with a $100 deductible in Minnesota is $232 per month, and, unlike Mr. Iacocca's employer-paid premium, the total amount of the Minnesota farmer's premium must be paid out of the farmer's pocket with after-tax dollars.

This situation is shared not just by farmers, but by the families of all Americans who are self-employed, temporarily unemployed, not eligible for their employer's health insurance plan, or who are employed by an employer that does not offer health insurance as a benefit.

The majority of this group simply cannot afford to pay the full cost of health coverage, typically available to them only at expensive, nongroup rates, and they must go insured for at least part of the year. Since they are outside any of the established health care plans, they receive very few preventive health services. When illness or accident strikes these unfortunate people often go without needed health care. If their health problems are severe and they seek care, they are liable for the full cost of hospital and doctor bills. In reality these costs are usually so enormous that the individual cannot pay but part of them and the hospitals and physicians end up providing the needed care as charity care or writing off the bills as bad debt.

If we believe that Federal tax policy ought to be used to promote the spread of private health insurance, then these are the people on whom the tax incentives should now be targeted.

Mr. President, this inequitable Federal policy of subsidizing health plans for some Americans and not others threatens the national welfare. In 1987, 63 million Americans who are not eligible for Medicare will receive no Federal tax subsidy to help them afford private coverage under health benefit plans. Many millions of these Americans will dig down deep into their own pockets and pay the total cost of health insurance with after-tax dollars. Many millions of other Americans will run the risk of being uninsured for the financial costs of illness and accidents because they simply cannot afford to pay for the full cost of those premiums. In my own State of Minnesota, 342,000 people are uninsured during the year. This means that 1 out of every 12 Minnesotans is unprotected against the high cost of illness and injury. Nationally, there are 37 million uninsured, and the number is increasing every year.

Why should we allow thousands of dollars of open-ended tax subsidy per year for over 146 million individuals when 63 million Americans receive zero subsidy? The policy is not only unfair, the absence of Federal assistance for these individuals and their families causes enormous problems for them and for the Nation.

Mr. President, just 3 or 4 years ago these problems didn't seem as serious even though they existed, largely because our 7,700 American hospitals and tens of thousands of individual professionals took care of those who could not pay. Uninsured persons could receive care free from community hospitals when they became seriously ill and couldn't pay, and the hospitals simply passed on the costs to third-party payors. Many doctors also provided care for free or substantially reduced fees to those who were uninsured.

But now cost-conscious competitive medical plans and Medicare's prospective payment system are rapidly replacing traditional cost-unconscious insurance, and hospitals are finding they have nobody to whom to send the bills for so-called uncompensated care. Last year in my home State of Minnesota, the hospitals provided about $46 million worth of free care; $21 million to the uninsured and indigent population and $25 million as bad debt. Nationally, hospitals provided $4.2 billion in uncompensated care in 1978, increasing to $6.2 billion in 1982, the most recent year for which such national data are available. No one doubts that the amount of uncompensated care provided by hospitals has continued to grow, and the resulting financial strain on many hospitals, especially those serving large numbers of poor patients, is requiring them to reevaluate their commitment to community service.

As a result, uninsured patients are frequently referred or transferred to public hospitals financed by local taxes and some State taxes. The New England Journal of Medicine recently published the results of a study of transfers to Cook County Hospital during 1983–84. This study revealed: 81 percent were unemployed; 87 percent were transferred because they lacked adequate medical insurance; only 6 percent of the patients had given informed consent for transfer; 24 percent of the patients were in an unstable clinical condition at the transferring hospital; 22 percent required admission to an intensive care unit, usually within 24 hours of arrival.

The proportion of transferred medical-service patients who died, 9.4 percent, was 2½ times as great as the proportion of medical-service patients who were not transferred, 3.8 percent.

The Congress tried to address this particular problem with legislation in the fiscal year 1986 reconciliation bill which requires hospitals that participate in Medicare to provide emergency services for people with an urgent need for care, including women in labor, regardless of their ability to pay. This provision, of course, does not solve the problem. Hospitals and doctors are still faced with providing care to patients who cannot possibly pay for it.

Many of the individual stories of uninsured patients seeking a hospital or physician willing to care for them are very disturbing. Only last February I submitted a statement for the CONGRESSIONAL RECORD expressing my personal outrage over the extreme difficulty an uninsured young woman, Linda S. Cohen, had in obtaining lifesaving surgery for a malignant melanoma.

At a hearing I chaired last fall on infant mortaility I was told equally distressing accounts of personal suffering caused by lack of access to the health care system. One of them concerned a Minnesota woman who was pregnant and living in a battered women's shelter. She was ineligible for Medicaid, and couldn't afford to buy insurance. The only way she could get proper care for here unborn child and here other children was to go back to her husband. the unborn baby was later injured in the womb by her husband's continued battering.

Sadly, the plight of these unfortunate women is not all that unusual. The fear of becoming sick or injured without access to medical care is a part of everyday life for the estimated 37 million Americans who are currently uninsured for health expenses.

Mr. President, the fact is that the Federal taxes used to buy Mr. Iacocca's health insurance last year could have provided access for at least three uninsured poor families in Detroit.

COST TO THE FEDERAL TREASURY

Mr. President, the second problem with the current tax subsidy is its huge, open-ended cost to American taxpayers. Estimates from the Department of Health and Human Services indicate that by 1987 the tax expenditure—including FICA taxes—for employer-sponsored health insurance will total $35.2 billion, increasing to $50.4 billion in 1991. The tax expenditure in 1987 would have been even higher if it were not for the emergence of cost sharing in private health insurance plans, limits employers placed on health plan contributions, and increased use of HMO's, PPO's and other managed health care systems with prospective payment arrangements.

All these reforms occurred in the early 1980's. If the 1978–81 trend in tax expenditurses had continued unaltered, the 1987 tax expenditure for employer-sponsored health insurance would have been about $52 billion.

The cost to the Treasury of flexible spending accounts is growing more rapidly than the tax exclusion. Tax law permits employees to direct employers to place part of their pay in "flexible spending accounts." Employees use these accounts to pay out-of-pocket medical expenses, including such items as eye glasses and cosmetic surgery. The Department of Health and Human Services estimates that the tax expenditure for these accounts will be $7.7 billion in 1987 and increase to $22 billion in 1991.

Taken together, Mr. President, the tax expenditure for these two subsidies will increase 69 percent to $72.4 billion in the next 5 years.

It is senseless to struggle as hard as we do to save billions out of Medicare or Medicaid while allowing the loss of uncontrolled billions of dollars through such tax breaks. And, it is just as illogical for the Finance Committee in tax reform to reduce the Federal income tax rates to 15 percent and 27 percent by eliminating more justifiable tax preferences while retaining this non-means-tested, open-ended tax subsidy.

INCENTIVES FOR INEFFICIENCY

Mr. President, the third thing wrong with the way our tax law treats health insurance is that it reinforces the cost-increasing incentives in the health care financing and delivery system. It induces employment groups to buy cost-unconscious, open-ended comprehensive insurance. It tells upper income groups that if they decide on still more costly benefits, Government will pay 40 to 50 percent of the extra cost.

Mr. President, evidence from the experience of the Federal employees health benefits plan [FEHBP] strongly suggests that no Chrysler employee needs $3,300 a year worth of group health insurance. The Blue Cross/Blue Shield high option plan offered through the FEHBP provides excellent benefits: $1,500 catastrophic expense protection; a $50 deductible per hospital admission—$200 annual maximum; 100 percent payment of hospital charges with no day limit; 80 percent payment of surgical charges; 80 percent payment of inpatient doctor visits; 100 percent of outpatient surgery; 80 percent of outpatient diagnostic tests, and outpatient doctor visits; 80 percent of inpatient psychiatric care up to $4,000 and 100 percent over that amount up to $75,000; and 70 percent of charges for 50 psychiatric outpatient visits. In addition the plan offers coverage for alcohol and drug abuse detoxification, home health care, use of midwives, and prescription drugs.

These are comprehensive benefits with built-in incentives for efficiency, and Federal employees are very satisfied with the plan. The total cost of this plan for family coverage is just $3,017.04 per year—$251.42 per month, and the Federal Government contributes just $1,267.15 per year—$108.14 per month, both figures well under those for Mr. Iacocca's health plan.

If a Federal employee opted for even lower out-of-pocket premium costs, he could choose, among others, the Blue

Cross/Blue Shield standard option with a $2,500 catastrophic expense limit; a $100 deductible per hospital admission—$250 annual deductible limit; 100 percent of hospital charges for the first 180 days and 75 percent payment after the first 180 days of stay; payment of 75 percent of charges for inpatient surgery, and doctor visits, outpatient diagnostic tests, and outpatient doctor visits; and somewhat more limited mental health benefits, the cost of health insurance would be just $1,659.84 per year for family coverage—$138.32 per month, and the Federal contribution is just $1,244.88 per year—$103.74 per month.

Mr. President, the employee and the Federal Government get excellent value for their money in these, and many other plans offered by FEHBP. If Federal employees want to purchase insurance from less efficient plans, or extremely generous benefits, or first dollar and every dollar coverage, they pay the full additional cost. The same principle should apply to Mr. Iacocca's employer-paid health premium and all other federally subsidized insurance in the private business sector.

Through the open-ended tax subsidy, the government is helping and encouraging upper income people and large employer groups to bid up the prices and standards of care that the uninsured must pay for directly and the Government must pay for through Medicare and Medicaid. Government is subsidizing its own competition and is driving lower income Americans into unprotected status.

The role played by flexible spending accounts also contributes to the inflationary forces within the health system. Those employees fortunate enough to have a flexible spending account are able to purchase health services and devices with pretax dollars, thus insulating themselves from the full cost of the consumer decisions.

THE LINKAGE BETWEEN EMPLOYMENT AND HEALTH INSURANCE

Mr. President, the fourth major defect in the present tax treatment is that it reinforces the link between jobs and health insurance. People lose their health insurance and their tax subsidy when they lose their jobs. Just when they need "insurance" the most. This link complicates the problem of getting everyone covered under a health benefits plan.

It is becoming urgent that we take decisive steps to make sure that all Americans have access to health care plans. If we don't, the strategy of competition will produce socially unacceptable results, and society may turn toward high-cost, inefficient, and regulatory solutions.

THREE BILLS

Mr. President, this Nation can and must find ways to reduce the number of Americans uninsured for medical care expenses. Last year I introduced S. 1211, the Health Equity and Fairness Act of 1985. S. 1211 included three provisions designed to make private health insurance more readily available to many of those now uninsured: First, health insurance premium tax deductions for self-employed and unemployed persons; second, mandatory catastrophic loss protection for employer-sponsored health insurance plans; and third, time limited continuity of coverage options for those who lose eligibility for employer-sponsored insurance. The continuity of coverage provision was included in the fiscal year 1986 reconciliation bill signed into law by the President.

Today, Mr. President, I introduce three bills that pick up where last session's efforts left off: S. 2484, the Uninsured Workers' Health Insurance Act of 1986; S. 2485, the Health Equity and Incentives Reform Act of 1986; and S. 2486, the Health Plan Promotion Act of 1986. Each of these bills would substantially increase the ability of Americans to purchase private health insurance plans.

These proposals offer three alternative approaches to reducing the number of Americans without health plan coverage and providing equity in the tax treatment of health plan premiums. All three are compatible with the wider ranging S. 2403, the Access to Health Care Act of 1986, introduced on May 1, 1986, by myself and my distinguished colleagues, Senator EDWARD KENNEDY, Senator JOHN HEINZ, and Senator DONALD RIEGLE. A companion bill to S. 2403 has been introduced in the House of Representatives by the chairman and ranking minority member of the Ways and Means Health Subcommittee, Mr. FORTNEY STARK and Mr. WILLIS GRADISON.

This cooperation among Members of both Chambers of the Congress and both political parties reflects the depth of our mutual concern over our increasing failure to provide access to adequate health care for 37 million Americans. While specific proposals may differ in their approach to this problem, there is an emerging consensus, in the Congress and across the Nation, that there is a Federal role in assuring all Americans adequate access to quality health services.

Mr. President, I introduce these proposals in the wake of the tax reform bill, which has been reported by the Senate Finance Committee. The Finance Committee measure includes a provision allowing self-employed people to deduct 50 percent of the cost of their health plan coverage from their taxable income. This is an important step forward, but the tax reform bill does not address any of the other problems I have outlined in the current tax treatment of health insurance.

In the spirit of equity through tax reform, these three bills offer somewhat different approaches to solving these problems. Each bill conforms to the same set of principles: increasing equity and incentives for efficiency, reducing costs to the taxpayers, and eliminating the requirement that individuals be covered by employer-paid health insurance in order to receive a Federal subsidy for health plan coverage. I offer these varied ideas as alternatives to achieving the same end. Each deserves discussion by my colleagues in the Congress and by the providers and consumers of health services. I look forward to that discussion, and it is my hope that one of these approaches will be enacted into law this year.

THE UNINSURED WORKERS' HEALTH INSURANCE ACT OF 1986

S. 2484, the Uninsured Workers' Health Insurance Act of 1986 primarily targets heads of households who are not eligible for employer-sponsored insurance.

S. 2484 maintains the existing tax exclusion for employer-paid health insurance premiums while enabling self-employed people to deduct health insurance premiums from their taxable income. Other individuals not eligible for employer-paid health benefit plans are allowed a refundable tax credit for the purchase of health plan coverage with the value of the credit declining as the taxpayer's adjusted gross income increases. The refundable tax credit targets the additional subsidies where they are needed the most: for individuals and families with incomes under $30,000. Those with greater incomes would receive no Federal subsidy.

Mr. President, if we were to build a Federal health plan premium tax policy from scratch, the income adjusted refundable tax credit would be the way to go. However, since we have had a tax policy in effect for over 30 years that provides a tax exclusion for all income groups, adoption of this approach for all taxpayers would prove a radical departure. I acknowledge this political reality and, instead, limit the approach to those individuals not currently offered employer-sponsored health insurance.

S. 2484 has four basic provisions:

First, any individual who is not eligible for employer-sponsored insurance and who is not covered by a Federal health program is eligible for a refundable tax credit for the payment of premiums for health plan coverage.

Employees, employee spouses, and dependents who are eligible for employer-sponsored insurance are not eligible for this refundable tax credit. For purposes of qualifying for the credit, insurance provided through the employer but without an employer

contribution does not qualify as employer-sponsored insurance.

Second, the amount of the refundable tax credit available in any case depends on income and insurance coverage status, for example, individual, family.

AMOUNT OF REFUNDABLE TAX CREDIT

Income	Insurance Coverage Status	
	Individual	Family
Not over $20,000	$400	$800
$20,001 to $25,000	200	400
$25,001 to $30,000	100	200
Over $30,000		

Third, this act enables the owners of unincorporated businesses and self-employed persons to deduct health insurance premiums from their taxable income.

Fourth, the changes in Federal tax law required by this act shall apply to taxable years beginning after December 31, 1985.

No source of funding for S. 2484 has been identified here to make this proposal budget neutral. If, however, this approach generates support among my colleagues in the Congress, a funding mechanism such as the health benefit tax cap will be put forward.

Mr. President, this bill was drafted in consultation with Gail Wilensky, Ph.D., vice president for health affairs at Project Hope and one of our Nation's leading health economists, and I greatly appreciate her assistance.

THE HEALTH EQUITY AND INCENTIVES REFORM ACT OF 1986

S. 2485, the Health Equity and Incentive Reform Act of 1986, while also using a refundable tax credit mechanism to provide a health insurance subsidy, is not as radical in its approach as the previous bill. Higher income individuals and families as well as poor people would receive a limited refundale tax credit. Thus, this bill not only provides a Federal tax incentive to those not offered employer-sponsored insurance, but also limits the current open-ended Federal subsidy for employer-sponsored health insurance.

S. 2485 includes the following specific provisions:

First, the Internal Revenue Code is modified to state that all employer contributions to employee health benefits, other than compensation for occupationally related illness or injury, are included in the wages and gross incomes of employees subject to Federal income and FICA taxes. Employers will assign all contributions to employee health benefits to individual employees using equitable actuarial methods.

Second, every lawful resident of the United States is entitled to receive a refundable tax credit, or direct payment to his or her health plan, equal to 40 percent of his or her payments up to 40 percent of the limit on subsidized premiums.

Third, the limit on subsidized premiums is $65 per month per household member covered under the plan up to a maximum of $195, in 1987. The limit in subsequent years is increased in proportion to GNP per capita. Thus, the cost to the Federal budget will grow with the GNP, not faster.

Fourth, in 1989, these limits would be replaced by a set of limits based on the ages of the insured and any other important factors that help predict medical costs per person. A uniform limit on subsidized premiums would put a greater financial burden on older groups with predictably higher costs. This provision requires that, starting no later than 1989, the limits would be adjusted for the age of the covered people and for other relevant factors that reflect relative need for medical services.

Fifth, a qualified health benefit plan will have to meet certain minimum conditions: First, catastrophic expense protection; and second, the option for the subscriber to cover his or her dependents.

Sixth, This credit is not available to Medicare and Medicaid beneficiaries, and active duty military and their dependents. Their arrangements are not changed by this legislation.

Seventh, the changes in Federal tax law required by this act shall apply to taxable years beginning after December 31, 1986.

Mr. President, I am very grateful to Prof. Alain C. Enthoven, Ph.D., Marriner S. Eccles Professor of Public and Private Management at Stanford University, for his substantial contribution to S. 2485, the Health Equity and Incentives Reform Act of 1986.

THE HEALTH PLAN PROMOTION ACT OF 1986

Mr. President, of the three bills I am introducing today, S. 2486, the Health Plan Promotion Act of 1986, comes closest to maintaining the structure of health benefit tax deductions with which employers and employees have become familiar over the last 30 years. While the bill requires that all employer-paid health plan premiums be included in gross income, employers will be allowed a deduction for the value of the premiums they pay, and all taxpayers will be allowed a nonitemized deduction from gross income for the value of premiums whether they are paid by the taxpayer or by the taxpayer's employer.

S. 2486 contains the following key provisions:

First, the Internal Revenue Code is modified to state that all employer contributions to employee health benefits other than compensation for occupational related illness or injury, are to be included in the wages and gross incomes of employees subject to Federal income and FICA taxes. Employers will assign all contributions to employee health benefits to individual employees using equitable actuarial methods.

Second, employers are permitted to deduct the cost of health insurance premiums for employees as a business expense.

Third, in calculating taxable income, individuals may claim a nonitemized deduction for the cost of their accident and health insurance to the extent such costs do not exceed specified levels. Such costs would be deductible whether paid by the taxpayer or the taxpayer's employer.

Fourth, the deduction would not be available to Medicaid or Medicare recipients.

Fifth, for single taxpayers, the deductible level is $75 a month—$900 per year. For married taxpayers, the deductible level is $175 a month—$2,100 per year.

Sixth, the current section 213 deduction threshold for medical expenses is raised from 5 percent of adjusted gross income to 10 percent of adjusted gross income. Amounts paid in excess of the deductable levels specified in paragraph 5 would be deductible as a section 213 expense.

Seventh, a qualified health benefit plan will have to meet certain minimum conditions: First, catastrophic protection; and second, at least 20 percent cost sharing by the beneficiary.

Eighth, the amendments to Federal tax law required by this act shall apply to taxable years beginning after December 31, 1986.

Mr. President, I would like to anticipate and address now some potential objections to these proposals.

Some may observe that passage of one of these bills by itself will not solve the problem of uninsured people. That is correct. Even with a subsidy, some will choose not to buy insurance. Others will be unable to because it is not available. Additional steps are needed to assure that all Americans have access to health plan coverage. This would be an appropriate area for action by the States.

Mr. President, I have recently introduced S. 2403, The Access to Health Care Act of 1986, which encourages the establishment of statewide health insurance pools to provide coverage for those people with preexisting medical conditions. The bill also requires State plans for providing medical care to people uninsured for other reasons. These State plans may take any of a number of different approaches. They might modify Medicaid eligibility rules, or establish other types of State health insurance pools, or in other ways give all their citizens the subsidized opportunity to buy health care coverage. The Federal subsidies proposed in these bills would be of substantial help to such State efforts.

The argument has been made that a limit on tax-free employer contributions would destroy group health insurance. That is not correct. We have a great deal of group insurance based on limited employer contributions and cost-conscious choice by employees. The largest example, the Federal Employees Health Benefits Program, covering about 10 million people, has been in successful operation for 25 years. Group health insurance does not depend on unlimited subsidies. On the other hand, a limited subsidy is needed to encourage even the healthy to insure. This is especially true in the case of poor people who, if they had to pay the full premium cost, might be tempted to take a chance on going uninsured. That is why these bills replace a Federal policy of unlimited subsidies to people who have employer-paid health insurance and nothing for those who do not, with limited subsides for all.

Many may object to this proposal because it would raise taxes. This is understandable. Nobody likes to have their taxes increased. But if we are to deal with the problem of over 37 million uninsured, it is going to be necessary to find the funding to offer all Americans access to health plan coverage.

It is undesirable to raise taxes on income because of what it does to incentives to work, save and invest. We don't want to raise marginal income tax rates. In fact, the tax reform bill we have just unanimously voted out of the Senate Finace Committee reduces the marginal tax rates and substantially eliminates other types of tax deductions. Taxing excess employer contributions to health insurance is logical and desirable because of the need to make everyone cost conscious in their choice of a health plan.

If tax subsidies to health insurance are important to business executives and union members, as they have told me, they must be even more important to the part-time employed, the intermittently employed, the self-employed, the unemployed, and people employed in industries whose employers do not provide health insurance.

Why, Mr. President, shouldn't they get at least the same tax subsidies for health insurance as the Tax Code allows for the well-to-do with employer-paid insurance. If the answer is that the budget can't stand the extra cost, why shouldn't we divide equally whatever amount the budget can stand?

In order to help others understand the current Federal subsidy for a typical health benefit plan and how this subsidy would change under each of the three bills I am introducing, I have provided an example set of calculations. As these calculations show, each of the bills I am introducing today provides a reasonable, limited subsidy where none currently exists to all Americans who purchase nonemployer-sponsored health benefit plan coverage.

Mr. President, I ask unanimous consent that the example calculations I have provided and the three bills be printed in consecutive order in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXAMPLE: CALCULATIONS OF TAX SUBSIDIES FOR HEALTH INSURANCE UNDER CURRENT LAW, S. 2484, S. 2485, AND S. 2486

The following calculations are for two similar individuals: married, filing jointly, with 3 household members, income equal to $25,000, with family health insurance premiums of $200 per month. The premium for Person A is paid for by employer and excluded from taxable income under current law. Person B does not have employer-sponsored insurance and currently pays the full premium out of after-tax dollars.

	Monthly	
	Tax subsidy to A	Tax subsidy to B
Current law	$48.58	0
S. 2484, the Uninsured Worker's Health Insurance Act of 1986	48.58	$33.33
S. 2485, the Health Equity and Incentives Act of 1986	78.00	78.00
S. 2486, the Health Plan Promotion Act of 1986	43.08	43.08

S. 2484

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Uninsured Workers' Health Insurance Act of 1986".

SEC. 2. REFUNDABLE CREDIT FOR HEALTH INSURANCE PREMIUMS OF UNINSURED WORKERS.

(a) IN GENERAL.—Subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to refundable credits) is amended by redesignating section 35 as section 36 and by inserting after section 34 the following new section:

"SEC. 35. HEALTH INSURANCE PREMIUMS OF UNINSURED WORKERS.

"(a) IN GENERAL.—In the case of an uninsured worker, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the amount of qualified health insurance premiums paid by such worker during such taxable year which does not exceed the applicable amount.

"(b) APPLICABLE AMOUNT.—

"(1) IN GENERAL.—For purposes of this section, the applicable amount shall be determined in accordance with the following table:

"If the uninsured worker's taxable income is:	*The applicable amount is:*
Not over $20,000	$400
Over $20,000 but not over $25,000	200
Over $25,000 but not over $30,000	100
Over $30,000	0.

"(2) APPLICABLE AMOUNT FOR FAMILY COVERAGE.—In the case of family coverage, each applicable amount set forth in the table in paragraph (1) shall be doubled.

"(c) DEFINITIONS.—For purposes of this section—

"(1) UNINSURED WORKER.—

"(A) IN GENERAL.—The term 'uninsured worker' means any individual—

"(i) who is not eligible for any employer sponsored health plan and is not covered by any Federal health program, and

"(ii) whose spouse is not eligible for family coverage under any employer sponsored health plan.

"(B) EMPLOYER SPONSORED HEALTH PLAN.—

"(i) IN GENERAL.—The term 'employer sponsored health plan' means any accident or health plan with respect to which employer contributions are excluded from gross income of the employee under section 106.

"(ii) UNFUNDED CONTINUATION AND CONVERSION OPTIONS NOT INCLUDED.—The term 'employer sponsored health plan' does not include any insurance provided through the employer on the basis of continuation coverage and conversion coverage if provided without such employer's contribution.

"(C) FEDERAL HEALTH PROGRAM INCLUDES MEDICAID.—The term 'Federal health program' includes any State plan approved under title 19 of the Social Security Act.

"(2) QUALIFIED HEALTH INSURANCE PREMIUMS.—The term 'qualified health insurance premiums' means premiums for insurance covering medical care (as defined in section 213(d)(1)).

"(3) FAMILY COVERAGE.—The term 'family coverage' means coverage for—

"(A) the uninsured worker,

"(B) the spouse of the uninsured worker, and

"(C) any dependent of the uninsured worker (as defined in section 152).

"(d) MARRIED COUPLE MUST FILE JOINT RETURN.—

"(1) IN GENERAL.—If the uninsured worker is married at the close of the taxable year, the credit provided by this section shall be allowed only if the uninsured worker and the spouse of such worker file a joint return for the taxable year.

"(2) MARITAL STATUS.—Marital status shall be determined under section 143.".

"(b) COORDINATION WITH OTHER SECTIONS.—Subsection (e) of section 213 of the Internal Revenue Code of 1954 (relating to deduction for medical, dental, etc., expenses) is amended to read as follows:

"(e) COORDINATION WITH OTHER SECTIONS.—For purposes of this section—

"(1) EXCLUSION OF INSURANCE PREMIUM EXPENSES ALLOWABLE AS CREDIT AGAINST TAX.—The amount paid during the taxable year for medical care shall be reduced by the amount allowable to the taxpayer as a credit under section 35.

"(2) EXCLUSION OF AMOUNTS ALLOWED FOR CARE OF CERTAIN DEPENDENTS.—Any expense allowed as a credit under section 21 shall not be treated as an expense paid for medical care.".

(c) CLERICAL AMENDMENT.—The table of sections for subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out the last item and inserting in lieu thereof the following new items:

"Sec. 35. Health insurance premiums of uninsured workers.

"Sec. 36. Overpayments of tax.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1986.

SEC. 3. HEALTH INSURED COSTS OF SELF-EMPLOYED INDIVIDUALS MADE DEDUCTIBLE.

(a) IN GENERAL.—Section 213 of the Internal Revenue Code of 1954 (relating to deduction for medical, dental, etc. expenses) is amended by adding at the end thereof the following new subsection:

"(f) SPECIAL RULE FOR SELF-EMPLOYED INDIVIDUALS OF UNINCORPORATED TRADES OR BUSINESSES.—In the case of an individual who is a self-employed individual (within the meaning of section 401(c)(1)) who owns the entire interest in an unincorporated trade or business—

"(1) there shall be allowable as a deduction for any taxable year an amount equal to the expenses paid during such taxable year for insurance which constitutes medical care for the individual, his spouse, or dependents,

"(2) no other deduction shall be allowable under this chapter with respect to such amount, and

"(3) such amount shall not be taken into account under subsection (a).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1985.

S. 2485

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Health Equity and Incentives Reform Act of 1986".

SEC. 2. INCLUSION OF EMPLOYER CONTRIBUTIONS TO HEALTH PLANS IN INCOME AND IN SOCIAL SECURITY WAGE BASE.

(a) INCLUSION IN INCOME.—Section 106 of the Internal Revenue Code of 1954 (relating to contributions by employer to accident and health plans) is amended to read as follows:

"SEC. 106. CONTRIBUTIONS BY EMPLOYER TO ACCIDENT AND HEALTH PLANS.

"(a) IN GENERAL.—Except as otherwise provided in this section, contributions by the employer to accident or health plans for compensation (through insurance or otherwise) to his employees for personal injuries or sickness shall be included in gross income.

"(b) CONTRIBUTIONS WITH RESPECT TO OCCUPATIONALLY RELATED ILLNESS OR INJURY.—Gross income does not include contributions referred to in subsection (a) if such contributions are made—

"(1) with respect to coverage under any workmen's compensation act.

"(2) for in-plant first aid, or

"(3) for treatment of occupationally related illness or injury.

"(c) CONTRIBUTIONS FOR MEDICARE RECIPIENTS.—With respect to any individual described in section 35(q) for any month, gross income does not include contributions referred to in subsection (a) to the extent such contributions (other than contributions made with respect to coverage under any workmen's compensation act) do not exceed the amount described in section 35(d)(1)(A)(i).".

(b) INCLUSION IN SOCIAL SECURITY WAGE BASE.—

(1) TAX BASE.—Section 3121(a) of the Internal Revenue Code of 1954 (defining wages) is amended by adding at the end thereof the following:

"Nothing in this subsection shall exempt from 'wages' as used in this chapter any employer contribution described in section 106 which is not excluded from gross income under subsection (b) or (c) of such section.".

(2) BENEFIT BASE.—Section 209 of the Social Security Act is amended by adding at the end thereof the following:

"Nothing in any of the foregoing provisions of this section shall exempt from 'wages' as used in this chapter any employer contribution described in section 106 of the Internal Revenue Code of 1954 which is not excluded from gross income under subsection (b) or (c) of such section.".

(c) EFFECTIVE DATES.—

(1) GROSS INCOME.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1986.

(2) SOCIAL SECURITY WAGE BASE.—The amendments made by subsection (b) shall apply to remuneration paid after December 31, 1986.

SEC. 3. REFUNDABLE CREDIT FOR PREMIUMS FOR CERTAIN HEALTH PLANS.

(a) IN GENERAL.—Subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to refundable credits) is amended by redesignating section 35 as section 36 and by inserting after section 34 the following new section:

"SEC. 35. PREMIUMS FOR CERTAIN HEALTH PLANS.

"(a) IN GENERAL.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 40 percent of the qualified health premiums of the taxpayer.

"(b) ASSIGNMENT OF CREDIT FOR PAYMENT OF PLAN PREMIUMS.—Any taxpayer may designate for the taxable year (at such time, in such manner, and subject to such conditions as are provided by regulations prescribed by the Secretary) payment of the credit allowed under subsection (a), to the extent of any overpayment of tax for such taxable year, to any qualified health care financing and delivery plan.

"(c) QUALIFIED HEALTH PREMIUMS.—For purposes of this section, the term 'qualified health premium' means, with respect to any month during the taxable year, the amount paid or incurred by or on behalf of the taxpayer as a premium to a qualified health care financing and delivery plan for coverage under such plan for such month.

"(d) MONTHLY LIMITATION ON PREMIUMS ELIGIBLE FOR CREDIT.—

"(1) IN GENERAL.—The amount of qualified health premiums taken into account under this section with respect to any month shall not exceed the lesser of—

"(A) the product of—

"(i) $65, and

"(ii) the number of individuals in the taxpayer's family who receive (by reason of the taxpayer) coverage under the plan at any time during such month, or

"(B) $195.

"(2) FAMILY MEMBERS.—For purposes of paragraph (1), the term 'taxpayer's family' means—

"(A) the individual,

"(B) the spouse of the individual, but only if such individual and spouse file a joint return for the taxable year in which the month occurs, and

"(C) each dependent child or such individual for such month.

"(e) QUALIFIED HEALTH CARE FINANCING AND DELIVERY PLAN.—For purposes of this section, the term 'qualified health care financing and delivery plan' means any plan which meets the requirements of paragraphs (1), (2), (3), (4), and (5).

"(1) BASIC HEALTH SERVICES.—

"(A) IN GENERAL.—Subject to copayments, coinsurance, and deductibles, a plan meets the requirements of this paragraph only if such plan provides coverage for at least physician and hospital inpatient and outpatient services which are reasonable and necessary for the diagnosis and treatment of illness and injury.

"(B) USE OF CONTRACTING PROVIDERS.—

"(i) IN GENERAL.—A plan shall not fail to meet the requirements of this paragraph if payment for services described in subparagraph (A) is made only if such services are provided by selected contracting providers.

"(ii) SUBSCRIBERS MUST BE NOTIFIED OF CONTRACTING PROVIDERS.—Clause (i) shall apply only if the subscribers to this plan are informed before subscribing as to the location and identities of the contracting providers.

"(iii) EXCEPTION FOR EMERGENCY SERVICES.—Clause (i) shall not apply to medically necessary emergency services if a contracting provider is unavailable.

"(C) NO EXCLUSION, ETC., BASED ON PRIOR MEDICAL CONDITION.—After the expiration of 6 months following the first day of plan coverage of any individual, there shall be no exclusions or restrictions on the coverage for services described in subparagraph (A) based upon the prior medical condition of such individual.

"(2) CATASTROPHIC EXPENSE PROTECTION.—

"(A) IN GENERAL.—A plan meets the requirements of this paragraph only if such plan provides for payment of 100 percent of the cost of basic health services provided during any calendar year with respect to any subscriber to the extent the subscriber's out-of-pocket expenses for such costs would otherwise exceed $3,500 for such year.

"(B) CERTAIN COSTS NOT TAKEN INTO ACCOUNT—For purposes of subparagraph (A), there shall not be taken into account any cost—

"(i) for which the subscriber is compensated for by insurance or otherwise, or

"(ii) which is attributable to a service rendered by a provider not authorized to provide such service under the plan.

"(C) SERVICE WITH RESPECT TO SUBSCRIBER.—For purposes of subparagraph (A), a service is provided with respect to a subscriber if such service is provided to the subscriber or any individual who is covered by the plan by reason of the subscriber.

"(3) CANCELLATION PROHIBITION.—A plan meets the requirements of this paragraph only if coverage provided under the plan may not be cancelled for any reason based upon the status or actions of the covered individuals, other than nonpayment of premiums.

"(4) COVERAGE FOR DEPENDENTS.—A plan meets the requirements of this paragraph only if the plan meets the requirements of subparagraphs (A), (B), (C), and (D).

"(A) IN GENERAL.—A plan meets the requirements of this subparagraph only if the plan provides that—

"(i) each subscriber has the option to purchase coverage under the plan for the spouse and each dependent child of the subscriber, and

"(ii) if such option is exercised, such coverage shall commence at the time of marriage, birth, or adoption, as the case may be.

"(B) DISABLED DEPENDENTS.—

"(i) IN GENERAL.—A plan meets the requirements of this subparagraph only if the plan provides that coverage under the plan shall continue for any qualified disabled dependent (in the same manner as if he were a dependent child) for so long as such dependent—

"(I) continues to be a qualified disabled dependent, and

"(II) resides in the same household as the subscriber.

"(ii) QUALIFIED DISABLED DEPENDENT.—For purposes of clause (i), the term 'qualified disabled dependent' means any individual—

"(I) who would (but for subsection (f)(1)(B)(i)) be a dependent child of the subscriber,

"(II) who is disabled, and

"(III) who became disabled during a period in which the individual was dependent child of the subscriber.

"(iii) DISABLED DEFINED.—For purposes of this subparagraph, an individual is disabled if the individual is unable to engage in substantial gainful activity.

"(D) ILLNESSES COMMENCING DURING DEPENDENCY.—

"(i) IN GENERAL.—A plan meets the requirements of this subparagraph only if the plan provides that coverage under the plan with respect to any illness shall continue for any qualified ill dependent (in the same manner as if such dependent were a dependent child) for the duration of the illness.

"(ii) QUALIFIED ILL DEPENDENT.—For purposes of clause (i), the term 'qualified ill dependent' means any individual—

"(I) who would (but for subsection (f)(1)(B)(i)) be a dependent child of the subscriber, and

"(II) who became ill during a period in which the individual was a dependent child of the subscriber.

"(E) REGULATIONS.—The Secretary shall by regulation establish criteria for determining onset and duration of disability and illness for purposes of this paragraph.

"(f) RULES RELATING TO DEPENDENT CHILDREN.—For purposes of this section—

"(1) IN GENERAL.—The term 'dependent child' means, with respect to a subscriber, an individual who is—

"(A) a dependent of such subscriber (within the meaning of section 152), and

"(B) a child of the subscriber (within the meaning of section 151(e)(3), who—

"(i) has not attained the age of 19, or

"(ii) is a student (within the meaning of section 151(e)(4)).

"(2) DETERMINATION OF DEPENDENCY.—For purposes of subsection (d)(2)(C), an individual shall be treated as a dependent child for any month if such individual is a dependent child for the calendar year in which the month occurs.

"(g) NO CREDIT FOR INDIVIDUALS COVERED BY MEDICARE.—An individual shall not be taken into account under subsection (d)(2) for any month if, for such month, such individual is entitled to benefits under part A of title XIII of the Social Security Act.

"(h) INFLATION ADJUSTMENT OF DOLLAR AMOUNTS.—

"(1) IN GENERAL.—Not later than December 15 of 1987 and each subsequent calendar year, the Secretary shall prescribe dollar amounts which shall apply in lieu of the dollar amounts contained in subsection (d)(1) with respect to taxable years beginning in the succeeding calendar year.

"(2) METHOD OF PRESCRIBING DOLLAR AMOUNTS.—The dollar amounts which under paragraph (1) are to apply in lieu of the dollar amounts contained in subsection (d)(1) with respect to taxable years beginning in any calendar year shall be determined by increasing each such dollar amount by the inflation adjustment for such calendar year (rounded off to the next highest dollar).

"(3) INFLATION ADJUSTMENT.—For purposes of paragraph (2), the inflation adjustment for any calendar year is the percentage (if any) by which—

"(A) the average per capita GNP for the preceding calendar year, exceeds

"(B) the average per capita GNP for calendar year 1985.

"(4) AVERAGE PER CAPITA GNP FOR ANY CALENDAR YEAR.—For purposes of paragraph (3), the average per capita GNP for any calendar year is the average of the per capita Gross National Product for the 36-month period ending on June 30 of such calendar year.

"(5) GROSS NATIONAL PRODUCT.—For purposes of paragraph (4), the term 'Gross National Product' means the Gross National Product published by the Department of Commerce.

"(i) NONRESIDENT ALIENS INELIGIBLE FOR CREDIT.—No credit shall be allowed under this section to any nonresident alien.".

(b) INFORMATION PROVIDED TO SUBSCRIBERS.—Subsection (a) of section 6051 of the Internal Revenue Code of 1954 (relating to receipts for employees) is amended—

(1) by striking out "and" at the end of paragraph (6),

(2) by striking out the period at the end of paragraph (7) and inserting in lieu thereof ", and", and

(3) by adding at the end thereof the following new paragraph:

(8) the total amount of employer contributions on behalf of the employee for each month of such calendar year to a qualified health care financing and delivery plan (as defined in section 35(e)) and the type coverage of the employee under such plan for each such month.".

(c) CLERICAL AMENDMENT.—The table of sections for subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 35. Premiums for certain health plans.

"Sec. 36. Overpayments of tax.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1986.

(e) STUDY ON ADJUSTMENT OF MONTHLY LIMITATIONS.—

(1) IN GENERAL.—The Secretary of Health and Human Services shall study and report to Congress, not later than March 31, 1988, on alternative methods for adjusting the monthly limitation on premiums eligible for credit under section 35(d) of the Internal Revenue Code of 1954 so as to take into account the ages of different individuals and other actuarial factors (such as those described in section 1876(a)(1)(B) of the Social Security Act) that reflect the relative cost of health care services for different individuals.

(2) CONSIDERATIONS.—In doing the study, the Secretary shall—

(A) consider the practicality of administration of alternative methods and the equity and incentives to individuals in different age and actuarial groups in each method, and

(B) only consider adjustments that are designed to produce the same aggregate tax expenditures as would be produced if there were no changes in section 35 of the Internal Revenue Code of 1954.

SEC. 4 PROVIDING PORTABILITY OF HMO BENEFITS FOR EMPLOYEES.

Section 1310(a) of the Public Health Service Act (42 U.S.C. 300e-9(a)) is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding paragraph (2), if an employer or State or political subdivision thereof described in paragraph (1) employs an individual who, immediately preceding the date of the employment, is enrolled with a qualified health maintenance organization and who continues to reside in the area served by the organization, such employer, State, or political subdivision thereof shall include in the health benefits plan offered to such employee the option of continuing membership in such qualified health maintenance organization and the amount of the employer's contribution with respect to such plan and such employee may not be less than the smallest contribution the employer, State, or political subdivision thereof would otherwise make with respect to another qualified health maintenance organization offered by the employer, State, or political subdivision thereof to such employee.".

S. 2486

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE.

This Act may be cited as the "Health Plan Promotion Act of 1986".

SEC. 2. INCLUSION OF EMPLOYER CONTRIBUTIONS TO ACCIDENT AND HEALTH PLANS IN GROSS INCOME.

(a) INCLUSION IN GROSS INCOME.—Part II of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically included in gross income) is amended by adding at the end thereof the following new section:

"SEC. 89. CONTRIBUTIONS BY EMPLOYER TO ACCIDENT AND HEALTH PLANS.

"Gross income includes contributions by the employer to accident and health plans for compensation (through insurance or otherwise) to his employees for personal injuries or sickness.".

(b) REPEAL OF EXCLUSION.—Section 106 of the Internal Revenue Code of 1954 (relating to contributions by employer to accident and health plans) is repealed.

(c) CONFORMING AMENDMENTS.—

(1) Subsection (c) of section 104 of the Internal Revenue Code of 1954 (relating to compensation for injuries or sickness) is amended to read as follows:

"(c) CROSS REFERENCE.—

"For exclusion of part of disability retirement pay from the application of subsection (a)(4) of this section, see section 1403 of title 10, United States Code (relating to career compensation laws).".

(2) Paragraph (20) of section 7701(a) of such Code (relating to definitions) is amended by striking out "sections 104, 105, and 106" and inserting in lieu thereof "sections 89, 104, and 105".

(d) CLERICAL AMENDMENT.—The table of sections for part II of subchapter B of chapter 1 of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new item:

"Sec. 89. Contributions by employer to accident and health plans.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1986.

SEC. 3. DEDUCTION FOR COSTS OF ACCIDENT AND HEALTH INSURANCE.

(a) IN GENERAL.—Section 63 of the Internal Revenue Code of 1954 (defining taxable income) is amended—

(1) in subsection (b)(1)—

(A) by striking out "and" at the end of subparagraph (B),

(B) by inserting after subparagraph (C) the following new subparagraph:

(D) the direct accident and health insurance deduction provided by subsection (j), and",

(2) in subsection (f)—

(A) by striking out "and" at the end of paragraph (2),

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a comma and "and", and

(C) by adding at the end thereof the following new paragraph:

"(4) the direct accident and health insurance deduction.", and

(3) by adding at the end thereof the following new subsection:

"(j) DIRECT ACCIDENT AND HEALTH INSURANCE DEDUCTION.—

"(1) DEDUCTION ALLOWED.—In the case of any eligible individual, the amount of premiums paid for qualified accident or health insurance shall be allowed as a direct accident and health insurance deduction.

"(2) LIMITATION ON DIRECT DEDUCTION ALLOWED.—

"(A) IN GENERAL.—The amount allowable as a direct accident and health insurance deduction under paragraph (1) to any eligible individual shall not exceed—

"(i) $75 per month for qualified accident or health insurance covering such individual only,

"(ii) $175 per month for such insurance covering such individual and such individual's spouse, or

"(iii) $225 per month for such insurance covering such individual and such individual's family.

"(B) HUSBAND AND WIFE.—In the case of a husband and wife filing separate returns, clauses (ii) and (iii) of subparagraph (A) shall be applied by substituting '$137.50' and '$112.50' for '$175' and '$225', respectively.

"(C) COST-OF-LIVING ADJUSTMENT.—

"(i) IN GENERAL.—The dollar amounts specified in clauses (i) and (ii) of subparagraph (A) and subparagraph (B) shall be increased for months in each calendar year after 1987 by the cost-of-living adjustment for such calendar year.

"(ii) COST-OF-LIVING ADJUSTMENT.—For purposes of clause (i), the cost-of-living adjustment for any calendar year is the percentage (if any) by which—

"(I) the CPI for the preceding calendar year, exceeds,

"(II) the CPI for the calendar year 1986.

"(iii) CPI FOR ANY CALENDAR YEAR.—For purposes of clause (ii), the CPI for any calendar year is the average of the Consumer Price Index as of the close of the 12-month period ending on September 30 of such calendar year.

"(iv) CONSUMER PRICE INDEX.—For purposes of clause (iii), the term 'Consumer Price Index' means the last Consumer Price Index for all-urban consumers published by the Department of Labor.

"(D) COVERAGE FOR ONLY PART OF MONTH.—If an eligible individual is covered under qualified accident or health insurance for only a portion of a month, the amount allowable under paragraph (1) as a deduction with respect to such month shall be an amount which bears the same ratio to the applicable dollar amount under subparagraph (A) for such month as such portion bears to the entire month.

"(E) FAMILY.—For purposes of this paragraph, the term 'family' means, with respect to any eligible individual, a spouse or a dependent (as defined in section 152) who receives coverage under qualified accident or health insurance by reason of a relationship to such individual.

"(F) MONTH.—For purposes of this paragraph, the term 'month' means a calendar month.

"(3) ELIGIBLE INDIVIDUAL.—For purposes of this subsection, the term 'eligible individual' means any individual who, with respect to any month, is not entitled to benefits under title XVIII of the Social Security Act or to medical assistance under a State medicaid plan approved under title XIX of such Act.

"(4) QUALIFIED ACCIDENT OR HEALTH INSURANCE.—For purposes of this section, the term 'qualified accident or health insurance' means any accident or health insurance which constitutes medical care (as defined in subparagraphs (A) and (B) of section 213(d)).

"(5) INSURANCE PAID BY INDIVIDUAL OR INDIVIDUALS'S EMPLOYER.—For purposes of paragraph (1), the amount of premiums for qualified accident or health insurance may be paid by the eligible individual or such individual's employer, or both.".

(b) EXCESS AMOUNTS DEDUCTIBLE UNDER SECTION 213.—

(1) IN GENERAL.—Subsection (a) of section 213 of the Internal Revenue Code of 1954 (relating to deduction for medical, dental, etc., expenses) is amended to read as follows:

"(a) ALLOWANCE OF DEDUCTION.—There shall be allowed as a deduction—

"(1) the amount of expenses paid during the taxable year, not compensated for by insurance or otherwise, for medical care of the taxpayer, his spouse, or a dependent (as defined in section 152), and

"(2) the amount allowable as a direct accident and health insurance deduction under section 63(j)(1) which exceeds the limitation imposed by section 63(j)(2),

to the extent that such amounts exceed 10 percent of adjusted gross income.".

(2) CONFORMING AMENDMENT.—Subparagraph (C) of section 213(d)(1) of such Code (defining medical care) is amended by striking out the period at the end thereof and inserting in lieu thereof a comma and "other than insurance, the premiums of which are subject to the provisions of section 68(j) and subsection (a)(2) of this section.".

(C) EFFECTIVE DATE.—The amendments made by this section shall apply to calendar months beginning after December 31, 1986, in taxable years ending after such date.

SEC. 4. SECTION 213 DEDUCTION THRESHOLD INCREASED TO 10 PERCENT.

(a) IN GENERAL.—Subsection (a) of section 213 of the Internal Revenue Code of 1954 (relating to deduction for medical, dental, etc., expenses) (as amended by section 3(b)(1) of this Act) is amended by striking out "5 percent" and inserting in lieu thereof "10 percent".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1986.

By Mr. BINGAMAN (for himself, Mr. ROCKEFELLER, Mr. MATSUNAGA, Mr. GLENN, Mr. BURDICK, Mr. MELCHER, Mr. BYRD, and Mr. BOREN):

S. 2487. A bill to provide grants to States for fellowships for individuals who have outstanding ability, demonstrate an interest in a teaching career, and will teach in areas of the State in which there is a shortage of quality elementary or secondary schoolteachers or in fields of study in which there is a shortage of quality elementary or secondary schoolteachers, or both, and for other purposes; to the Committee on Labor and Human Resources.

(The remarks of Mr. BINGAMAN and Mr. ROCKEFELLER and the text of the legislation appear earlier in today's RECORD.)

By Mr. KENNEDY (for himself, Mr. GRASSLEY, Mr. HEINZ, Mr. METZENBAUM, and Mr. GLENN):

S. 2489. A bill to improve the training of physicians in geriatrics; to the Committee on Labor and Human Resources.

GERIATRIC PHYSICIANS GRADUATE MEDICAL EDUCATION ACT

● Mr. KENNEDY. Mr. President, I wish to introduce the Geriatric Physicians Medical Education Act of 1986.

In recent years, the need for improving the training of physicians in geriatrics has become increasingly apparent. Major demographic changes are occurring within our aging society. For example, it has been projected that by the year 2000, 13 percent of Americans will be 65 years of age and older. About half of these individuals will be 75 years or older. Persons 85 years of age and older are the fastest growing category of the U.S. population; their number is expected to more than double by the end of the century.

Mr. President, in view of these remarkable changes in our society, it is essential that tomorrow's physicians be prepared to meet the challenge of caring for our elderly citizens. Although we have experienced an enormous growth of knowledge regarding the diagnosis and treatment of diseases of the elderly, we have not devoted adequate attention to providing our young doctors in training with the necessary knowledge and skills to give our elderly the care which we are now capable of delivering.

The purpose of this bill is to rapidly increase the number of academic geriatricians available for the faculties of our teaching hospitals. We need to train a cadre of academic physicians to provide teaching in geriatrics to all physicians in training who take care of adults, and particularly to primary-care residents. The basic underlying principle is that every physician who cares for adults should be trained extensively in the principles of geriatrics.

Adequate attention to training of young physicians in geriatrics is lacking. The essence of the problem is as follows:

There are now only approximately 400 academic physicians who characterize themselves as geriatricians; a substantially smaller number have formal training in geriatrics.

There are now approximately 800 training programs for internal medicine and family practice residents. Since it is essential that all internists and family physicians (as well as all other physicians who care adults) receive extensive training in geriatrics, it is important that each training program have on its staff at least two geriatricians who are active clinician-teachers involved in teaching within the hospital, at ambulatory training sites, and at long-term care facilities.

There are now a maximum of 90 geriatricians per year produced by the less than 50 training programs located at VA hospitals and other teaching hospitals. Not all of these physicians remain in academic medicine. At this rate of training, assuming minimal attrition, it will require more than 15 years to fulfill just the current need for somewhere in excess of 1,600 academic geriatricians needed for resident training within our graduate medical education programs in family practice and internal medicine.

It is necessary to establish a goal of graduating at least 900 additional trainees over the next 5 years just to meet the teaching needs in geriatrics. Present programs which train geriatric faculty cannot expand their capacity because it is difficult to fund the additional faculty members needed to expand these training centers. Faculty practice income does not provide adequate support for their salary due to the great amount of physician time required for each patient visit and the absence of income-generating procedures in the practice of geriatrics.

Thus, in order to provide tomorrow's practicing physicians with the geriatric knowledge and skills which they need, it is necessary to make an investment today to provide salary for the faculty who will train these teachers, who in turn will educate tomorrow's physicians. The value of the additional $4 million per year which this bill authorizes will be infinitely multiplied by the impact that this new generation of academic geriatricians will have upon the residents they train in future decades.

Mr. President, I would also like to take this opportunity to emphasize another important aspect of this bill. This relates to provision of geriatric health care for the elderly mentally retarded persons. Currently, there is a major deficiency in the training of primary care physicians to provide medical services for this segment of the American population. As other Americans, mentally retarded persons are surviving to an ever-increasing older age. In fact, during the next 35 years, the number of mentally retarded persons over the age of 55 will double. There is a growing recognition among health policymakers and providers that our current health care resources are insufficient to meet current needs and certainly will be inadequate to meet future needs.

In the field of mental retardation, there is an existing technology that can be applied to the training of health care providers. We expect that this knowledge of lifelong disability and impairment can be drawn upon in the development of the geriatric training programs that will be established as a result of this legislation. The Joseph P. Kennedy, Jr., Foundation has been at the forefront of providing models in such training. An excellent example of this is the current program at the Shriver Center in Waltham, MA. This program, the first in the Nation, has served as a model for the cross-training of physicians in geriatrics and mental retardation. This effort represents only a beginning. I hope that you will join me in the future in pursuing other legislation to ensure appropriate care for the mentally retarded elderly.

The legislation which I am introducing today recognizes the key role of the primary care physician in bringing to our elderly the rapidly expanding body of knowledge in geriatrics and gerontology which will greatly enhance their quality of life. I urge my colleagues to support speedy passage of this bill so that we may meet the urgent requirement to improve geriatric training for the primary care physician without further delay.●

● Mr. HEINZ. Mr. President, today I am joining with my colleagues, Senators KENNEDY, GLENN, GRASSLEY, and METZENBAUM in introducing the Geriatric Physicians Graduate Education Act of 1986. This legislation addresses a critical problem: The shortage of adequately trained physicians to meet the needs of a growing elderly population. This bill is an attempt to solve the problem by providing funds to train medical school faculty, who can in turn educate medical students and practicing physicians about the special medical problems associated with aging.

Mr. President, medical schools now produce very few physicians with any substantive knowledge of geriatric medicine. The 1986 data from the American Medical Association show that of the 520,000 doctors in the United States, there are only 922 geriatricians. A national total of 922 geriatricians is a surprisingly small number in contrast to the 8,000 geriatricians needed by 1990, a need identified by the National Institute on Aging in its "Report on Education in Geriatrics and Gerontology," prepared for the Secretary of Health and Human Services in 1984.

Experts testifying before the Special Committee on Aging have presented evidence that those who care for older patients are not prepared to cope with the multiple complex diseases and conditions frequently associated with these patients. The result too often is inadequate care, including drug misuse, misdiagnosis, and even death.

The shortage of practitioners stems from a critical shortage of academic physicians with any extensive background in geriatrics. The 1984 NIA report stated that a minimum of 900 geriatric faculty will be needed before the year 2000. Unless we have well-trained teachers, no physicians will be appropriately trained to care for this Nation's older citizens. The Geriatric Physicians Graduate Education Act of 1986 would provide the financial support needed to train physicians as educators in the specialty of geriatrics.

The Geriatric Physicians Graduate Education Act of 1986 sets a goal of graduating at least 900 additional trainees over the next 5 years to meet minimum teaching needs for geriatrics. This legislation would strengthen existing geriatric fellowship programs and promote development of new programs providing for a total of 40 geriatric training centers.

This bill would provide funds for physicians participating in three specialized training programs. The first program provides the opportunity for midcareer physicians to come back to the classroom for a year of focused training in the special skills needed to care for older patients. Two additional programs would encourage new family medicine and general internal medicine specialists to enter 1 or 2 years of training in the practice of geriatrics. These physicians would also be trained to conduct the research needed to improve and expand our knowledge of proper care for older persons.

Mr. President, when Congress enacted the Health Research Extension Act—Public Law 99-158—it recognized the need to establish a comprehensive plan to train professionals in geriatrics. The conference report for Public Law 99-158 requires the Secretary of Health and Human Services report to Congress by March 1, 1987, with policy recommendations to provide for the specific numbers and types of health personnel that will be needed to meet the health needs of the elderly for the next four decades. This information will be very important. However, I feel that it would be a critical error to postpone establishment of training programs that we know are needed while we await these administration recommendations. The Geriatric Physicians Graduate Education Act of 1986 provides a responsible base on which to build a more comprehensive program for training health professionals in geriatrics today, not tomorrow.

Mr. President, this legislation focuses a critical need: Training physicians to teach their peers. The total cost to the Federal Government for this essential program is minimal—$20

million over the next 5 years—which I believe is a small investment with a big return not only in quality health care for older Americans but in potential savings for Medicare, Medicaid, and families of America's aged. We will not be supporting more doctors, but rather more appropriately trained doctors.

Mr. President, we cannot afford to spend Federal dollars for inappropriate and dangerous health care. I am strongly committed to making certain that this Nation develops programs which offer cost-effective means of improving the health care provided to older Americans. Last year, I introduced the Geriatric Research, Education and Training Act [GREAT], which would substantially increase funding for training a wide range of health personnel in the care of the aged. Also, when the Finance Committee considered reform of Medicare payments for graduate medical education during last year's reconciliation markup, we provided, at my request, an exemption for geriatric trainees to ensure that at least some funding would be available from Medicare to train physicians in caring for the elderly. Thus, today, I again offer my support for geriatrics by joining my colleagues in introducing the Geriatric Physicians Graduate Education Act of 1986.●

● Mr. METZENBAUM. Mr. President, I'm sure we're all aware of the good news—that today's Americans are living longer than ever before. Most of us are aware of the dramatic changes in longevity. We may know that, in 1900, the average life expectancy was only 45 years. On average now, however, males born in 1983 will live 71 years and females 78 years. And more and more people are living into their eighties, nineties, and even hundreds. It has been estimated that more than 1 of every 10 Americans—some 13 percent of us—will be over 65 by the year 2000.

Medical professionals believe that people can do much themselves to extend the healthy productive years of their extended lives by establishing good dietary habits, exercising regularly, not smoking, getting proper medical care.

The bad news is that extended life includes special health problems. Our primary care physicians will need to know more about the aging process. They will need to know more about how to prevent, treat, or postpone the diseases and adverse conditions that interfere with the quality of life in our later years.

As the "Baby Boomers" of yesteryear become the seniors of tomorrow, this Nation must prepare to deal with the inevitable health care needs of the growing numbers of older Americans.

Of major concern is the fact that less than 100 geriatricians are being produced each year. We have some 800 residency training programs in internal medicine and family practice, but there are fewer than 400 faculty-level geriatricians available to staff these programs.

As has been noted, the act we are introducing today would make funds available only to those fellowship programs that address the full range of geriatric health care, including comprehensive instruction in the physical and mental disabilities of the elderly, and patient management in acute and chronic care settings.

Recently, I introduced bills, cosponsored by several of my colleagues, which would alleviate the suffering of Alzheimer's disease victims and their families. Alzheimer's is one of the very tragic diseases that strikes older Americans with increasing frequency as longevity increases. It is a degenerative, neurological disorder, devastating in its effects—robbing victims of mind, memory, personality. The costs are staggering—physically, mentally, emotionally, and financially.

Diagnosis is difficult, and some of those said to have Alzheimer's disease have been found to have other conditions, reversible in nature. Primary care physicians need to know more about these conditions. It is essential that they be educated and skilled in diagnosis and treatment of the adverse health conditions of the elderly, and in strategies for maintaining quality of life throughout the extended years of life.

Comprehensive instruction by knowledgeable faculty should alleviate the shortage of such physicians, and promises thereby to provide better health care for our growing population of older Americans.

Therefore, I urge my colleagues to support this effort to insure that there will be an adequate supply of primary care physicians, and that they are equipped to manage the health care of the elderly, our own health care as we grow older.●

● Mr. GLENN. Mr. President, as the senior Democratic member of the Senate Special Committee on Aging, I am pleased to join Senators KENNEDY, HEINZ, GRASSLEY, and METZENBAUM in introducing the Geriatric Physicians Graduate Medical Education Act of 1986. This legislation represents an important step toward insuring that our Nation's health care providers are adequately trained in geriatric medicine.

We all know our population is aging and it is time for us to plan for these demographic changes. By the year 2025, 20 percent of our population will be over 65. Understanding this and keeping in mind that the largest percentage of the U.S. health care dollar is spent on the health needs of older Americans, simple common sense dictates that we make sure the providers taking care of our elderly are sufficiently trained in geriatric medicine.

The current critical shortage of trained health care professionals was fully documented in the 1984 National Institute on Aging "Report on Education and Training in Geriatrics and Gerontology." This report pointed out that a growing demand for hospital, long-term care, and community services will clearly accompany the demographic changes in the elderly population.

Currently there are fewer than 400 faculty level geriatricians available to staff more than 800 training programs in internal medicine and family practice. The bill we are introducing today will provide incentives—through faculty support—to expand current geriatric fellowship programs and to develop new programs. This approach should provide, within 5 years, a sufficient number of trained faculty members to staff all internal medicine and family practice residency training programs across the country.

Preparing now to have adequately trained personnel in the health care field is good public policy, not only because it is humane, but because it will also prove to be cost effective in terms of diagnosis, treatment, and prevention. Without adequate research and trained practitioners, we cannot expect the medical and technological breakthroughs needed to combat the various diseases and conditions that particularly affect the elderly, such as Alzheimer's disease and other dementias, arthritis, osteoporosis, coronary heart disease, hypertension, and cancer. Not only are these conditions devastating to the affected individual and his or her family and friends, but they are also costly to all of us.

I view the Geriatric Physicians Graduate Medical Education Act of 1986 as a first step up the ladder of success toward adequately training the health care providers who will be responsible for taking care of our everincreasing elderly population. This bill is important in that it addresses the weaknesses we currently face in the internal medicine and family practice field. However, it does not address the shortages of faculty adequately trained in geriatrics and gerontology who teach our nurses, geriatric dentists, social workers, occupational therapists, optometrists, pharmacists, podiatrists, respiratory therapists, and who would encourage researchers to concentrate on the biomedical, behavioral, and social problems of the elderly.

Last year, I joined Senator HEINZ in introducing S. 1100, the Geriatric Research, Education, and Training Act of 1985 [GREAT], which provides for a much more comprehensive framework to address our shortages in these other fields. Although it appears unlikely that Congress will act on the GREAT bill this year, I remain committed to

this legislation and will continue to work for its passage. However, I cannot and will not wait around for action on S. 1100. Therefore, I am strongly supporting the bill we are introducting today as a more modest, but necessary, first step.

I am proud to say that my home State of Ohio was the first State to provide financial support to each of its seven medical schools to establish offices of geriatric medicine. In 1977, the Ohio General Assembly enacted legislation which established a separate line item in the higher education budget to do this. Funding has risen from $350,000 in fiscal year 1979 to $1.27 million in fiscal year 1986. This experience has provided us with numerous innovative approaches to educating medical students and practitioners about the needs of elderly patients and has stimulated exciting new research.

The Congress can provide the leadership to ensure that Ohio's innovations in geriatric education are possible on a national basis. This experience needs to be replicated throughout the country if we hope to overcome the well-documented shortages of adequately prepared health care professionals to meet the challenge of our rapidly growing aging population. I believe that the Geriatric Physicians Medical Education Act of 1986 will help us meet this challenge head-on and I urge my colleagues in the Senate to join me in supporting this important legislation.●

By Mr. LAUTENBERG (for himself and Mr. BRADLEY):

S. 2490. A bill to provide a 5-year suspension of the duty on silk yarn; to the Committee on Finance.

SILK YARN DUTY SUSPENSION

● Mr. LAUTENBERG. Mr. President, I rise to introduce legislation to suspend temporarily the duty on imports of certain silk yarns. I am joined by my colleague Senator BRADLEY.

This legislation would assist a manufacturer of silk fabric in my State. Kalkstein Silk Mills of Paterson manufactures silk fabric, primarily for sale to makers of neckties. This silk fabric manufacturer must import its silk yarn. There is virtually no spinning of yarn in the United States.

Meanwhile, silk fabric and necktie manufacturing faces increasing import competition, particularly from Italy and other European countries. Imposing a tariff on silk yarn impairs the ability of silk mills in the United States to compete, without providing any measurable benefit to other domestic businesses.

Mr. President, there was a time when a substantial amount of silk fabric was woven in America, much of it in Paterson, where I was born. My father worked in a silk mill. After World War II, silk was replaced not by imports, but by new, man-made fabrics produced in the United States. The silk industry in New Jersey all but disappeared.

To survive in today's competitive environment, substantial investment in equipment is required. There is no reason to make matters even more difficult for a domestic manufacturer of silk fabric.

Mr. President, I have discussed this bill with the representatives of textile manufacturers and textile and apparel unions. They have no objection to the bill. Indeed, it would assist a domestic textile manufacturer.

Last, Mr. President, I would note that this bill is unrelated to ongoing efforts to renegotiate the multifiber arrangement. I am aware that there is an effort to include certain textile and apparel articles made with blends of silk and other fibers. The MFA does not now cover silk. Blending MFA-covered fibers with relatively small amounts of silk has been used to avoid current quotas. This bill does not affect that issue. This bill affects pure silk yarns. Moreover, it is a tariff bill, not a quota bill.

Mr. President, the revenue impact of this bill would be quite minor. The column 1 rate of duty for the yarns covered by this bill is 5 percent ad valorem. Total imports of the silk yarn covered by this bill total slightly over $4 million. And close to 10 percent of that already comes in duty free under the generalized system of preferences.

I urge my colleagues to support this bill.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SILK YARN.

Subpart B of part 1 of the Appendix to the Tariff Schedules of the United States is amended by inserting in numerical sequence the following new item:

"905.25	Yarns of silk (provided for in item 308.30 or 308.51).	Free	Fee	No change	On or before 12/31/90 ".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse for consumption after the date that is 15 days after the date of enactment of this Act.●

By Mr. GARN (for himself and Mr. PROXMIRE) (by request):

S. 2491. A bill to facilitate the provision of additional financial resources to the Federal Savings and Loan Insurance Corporation; to the Committee on Banking, Housing, and Urban Affairs.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION RECAPITALIZATION ACT

● Mr. GARN. Mr. President, today, Senator PROXMIRE and I are introducing by request the proposal designed to recapitalize the Federal Savings and Loan Insurance Corporation [FSLIC]. This bill is an important piece of legislation which is intended to provide statutory authority for raising additional resources for the FSLIC. This bill will also be included in a more comprehensive piece of banking legislation which will be introduced shortly after the Memorial Day recess.

Mr. President, I ask unanimous consent that a section-by-section analysis of the letter of transmittal, and a letter from the Office of Management and Budget be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Section-by-Section Analysis]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION RECAPITALIZATION ACT OF 1986

Section 1. This section states the title of the Act as the "Federal Savings and Loan Insurance Corporation Recapitalization Act of 1986."

Sec. 2. Section 2 amends the Federal Home Loan Bank Act to add a new section 21 that would require the Federal Home Loan Banks ("FHLBanks" or "Banks") to invest in the newly created "Financing Corporation", which, in turn, would be required to invest in the Federal Savings and Loan Insurance Corporation ("FSLIC"). Under paragraph (1) of subsection (a) of new section 21 of the Federal Home Loan Bank Act, the Federal Home Loan Bank Board ("board") would be required to charter the Financing Corporation, which would be under the direction of the Financing Corporation Directorate ("Directorate"), and operated by the Directorate subject to the board's rules, regulations, orders, and directions. Subsequent provisions of this Act describe the Financing Corporation, which would be owned by the FHLBanks and would be used as a means of financing an equity transfer to FSLIC. Paragraph (1) also would require each FHLBank to purchase non-voting capital stock in the Financing Corporation at such time and in such amounts as prescribed by the board. The stock would have par value and would be transferable only among the Banks, in the manner prescribed by the board. The Banks' investment would be lawful, notwithstanding limitations found elsewhere in the Federal Home Loan Bank Act.

The Directorate would consist of three members, one of whom would be the Director of the Office of Finance of the FHLBanks or his successor, and two of whom would be selected by the Chairman of the Federal Home Loan Bank Board from among the presidents of the FHLBanks. Each of the two FHLBank presidents would serve for a term of one year. No president of a FHLBank could be selected to serve an additional term on the Directorate unless each of the FHLBank presidents had already served at least as many terms as the president being selected to serve the additional term. The legislation provides that the Chairman of the Federal Home Loan Bank Board will select a chairman of the Directorate from among its three members.

Paragraph (2) of subsection (a) of new section 21 would limit the aggregate amount of the Banks' investment in the Financing Corporation to $3 billion, the cumulative investment by each Bank to the aggregate of its legal reserves plus "undivided profits." For purposes of the Banks' investment in the Financing Corporation, the language referring to legal reserves and "undivided profits" is intended to include all retained earnings of the FHLBanks except for those amounts held in the "dividend stabilization reserve" as of December 31, 1985. The "dividend stabilization reserve" is excluded from investment in the Financing Corporation because it includes funds, above the legal reserves, that had been determined not to be dividended in the year earned, so as to create a possible supplement to future years' dividends. This special dividend reserve, would, however, have to be used completely before a FHLBank, subject to board approval, could ever draw on its legal reserves under the circumstances outlined under section 5 of this Act. To ensure that only the amount held in the "dividend stabilization reserve" as of December 31, 1985, is excluded from the amounts that may be invested in the Financing Corporation, the legislation specifically lists the amounts held by each FHLBank in its "dividend stabilization reserve" as of December 31, 1985. For purposes of this Act, "undivided profits" includes retained earnings other than legal reserves and amounts held in the "dividend stabilization reserve" as of December 31, 1985. "Legal reserves" refers to the amount each FHLBank has and is required to carry to a reserve account pursuant to the first two sentences of Section 16(a) of the Federal Home Loan Bank Act.

Under paragraph (3) of subsection (a) of new section 21, each FHLBank would be required to purchase a specified percentage of the first $1 billion of stock in the Financing Corporation. The percentage of the first $1 billion that each Bank is required to invest in non-voting capital stock of the Financing Corporation is derived from a formula taking into account each Bank's individual share of total FHLBank System retained earnings (minus their "dividend stabilization reserves") and the share of FSLIC-insured deposits held by each Bank's member institutions. By taking into account the shares of FSLIC-insured deposits held by Banks' member institutions, the formula accommodates Banks' member institutions that are insured by the Federal Deposit Insurance Corporation.

Allocation of the remaining stock purchases is based on the percentage of total assets of FSLIC-insured members represented at each Bank; however, the amount of stock that any FHLBank would be required to purchase is limited to the total of its legal reserves plus undivided profits, which are described above. The aggregate amount of Financing Corporation stock that must be purchased by all of the FHLBanks is not reduced because of the above limitation, which may affect particular Banks. Therefore, paragraph (4) of this subsection provides for a reallocation of stock purchases among Banks that have not reached their limits.

Paragraph (4) of subsection (a) of new section 21 provides that if a Bank could not purchase the full amount of stock in the Financing Corporation because that amount exceeded its legal reserves plus undivided profits, the amount that that Bank could not purchase would be prorated for investment among the remaining FHLBanks based on their stock holdings in the Financing Corporation, as long as the cumulative amount of funds required to be invested in by the remaining Banks did not exceed their legal reserves and undivided profits. Any such FHLBank that did not purchase the full amount of Financing Corporation stock as required under the formula in the preceding paragraph would be obligated to purchase at some future time from those Banks to which such stock was reallocated, the stock that would have originally been allocated to it. Until the restricted Bank had fulfilled this repurchase obligation, it would be prohibited from paying dividends in excess of one-half of its net earnings. Such funds not paid out in dividends would be placed in a reserve required by the board and would not be available for dividends.

Under subsection (b) of new section 21, the Financing Corporation, subject to rules, regulations, orders, and directions prescribed by the board, would be provided with corporate powers necessary and appropriate for its operation as a specialized corporate entity. Such corporate powers would include the power to issue obligations in the form of non-voting capital stock to the FHLBanks; to invest in any securities issued by FSLIC; to borrow from the capital markets by issuing debt, the maturity of which (including any refinancings) could not exceed thirty years, and the net proceeds of which would be required to be invested in FSLIC under terms and conditions approved by the board; and other powers which are customary and usual for corporations generally. Under the terms of this subsection, the Financing Corporation would have no paid employees and the Directorate could, with the approval of the board, authorize the officers, employees, or agents of the FHLBanks or board to act on behalf of the Financing Corporation to perform the Financing Corporation's functions.

Under paragraph (1) of subsection (b) of new section 21, obligations of the Financing Corporation (which would be issued only with the approval of the board), like FHLBank obligations, would be lawful investments, and could be accepted as security for all fiduciary, trust, and public funds, the investment or deposit of which would be under the authority or control of the United States or any officer or officers thereof. This subsection would also authorize the Federal Reserve banks to act as depositaries, custodians, and/or fiscal agents for the Financing Corporation in the general performance of its powers under this Act.

Pursuant to paragraph (2) of subsection (b) of new section 21, obligations of the Financing Corporation would be treated in the same manner as FHLBank obligations for purposes of investment, sale, underwriting, purchase, use as collateral, and dealing by financial institutions such as banks, thrifts, and credit unions.

Under paragraph (3) of subsection (b) of new section 21, the Financing Corporation would bear exclusive liability for its obligations and interest thereon. The Financing Corporation's obligations and interest theron would not be obligations of or guaranteed by the FHLBanks, the United States, or FSLIC. Obligations of the Financing Corporation would have the same tax status as obligations of the FHLBanks and the Financing Corporation would have the same tax status as the FHLBanks. The Secretary of Treasury would be authorized to prepare the necessary forms of stock, debentures, and bonds, as approved by the board, pursuant to Section 23 of the Federal Home Loan Bank Act, for obligations of the Financing Corporation, as the Secretary of Treasury is also so authorized for obligations of the FHLBanks.

Under paragraph (4) of subsection (b) of new section 21, all instruments issued by the Financing Corporation would be exempt securities under the provisions of the Federal securities law administered by the Securities and Exchange Commission. This exemption is the same as that enjoyed by obligations of the FHLBanks.

Under paragraph (5) of subsection (b) of new section 21, the Financing Corporation would be prohibited from making any net new borrowings after December 31, 1996, although the Financing Corporation would be permitted to refinance previously issued debt after December 31, 1996. Refinancings of previously issued debt could not mature later than December 31, 2026.

Under paragraph (6) of subsection (b) of new section 21 would accord the Financing Corporation the same coverage under the Government Corporations Control Act as the FHLBanks are accorded under that Act pursuant to Section 11(j) of the Federal Home Loan Bank Act (12 U.S.C. 1431(j)). Thus, audits of the Financing Corporation by the General Accounting Office could be conducted although the Financing Corporation would have no Government capital invested in it. In addition, the Secretary of the Treasury, a Federal Reserve bank, or a bank designated as a depositary or fiscal agent of the United States Government would have the authority to keep the Financing Corporation's accounts (although the Secretary of Treasury could waive this provision regarding accounts and there is separate authority for Federal Reserve banks to act as depositaries, custodians, and/or fiscal agents for the Financing Corporation pursuant to new paragraph 21(b)(2)). Before the Financing Corporation could issue obligations and offer them to the public, the Secretary of the Treasury would prescribe the various conditions to which the obligations would be subject (including the form, denomination, maturity, and interest rate), the way and time the obligations would be issued, and the price for which the obligations would be sold. This procedure is currently in place for the issuers who are subject to Section 9108(a) of title 31, United States Code (part of the Government Corporations Control Act) and in practice the Treasury generally approves terms and conditions on obligations as proposed by these issuers. Finally, before the Financing Corporation could buy or sell a direct obligation of the United States Government, or an obligation on which the principal, interest, or both, is guaranteed, of more than $100,000, the Secretary of Treasury would have to approve the purchase or sale, although the Secretary could waive this requirement. All of these authorities also pertain to the FHLBanks' issuance of debt.

Under new subsection 21(c) the Financing Corporation would invest those assets that it does not invest in FSLIC, in the same set of obligations and under the same conditions as FHLBanks are permitted to invest their reserves under the current Section 16 of the Federal Home Loan Bank Act. These investments include: (1) investments in zero-coupon securities, which investments would be used to defease at maturity the principal of debt issued by this Financing Corporation; and (2) short-term investments of the net proceeds of debt issued by the Financing

Corporation prior to the purchase of FSLIC capital stock and certificates.

Under new subsection 21(d), obligations issued by the Financing Corporation and outstanding would be issued at such times and in such amounts as the board determines, but would not be permitted to exceed the greater of (1) five times the Financing Corporation's paid-in capital, as determined by the board, or (2) the face amount (which for zero-coupon securities would be the principal amount due at maturity) of obligations invested in by the Financing Corporation pursuant to subsection 21(c). The second restriction would permit the Financing Corporation to exceed a five-to-one leverage only if it could purchase securities whose amount due at maturity would at least equal the principal amount due on all the Financing Corporation's debt, thereby ensuring that the debt principal would be repaid.

New subsection 21(e) would require both retirement of all Financing Corporation obligations and liquidation of the Financing Corporation no later than December 31, 2026. This date relates to the date in new subsection 21(b) which provides both that the Financing Corporation cannot issue obligations whose maturities exceed thirty years, and that the Financing Corporation can make no net new borrowings after December 31, 1996. The board, on behalf of the FHLBanks, would be the successor to the powers of the Financing Corporation deemed necessary by the board to be preserved.

Section 3. Section 3 would establish the status of the Financing Corporation as a "mixed ownership" government corporation, which is the same status accorded to FHLBanks, under the Government Corporations Control Act. Although there would be no government capital invested in the Financing Corporation, this category of "mixed ownership" has been accorded to the Financing Corporation to provide it with parallel legal status to that of the FHLBanks.

Section 4. Section 4 would empower FSLIC to issue equity in the forms of redeemable non-voting capital stock and non-redeemable capital certificates. The non-voting capital stock would be issued in an amount equal to the aggregate investment by the FHLBanks in the Financing Corporation. The Financing Corporation would be the sole purchaser of both the capital certificates and the capital stock issued by FSLIC, and proceeds paid to FSLIC from that purchase would be included as part of the primary reserve of FSLIC. The capital certificates and stock would pay dividends equal to the Financing Corporation's interest payments on its obligations and issuance costs, on or before the dates on which such amounts would be due and payable, minus any net interest payments to the Financing Corporation on short term investments of the net proceeds of its obligations prior to the purchase of capital certificates and capital stock in FSLIC, as determined by the board. Thus, dividends paid by FSLIC will cease at such time that all Financing Corporation obligations mature since the Financing Corporation will be dissolved at that time.

This section also would authorize FSLIC to pay off and retire its capital stock upon maturity of all the obligations issued by the Financing Corporation. Since FSLIC's capital certificates would be non-redeemable, FSLIC would extinguish them with no payoff at the time FSLIC retired the capital stock. FSLIC would be authorized to make such payoff on the retired capital stock solely with its contributions accumulated in its "equity return account," an account created under this Act that could include annual contributions made by FSLIC according to statutorily prescribed formulae. Any such contributions would be made at the end of each year beginning in 1997 and ending in the year during which the last obligation of the Financing Corporation matures. Contribution amounts made to the equity return account would not be included as FSLIC reserves. Such contribution amounts would be the only monies included in the equity return account. Any interest earned on the funds in the equity return account would be for the account of FSLIC and would not be included as part of the equity return account, but would be added to the reserves of FSLIC. While the contributions to the equity return account would be made annually as prescribed above, no payoff and retirement of FSLIC stock would be authorized to be made until the maturity of all Financing Corporation obligations.

The formulae for the annual contributions are described below. No annual contributions can be required to be made if the FSLIC reserves are less than .50 percent of all accounts of all insured members (as of December 31 of the preceding year). In any year in which FSLIC's reserves are equal to .50 percent of all accounts of all insured members or greater (as of December 31 of the previous year), the contribution would be the amount invested by the Financing Corporation in FSLIC capital stock, divided by the number of years from the first year after 1996 that the reserves to accounts ratio reached .50 percent to the year in which the last maturing obligation of the Financing Corporation matures (which could be no later than 2026).

The legislation also provides for additional contributions as determined by the board, under certain circumstances. In any year in which the FSLIC's reserves are equal to 1.0 percent of all accounts of all insured members or greater up to and including 1.25 percent of all accounts (as of December 31 of the preceding year), the additional contribution as determined by the board could be a maximum of 6 percent per year compounded on the amount invested by the Financing Corporation in FSLIC capital stock computed from the year the investment was made to the year in which the last maturing obligation of the Financing Corporation matures (not later than 2026), divided by the number of years from the first year after 1996 that the reserves to accounts ratio reached 1.0 percent to the year in which the last maturing obligation of the Financing Corporation matures. The legislation sets forth two other formulae for possible additional contributions if the reserves to accounts ratio of FSLIC were to increase, raising the percentage compounded and subtracting from these in the numerator of the fraction, the amounts already paid out in additional contributions. All these additional contributions, which would be above the repayment of the amount invested by the Financing Corporation in FSLIC capital stock, would be subject to the discretion of the board.

This legislation is structured carefully to create, in a fair and appropriate manner, budgetary collections from the equity investments in FSLIC that would offset budgetary outlays resulting from FSLIC's case resolution costs. The equity investments in FSLIC should be counted as offsetting collections for three primary reasons. First, FSLIC would never repay, under any circumstances, the bulk of the funds invested in it by the Financing Corporation (the non-redeemable capital certificates). Second, any possible repayment of the capital investment in FSLIC stock at time of retirement would be dependent on FSLIC's financial performance. Indeed, the FHLBanks' capital contribution to the Financing Corporation may never be paid back, as would be clearly reflected in the FHLBanks' independently audited financial statements. Finally, FSLIC would have no responsibility to pay off the principal of the Financing Corporation's debt; the Financing Corporation's debt would be solely its own responsibility.

Section 4 also makes clear that the term "Financing Corporation" refers to the corporation chartered pursuant to section 2 of this legislation, new section 21 of the Federal Home Loan Bank Act. Finally, section 4 makes clear that certain statutorily prescribed actions regarding the FSLIC's primary and secondary reserves could not be triggered as long as shares of the capital stock of the FSLIC are outstanding.

Section 5. Section 5 would amend Section 16 of the Federal Home Loan Bank Act to allow the board, under certain circumstances, to authorize a FHLBank to declare and pay dividends out of its undivided profits or legal reserves, but only after such Bank has reduced all other reserves (e.g., the "dividend stabilization reserve") to zero. Such an extraordinary dividend may be permitted where (1) a FHLBank incurs a charge-off related to its investment in the Financing Corporation and (2) the board determines there is an extraordinary need for payment of such dividends. Any such use of dividend profits or legal reserves would not affect the requirements for FHLBanks' investments in Financing Corporation stock.

Section 6. Section 6 is meant to clarify that the sentences referring to the retirement of capital stock in subsection 402(h) of the National Housing Act do not cover either FSLIC stock or FSLIC certificates issued pursuant to this Act.

DEPARTMENT OF THE TREASURY,
Washington, DC, May 20, 1986.

The Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill, the "Federal Savings and Loan Insurance Corporation Recapitalization Act of 1986."

The Administration has made assistance to the Federal Savings and Loan Insurance Corporation ("FSLIC") fund a high priority. This bill would strengthen the FSLIC fund, and concomitantly, the Federal Home Loan Bank System as a whole. In doing so, it should help reaffirm depositor confidence in the thrift industry. The Federal Home Loan Bank Board ("FHLBB"), the Federal Home Loan Banks ("FHLBanks"), and the Treasury Department worked together to prepare this bill.

The proposed bill, which provides for the recapitalization of FSLIC, produces several important benefits. Under the bill, FSLIC would be able to employ about $25 billion over five to six years to resolve its case load of problem thrifts, thereby halting expansion of the problem. The certain availability of about $25 billion should increase depositor confidence. This confidence plus the sale, merger, or liquidation of the weakest thrifts should help the industry lower its cost of funds. In addition, the bill provides

for the FSLIC recapitalization burden to be shared fairly between the thrifts and the FHLBanks; contributions are structured to minimize the adverse effects on both. FHLBank debt should be protected from possible higher borrowing spreads. Moreover, the equity nature of the FHLBanks' capital contribution to the Financing Corporation should ease the FHLBanks' accounting treatment. The formula that governs the FHLBanks' capital contribution will accommodate FHLBanks with a large percentage of members insured by the Federal Deposit Insurance Corporation. Finally, the flexibility built into the bill permits the FHLBB to raise a range of funds for FSLIC, depending on FSLIC's needs.

The proposed bill would require the FHLBanks to invest in the newly created, limited purpose Financing Corporation, which, in turn, would be required to invest in FSLIC. More specifically, the FHLBanks would be required to invest up to $3 billion from their earned surplus in the Financing Corporation over time. The Financing Corporation would leverage that investment by issuing obligations to the public, the proceeds of which would be invested in FSLIC non-redeemable capital certificates and non-voting capital stock.

The proposed bill requires the FHLBB to charter the Financing Corporation, which would be operated by the Financing Corporation Directorate—composed of two FHLBank presidents and the Director of the Office of Finance of the Federal Home Loan Banks. The Financing Corporation would be subject to rules, regulations, and some specific directions of the FHLBB. The FHLBB would require each FHLBank to invest in non-voting capital stock of the Financing Corporation over a period of approximately five to six years according to formulae set forth in the proposed legislation. The Financing Corporation would issue long-term obligations to the public, for which the Financing Corporation alone would be liable. The Financing Corporation would assure payment of the principal on its obligations by purchasing long-term zero-coupon instruments whose value at maturity would equal the obligations of the Financing Corporation when those obligations come due.

The Financing Corporation's activities would be limited to those necessary to effect the recapitalization of FSLIC. In addition, the Financing Corporation's authority to borrow would be restricted with respect to its capital base. The Financing Corporation would have no paid employees and would sunset by 2026, or sooner if it repaid all its debt.

The legislation provides for the Financing Corporation to invest in FSLIC through two types of FSLIC equity—non-voting capital stock and non-redeemable capital certificates. The investment in the FSLIC non-voting capital stock would be in an amount equal to the aggregate investment by the FHLBanks in the capital stock of the Financing Corporation. FSLIC would pay dividends to the Financing Corporation on the equity issued by FSLIC, and the Financing Corporation would employ these dividends to pay the interest on its debt. Upon repayment of all of the Financing Corporation's obligations (which must occur by 2026), FSLIC would extinguish its capital certificates without repayment, and retire and possibly pay off its outstanding capital stock. The funds for this payoff of the non-voting capital stock would come solely from FSLIC's payments into an "equity return account," pursuant to formulae set forth in the bill. Depending upon FSLIC's financial performance, FSLIC could begin making contributions to this equity return account in 1997.

The bill is structured carefully to create, in a fair and appropriate manner, budgetary collections from the equity investments in FSLIC that will offset budgetary outlays resulting from FSLIC's case resolution costs. The equity investments in FSLIC should be counted as offsetting collections for three primary reasons. First, FSLIC would never repay, under any circumstances, the bulk of the funds invested in it by the Financing Corporation (the non-redeemable capital certificates). Second, any possible repayment of the capital investment in FSLIC stock and return on this equity at time of retirement is dependent on FSLIC's financial performance. Indeed, the FHLBanks' capital contribution to the Financing Corporation may never be paid back, as will be clearly reflected in the FHLBanks' independently audited financial statements. Finally, FSLIC will have no responsibility to pay off the principal of the Financing Corporation's debt; the Financing Corporation's debt will be solely its own responsibility.

There is also enclosed a section-by-section analysis explaining the provisions of the draft bill, and a letter from the Office of Management and Budget explaining its conclusion that the equity investments in FSLIC count as a budgetary collection.

It will be appreciated if you will lay the enclosed bill before the Senate. A similar proposal has been transmitted to the Speaker of the House of Representatives.

The Office of Management and Budget has advised that there is no objection from the standpoint of the Administration's program to the presentation of the proposed legislation to the Congress and that its enactment would be in accord with the President's program.

Sincerely,

ROBERT M. KIMMITT,
General Counsel.

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, May 19, 1986.

Hon. GEORGE D. GOULD,
Under Secretary, Department of Treasury, Washington, DC.

DEAR GEORGE: We have reviewed the Treasury proposal to recapitalize the Federal Savings and Loan Insurance Corporation (FSLIC) and consider that the capital infusion into FSLIC should be scored as an offsetting collection.

Let me review how we distinguish among three different types of transactions: budget receipts, offsetting collections, and borrowing.

Budget receipts are composed of all those collections from the public that arise as a result of the exercise of the Government's sovereign powers to compel payment: essentially taxes and non-taxes (such as compulsory social insurance premiums).

Offsetting collections are payments from the public as a consequence of business-type transactions plus payments by the Government to itself.

Outlays are calculated as the sum of disbursements less offsetting collections.

Borrowing, on the other hand, is neither income nor an offset to spending, but is the principal means of financing deficits.

The Treasury proposal takes the form of user charges on the industry rather than taxes or borrowing. The proposal incorporates two distinct forms of stock to be sold to the industry. The first is $3 billion of non-voting capital stock, while the other is $8 to $12 billion of non-redeemable capital certificates. Both types of stock have the characteristics of an equity infusion and constitute offsetting collections—not borrowing. The FSLIC has total control of the funds and is not required to redeem the stock or the certificates. In fact, the plan is structured so that FSLIC will redeem only the non-voting capital stock, and that only if the FSLIC fund exceeds a certain reserve-to-deposit ratio. At the time the FSLIC issues stock, we plan to score the proceeds of these sales as offsetting collections to the FSLIC fund. If and when the capital stock is redeemed, we plan to score the redemption as obligations and outlays. Naturally, all dividend payments would be scored as obligations and outlays.

Let me cite examples of some similar budgetary accounting. One example is the recapitalization of the National Credit Union Share Insurance Fund (NCUSIF). Title VII of the Deficit Reduction Act of 1984 (P.L. 98-369) required all federally insured credit unions to make a deposit to the fund of 1 percent of their insured shares. As in the case of the FSLIC proposal, the NCUSIF has total control of the funds. Moreover, if a credit union terminates its Federal insurance and withdraws from the fund, the deposit is refunded to the extent that it has not been impaired through previous losses.

Another example of private ownership in a Federal enterprise is the Central Liquidity Facility (CLF). In order to become a member of the CLF, a credit union must purchase stock based on its asset size. The CLP pays an annual dividend on the stock. Members are free to withdraw from the CLP and may redeem their stock. We treat the purchase of stock as an offsetting collection and we score the payment of dividends and the redemption of stock as an obligation and an outlay.

The FSLIC recapitalization proposal is similar in nature to the NCUSIF and CLF capitalizations. Obviously the detailed financial arrangements differ in nature. Nevertheless, we conclude that because of the characteristics of the FSLIC stock issue, the proceeds from the sale of stock constitute an offsetting collection under our budget accounting principles.

Sincerely yours,

JOSEPH R. WRIGHT,
Deputy Director.●

By Mr. HEINZ (for himself, Mr. BRADLEY, and Mr. BURDICK):

S. 2492. A bill to amend title XIX of the Social Security Act to permit States, at their option, to provide Medicaid coverage for poor, elderly, or disabled individuals and to provide medical assistance for poor, Medicare beneficiaries in meeting Medicare cost-sharing requirements; to the Committee on Finance.

LOW-INCOME ELDERLY AND DISABLED MEDICAID AMENDMENTS

● Mr. HEINZ. Mr. President, I rise today to introduce the Low-Income Elderly Protection Amendments of 1986. I am pleased to be joined by Senators BRADLEY and BURDICK in support of this effort. More than 2 million elderly

in this Nation with incomes below the Federal poverty line are not covered by Medicaid. This bill will close this gaping hole in our health care system.

Health care is the window of vulnerability for the elderly and disabled poor in this country. Medicaid only covers about 36 percent of America's aged poor—leaving 2.2 million seniors with no Medicaid coverage. Medicare coverage is also inadequate for these seniors, covering less than half of the average health bill for the elderly. Seniors covered by Medicare incur significant out-of-pocket expenses before Medicare coverage begins, including Medicare deductibles and premiums which currently total $753 a year. Medicare also does not cover the costs of prescription drugs. It is not unusual for an elderly person with a common health problem like angina, diabetes, or arthritis to pay $50 or more every month for prescription drugs.

While Medicaid serves as supplementary health insurance coverage for 3.2 million very low-income Medicare beneficiaries, the elderly poor not covered by Medicaid are left with out-of-pocket costs ranging from one-fourth to one-third of their annual incomes. The result: Many low-income elderly cannot afford the health care they need.

Medicaid was created as the health care safety net for this Nation's poor, and, on average, it has served us very well. Medicaid provides supplementary Medicare coverage for 3.2 million seniors and purchases Medicare part B insurance for 2.3 million aged Medicaid beneficiaries. We can all take pride in the Medicare and Medicaid Programs and the standard of health care that these programs have helped maintain for most of the elderly in this country.

There are, however, 2.3 million elderly persons who do not fit into the averages and have been left out of the health care picture altogether. These vulnerable older and disabled persons lie just outside the safety net's reach. Their incomes are a few dollars too high to allow them to qualify for Medicaid under traditional income tests, but far too low to allow them to afford the health care they need.

They fall within a crack created by a quirk in the eligibility requirements for Medicaid. Eligibility for Medicaid is currently linked to eligibility for assistance under the AFDC or SSI programs, and the income levels for both these programs lie below the Federal poverty line. The Federal poverty line is currently $5,360 for a single person and $7,240 for a couple, or $447 per month for a single and $603 per month for a couple. The SSI income eligibility limit is $111 less than poverty—$336—per month for a single person and $199 less than poverty—$504—per month for a couple.

Under current law, the two primary ways a person can become eligible for Medicaid coverage are to be eligible for SSI cash payments, or to spend down to 133⅓ percent of the AFDC level under the medically needy category. All States must cover the "categorically needy"—generally persons receiving assistance under AFDC or SSI—under their Medicaid plans.

Aged and disabled persons whose incomes fall between the very low SSI level and the Federal poverty line, however, are required to impoverish themselves to the even lower SSI level before they can become eligible for health care coverage under Medicaid. For those 2.2 million seniors with incomes between the Federal and State poverty lines, adequate health care is a distant hope that can be achieved only after the grim spectre of further impoverishment.

Clearly, any member of our society who is at or below the Federal poverty line is already impoverished. Requiring additional impoverishment as a prerequisite to receiving adequate health care seems callous at best.

This legislation would turn the distant hope of adequate health care into a reliable fact of life for the elderly and disabled poor. By establishing a new categorically needy program for seniors and the disabled with incomes below the Federal poverty line, low-income seniors and the disabled would no longer be forced to spend down to an even more impoverished level for Medicaid eligibility and the Federal Government would provide matching payments for Medicaid coverage.

This bill would separate Medicaid eligibility from eligibility for SSI and AFDC, in effect saying that no matter how an individual's income relates to SSI or AFDC, if his income is at or below the Federal poverty rate, and if he is a senior or is disabled, he can be considered Medicaid eligible with Federal matching payments at the States' option.

The effect of the bill would be to provide Medicaid health care and prescription drug coverage to low-income elderly and the disabled; it would cover their Medicare premiums, deductibles for both Parts A and B services and coinsurance payments. Medicaid coverage for this population would also guarantee that physicians accept the Medicaid payment as payment in full, as Medicaid physicians are required to accept assignment.

Medicaid coverage for this population group is especially important since the elderly and disabled poor have large health care needs. Death rates among the elderly poor are 50-percent higher than for other Medicare beneficiaries. Despite their greater health needs, they receive 35-percent fewer physician visits, use 29-percent fewer prescription drugs, and are 18-percent less likely to be admitted to a hospital.

The costs of providing this vital health care coverage to this targeted group are low. The Congressional Budget Office has estimated that this legislation would cost a total of $144 million in the first full year of implementation—$79 million to the Federal Government, $65 million to the States.

For the first time, we would be giving States the flexibility to target their resources to provide health care to a specific, high-risk population. This legislation, which is being introduced in the House today by Congressman WAXMAN, the distinguished chairman of the Health and Environment Subcommittee of the Energy and Commerce Committee, is meant to go hand in hand with legislation introduced earlier this session by Senators CHILES and DURENBERGER. The Chiles and Durenberger bills would allow States to provide Medicaid coverage to pregnant women and children below the Federal poverty line.

The legislation Congressman WAXMAN and I are introducing today complements the Chiles/Durenberger bills, both of which I have cosponsored, by giving each State the option of providing Medicaid coverage to elderly and disabled poor after coverage has been provided to pregnant women and children below the poverty line in that State.

I sincerely hope my colleagues will join me in supporting this legislation, which has already been provided for in the House budget resolution. For the Federal Government, this bill represents a very small price tag. For 2.2 million elderly and disabled poor in this country, it represents nothing short of a distant hope come true.

Mr. President, I ask that the text of the bill be printed in full at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

"(A) who are 65 years of age or older or are disabled individuals (as determined under section 1614(a)(3)),

"(B) whose income (as determined under section 1612 for purposes of the supplemental security income program) does not exceed an income level established by the State consistent with paragraph (2)(A), and

"(C) whose resources (as determined under section 1613 for purposes of the supplemental security income program) do not exceed (except as provided in paragraph (2)(B)) the maximum amount of resources that an individual may have and obtain benefits under that program.

"(2)(A) The income level established under paragraph (1)(B) may not exceed—

"(i) 100 percent, or

"(ii) such lesser percent as the State establishes under subsection (h)(2)(A) as amended by section 2 of the Medicaid Infant Mortality Amendments of 1986),

of the nonfarm official poverty line (as defined by the Office of Management and Budget, and revised annually in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981) applicable to a family of the size involved.

"(B) In the case of a State that provides medical assistance to individuals not described in section 1902(a)(10)(A) and at the State's option, the State may use under paragraph (1)(C) such resources level (which is higher than the level described in that paragraph) as may be applicable with respect to individuals described in paragraph (1)(A) who are not described in section 1902(a)(10)(A).".

S. 2492

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Low Income Elderly and Disabled Medicaid Amendments of 1986".

TITLE I—OPTIONAL COVERAGE OF ELDERLY AND DISABLED POOR FOR ALL MEDICAID BENEFITS

SEC. 101. ELIGIBILITY.

(a) CREATION OF NEW OPTIONAL CATEGORICALLY NEEDY GROUPS.—

(1) IN GENERAL.—Subsection (a)(10)(A)(ii) of section 1902 of the Social Security Act (42 U.S.C. 1396a) is amended—

(A) by striking "or" at the end of subclause (VII),

(B) by striking the semicolon at the end of subclause (VIII) and inserting ", or", and

(C) by adding at the end the following new subclause:

"(IX) subject to subsection (l)(3), who are described in subsection (l)(1);".

(2) DESCRIPTION OF INDIVIDUALS.—Such section is further amended by adding at the end the following new subsection:

"(l)(1) Individuals described in this paragraph are individuals—

(b) REQUIREMENT OF COVERAGE OF CERTAIN PREGNANT WOMEN AND CHILDREN AND OTHER SPECIAL RULES.—Section 1902(1) of such Act, as added by subsection (a)(2), is further amended by adding at the end the following new paragraphs:

"(3) A State plan may not provide coverage for individuals under subsection (a)(10)(A)(ii)(IX) unless the plan provides coverage of some or all of the individuals described in subsection (h)(1) (as inserted by section 2(b) of the Medicaid Infant Mortality Amendments of 1986, H.R. 4630).

"(4) Notwithstanding subsection (a)(17), for individuals described in paragraph (1) who are covered under the State plan by virtue of subsection (a)(10)(A)(ii)(IX)—

"(A) the income standard to be applied is the income standard described in paragraph (1)(B), and

"(B) except as provided in section 1612(b)(4)(B)(ii), costs incurred for medical care or for any other type of remedial care shall not be taken into account in determining income.

Any different treatment provided under this paragraph for such individuals shall not, because of subsection (a)(17), require or permit such treatment for other individuals.".

SEC. 102. EFFECTIVE DATE.

The amendments made by this title shall apply to payments to States for calendar quarters beginning on or after July 1, 1987, without regard to whether or not final regulations to carry out such amendments have been promulgated by such date.

TITLE II—OPTIONAL COVERAGE OF POOR MEDICARE BENEFICIARIES FOR MEDICARE COST-SHARING EXPENSES

SEC. 201. ELIGIBILITY.

(a) OPTIONAL COVERAGE OF QUALIFIED MEDICARE BENEFICIARIES FOR MEDICARE COST-SHARING.—Section 1902(a)(10) of the Social Security Act (42 U.S.C. 1396a(a)(10)) is amended—

(1) by striking "and" at the end of subparagraph (C),

(2) by inserting "and" at the end of subparagraph (D), and

(3) by inserting after subparagraph (D) the following new subparagraph:

"(E) at the option of a State but subject to subsection (1)(3), for making medical assistance available for medicare cost-sharing (as defined in section 1905(o)(3)) for qualified medicare beneficiaries described in section 1905(o)(1);".

(b) QUALIFIED MEDICARE BENEFICIARY DEFINED.—Section 1905 of such Act (42 U.S.C. 1396d) is amended by adding at the end the following new subsection:

"(o)(1) The term 'qualified medicare beneficiary' means an individual—

"(A) who is entitled to hospital insurance benefits under part A of title XVIII (including an individual entitled to such benefits pursuant to an enrollment under section 1818),

"(B) who, but for section 1902(a)(10)(E) and the election of the State, is not eligible for medical assistance under the plan,

"(C) whose income (as determined under section 1612 for purposes of the supplementary security income program) does not exceed an income level established by the State consistent with paragraph (2)(A), and

"(D) whose resources (as determined under section 1613 for purposes of the supplemental security income program) do not exceed (except as provided in paragraph (2)(B)) the maximum amount of resources that an individual may have and obtain benefits under that program.

"(2)(A) The income level established under paragraph (1)(C) may not exceed—

"(i) 100 percent, or

"(ii) such lesser percent as the State establishes under subsection (h)(2)(A) (as amended by section 2 of the Medicaid Infant Mortality Amendments of 1986),

of the nonfarm official poverty line (as defined by the Office of Management and Budget, and revised annually in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981) applicable to a family of the size involved.

"(B) In the case of a State that provides medical assistance to individuals not described in section 1902(a)(10)(A) and at the State's option, the State may use under paragraph (1)(D) such resource level (which is higher than the level described in that paragraph) as may be applicable with respect to individuals described in paragraph (1)(A) who are not described in section 1902(a)—(10)(A).".

"(c) REQUIREMENT OF COVERAGE OF CERTAIN PREGNANT WOMEN AND CHILDREN AND OTHER SPECIAL RULES.—

(1) Requiring coverage of certain pregnant women and children and income standard to be used—Section 1902(1) of such Act, as added by section 101 of this Act, is amended—

(A) in paragraph (3), by inserting "or coverage under subsection (a)(10)(E)" after "subsection (a)(10)(A)(ii)(IX)", and

(B) by adding at the end of the following new paragraph:

"(5) Notwithstanding subsection (a)(17), for qualified medicare beneficiaries described in section 1905(c)(1)—

"(A) the income standard to be applied is the income standard described in section 1905(o)(1)(C), and

"(B) except as provided in section 1612(b)(4)(B)(ii), costs incurred for medical care or for any other type of remedial care shall not be taken into account in determining income.

Any different treatment provided under this paragraph for such individuals shall not, because of subsection (a)(17), require or permit such treatment for other individuals.".

(2) EFFECTIVE DATE OF BENEFITS.—Section 1902(e) of such Act is amended by adding at the end the following new paragraph:

"(6) If an individual is determined to be a qualified medicare beneficiary (as defined in section 1905(c)(1)), such determination shall apply to services furnished after the end of the month in which the determination first occurs. For purposes of payment to a State under section 1903(a), such determination shall be considered to be valid for an individual for a period of 12 months, except that a State may provide for such determinations more frequently, but not more frequently than once every 6 months for an individual.".

SEC. 202. BENEFITS.

(a) LIMITED, MEDICARE GAP-FILLING BENEFITS.—Section 1902(a)(10) of the Social Security Act (42 U.S.C. 1395a(a)(10)) is amended, in the matter after subparagraph (D)—

(1) by striking "and" before "(VI)" and inserting a comma,

(2) by inserting before the semicolon at the end the following: ", and (VII) the medical assistance made available to a qualified medicare beneficiary described in section 1905(c)(1) shall be limited to medical assistance for medicare cost-sharing (described in section 1905(o)(3)), subject to the provisions of subsection (m) and section 1916(b)".

(b) MEDICARE COST-SHARING DEFINED.—Section 1905(c) of such Act, as added by section 201(b), is amended by adding at the end the following:

"(3) The term 'medicare cost-sharing' means the following costs incurred with respect to a qualified medicare beneficiary:

"(A) Premiums under part B and (if applicable) under section 1818.

"(B) Deductibles and coinsurance described in section 1813.

"(C) The annual deductible described in section 1833(b).

"(D) The difference between the amount that is paid under section 1833(a) and the amount that would be paid under such section if any reference to '80 percent' therein were deemed a reference to '100 percent'.

Such term also may include, at the option of a State, premiums for enrollment of a qualified medicare beneficiary with an eligible organization under section 1876.".

(C) PAYMENT AMOUNTS.—Section 1902(a) of such Act, as amended by section 101 of this Act, is further amended by adding at the end the following new subsection:

"(m) In the case of medical assistance furnished under this title for medicare cost-sharing respecting the furnishing of a service or item to a qualified medicare beneficiary, the State plan may provide payment in an amount with respect to the service or item that results in the sum of such payment amount and any amount of payment made under title XVIII with respect to the service or item exceeding the amount that is

otherwise payable under the State plan for the item or service for eligible individuals who are not qualified medicare beneficiaries.".

(d) CONFORMING AMENDMENTS.—

(1) TREATMENT OF BENEFITS.—Section 1902(a)(10)(C) of such Act (42 U.S.C. 1396a(a)(10)) is amended, in the matter before clause (i), by inserting "or (E)" after "subparagraph (A)".

(2) PAYMENT OF MEDICARE PREMIUMS AND PART A DEDUCTIBLE.—Section 1903(a)(1) of such Act (42 U.S.C. 1396b(a)(1)) is amended—

(A) by inserting "deductible amounts under part A and" after "(including expenditures for",

(B) by inserting "(and, in the case of qualified medicare beneficiaries described in section 1905(o)(1), part A)" after "premiums under part B", and

(C) by striking "or (B)" and inserting "(B) are qualified medicare beneficiaries described in section 1905(o)(1), or (C)".

(3) TIMING OF BENEFITS.—Section 1905(a) of such Act (42 U.S.C. 1396d(a)) is amended, in the matter before subdivision (i), by inserting "or, in the case of a qualified medicare beneficiary described in section 1905(o)(1), if provided after the month in which the individual becomes such a beneficiary" after "makes application for assistance".

(4) COPAYMENTS.—

(A) Section 1902(a)(15) of such Act (42 U.S.C. 1396a(a)(15)) is amended by inserting "are not qualified medicare beneficiaries (as defined in section 1905(o))1)) but" after "older who".

(B) Subsections (a) and (b) of section 1916 of such Act (42 U.S.C. 1396o) are each amended by striking "section 1902(a)(10)(A)" and inserting "subparagraph (A) or (E) of section 1902(a)(10)".

SEC. 203. EFFECTIVE DATE.

The amendments made by this title apply to payments under title XIX of the Social Security Act for calendar quarters beginning on or after July 1, 1987, without regard to whether or not final regulations to carry out such amendments have been promulgated by such date.●

By Mr. STEVENS:

S. 2493. A bill to amend chapter 2 of title 39, United States Code, with respect to appointment, pay, and status of the Postmaster General and the Deputy Postmaster General, and for other purposes; to the Committee on Governmental Affairs.

APPOINTMENT, PAY, AND EXPENSES OF THE POSTMASTER GENERAL

Mr. STEVENS. Mr. President, I am today introducing legislation similar to that which will be introduced in the other body by my good friend, BILL FORD, Chairman of the House Post Office and Civil Service Committee, to allow once again for the Presidential appointment and Senate confirmation of the Postmaster General beginning in May of 1989. My bill would reestablish this Presidential responsibility prospectively.

Let me say at the outset that my introduction of this bill is not in any way meant to be a criticism of the current Postmaster General, Al Casey. Al has done an outstanding job in a very tough and short period of time. Al and his lovely wife, Ellie, are planning to return to Dallas, TX, this fall where he will become Professor Emeritis of the SMU Business School.

The goal of this legislation is to strengthen the position of the Postmaster General and the U.S. Postal Service. As a Cabinet member, the Postmaster General will be able to present to the President and the other heads of Federal departments the difficulties and problems faced by his department. The Postmaster General can be helpful in meeting the challenges facing the Cabinet day in and day out.

The appointment date of a Presidentially appointed Postmaster General was set for May of 1989 in order to take politics out of the selection as much as possible. I do not know who will be President in 1989 so there is no attempt to politicize this office.

In addition, this bill provides that the Postmaster General will become Chairman of the Board of Governors, that he shall appoint the Deputy Postmaster General, and that they both will become voting members of the Board of Governors. It just makes sense that the chief executive officer of the Postal Service also be the Chairman of the Board. It is also logical that the Postmaster General be able to select his chief deputy.

The U.S. Postal Service, one of the oldest and most important of all Federal services, is responsible for the transportation of letters and parcels to every corner of the Nation. To carry out this goal in the most efficient and least costly manner, we continue to need dedicated individuals in top management just as we need dedicated mail carriers, clerks, mechanics, and all the other 750,000 key postal workers throughout the Nation. This legislation will help us attract the very best top management possible.

Mr. President, I ask unanimous consent to have the bill printed at the end of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2493

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. APPOINTMENT, PAY, AND EXPENSES OF POSTMASTER GENERAL AND OTHER GOVERNORS OF POSTAL SERVICE; ANNUAL REPORT.

Section 202 of title 39, United States Code, is amended by striking out subsections (c) and (d) and inserting in lieu thereof the following:

"(c) The President shall appoint the Postmaster General, by and with the advice and consent of the Senate. The Postmaster General shall—

"(1) be a voting member of the Board of Governors; and

"(2) serve as Chairman of the Board of Governors; and

"(3) be paid at a rate equal to the annual rate of basic pay payable for positions at level I of the Executive Schedule, under section 5312 of title 5.

"(d) The Deputy Postmaster General shall—

"(1) be appointed by, and serve at the pleasure of, the Postmaster General;

"(2) be a voting member of the Board of Governors; and

"(3) be paid at a rate, as determined by the Postmaster General, not more than the annual rate of basic pay payable for positions at level II of the Executive Schedule, under section 5313 of title 5.

"(e) Each Governor (other than the Postmaster General and the Deputy Postmaster General) shall—

"(1) be paid basic pay at the rate of $10,000 per year;

"(2) in addition to basic pay, be paid $300 for each day on which such Governor attends an official meeting of the Board;

"(3) be reimbursed for actual expenses (including travel expenses) incurred in connection with attendance at official meetings of the Board.

The Board may conduct official meetings as often as may be necessary to carry out its functions under this title, but a Governor shall not be paid under paragraph (2) for more than 24 days in a calendar year.

"(f) Funds available to the Board shall be used only for essential activities of the Board. Expenses of the Board shall be paid from such funds only upon vouchers signed by the Chairman—

"(1) after a determination by the Chairman that such expenses are necessary, reasonable, and directly related to the functions of the Board; and

"(2) in the case of expenses of a Governor, after a determination by the Chairman that such expenses are incurred in the performance of official duties as a Governor.

Payments pursuant to the preceding sentence shall be audited at least annually by the Comptroller General under section 2008(a) of this title.

"(g) Not later than January 31 of each year, the Chairman of the Board of Governors shall submit to the President and to the Congress, with respect to the operations of the Board for the preceding calendar year, a report of—

"(1) the pay and reimbursed expenses of each Governor; and

"(2) all contracts and other agreements requiring payment from funds available to the Board or the Postal Service.".

SEC. 2. STATUS OF POSTMASTER GENERAL AND DEPUTY POSTMASTER GENERAL AS FULL VOTING MEMBERS OF THE BOARD OF GOVERNORS.

Section 202 of title 39, United States Code, as amended by section 1, is further amended—

(1) by striking out "Nine of the members, to be known as" in the second sentence of subsection (a) and inserting in lieu thereof the following: "Two of the Governors shall be the Postmaster General and the Deputy Postmaster General. The remaining 9";

(2) by striking out the third sentence of subsection (a);

(3) in the fourth sentence of subsection (a), by inserting after "The" the following: "nine";

(4) by striking out the fifth and sixth sentences of subsection (a);

(5) in the first sentence of subsection (b), by striking out "9 Governors" the first place it appears and inserting in lieu thereof "Governors (other than the Postmaster

General and the Deputy Postmaster General)";

(6) in the second sentence of subsection (b), by inserting after "Any" the following: "such"; and

(7) in the third sentence of subsection (b), by striking out "A Governor" and inserting in lieu thereof "Any such Governor".

SEC. 3. TECHNICAL AMENDMENTS.

(a) DEFINITION.—Section 102 of title 39, United States Code, is amended by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) 'Governor' means the Postmaster General and the Deputy Postmaster General (each when acting in the capacity of a Governor), and each of the 9 additional Governors appointed by the President under section 202(a).

(b) REPEAL OF OBSOLETE VOTING PROVISION.—Subsection (c) of section 205 of title 39, United States Code, is amended by striking out "except—" and all that follows through the end of the subsection and inserting in lieu thereof "except as otherwise provided in this title.".

SEC. 4. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect on May 15, 1989.

By Mr. BRADLEY (for himself, Mr. HEINZ, and Mr. GLENN):

S. 2494. A bill to amend title XVIII of the Social Security Act to modify the limitations on payment for home health services under the medicare program to conform to regulations; to assure that all legitimate costs are taken into account in calculating such limitations; to provide affected parties an opportunity to comment on revisions in medicare policies; and to require discharge planning procedures; to the Committee on Finance.

MEDICARE HOME HEALTH CARE IMPROVEMENT

● Mr. BRADLEY. Mr. President, I rise today to introduce the Medicare Home Health Care Improvement Act of 1986. Joining me in introducing this legislation are the Senators from Pennsylvania [Mr. HEINZ] and Ohio [Mr. GLENN]. This bill attempts to ensure that elderly individuals who need home care services receive them. It does so by stopping the Health Care Financing Administration from arbitrarily restricting home care services financed by Medicare.

Mr. President, the Congress has consistently supported efforts to expand home care services—in part to meet the needs of the growing number of people who need some level of care after their discharge from the hospital. Last month I held a Senate Aging Committee hearing in New Jersey to find out from Medicare recipients and health care providers just how well the Medicare home health care programs are working. One message came through loud and clear. The Health Care Financing Administration, through a variety of administrative mechanism, has made it very difficult—and frequently impossible—for elderly patients to receive the home care services that they need and are entitled to under Medicare. I found out that in New Jesey there has been an actual reduction in the number of patients being accepted for home care and a significant increase in the number of patients being denied Medicare coverage for home care services. This is simply not acceptable. I heard story after story from elderly New Jerseyans who are caring for even older patients, siblings or spouses about their frustrations with HCFA. And health care providers reported vastly differing decisions from HCFA on substantially similar cases.

This hearing led me to the inescapable conclusions that people with real needs are not being helped as they should be by Medicare. It is clear that we need legislation to stop HCFA from unilaterally and arbitrarily restricting eligibility for home care services. This legislation does just that.

In 1983, in an attempt to control rapidly increasing hospital costs, Congress enacted a new prospective method utilizing diagnosis related groupings, or DRG's, to reimburse hospitals for their care of Medicare patients. The DRG system provides an incentive for hospitals to reduce the length of a hospital stay to only that period of time where a patient requires acute care. This means that some people leave the hospital sicker and quicker than in the past.

There is nothing wrong with reducing the length of a hospital stay so long as a patient has access to a less intensive level of care after their stay in the hospital setting. Indeed, when services in hospitals are cut back, there is an obvious need to increase the availability of home care services to fill that gap. And that is exactly what we have seen over the past few years—the proportion of patients leaving the hospital that are receiving home care services has expanded fairly rapidly in recent years.

Mr. President, Medicare has always provided limited reimbursement for home care. A person is eligible for Medicare coverage if he or she meets the following criteria:

In need of skilled nursing care—in other words, sick enough to need medical care as distinguished from personal care alone.

In need of intermittent, as opposed to daily, care—in other words, not too sick to need full time care.

The patient must be homebound—in other words, so sick as to be unable to leave the home for any period of time.

Except for hospice patients, the patient must have rehabilitative potential—in other words, not in need of long-term custodial care.

But the hearings in New Jersey and other reports from around the country indicate that individuals meeting these criteria are not receiving needed home care.

That is the reason we are introducing this legislation today. This legislation does three things:

First, the bill mandates discharge planning. Currently, many elderly beneficiaries are being discharged from hospitals without adequate planning for their home care needs. The bill requires all hospitals to develop a discharge plan for their patients that evaluates the patients' likely need for appropriate home care services and the availability of those services. All health care facilities would be required to develop a discharge plan for all in-hospital patients as well as patients scheduled for ambulatory, or out-patient surgery.

Second, the bill stops HCFA from circumventing the regulatory process. Over the past few months, HCFA has unilaterally promulgated major policy changes through written and verbal directives and manuals, rather than through the regulatory process. This gives the public little or no opportunity to comment on changes in policy. My legislation ends that practice and requires HCFA to comply with the Federal Administrative Procedures Act. This would ensure that policy changes are only instituted through the normal regulatory process, which will permit a thorough review of changes in policy by Congress and the general public.

Third, the bill stops HCFA from arbitrarily restricting reimbursement for various home care services. HCFA recently established a new policy that limits reimbursement levels for each type of home care service, including skilled nursing services, physical therapy and social work services. These policies severely restrict the capacity of home care agencies to provide a full range of services to meet the need for services in their particular communities. The bill prohibits HCFA from establishing separate cost limits and allows home care agencies to continue to combine costs in order to better meet the needs in their community. In addition, the bill requires HCFA to take into account all legitimate costs when it establishes reimbursement for home care services.

Mr. President, we are all too aware that the present system of Medicare reimbursement for home care is totally geared toward post-acute care rather than long-term care. For many years I have tried to get the Senate to focus on the need to expand home care services to include long-term care. I will not give up that fight. But that is a fight for another day. Today, I am asking my colleagues to take important and needed actions to make sure that elderly, sick Americans receive the post-acute care Medicare home care benefits that Congress intended them to have. This bill goes a long way

to protecting older Americans in need of care.

I ask unanimous consent that a copy of the bill appear in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2494

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE

(a) SHORT TITLE.—This Act may be cited as the "Medicare Home Health Care Improvement Act of 1986."

SECTION 101. MODIFYING LIMITS ON PAYMENT FOR HOME CARE SERVICES

(a) CONFORMING AMENDMENT—Section 1861(v)(1)(L) of the Social Security Act is amended by striking out "the 75th percentile" and all that follows through "as the Secretary may determine." and inserting in lieu thereof "for cost reporting periods beginning on or after—

"(i) July 1, 1985, and before July 1, 1986, 120 percent,

"(ii) July 1, 1986, and before July 1, 1987, 115 percent, or

"(iii) July 1, 1987, 112 percent,

of the mean of the labor-related and nonlabor per visit costs for free standing home health agencies. Such limitations shall be applied on an aggregate basis for the agency, rather than on a discipline specific basis, with appropriate adjustment for administrative and general costs of hospital-based agencies".

(b) CALCULATION OF PER VISIT COSTS—In determining per visit costs pursuant to clauses (ii) and (iii) of section 1861(v)(1)(L) of the Social Security Act, the Secretary shall take into account all costs to be incurred by home health agencies in the cost reporting period to which such clause (ii) or (iii), as the case may be, applies, including: costs attributable to increases in the intensity of home health services that have occurred as a result of decreases in the duration of the hospital stays of home health patients and the increased use of home health services as an alternative to admission to a hospital; the costs attributable to the startup costs of relatively new agencies; and the costs attributable to the implementation and the ongoing administration of billing and coverage verification procedures.

(c) GAO REPORT.—The Comptroller General shall study and report to Congress, not later than December 31, 1986, on the appropriateness and impact on beneficiaries of applying the per visit cost limits for home health services under the medicare program on a discipline-specific basis, rather than on an aggregate basis for all home health services furnished by an agency, and the appropriateness and impact on beneficiaries of the percentages specified in subsection (a).

(d) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to cost reporting periods beginning on or after July 1, 1985. The amendment made by subsection (b) shall apply to cost reporting periods beginning on or after January 1, 1987.

SECTION 201. PROVIDING GREATER PUBLIC COMMENT

(a) Section 1871 of the Social Security Act is amended by adding the following:

"Such regulations shall be subject to general notice, publication and opportunity for comment to the same extent as rule making which is subject to the provisions of 5 U.S.C. 553; provided, however, that the provisions of such section 553 which afford special treatment for interpretative rules, general statements of policy and statements of policy shall not be applicable. For purposes of the preceding sentence, the term "regulations" shall mean any statement which initiates, clarifies or otherwise modifies a policy or procedure or its application and which can be expected to have a significant effect on individuals who are entitled to benefits under this title or any institution, agency or other party from whom such individuals obtain health services or items."

(b) The amendment made by subsection (a) shall apply to policy issued on and after July 1, 1986.

SEC. 301. REQUIRING HOSPITALS TO PROVIDE DISCHARGE PLANNING PROCESS.

"(a) REQUIREMENT AS CONDITION OF PARTICIPATION.—Section 1861(e)(6) of the Social Security Act (42 U.S.C. 1395x(e)(6)) is amended—

(1) by inserting "(A)" after "(6)", and

(2) by inserting before the semicolon at the end the following: "and (B) has in place a discharge planning process that meets the requirements of subsection (ee)".

(b) DISCHARGE PLANNING PROCESS.—Section 1861 of such Act is further amended by adding at the end the following new subsection:

"DISCHARGE PLANNING PROCESS

"(ee)(1) A discharge planning process of a hospital shall be considered sufficient if it is applicable to services furnished by the hospital to individuals entitled to insurance benefits under this title and if it meets the guidelines and standards established by the Secretary under paragraph (2).

"(2) The Secretary shall develop guidelines and standards for the discharge planning process in order to ensure a timely and smooth transition to the most appropriate type of and setting for post-hospital or rehabilitative care. The guidelines and standards shall include the following:

"(A) The hospital must identify, at an early stage of hospitalization, those patients who are likely to suffer adverse health consequences upon discharge in the absence of adequate discharge planning.

"(B) Hospitals must provide a discharge planning evaluation for patients identified under subparagraph (A) and for other patients upon the request of the patient, patient's representative, or patient's physician.

"(C) Any discharge planning evaluation must be made on a timely basis to ensure that appropriate arrangements for post-hospital care will be made before discharge and to avoid unnecessary delays in discharge.

"(D) A discharge planning evaluation must include an evaluation of a patient's likely need for appropriate post-hospital services and the availability of those services.

"(E) The results of a discharge planning evaluation must be made available to the patient (or the patient's representative) and the patient's physician for use in establishing an appropriate discharge plan.

"(F) Upon the request of a patient's physician, the hospital must arrange for the development and initial implementation of a discharge plan for the patient.

"(G) Any discharge planning evaluation or discharge plan required under this paragraph must be developed by, or under the supervision of, a registered professional nurse, social worker, or other appropriately qualified personnel."

(c) COVERAGE.—The discharge planning process shall be undertaken for all patients admitted to the hospital, including patients scheduled for ambulatory surgery.

(1) The third sentence of section 1832(a)(2)(F)(i) is amended as follows: between "safety," and "and" add "standards with respect to discharge planning as defined in section 1861."

(2) Section 1832(a)(2)(F)(ii) is amended after Section III by adding the following new subsection: "IV. All patients receive adequate discharge planning services, as defined in section 1861."

(d) EFFECT OF ACCREDITATION.—The second sentence of section 1865(a) of such Act (42 U.S.C. 1395bb(a)) is amended—

(1) by inserting ", requires a discharge planning process (or imposes another requirement which services substantially the same purpose)," after "the same purpose)", and

(2) by inserting "clause (A) or (B) of" after "comply also with".

(e) EFFECTIVE DATE.—The requirements of section 1861(ee) of the Social Security Act shall apply to agreements entered into with hospitals, under section 1866 of the Social Security Act, on or after one year after the date of the enactment of this Act.●

● Mr. HEINZ. Mr. President, it gives me great pleasure to join with my distinguished colleagues, Senators BRADLEY and GLENN, in introducing a bill which will address three of the difficult problems Medicare beneficiaries face in getting the home health care they need.

This legislation, which consolidates several provisions from bills I have introduced earlier, would require: First, the Health Care Financing Administration to fairly and adequately pay for home health services, second, that hospitals provide Medicare beneficiaries with discharge planning services as a prerequisite for participation in the Medicare Program, and third, that HCFA provide public notices in the Federal Register of transmittals and guidelines issued by the agency that have a significant effect on Medicare policy.

This legislation is needed for the very simple and well-documented reason that, partly as a result of the Medicare prospective payment system, Medicare beneficiaries are being discharged from hospitals sooner and in greater need of care after leaving the hospital than ever before. From October 1, 1983, when the prospective payment system was implemented, to March 31, 1985, hospital discharges to home health care increased by 37 percent. Discharges to skilled nursing facilities increased similarly. This means that by the end of the first calendar quarter of 1985, more than 50,000 additional patients were being discharged yearly to skilled nursing facilities and home health care than had been discharged to these same providers at the beginning of PPS.

This increase in use of post-hospital services directly follows the intent of Congress in passing the Medicare prospective payment system. The idea behind the prospective payment legis-

lation was to provide incentives for Medicare patients to be cared for in the least costly, most appropriate health care settings, and to encourage use of skilled nursing facilities and home health care as substitutes for more costly hospital inpatient care.

We are clearly seeing these incentives change the way health care is delivered in this country and the increased use of home health care is one indication of this change. At the same time that increased use of home health care is encouraged under PPS, however, the Health Care Financing Administration is working to prevent any increased use of the Medicare home health benefit. Health care is like a balloon, Mr. President. If we squeeze down on the acute end, the sick have to find care at the posthospital end. Squeezing down on both ends, as HCFA would like to do, gives seniors in need of health care no where to go.

This legislation would work on three fronts to ensure that seniors can get the home health care they need. First, Medicare patients will not be able to get home health care if HCFA does not adequately reimburse for these important services. To ensure adequate xayment, this bill borrows provisions concerning home health reimbursement that were agreed to by both Houses of the Congress and originally included in the Consolidated Omnibus Budget Reconciliation Act of 1985. These provisions, which I introduced last year as amendments to the reconciliation bill, were unfortunately dropped from the bill as finally signed into law at the administration's request.

These provisions would allow HCFA to impose slightly decreasing payment levels for home health care services, but would allow home health agencies to aggregate their payments—be paid on a lump-sum basis for the different services they provide, rather than being paid individually for each separate service. The legislation would also require HCFA to develop its payment levels based on the most recent cost data available, adequately adjusted for changes that have occurred as the result of PPS, costs attributable to the startup costs of new home health agencies, and costs attributable to the new, time-consuming billing and review procedures HCFA has imposed on health agencies in the last year.

Second, discharge planning is the vital element to assure that Medicare beneficiaries will actually find their way to the home health care they need. Proper discharge planning provided in hospitals before the patient is discharged can help evaluate the patient's needs, and, taking into account his and his family's wishes, can help match patients with posthospital providers to care for the patient after discharge.

Using language from S. 2331, the Medicare Quality Protection Act which I introduced last month with Congressman STARK, this bill would require that hospitals have a meaningful discharge planning process to aid Medicare patients as they move through the health care system.

Third, home health and other Medicare providers are finding that the rules of the Medicare game are ever changing and open to interpretation. Currently, Medicare regulations are exempt from the requirement of public notice and comment under the Administrative Procedures Act. While DHHS currently follows APA requirements for regulations on a voluntary basis, I believe we need to make this voluntary agreement a legal requirement to ensure that Medicare beneficiaries and providers continue to receive this important information.

In addition, I believe HCFA/DHHS transmittals, guidelines, and program instructions to fiscal intermediaries should also be subject to public notice under the APA. This bill would require published notice in the Federal Register of the issuance of any Medicare communication that would have the effect of changing Medicare policy, including the name and phone number of the HCFA contract responsible for the issuance. HCFA often uses these guidelines and transmittals to institute important changes in Medicare policy, such as its interpretation of "intermittent" care.

Currently, information about part B changes can only be found in a private, costly journal, unavailable to many providers and senior advocates. Last year, the Federal Register published 112,000 pages. This requirement, which would add only public notice, not publication of the full text to the Register, would add an estimated 70 pages a year—not an overwhelming burden on the Federal Government, and certainly a small price to pay for informed beneficiaries and an openly run Federal health care program.

I have long advocated bringing the Medicare Program under the Administrative Procedures Act and am pleased to have this provision included in this bipartisan legislation.

These three elements—fair home health care payments, adequate and proper discharge planning, and an openly run Federal health care program—are vital to ensuring that the price for heavyhanded cost containment on both ends of the health care spectrum is not paid for by the deterioration of the health and well-being of our Nation's elderly.

I urge my colleagues to support this legislation that will restore quality and access to a pendulum that has swung too far in the direction of cost cutting.●

By Mr. KENNEDY:

S. 2495. A bill to amend the Food Stamp Act of 1977, the Child Nutrition Act of 1966, and the National School Lunch Act to improve the availability of benefits under such acts, to provide for a program for nutrition monitoring and research, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

HUNGER RELIEF ACT

● Mr. KENNEDY. Mr. President, some chapters in the war on poverty have been bright additions to our national history, and, until 1981, the war on hunger was a bright page. The other America was discovered in the early 1960's, and perhaps the most shocking fact about the destitution that we discovered in our midst was that millions of Americans were without enough to eat. Doctors in some clinics were prescribing food for their patients—food that their patients could not afford. The Food Stamp Program was launched as a pilot program by President Kennedy, the first public step in a long-term national commitment to eradicate hunger in America.

That program and others proved to be effective, and they were expanded to meet the need. A Harvard School of Public Health Task Force reported in 1967 that there was widespread starvation in this country, but that by 1977, we had largely succeeded in ending hunger and malnutrition, chiefly because of effective Government action.

In 1981, the Reagan administration enacted the broadest, deepest cuts in food programs in history—and then adopted economic policies that sent unemployment into double digits. The result was inevitable, foreseeable, and cruel. I saw it first hand in 1983 when I visited four cities and rural Kentucky to explore the extent of American hunger. In 1985, the Harvard physicians returned to the field and this is what they found:

> Perhaps never in the past half century has hunger in this Nation spread so rapidly. It returned because programs which virtually ended hunger in the past decade have been weakened.

At the same time that hunger was returning to America, famine swept Africa. I traveled with my family to Ethiopia and the Sudan and saw the pain of the people and children of Africa. The world reached out to them, and an unprecedented relief effort turned the tide for famine; 7 million lives were saved. Of that effort, the world and the people of this country are justly proud.

But there remains a crisis here in America. Millions of Americans and their children are without enough to eat. Many of the same people who worked to saves lives in Africa have turned their energies to restore hope

for millions at home. The hands across America event this Sunday will show the concern and commitment of Americans to the hunger that other Americans suffer. Their hands will reach from coast through desert, to cities and farms, and from hand to hand a bond will be forced against poverty, hunger, and neglect.

Today, I join my efforts with theirs in a new commitment to eliminate hunger in America. The goal is both achievable and affordable—we can reach it by December 1986, if we have the will to do so.

I am introducing today legislation to carry out that commitment by expanding the reach of the Food Stamp Program and feeding hungry children and elderly Americans. Congressman PANETTA has introduced a similar bill in the House of Representatives. We want Government to join hands with private citizens to end hunger in this country. Private efforts are vital, but they are no substitute for public action. I hope that the administration will join me in this commitment and I hope that my colleagues in the Senate will work with me to enact the Hunger Relief Act of 1986.

THE HUNGER RELIEF ACT OF 1986: A 12-POINT PLAN

1. BASIC FOOD STAMP BENEFITS

Add $400 million per year (2½% increase per year) to the thrifty food plan with the ultimate aim of moving to the low cost food plan as the basis for the Food Stamp Program.

2. SHELTER DEDUCTION

Raise the shelter deduction from $147 to $175 to make up for the loss in indexing when the adminstration froze it in 1981.

3. ELDERLY MEDICAL DEDUCTION

Liberalize the medical deduction for the elderly to set the threshold at 5% of gross income or $35, whichever is less, to respond to increasing copayments and deductions in both private medical insurance and Medicare.

4. ASSET LIMITS

Raise the asset limits to correspond with the President's Task Force on Hunger recommendations.

$2,250 for nonelderly households.
$3,500 for elderly households.
$5,500 for automobiles.

5. OUTREACH

Restore the Federal 50% matching funds for States who opt to provide food stamp outreach services.

6. CHILD SUPPORT DISREGARD

Exempt the first $50 a month paid in child support from counting against food stamps to make the Food Stamp Program consistent with AFDC.

7. CHILD NUTRITION: BREAKFAST AND LUNCH

Increase the Federal reimbursement for school breakfasts to help defray the cost of maintaining and improving the nutritional quality of breakfast.

Return the cost of reduced price breakfasts to pre-1981 status of 15¢ from current 30¢.

Return the cost of reduced price lunch to pre-1981 status of 25¢ from current 40¢.

8. CHILD CARE FOOD PROGRAM

Increase the reimbursement rate for child care breakfasts by 5¢.

Return a meal or snack (provider's choice) to the program. The administration cut both a meal and a snack in 1981 from the program.

9. WIC

Increase WIC funding by $550 million over 3 years. This will add 380,000 eligible women, infants, and children to the program.

ELDERLY NUTRITION

Increase authorization levels for congregate and home-delivered meals and elderly feeding commodities programs.

Increase the temporary emergency food assistance program [TEFAP] authorization level.

11. NUTRITION EDUCATION

Increase the authorization levels for the major nutrition education programs as follows:

Increase the expanded food and nutrition program by $15 million.

Add $5 million to the authorization level for the community food and nutrition program.

Add $10 million to the authorization level for nutrition education training in schools.

NUTRITION MONITORING

Enact the National Nutrition Monitoring and Related Services Act.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2495

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Hunger Relief Act of 1986".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title and table of contents.

TITLE I—GENERAL FOOD AND NUTRITION PROGRAMS

Sec. 101. Food stamp program.
Sec. 102. Temporary emergency food assistance program.
Sec. 103. Food, nutrition, and consumer education program.

TITLE II—SPECIAL FOOD AND NUTRITION PROGRAMS FOR CHILDREN, WOMEN, AND THE ELDERLY

Sec. 201. School breakfast program.
Sec. 202. School lunch program.
Sec. 203. Child care food program.
Sec. 204. Special supplemental food program for women, infants, and children (WIC).
Sec. 205. Nutrition education and training program.
Sec. 206. Older Americans programs.
Sec. 207. Commodity supplemental food program.
Sec. 208. Community food and nutrition program.

TITLE III—NUTRITION MONITORING AND RELATED RESEARCH

Subtitle A—General Provisions

Sec. 301. Short title.
Sec. 302. Purposes.
Sec. 303. Definitions.

Subtitle B—Nutrition Monitoring and Related Research

Sec. 310. Establishment of Coordinated Program.
Sec. 311. Functions of the Secretaries.
Sec. 312. Development of Comprehensive National Nutrition Monitoring and Related Research Plan.
Sec. 313. Implementation of the Comprehensive Plan.
Sec. 314. Scientific research and development in support of Coordinated Program and Comprehensive Plan.
Sec. 315. Authorization of appropriations.

Subtitle C—National Nutrition Monitoring Advisory Council

Sec. 320. Establishment of the Council.
Sec. 321. Functions of the Council.

Subtitle D—Dietary Guidance

Sec. 330. Establishment of dietary guidelines.

TITLE IV—EFFECTIVE DATES

Sec. 401. Effective dates.

TITLE I—GENERAL FOOD AND NUTRITION PROGRAMS

SEC. 101. FOOD STAMP PROGRAM.

(a) ADJUSTMENT OF COST OF THRIFTY FOOD PLAN.—The second sentence of section 3(o) of the Food Stamp Act of 1977 (7 U.S.C. 2012(o)) is amended—

(1) by striking out "and (8) on October 1, 1985, and each October 1 thereafter", and inserting in lieu thereof "(8) on October 1, 1985, and October 1, 1986"; and

(2) by inserting after "size" the last place it appears the following: "; and (9) on October 1, 1987, and each October 1 thereafter, increase the cost of such diet by the sum of 2.5 percent and any increase in the cost of the thrifty food plan for the 12 months ending the preceding June 30 and round the result to the nearest lower dollar increment for each household size, except that the cost of the thrifty food plan as so increased may not exceed the cost of the low cost food plan for such household size".

(b) EXCLUSION OF CERTAIN CHILD SUPPORT PAYMENTS FROM INCOME.—Section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended—

(1) in subsection (d), by amending clause (13) to read as follows: "(13) any child support payments received with respect to one or more dependent children, but not in excess of $50 per month"; and

(2) by striking out subsection (m).

(c) DEDUCTION FOR EXCESS SHELTER EXPENSE.—The proviso to the fourth sentence of section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended—

(1) by striking out "$147" and inserting in lieu thereof "$175"; and

(2) by striking out "$256, $210, $179, and $109" and inserting in lieu thereof "$305, $250, $213, and $130".

(d) DEDUCTION FOR EXCESS MEDICAL EXPENSES OF THE ELDERLY AND DISABLED.—Clause (A) of the last sentence of section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by striking out "$35 a month" and inserting in lieu thereof "the lesser of $35 a month or 5 percent of monthly household income after any exclusions and before any deductions provided for in this section".

(e) LIMITATION ON RESOURCES.—Section 5(g) of the Food Stamp Act of 1977 (7 U.S.C. 2014(g)) is amended—

(1) in the first sentence, by striking out "$2,000" and all that follows through

"$3,000" and inserting in lieu thereof "$2,250 or, in the case of a household that consists of or includes a member who is 60 years of age or older, $3,500"; and

(2) in the second sentence, by striking out "$4,500" and inserting in lieu thereof "$5,500".

(f) PUBLIC INFORMATION.—

(1) OUTREACH ACTIVITIES.—Section 11(e)(1)(A) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(1)(A)) is amended by inserting after "funds provided under this Act" the following: "except for activities, implemented at the discretion of the State agency, that provide program information (including program eligibility and benefit guidelines) to unemployed, disabled, or elderly persons who apply, or may be eligible, for participation in the program".

(2) ADMINISTRATIVE COSTS.—The first sentence of section 16(a) of the Food Stamp Act of 1977 (7 U.S.C. 2025(a)) is amended by striking out "and (4) fair hearings" and inserting in lieu thereof "(4) fair hearings, and (5) activities providing program information to unemployed, disabled, or elderly persons".

(g) AUTHORIZATION OF APPROPRIATIONS.—The second sentence of section 18(a)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2027(a)(1)) is amended by striking out "$13,936,000,000" and all that follows through "1990" and inserting in lieu thereof the following: "$14,700,000,000 for the fiscal year ending September 30, 1987; $15,500,000,000 for the fiscal year ending September 30, 1988; $16,300,000,000 for fiscal year ending September 30, 1989; and $16,900,000,000 for the fiscal year ending September 30, 1990".

(h) REPORT.—Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall submit, to the Speaker of the House of Representatives and the President pro tempore of the Senate, a report containing an evaluation of the budgetary and administrative consequences under the food stamp program established under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.) that would result from calculating the value of the financial resources (including licensed vehicles) of households for purposes of determining eligibility to participate in the program solely on the basis of the amount of equity such households have in such resources.

SEC. 102. TEMPORARY EMERGENCY FOOD ASSISTANCE PROGRAM.

Section 204(c)(1) of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended—

(1) by striking out "$50,000,000 for each of the fiscal years" and inserting in lieu thereof "$55,000,000 for the fiscal year", and

(2) by inserting "$70,000,000 for the fiscal year ending" after "1986, and".

SEC. 103. FOOD, NUTRITION, AND CONSUMER EDUCATION PROGRAM.

Section 1588(a) of the Food Security Act of 1985 (7 U.S.C. 3175e(a)) is amended—

(1) by striking out "$6,000,000" and inserting in lieu thereof "$21,000,000"; and

(2) by striking out "$8,000,000" and inserting in lieu thereof "$23,000,000".

TITLE II—SPECIAL FOOD AND NUTRITION PROGRAMS FOR CHILDREN, WOMEN, AND THE ELDERLY

SEC. 201. SCHOOL BREAKFAST PROGRAM.

(a) REDUCED PRICE BREAKFASTS.—Section 4(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(b)) is amended—

(1) in paragraphs (1)(B) and (1)(C), by striking out "30" each place it appears and inserting in lieu thereof "15"; and

(2) in paragraph (2)(C), by striking out "30" and inserting in lieu thereof "15".

(b) ADDITIONAL FUNDING TO IMPROVE SCHOOL BREAKFAST PROGRAM MEAL PATTERN.—Section 4(b) of the Child Nutrition Act of 1966 is amended by adding at the end thereof the following new paragraph:

"(3)(A) Except as provided in subparagraph (B), the Secretary shall increase by 5 cents the annual adjusted payment for each breakfast served under this Act and section 17 of the National School Lunch Act (42 U.S.C. 1766) to assist States in improving the nutritional quality of such breakfasts, to the extent feasible.

"(B) The Secretary shall increase by 10 cents the annual adjusted payment for each breakfast served to a child qualifying for a free or reduced-price breakfast at schools that are in severe need.".

(c) REVIEW OF NUTRITION REQUIREMENTS.—

(1) REVIEW.—The Secretary of Agriculture shall review and revise the nutrition requirements for meals served under the school breakfast program established under the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) to improve the nutritional quality of such meals, taking into consideration both the findings of the National Evaluation of School Nutrition Programs and the need to provide increased flexibility in meal planning to local school food service authorities.

(2) REGULATIONS.—Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall promulgate regulations to implement such revisions.

SEC. 202. SCHOOL LUNCH PROGRAM.

(a) INCREASE IN FEDERAL REIMBURSEMENT FOR REDUCED PRICE MEALS.—Section 11(a)(2) of the National School Lunch Act (42 U.S.C. 1759a(a)(2)) is amended by striking out "40" and inserting in lieu thereof "25".

(b) CONFORMING AMENDMENT.—The third sentence of section 9(b)(3) of the National School Lunch Act (42 U.S.C. 1758(b)(3)) is amended by striking out "40" and inserting in lieu thereof "25".

SEC. 203. CHILD CARE FOOD PROGRAM.

Section 17(f)(2)(B) of the National School Lunch Act (42 U.S.C. 1766(f)(2)(B)) is amended by striking out "two meals and one supplement" and inserting in lieu thereof "two meals and two supplements or three meals and one supplement".

SEC. 204. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC).

(a) LIMITED STATE ENTITLEMENT.—Section 17(g) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)) is amended—

(1) by inserting "(1)" after "(g)";

(2) in paragraph (1) (as so designated), by striking out the first sentence and inserting in lieu thereof in lieu thereof the following new sentence: "For fiscal years 1987, 1988, 1989, there are authorized to be appropriated, and the Secretary shall pay to each State agency, such sums as may be necessary to provide supplemental foods, nutrition services, administration, and such other programs, services, and activities as are authorized for eligible women, infants, and children under this section, except that the amount appropriated under this sentence may not exceed $1,750,000,000 for fiscal year 1987, $1,850,000,000 for fiscal year 1988, and $1,950,000,000 for fiscal year 1989."; and

(3) by inserting after paragraph (1) (as so designated) the following new paragraph:

"(2) Each State agency shall be entitled to payment under this section for each fiscal year in an amount equal to the allocation of the State agency (as determined under subsections (h)(2) and (i)) of the authorization levels specified in paragraph (1).".

(b) CONFORMING AMENDMENT.—The second sentence of section 17(a) of the Child Nutrition Act of 1966 is amended by striking out ", up to the authorization levels set forth in subsection (g) of this section,".

SEC. 205. NUTRITION EDUCATION AND TRAINING PROGRAM.

Section 19(j)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1788(j)(2)) is amended—

(1) in the first sentence, by striking out "ending on or before September 30, 1984,"; and

(2) in the second sentence, by striking out "$5,000,000" and inserting in lieu thereof "$15,000,000".

SEC. 206. OLDER AMERICANS PROGRAMS.

(a) CONGREGATE NUTRITION SERVICES.—Section 303(b)(1) of the Older Americans Act of 1965 (42 U.S.C. 3023(b)(1)) is amended by striking out "$395,000,000" and inserting in lieu thereof "$425,000,000".

(b) HOME DELIVERED NUTRITION SERVICES.—Section 303(b)(2) of the Older Americans Act of 1965 (42 U.S.C. 3023(b)(2)) is amended by striking out "$75,600,000" and inserting in lieu thereof "$95,600,000".

(c) AVAILABILITY OF SURPLUS COMMODITIES.—Section 311(c)(1)(A)(i) of the Older Americans Act of 1965 (42 U.S.C. 3030a(c)(1)(A)(i)) is amended by striking out "$144,000,000" the last place it appears and inserting in lieu thereof "$154,000,000".

SEC. 207. COMMODITY SUPPLEMENTAL FOOD PROGRAM.

Section 5(f) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) is amended by inserting in lieu thereof "for mothers, infants, and children and for low-income elderly persons" after "sites for the program".

SEC. 208. COMMUNITY FOOD AND NUTRITION PROGRAM.

Section 618A(b) of the Community Services Block Grant Act (42 U.S.C. 9910a(b)) is amended by inserting in lieu thereof "and $5,000,000 for fiscal year 1987" after "1986".

TITLE III—NUTRITION MONITORING AND RELATED RESEARCH

Subtitle A—General Provisions

SEC. 301. SHORT TITLE.

This title may be cited as the "National Nutrition Monitoring and Related Research Act of 1986".

SEC. 302. PURPOSES.

It is the purpose of this title—

(1) to make more effective use of Federal and State expenditures for nutrition monitoring;

(2) to enhance the performance and benefits of current Federal nutrition monitoring and related research activities;

(3) to establish and facilitate the timely implementation of a coordinated National Nutrition Monitoring and Related Research Program and thereby establish a scientific basis for the maintenance and improvement of the nutritional status of the United States population and the nutritional quality of the United States food supply;

(4) to establish and implement a comprehensive National Nutrition Monitoring and Related Research Plan to assess on a continuing basis the dietary and nutritional status and trends of the United States population, the state-of-the-art, future monitoring and related research priorities, and the relevant policy implications;

(5) to establish and improve national nutritional and health status data and related

data bases and networks, and to stimulate research necessary to develop uniform indicators, standards, methodologies, technologies, and procedures for nutrition monitoring;

(6) to establish a central Federal focus for the coordination, management, and direction of Federal nutrition monitoring activities;

(7) to establish mechanisms for addressing the nutrition monitoring needs of Federal, State, and local governments, the private sector, scientific and engineering communities, health care professionals, and the public in support of the objectives described in paragraphs (1) through (6); and

(8) to provide for the conduct of such scientific research and development as may be necessary or appropriate in support of such objectives.

SEC. 303. DEFINITIONS.

As used in this title:

(1) INTERAGENCY BOARD FOR NUTRITION MONITORING AND RELATED RESEARCH AND BOARD.—The terms "Interagency Board for Nutrition Monitoring and Related Research" and "Board" mean the Federal coordinating body established by section 310(c).

(2) JOINT IMPLEMENTATION PLAN FOR A COMPREHENSIVE NATIONAL NUTRITION MONITORING SYSTEM.—The term "Joint Implementation Plan for a Comprehensive National Nutrition Monitoring System" means the plan of that title submitted to the Congress in September 1981 by the Department of Agriculture and the Department of Health and Human Services, pursuant to section 1428 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3178).

(3) LOCAL GOVERNMENT.—The term "local government" means a local general unit of government or local educational unit.

(4) NATIONAL NUTRITION MONITORING ADVISORY COUNCIL AND COUNCIL.—The terms "National Nutrition Monitoring Advisory Council" and "Council" mean the advisory body established by section 320.

(5) NUTRITION MONITORING AND RELATED RESEARCH.—The term "nutrition monitoring and related research" means the set of activities necessary to provide timely information about the role and status of factors that bear on the contribution that nutrition makes to the health of the United States population, including—

(A) dietary, nutritional, and health status measurements;

(B) food consumption measurements;

(C) food composition measurements and nutrient data banks;

(D) dietary knowledge and attitude measurements; and

(E) food supply and demand determinations.

(6) NATIONAL NUTRITION MONITORING AND RELATED RESEARCH PLAN AND COMPREHENSIVE PLAN.—The terms "National Nutrition Monitoring and Related Research Plan" and "comprehensive plan" mean the comprehensive plan established by section 312.

(7) NATIONAL NUTRITION MONITORING AND RELATED RESEARCH PROGRAM AND COORDINATED PROGRAM.—The terms "National Nutrition Monitoring and Related Research Program" and "coordinated program" mean the coordinated program established by section 310(a).

(8) SECRETARIES.—The term "Secretaries" means the Secretary of Agriculture and the Secretary of Health and Human Services acting jointly.

Subtitle B—Nutrition Monitoring and Related Research

SEC. 310. ESTABLISHMENT OF COORDINATED PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—There is established a 10-year coordinated program, to be known as the National Nutrition Monitoring and Related Research Program, to carry out the purpose of this title.

(b) IMPLEMENTATION.—The Secretaries shall be responsible for the implementation of the coordinated program.

(c) ESTABLISHMENT OF BOARD.—

(1) IN GENERAL.—To assist in implementing the coordinated program, there is established an Interagency Board for Nutrition Monitoring and Related Research.

(2) CHAIRPERSONS.—An Assistant Secretary in the Department of Agriculture (designated by the Secretary of Agriculture) and an Assistant Secretary in the Department of Health and Human Services (designated by the Secretary of Health and Human Services) shall act as joint chairpersons of the Board.

(3) REMAINING MEMBERSHIP.—The remaining membership of the Board shall consist of additional representatives of Federal agencies, as considered appropriate by the joint chairpersons of the Board.

(4) MEETINGS.—The Board shall meet no less often than once every 3 months.

(d) ADMINISTRATOR.—

(1) IN GENERAL.—To establish a central focus and coordinator for the Nutrition Monitoring and Related Research Program, the Secretaries may appoint a full-time Administrator of Nutrition Monitoring and Related Research.

(2) APPOINTMENT.—The Administrator shall be—

(A) an individual who is eminent in the field of nutrition monitoring and related areas; and

(B) be selected on the basis of the established record of expertise and distinguished service of the individual.

(3) DUTIES.—The Administrator shall—

(A) administer the coordinated program with the advise and counsel of the joint chairpersons of the Board;

(B) serve as the focal point for the coordinated program; and

(C) serve as the Executive Secretary for the National Nutrition Monitoring Advisory Council.

SEC. 311. FUNCTIONS OF THE SECRETARIES.

(a) IN GENERAL.—The Secretaries, with the advice of the Board, shall—

(1) establish the goals of the coordinated program, identify the activities required to meet such goals, and identify the responsible agencies;

(2) update and integrate the Joint Implementation Plan for a Comprehensive National Nutrition Monitoring System into the coordinated program;

(3) assure the timely implementation of the coordinated program and the comprehensive plan established under section 312;

(4) include in the coordinated program and the comprehensive plan a competitive grants program in accordance with this title, to encourage and assist the conduct, by Federal and non-Federal entities on an appropriate matching funds basis, of research (including research described in section 312(a)(3)) that will accelerate the development of uniform and cost-effective standards and indicators for the assessment and monitoring of nutritional and dietary status and for relating food consumption patterns to nutritional and health status;

(5) include in the coordinated program and the comprehensive plan a grants program, in accordance with this title, to encourage and assist State and local governments in developing the capacity to conduct monitoring and surveillance of nutritional status, food consumption, and nutrition knowledge and in using such capacity to enhance nutrition services (including activities described in sections 312(a)(5) and 312(b)(9));

(6) include in the coordinated program an annual interagency budget for each fiscal year of the program;

(7) foster productive interaction between Federal efforts, State and local governments, the private sector, scientific communities, health professionals, and the public;

(8) contract with a scientific body, such as the National Academy of Sciences or the Federation of American Societies for Experimental Biology—

(A) to interpret available date analyses; and

(B) every 2 years, or more frequently if appropriate, to publish a report on the dietary, nutritional, and health-related status of the population of the United States and the nutritional quality of the national food supply;

(9) foster cost recovery management techniques; and

(10) impose appropriate charges and fees for publications of the coordinated program, including print and electronic forms of data and analysis, and utilize the proceeds of such charges and fees for purposes of the program (except that no such charge or fee imposed on an educational or other nonprofit organization shall exceed the actual costs incurred by the program in providing the publication or publications involved).

(b) ANNUAL REPORTS.—The Secretaries shall submit to the President for transmittal to the Congress by January 15 of each year an annual report that shall—

(1) evaluate the progress of the program under this title;

(2) summarize the results of such program components as are developed under section 312;

(3) analyze the dietary, nutritional, and related health status of the United States population, the nutritional quality of the national food supply, the relevant policy implications of the findings, and future nutrition monitoring and related research priorities;

(4) include in full the annual report of the Council as specified in section 321; and

(5) include an executive summary of the report most recently published by the scientific body specified in subsection (a)(8).

SEC. 312. DEVELOPMENT OF COMPREHENSIVE NATIONAL NUTRITION MONITORING AND RELATED RESEARCH PLAN.

(a) DESIGN.—The Secretaries, with the advice of the Board, shall prepare and implement a comprehensive plan for the coordinated program that shall be designed—

(1) to assess, collate, analyze, and report on a continuous basis the dietary and nutritional status and trends of the United States population (dealing with such status and trends separately in the case of preschool and school-age children, pregnant and lactating women, elderly individuals, low-income populations, blacks, Hispanics, and other minorities as appropriate), the state-of-the-art, future monitoring, and related research priorities, and relevant policy implications of the findings;

(2) to assess, analyze, and report on a continuous basis, for a representative sample of

the low-income population, food and household expenditures, participation in food assistance programs, and periods experienced when resources were not sufficient to provide an adequate diet;

(3) to sponsor or conduct research necessary to develop uniform indicators, standards, methodologies, technologies, and procedures for conducting and reporting nutrition monitoring and surveillance;

(4) to develop and update a national dietary and nutritional status data bank, a nutrient data bank, and other data resources as required;

(5) to assist State and local agencies in developing procedures and networks for nutrition monitoring and surveillance; and

(6) to focus the relevant activities of the Federal agencies.

(b) COMPONENTS.—The comprehensive plan shall, at a minimum, include components to—

(1) maintain and coordinate the National Health and Nutrition Examination Survey (NHANES) and the Nationwide Food Consumption Survey (NFCS);

(2) provide by 1990 for the continuous collection, processing, and analysis of nutritional and dietary status data through a stratified probability sample of the United States population designed to permit statistically reliable estimates of high-risk groups and geopolitical and geographic areas and to permit accelerated data analysis (including annual analysis, as appropriate);

(3) maintain and enhance other Federal nutrition monitoring efforts such as the Centers for Disease Control Nutrition Surveillance Program and the Food and Drug Administration Total Diet Study, and, to the extent possible, coordinate such efforts with the surveys described in paragraphs (1) and (2);

(4) incorporate, in the survey design, military and (where appropriate) institutionalized populations;

(5) complete the analysis and interpretation of NHANES and NFCS data sets collected prior to 1984 within the first year of the comprehensive plan;

(6) improve the methodologies and technologies, including those suitable for use by States and localities, available for the assessment of nutritional and dietary status and trends;

(7) develop uniform standards and indicators for the assessment and monitoring of nutritional and dietary status, for relating food consumption patterns to nutritional and health status, and for use in the evaluation of Federal food and nutrition intervention programs;

(8) establish national baseline data and procedures for nutrition monitoring;

(9) provide scientific and technical assistance, training, and consultation to State and local governments for the purpose of obtaining dietary and nutritional status data and developing related data bases and networks to promote the development of regional, State, and local data collection services to become an integral component of a national nutritional status network;

(10) establish mechanisms to identify the needs of users of nutrition monitoring data and to encourage the private sector and the academic community to participate in the development and implementation of the comprehensive plan and contribute relevant data from non-Federal sources to promote the development of a national nutritional status network;

(11) compile an inventory of Federal, State, and nongovernment activities related to nutrition monitoring and related research;

(12) focus on national nutrition monitoring needs while building on the responsibilities and expertise of the individual membership for the Board;

(13) administer the coordinated program, define program objectives, priorities, oversight, responsibilities, outcomes, and resources, and define the organization and management of the Board and the Council; and

(14) provide a mechanism for periodically evaluating and refining the coordinated program and the comprehensive plan that facilitates cooperation and interaction by State and local governments, the private sector, scientific communities, and health care professionals, and that facilitates coordination with non-Federal activities.

(c) ALLOCATION OF FUNCTIONS.—The comprehensive plan shall—

(1) allocate all of the projected functions and activities under the coordinated program among the various Federal agencies and offices that will be involved; and

(2) contain an affirmative statement and description of the functions to be performed and activities to be undertaken by each of such agencies and offices in carrying out the coordinated program.

(d) SUBMISSION OF PLAN.—The comprehensive plan—

(1) shall be submitted in draft form to the President for submission to the Congress, and for public review, within 12 months after the date of enactment of this Act;

(2) shall be available for public comment for a period of 60 days after submission in draft form under paragraph (1) by means of publication in the Federal Register;

(3) shall be submitted in final form, incorporating such needed revisions as may arise from comments received during the review period, to the President for submission to the Congress within 60 days after the close of the period allowed for comments on the draft comprehensive plan under paragraph (2); and

(4) shall constitute the basis on which each agency participating in the coordinated program requests authorizations and appropriations for nutrition monitoring and related research during the 10-year period of the program.

(e) APPROPRIATIONS.—Nothing in this section shall be construed as modifying, or as authorizing the Secretaries or the comprehensive plan to modify, any provision of an Act appropriating funds (or any other provision of law relating to the use of appropriated funds) that specifies—

(1) the department or agency to which funds are appropriated; or

(2) the obligations of such department or agency with respect to the use of such funds.

SEC. 313. IMPLEMENTATION OF THE COMPREHENSIVE PLAN.

(a) IN GENERAL.—

(1) IMPLEMENTATION.—The comprehensive plan shall be—

(A) carried out during the period ending with the close of the ninth fiscal year following the fiscal year in which the comprehensive plan is submitted in its final form under section 312(d)(3);

(B) carried out in accord with, and meet the program objectives specified in, section 312(a) and paragraphs (1) through (11) of section 312(b);

(C) managed in accord with paragraphs (12) through (14) of section 312(b);

(D) carried out, by the Federal agencies involved, in accord with the allocation of functions and activities under section 312(c); and

(E) funded by appropriations that shall be made to such agencies pursuant to section 315 for each fiscal year of the program.

(2) OVERSIGHT.—The Congress through its appropriate authorizing committees shall exercise continuing oversight over the coordinated program, taking into account the annual reports of the Secretaries and such other information and data as may be developed.

(b) REGULATORY AUTHORITY.—Nothing in this subtitle shall be deemed—

(1) to grant any new regulatory authority;

(2) to limit, expand, or otherwise modify any regulatory authority under existing law; or

(3) to establish new criteria, standards, or requirements for regulation under existing law.

SEC. 314. SCIENTIFIC RESEARCH AND DEVELOPMENT IN SUPPORT OF COORDINATED PROGRAM AND COMPREHENSIVE PLAN.

The Secretaries shall provide for and coordinate the conduct, by the National Science Foundation, the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, the National Bureau of Standards, and other suitable Federal agencies, of such scientific research and development as may be necessary or appropriate in support of the coordinated program and the comprehensive plan and in furtherance of the purposes and objectives of this title.

SEC. 315. AUTHORIZATION OF APPROPRIATIONS.

(a) APPROPRIATIONS.—

(1) REQUESTS.—Authorizations and appropriations for the fiscal year in which the comprehensive plan is submitted in final form under section 312(d)(3) and for each of the 9 succeeding fiscal years, for purposes of carrying out the coordinated program and implementing the comprehensive plan, shall be requested by the Secretaries and by each of the agencies that are allocated responsibilities under the coordinated program pursuant to section 312(c), in a separate line item of the budget of the agency involved and consistent with the interagency budget for the coordinated program.

(2) 3-YEAR BASIS.—To the maximum extent feasible such appropriations shall be provided on a 3-year basis, subject to annual authorization Acts.

(b) ADDITIONAL FUNDS.—Nothing in this subtitle is intended either—

(1) to authorize the appropriation or require the expenditure of any funds in excess of the amount of funds that would be authorized or expended for the same purposes in the absence of the coordinated program; or

(2) to limit the authority of any of the participating agencies to request and receive funds for those purposes (for use in the coordinated program) under other laws.

Subtitle C—National Nutrition Monitoring Advisory Council

SEC. 320. ESTABLISHMENT OF THE COUNCIL.

(a) IN GENERAL.—

(1) ESTABLISHMENT.—The President shall establish, within 90 days after the date of enactment of this Act, a National Nutrition Monitoring Advisory Council.

(2) DUTIES.—The Council shall—

(A) assist in carrying out the purposes of this title;

(B) provide scientific and technical advice on the development and implementation of the coordinated program and comprehensive plan; and

(C) serve in an advisory capacity to the Secretaries.

(3) COMPOSITION.—The Council shall consist of 11 voting members, of whom—

(A) 7 members shall be appointed by the President; and

(B) 4 members shall be appointed by the Congress, of whom—

(i) one member shall be appointed by the Speaker of the House of Representatives;

(ii) one member shall be appointed by the minority leader of the House of Representatives;

(iii) one member shall be appointed by the President pro tempore of the Senate; and

(iv) one member shall be appointed by the minority leader of the Senate.

(4) NONVOTING MEMBERS.—The Council shall also include the joint chairpersons of the Board as ex officio nonvoting members.

(b) GENERAL APPOINTEES.—The persons appointed to the Council—

(1) shall be eminent in the fields of administrative dietetics, clinical dietetics, community nutrition research, public health nutrition, nutrition monitoring and surveillance, nutritional biochemistry, food composition and nutrient analysis, health statistics management, epidemiology, food technology, clinical medicine, public administration, health, education, nutritional anthropology, food consumption patterns, food assistance programs, agriculture, and economics; and

(2) shall be selected solely on the basis of established records of distinguished service.

(c) PRESIDENTIAL APPOINTEES.—The persons appointed to the Council by the President shall include—

(1) one member who is a director of a nutrition research unit that is primarily supported by Federal funds, and who has a specialized interest in nutrition monitoring;

(2) one member who is an employee of a State government and who has a specialized interest in nutrition monitoring;

(3) one member who is an employee of a local government and who has a specialized interest in nutrition monitoring; and

(4) one member who is an appointed representative of the Food and Nutrition Board of the National Academy of Sciences.

(d) REPRESENTATION.—The Council membership shall at all times have representatives from various geographic areas, the private sector, academia, scientific and professional societies, minority organizations, and public interest organizations.

(e) CHAIRPERSON.—

(1) ELECTION.—The Chairperson of the Council shall be elected from and by the Council membership.

(2) TERM OF OFFICE.—The term of office of the Chairperson shall not exceed 5 years.

(3) VACANCIES.—In case a vacancy occurs in the Chairpersonship, the Council shall elect a member to fill such vacancy.

(f) TERMS OF OFFICE.—

(1) IN GENERAL.—The term of office of each of the voting members of the Council shall be 5 years, except that of the 7 members first appointed by the President—

(A) 1 member shall be appointed for a term of 2 years;

(B) 3 members shall be appointed for a term of 3 years; and

(C) 3 members shall be appointed for a term of 4 years,

as designated by the President at the time of appointment.

(2) VACANCIES.—Any member elected to fill a vacancy occurring prior to the expiration of the term for which the predecessor of the member was appointed shall be elected for the remainder of such term.

(3) CONSECUTIVE TERMS.—No member shall be eligible to serve continuously for more than 2 consecutive terms.

(g) INITIAL APPOINTMENT.—Initial Council members shall be appointed or designated (without regard to the requirements of the Federal Advisory Committee Act) not later than 90 days after the date of enactment of this Act.

(h) MEETINGS.—

(1) IN GENERAL.—The Council shall meet on a regular basis at the call of the Chairperson, or on the written request of one-third of the members.

(2) QUORUM.—A majority of the appointed members of the Council shall constitute a quorum.

(i) FEDERAL EMPLOYMENT AND TRAVEL EXPENSES.—Appointed members of the Council—

(1) shall not be employed by the Federal Government; and

(2) shall be allowed travel expenses as authorized by section 5703 of title 5, United States Code.

(j) EXECUTIVE SECRETARY.—The Administrator of Nutrition Monitoring and Related Research (if appointed under section 310(d)) shall serve as the Executive Secretary of the Council.

SEC. 321. FUNCTIONS OF THE COUNCIL.

The Council shall—

(1) provide scientific and technical advice on the development and implementation of all components of the coordinated program and the comprehensive plan;

(2) evaluate the scientific and technical quality of the comprehensive plan and the effectiveness of the coordinated program;

(3) recommend to the Secretaries, on an annual basis, means of enhancing the comprehensive plan and the coordinated program; and

(4) submit to the Secretaries an annual report that shall—

(A) contain the components specified in paragraphs (2) and (3); and

(B) be included in full in the annual report of the Secretaries to the President for transmittal to the Congress as specified in section 311(b).

Subtitle D—Dietary Guidance

SEC. 330. ESTABLISHMENT OF DIETARY GUIDELINES.

(a) IN GENERAL.—The Secretaries shall issue and publish basic dietary guidelines for the general population based on scientific knowledge and the dietary patterns and nutritional status of the population.

(b) REVIEW OF OTHER DIETARY GUIDELINES.—

(1) SUBMISSION.—Any Federal agency planning to issue basic dietary guidance for the general population shall submit the text of the proposed guidance to the Secretaries for review prior to release.

(2) COMPLETION DEADLINE.—The review process shall be completed within a period of 6 months after the proposed guidance is so submitted.

(3) NONISSUANCE WITHOUT APPROVAL.—Except as provided in paragraph (4), the guidance shall not be issued until the Secretaries have approved the proposed materials and notified the head of the agency of such approval.

(4) ISSUANCE WITHOUT OBJECTION.—If the Secretaries fail to express any objection within that 6-month period, the submitting agency may issue the dietary guidance.

TITLE IV—EFFECTIVE DATES

SEC. 401. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), this Act shall become effective on October 1, 1986.

(b) EXCEPTION.—Section 104 shall become effective on the date of enactment of this Act.●

By Mr. WALLOP (for himself, Mr. GRASSLEY, and Mr. DECONCINI):

S. 2496. A bill to authorize the President to award Congressional Gold Medals to Doctors Andrei Sakharov and Yelena Bonner for the great personal sacrifice they have made to further the causes of human rights and world peace; to the Committee on Banking, Housing, and Urban Affairs.

CONGRESSIONAL GOLD MEDALS TO ANDREI SAKHAROV AND YELENA BONNER

● Mr. WALLOP. Mr. President, today I am introducing a bill to authorize the President of the United States to award Congressional Gold Medals to Doctors Andrei Sakharov and Yelena Bonner for the great personal sacrifice they have made to further the causes of human rights and world peace. Companion legislation is being introduced in the House. It is my hope that this legislation can be moved quickly so that it may encourage and comfort Dr. Yelena Bonner on her long journey, beginning May 24, to rejoin her husband, Dr. Andrei Sakharov, in internal exile in the closed city of Gorky in the Soviet Union.

Mr. President, if there ever were two more obvious deserving candidates for these gold medals, they are Dr. Sakharov and Dr. Bonner. They are two of the most courageous fighters for freedom and human rights of our time. Dr. Bonner was a founding member of the Moscow Helsinki Accords Monitoring Group in 1976. That group has suffered unbearably for its legitimate battle with the Soviet leadership on behalf of human and civil rights in the U.S.S.R. All but two of its members have been sentenced, imprisoned, tortured, or banished, including Dr. Bonner herself.

Dr. Sakharov, a noted physicist, author, and humanitarian, won the Nobel Peace Prize in 1975 for his love of truth and strong belief in the inviolability of the human being, for his fight against violence and brutality, for his courageous defense of the freedom of the human spirit, and for his unselfishness and strong humanitarian convictions which turned him into the spokesman for the conscience of mankind.

This same human being now suffers internal exile in the Soviet Union, banished forever from the very mankind he so loves and under the sentence of a slow and inexorable death. I spoke out for him and his brave wife in my floor statement here earlier today. Many of my Senate colleagues

joined me in making eloquent statements in the Senate today about the Sakharovs and their freedom fight.

I think, Mr. President, that all of us can make no more fitting tribute to Dr. Sakharov's 65th birthday today, May 21, 1986, than to authorize President Reagan to award the Congressional Gold Medals to Dr. Andrei Sakharov and to his wife, Dr. Yelena Bonner.●

By Mr. SIMON (for himself and Mr. ROCKEFELLER):

S. 2497. A bill to provide for the collection of data regarding certain insurance matters, to make such data available to the States for use in making policy decisions and determinations with respect to the insurance industry, and for other purposes; to the Committee on Commerce, Science, and Transportation.

INSURANCE TREND FORECASTING ACT

● Mr. SIMON. Mr. President, there is a growing public realization that liability insurance is an essential financial service and that the market for this service lacks stability. In a short span of time, problems with the price and supply of commercial liability insurance have developed into a severe and perplexing national crisis. The effects of the crisis cut across virtually every sector of the economy, affecting several segments of American society, and have brought forth tumultuous outcries of public concern. Many hearings have been held and there has been an increase in legislative activity at both the State and Federal levels as policymakers grapple with finding solutions to this crisis.

The liability insurance crisis defies easy analysis and the quick-fix. The role of the Federal Government is unclear because tort law and insurance regulation—major components of this issue—have traditionally been left up to the States. The structural changes that may be necessary in both the insurance industry and the legal community will take considerable time, energy and study to work out.

One of the problems in attempting to deal with the crisis is a serious shortage of credible insurance data and information. Policymakers are reluctant to rely upon data supplied or interpreted by the insurance industry, or upon data assembled and analyzed in studies commissioned by parties with significant economic stakes in the issue. The Federal Establishment and the Congress have relatively little knowledge and expertise in the arcane complexities of the insurance industry.

The data shortage has been cited in nearly every congressional hearing which have focused on the liability insurance crisis. The insurance industry has repeatedly characterized themselves as an industry that thrives on data and statistics which they say they would be "happy to share" with lawmakers. The industry maintains, however, that lawmakers do not know what to ask for or how to ask for it. The fact is that policymakers have neither the human resources nor the requisite expertise to adequately analyze data and advise other lawmakers on the findings.

The bill that I introduced today directly addresses the data problem, and was formulated with little technical advice or input from the insurance industry. I expect criticism, but this should not deter our purpose to acquire and maintain an adequate insurance database and the requisite expertise to effectively analyze reported information. My intent is that this data base, which would be available to both State and Federal lawmakers, would assist State officials in regulating insurance industry operations and shed light on the relationship between the civil justice system and insurance rates.

An article in the May 20 edition of the Journal of Commerce states that the New York State Commission, investigating the liability insurance crisis, recently voted to recommend a "serious inquiry" into the merits of a greater Federal role in insurance, specifically in the collection of more detailed information on industry practices. This finding from the Nation's leading insurance regulatory power is most significant.

Frankly, we cannot duck this problem and hope that it will go away. Collecting and analyzing the hard data is necessary to bring sense and stability to the commercial liability insurance industry.

Mr. President, I ask unanimous consent that a summary and a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE INSURANCE TREND FORECASTING ACT OF 1986

The unavailability and unaffordability of liability insurance has captured the attention of government officials at all levels. Although the insurance industry is regulated at the state level, no responsible federal official can ignore the pleas of the public whose businesses are going under or who cannot send their children to play at the local playground because the park district cannot find affordable insurance. As I delved into this problem, I was struck by the lack of independent information available on how insurance is priced.

The Insurance Trend Forecasting Act of 1986 is designed to provide a database at the federal level to assist state officials in regulating the insurance industry. By setting up a central location in the Department of Commerce to receive and analyze data generated by the property/casualty insurance companies, state insurance directors will have more complete information in order to regulate more efficiently. While recognizing and promoting the principle of state regulation of the insurance industry, the Act also recognizes that a regulator in Illinois confronted by day-care center operators who cannot find liability insurance can act more swiftly and more effectively to stabilize price and coverage limits if he or she knows that day-care centers in West Virginia are also experiencing difficulty finding affordable liability insurance.

One of the most debated arguments in the insurance crisis is the link between our civil justice system and insurance rates. The Act provides a mechanism to define how important that relationship actually is. Among the reporting requirements are a series of questions regarding pay-outs, costs of settling a claim in court, out of court or in the regular course of business and the types of pay-outs made to a claimant. Also included in the reporting requirements are questions about the costs of a policy and the highest and lowest premiums charged. This information will then be analyzed by the Secretary and reported to the states and to Congress.

No specific insurance company will be named in the report of the Secretary to avoid both uncompetitive behavior and illogical analysis of data.

SECTION-BY-SECTION ANALYSIS OF THE INSURANCE TREND FORECASTING ACT OF 1986

This bill authorizes the collection and analysis of data generated by the property/casualty insurance industry to assist state officials in their capacity to regulate available and stable insurance markets. The data reported will also shed light on the relationship between the civil justice system and insurance rates. Lastly, the analysis of the data will fill a void in expertise that currently exists within the federal government.

Section 1 sets out that the short title of this bill as the "Insurance Trend Forecasting Act of 1986."

Section 2 states that the property/casualty insurance industry is crucial to the smooth functioning of our economy. Section 2 also notes that no coordinated and comprehensive data base of insurance or civil justice statistics exists. This section also finds that the information provided by this bill will assist state insurance regulators to stabilize insurance cycles.

Section 3 states the purposes of the act. The information collected and analyzed will be distributed to the states—the regulators of the industry. The states could regulate more thoroughly and efficiently by knowing if day care centers in one state are in the same situation as day care centers in another state. This section states that the Act will assist in determining the relationship between the civil justice system and insurance rates. This section also recognizes the need to create a reservoir of expertise for the federal government.

Section 4 explains the definition of terms used throughout the Act.

"Claims paid" is used to explain any payment that a property/casualty insurance company makes in the regular course of business, as a judgment made in court or as a settlement negotiated out of court.

The terms "commerical casualty insurance policy or policies" and "commercial property insurance policy or policies" mean policy or policies which insure commercial, nonprofit or governmental entities against covered property damage or injury occurring on their property or occurring as a result of their activities.

"Insurance company" means any entity which issues or administers any property/casualty insurance policy.

"Classification of business" means a business, nonprofit or governmental entity which has similar risk characteristics and is engaged in similar activity. For example, a classification of business could be amusement parks.

"Unit of exposure" means the common denominator used to measure risk. For example, if one policy covers ten day-care centers, then there are ten units of exposure.

"Reserves" means liabilities established and liabilities incurred but not reported for a future payment of a claim.

"Secretary" means the Secretary of Commerce.

"State" is defined to include the fifty states, the District of Columbia, Puerto Rico and other possessions of the United States.

Section 5 details the data that the Act requires the property/casualty insurance companies to report for the previous year. The reporting date conforms to the state reporting date of March 31 to promote efficiency for the companies. A property/casualty insurance company must report by state and by rating territory. For each class of business that they write, they will report the following:

The total amount of premiums earned and the total amount of premiums written;

The total number of units of exposure and what the standard was by which they determined risk;

The lowest and highest premiums charged per unit of exposure;

The lowest and highest coverage written per unit of exposure;

The total number and total amount of claims paid out per unit of exposure, a breakdown into monetary categories of the amount of all claims, and a breakdown into monetary categories of the amounts of types of economic and noneconomic damages for all claims adjudicated;

Total amount of direct legal costs and loss adjustment expenses incurred by the insurance company in a judicial proceeding and whether the insurance company prevailed;

The total number and amount of claims paid out per unit of exposure, a distribution by size of claim for all settlements negotiated out of court and expenses incurred;

The total amount of administrative overhead, in terms of underwriting expenses and claims adjustment expenses;

The average amount of reserves per unit of exposure;

The total amount of reserves in terms of liabilities incurred and liabilities incurred but not reported;

The percentage of units of exposure that a company wrote which were cancelled or were nonrenewed.

Clause 2 of section 5 asks the insurance companies to report increases in coverage of 25 percent or more, decreases in coverage of 15 percent or more, increase in premium for the same coverage of 25 percent or more and decreases in premium for the same coverage of 15% or more.

Clause 3 of section 5 asks for a report of all investment income earned and other information in order for the Secretary to evaluate whether the premium is adequate to pay losses.

Section 6 explains which information the Secretary will analyze and report. Without mentioning any property/casualty company by name, the information collected in section 5 will be compiled and reported. The analysis section of the Secretary's report will:

Analyze the difference in coverage and price for classes of business with similar characteristics by state, for example, a rural day care center in Illinois compared to a rural day care center in West Virginia;

Analyze the difference in claims paid by class of business by state;

An analysis of the relationship between claims paid for each class of business and the fluctuation or insurance coverage and rates.

The Secretary's report will be issued by September 30 and sent to the Governor of each state, the Mayor of the District of Columbia, Congress, the Comptroller General and the Director of the Congressional Research Service. Copies of the report will be available to the public.

Section 7 outlines that the penalty for failing to report or for falsification of data will be $300,000.

Section 8 states that the Secretary will issue regulations within ninety days of enactment of the Act. All information reported must be verified by an accredited and independent actuary.

Section 9 notes that the Secretary will work with all interested parties to issue a standard reporting form which will be available to the property/casualty company by writing to the Secretary. The reporting form will also be published in the Federal Register. All information reported to the secretary is confidential except as is necessary to publish the required report.●

● Mr. ROCKEFELLER. Mr. President, I am pleased to cosponsor S. 2497 the Insurance Trend Forecasting Act of 1986, with my colleague Senator SIMON. This bill requires the insurance industry to disclose a wide range of data to the Department of Commerce, which will in turn analyze that data and distribute it to the State insurance companies and to Congress.

I believe that the answer to the current insurance crisis is twofold. First, the tort system merits reforms at the Federal and State level. Second, the insurance industry must be held accountable for its practices. At present, it's impossible to adequately examine the insurance industries practices without an independent source of reliable, impartial, and accessible insurance data. Horror stories and anecdotes are not enough.

Insurance companies must admit that their recent disastrous financial results were in part due to their own mismanagement. Then, they must contribute hard facts to the tort reform debate, showing how specific reforms will control litigation and insurance costs.

Recent events in West Virginia have made it crystal clear to me that this data must be collected at the national level. Right now the West Virginia State Legislature is in special session, due to the rash and reprehensible actions of four major medical malpractice insurers in my State. The 1986 session of the West Virginia Legislature passed a bill which, among other provisions, requires data disclosure from the industry. The industry's response was to issue cancellation notices to over 7,000 West Virginia doctors and other professionals. The industry has decided to use West Virginia as an example to the Nation. Their message is loud and clear: We will abandon your State rather than disclose detailed information or submit to new State regulation.

It's easy for medical malpractice insurers to use West Virginia as their test case. After all, our State is small and we don't have many physicians. West Virginia is a miniscule percentage of their total sales. If a national data collection bill were passed, the industry could not walk away from it so easily. It would certainly be a lot tougher for the industry to stop sales of all insurance nationwide because they disliked the provisions in a bill.

As a member of the Senate Commerce Committee, to which this bill is being referred, I will be pushing for data disclosure on the part of industry. I know there's room for improvement in the bill I'm endorsing today. I am convinced, however, that the concept is right. There is a desperate need for reliable and independent information about insurance.

The States have played a lead role in the insurance area and I believe that should continue. The purpose of this bill is not for Congress to regulate insurance but we need to develop some expertise on this issue at the Federal level. By providing a mechanism to gather and analyze data to assist States in stabilizing insurance cycles, this bill will actually help prevent Federal regulation.

I welcome the opportunity to work with the insurance industry and other interested parties on this data disclosure bill. This kind of legislation is essential to solve the insurance crisis and to rebuild consumers' confidence in the insurance industry.●

By Mr. RIEGLE:

S. 2499. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to increase the benefit payable with respect to the death of a public safety officer, and for other purposes; to the Committee on the Judiciary.

PUBLIC SAFETY OFFICERS' DEATH BENEFITS AMENDMENTS

● Mr. RIEGLE. Mr. President, I rise today to introduce a bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to increase the benefit payable with respect to the death of a public safety officer. This legislation is identical to H.R. 4818 which was introduced by Representatives TRAXLER on May 13.

The Public Safety Officers Death Benefits Program was created in 1976. Under this program, all police officers who are killed in the line of duty, including sheriffs and correctional offi-

cers, receive a $50,000 death benefits for their survivors. This bill would increase the benefit to $100,000. The increase in the Death Benefits Program would be provided for by the establishment in the Treasury of a special fund, to be known as the "Public Safety Officers' Death Benefits Trust Fund." Each person convicted of a felony would pay $500 into the trust fund. Last year, $11.4 million was appropriated for the officers' Death Benefit Program. This amount would be easily covered by the trust fund concept to fund the increase.

As we recently celebrated National Police Week and Police Memorial Day, I think it is appropriate to introduce this legislation for the survivors of our law enforcement officers who are killed in the line of duty.

I urge all my colleagues to join me in supporting this legislation.●

By Mr. KENNEDY (for himself, Mr. WEICKER, Mr. PROXMIRE, Mr. SPECTER, Mr. BIDEN, Mr. SARBANES, Mr. CRANSTON, Mr. KERRY, Mr. LEVIN, Mr. BRADLEY, Mr. HART, Mr. RIEGLE, Mr. METZENBAUM, Mr. LEAHY, Mr. LAUTENBERG, Mr. HARKIN, and Mr. SIMON):

S. 2498. A bill to prohibit loans to, other investments in, and certain other activities with respect to, South Africa, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

ANTI-APARTHEID ACT

Mr. KENNEDY.

Mr. President, today, with Senator LOWELL WEICKER and 15 other Senators, I am introducing the Anti-Apartheid Act of 1986. This legislation is the next step in the worldwide struggle to end apartheid in South Africa.

If enacted into law, this legislation would accomplish the following:

It would prohibit any U.S. person from making any loan to any South African entity;

It would prohibit any U.S. person from making any new investment in South Africa;

It would prohibit any U.S. person from assisting in the exploration for, or the research, development, or production of new energy sources in South Africa;

It would prohibit any U.S. person from making any deposit in a South African bank;

It would prohibit South African banks from operating in the United States;

It would ban the importation of uranium, coal, and steel from South Africa;

It would prohibit any South African airline from landing in the United States;

It would require U.S. computer companies to divest their holdings inside South Africa unless certain conditions were met; and

It would provide for $25 million in assistance for community development projects for those disadvantaged by apartheid.

We introduce this legislation today to renew our effort to put the United States on the right side of history and justice in the struggle to end that evil system.

And we are introducing this legislation today—simultaneously on the floor of both the House and Senate—as a response to the true voice of South Africa's future. Last month, Bishop Desmond Tutu declared:

> I have no hope of real change from the South African government unless they are forced. We face a catastrophe in this land, and only the action of the international community by applying pressure can save us. Our children are dying. Our land is burning and bleeding, and so I call upon the international community to apply punitive sanctions against this government—to help us establish a new South Africa—non-racial, democratic, participatory and just.

The Anti-Apartheid Act of 1986 responds to Bishop Tutu's call by seeking a broad range of specific new American economic sanctions against South Africa. We appeal to the consciences of all Americans—Republicans and Democrats, young and old, black and white. It is time for us once again to make common cause with those South Africans who so courageously work for justice in their tortured and tormented land.

To those who see faint signs of progress and ask us to hold off, we say, "Read the morning headlines; talk to anyone in South Africa; open your eyes to the truth that the progress is too little and it may soon be too late."

Last year at this time, 70 South Africans were dying each month because of the violence of apartheid—and Congress responded. This year, that number has almost doubled—and Congress must respond again.

Last year at this time, there was trouble in Langa and in the townships of the Vaal Triangle. This year, every black township from Alexandra to the Eastern Cape is consumed with violence or ready to explode. The funerals we see today are a symbol of the all-consuming funeral that is coming for South Africa tomorrow if apartheid does not end.

Last year at this time, we urged the Government of South Africa to release Nelson Mandela and begin a dialog for a peaceful transition to majority rule. This year, Nelson Mandela is still in prison, and the dream of dialog is dashed.

True, President Botha has announced the end of the pass laws—and that is a hopeful step forward. But it pales beside the steps backward that are being taken every day: a new homeland is scheduled to be created in December; forced removals are relentlessly proceeding; blacks are still denied every fundamental political right; the bloodshed and brutality of apartheid are worsening with every passing month.

A year ago, the Reagan administration opposed sanctions against South Africa for as long as possible, until the administration's ineffective policy of "quiet diplomacy" and "constructive engagement" was repudiated by Congress as an embarrassment to America's ideals and to our role in the world.

We hope that the administration's reaction will be different in 1986. We had prepared this legislation well before South Africa's latest outrage—the raw military strikes this week against its three African neighbors. I urge the administration to reassess its preliminary statement that no further U.S. sanctions are called for, even after the raid. The sanctions we have are not strong enough—and the raid on South Africa's neighbors is now exhibit A in the case for strengthening them.

Let us work together in this country and with our friends and allies in other lands to halt the violence, cruelty and racism in South Africa. Passing this legislation alone will not end apartheid. But it is a signal to every other nation that the United States of America is ready to do more than we have done so far to end the nightmare of apartheid and bring justice to a new South Africa.

To Desmond Tutu and Alan Boesak and Beyers Naude, to Nelson Mandela and Winnie Mandela and all the others who live in the prison of apartheid, and to all the heroes and martyrs of the freedom struggle in South Africa, we say to you today, "We are with you—and, working together, we shall overcome."

I ask unanimous consent that the full text of the proposed legislation be inserted at this point in the RECORD, along with other statements of support.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2498

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Anti-Apartheid Act of 1986".

SEC. 2. PROHIBITIONS ON LOANS TO, NEW INVESTMENT IN, AND OTHER ACTIVITIES INVOLVING SOUTH AFRICA.

(a) PROHIBITIONS.—

(1) ON UNITED STATES PERSONS.—No United States person may, directly or through another person—

(A) make any loan or other extension of credit to, or provide funds for the purpose of making a loan or other extension of credit to, the Government of South Africa or any corporation, partnership, or other organization which is owned or controlled by the Government of South Africa, as deter-

mined under regulations which the President shall issue;

(B) otherwise make any investment in South Africa;

(C) contribute technology or technological information, training, or services of any kind to the exploration for, or the research, development, or production of, new, or to the expansion of existing, energy sources in, for, or on behalf of South Africa; or

(D) make any deposit in—

(i) a foreign bank which is organized under the law of South Africa or owned or controlled by South African nationals; or

(ii) a branch of a bank or foreign bank if that branch is located in South Africa.

(2) ON CERTAIN FOREIGN BANKS—(A) No foreign bank which is organized under the laws of South Africa or owned or controlled by South African nationals may establish or operate any branch or agency in the United States.

(b) EXCEPTION.—

(1) The prohibition contained in subsection (a)(1)(A) shall not apply to any loan or extension of credit for which an agreement is entered into before May 21, 1986.

(2) The prohibition contained in subsection (a)(1)(B) shall not apply to an investment which consists of earnings derived from a business enterprise in South Africa established before May 21, 1986, and which is made in that business enterprise.

(3) The prohibition contained in subsection (a)(1)(C) shall not apply with respect to a contract entered into before May 21, 1986.

SEC. 3. BAN ON IMPORTATION OF URANIUM, COAL, AND STEEL.

Notwithstanding any other provision of law, the following products of South Africa may not be imported into the United States: uranium ore, uranium oxide, coal, and steel.

SEC. 4. CONDITIONAL DIVESTITURE FROM COMPUTER INDUSTRY.

(a) PROHIBITIONS.—Unless the conditions set forth in subsection (b) are met within 12 months after the date of the enactment of this Act, then—

(1) effective 6 months after the end of that 12-month period, no United States person may, directly or indirectly, make or hold any investment in South Africa in a business enterprise that sells computers, computer software, or goods or technology intended to service computers; and

(2) no computers, computer software, or goods or technology intended to service computers may be exported, directly or indirectly, to South Africa.

(b) CONDITION.—The conditions referred to in subsection (a) are the following:

(1) The President certifies to the Congress that the Government of South Africa—

(A) has freed Nelson Mandela and all political prisoners, and has entered into good faith negotiations with truly representative leaders of the black majority for a new political system; or

(B) has totally dismantled the apartheid system.

(2) A joint resolution is enacted approving the President's certification.

(c) DEFINITION.—For purposes of subsection (a)(2), the term "computer" includes any computer that is the direct product of technology of United States origin.

(c) PROCEDURES FOR CONSIDERATION OF JOINT RESOLUTION.—

(1) REFERRAL OF JOINT RESOLUTION.—All joint resolutions introduced in the House of Representatives and the Senate shall be referred immediately to the appropriate committees.

(2) COMMITTEE DISCHARGE.—If the committee of either House to which a joint resolution has bmen referred has not reported it at the end of 30 days after its introduction, the committee shall be discharged from further consideration of the joint resolution or of any other joint resolution introduced with respect to the same matter.

(3) CONSIDERATION OF RESOLUTIONS.—A joint resolution under this subsection shall be considered in the Senate in accordance with the provisions of section 601(b)(4) of the International Security Assistance and Arms Export Control Act of 1976. For the purpose of expediting the consideration and passage of joint resolutions reported or discharged pursuant to the provisions of this subsection, it shall be in order for the Committee on Rules of the House of Representatives to present for consideration a resolution of the House of Representatives providing procedures for the immediate consideration of a joint resolution under this subsection which may be similar, if applicable, to the procedures set forth in section 601(b)(4) of the International Security Assistance and Arms Export Control Act of 1976.

(4) RECEIPT OF RESOLUTIONS FROM THE OTHER HOUSE.—if before the passage by one House of a joint resolution of that House, that House receives a joint resolution with respect to the same matter from the other House, then—

(A) the procedure in the House shall be the same as if no joint resolution had been received from the other House; but

(B) the vote on final passage shall be on the joint resolution of the other House.

(5) COMPUTATION OF LEGISLATIVE DAYS.—In the computation of the period of 30 days referred to in paragraph (2), there shall be excluded the days on which either House of Congress is not in session because of an adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die

(6) JOINT RESOLUTION DEFINED.—For purposes of this subsection, the term "joint resolution" means a joint resolution the matter after the resolving clause of which is as follows: "That the Congress, having received on a certification by the President under section 4(b)(1) of the Anti-Apartheid Act of 1986, approves the President's certification.", with the date of the receipt of the certification inserted in the blank.

SEC. 5. ASSISTANCE FOR SOUTH AFRICA.

(a) AUTHORIZED ANNUAL AMOUNT OF ASSISTANCE.—In addition to any amount used for the Human Rights Fund for South Africa, up to $25,000,000 may be used each fiscal year for assistance for South Africa under the Foreign Assistance Act of 1961 and section 2(b) of the Migration and Refugee Assistance Act of 1962.

(b) USES OF ASSISTANCE.—Of the assistance authorized by subsection (a)—

(1) $4,000,000 shall be for refugee education assistance programs; and

(2) the remainder shall be for community development projects that are selected in consultation with truly representative leaders of South Africans disadvantaged by the apartheid system, that are under the leadership and control of such disadvantaged South Africans, and that are not conducted by or thorugh organizations in South Africa financed or controlled by the Government of South Africa.

(c) REPORTS.—Not later than the end of each calendar quarter, the President shall transmit to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a report setting forth—

(1) the names and a description of the recipients of assistance that are described in subsection (b)(2);

(2) the amounts of assistance granted to each such recipient; and

(3) who was consulted in selecting such recipients.

(d) EFFECTIVE DATE.—This section shall apply with respect to assistance in fiscal year 1987 and thereafter.

SEC. 6. PROHIBITION ON LANDING RIGHTS OF SOUTH AFRICAN AIRCRAFT.

(a) PROHIBITION.—The Secretary of Transportation shall prohibit the takeoff and landing of any aircraft by an air carrier owned, directly or indirectly, by the Government of South Africa or by South African nationals.

(b) EXCEPTIONS FOR EMERGENCIES.—The Secretary of Transportation may provide for such exceptions from the prohibition set forth in subsection (a) as the Secretary considers necessary to provide for emergencies in which the safety of an aircraft or its crew or passengers are threatened.

(c) DEFINITIONS.—For purposes of this section, the terms "aircraft" and "air carrier" have the meanings given those terms in section 101 of the Federal Aviation Act of 1958 (49 U.S.C. App. 1301).

SEC. 7. REGULATORY AUTHORITY.

The President shall issue such regulations, licenses, and orders as are necessary to carry out this Act. The President shall issue such regulations not later than 90 days after the date of the enactment of this Act.

SEC. 8. ENFORCEMENT AND PENALTIES.

(a) AUTHORITY OF THE PRESIDENT.—Subject to subsection (b), the President shall take the necessary steps to ensure compliance with this Act and any regulations, licenses, and orders issued to carry out this Act, including establishing mechanisms to monitor compliance with this Act and such regulations, licenses, and orders. In ensuring such compliance, the President may conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to any matter under investigation.

(b) ENFORCEMENT OF PROHIBITION ON FOREIGN BANKS.—The Comptroller of the Currency, in the case of a Federal branch or agency, and the Board of Governors of the Federal Reserve System, in the case of any other branch or agency, shall take the necessary steps to ensure compliance with section 2(a)(2), including revoking any existing authority of any foreign bank subject to the prohibition in section 2(a)(2) to establish or operate a branch or agency in the United States.

(c) PENALTIES.—

(1) FOR PERSONS OTHER THAN INDIVIDUALS.—Any person, other than an individual, that knowingly violates the provisions of this Act or any regulation, license, or order issued to carry out this Act shall be fined not more than $500,000.

(2) FOR INDIVIDUALS.—Any individual who knowingly violates the provisions of this Act or any regulation, license, or order issued to carry out this Act shall be fined not more than $250,000, or imprisoned not more than 5 years, or both.

(d) ADDITIONAL PENALTIES FOR CERTAIN INDIVIDUALS.—

(1) IN GENERAL.—Whenever a person commits a violation under subsection (c)—

(A) any officer, director, or employee of such person, or any natural person in control of such person who willfully ordered, authorized, acquiesced in, or carried out the act or practice constituting the violation, and

(B) any agent of such person who willfully carried out such act or practice,

shall be fined not more than $250,000, or imprisoned not more than 5 years, or both.

(2) RESTRICTION ON PAYMENT OF FINES.—A fine imposed under paragraph (1) on an individual for an act or practice constituting a violation may not be paid, directly or indirectly, by the person committing the violation itself.

(e) SEIZURE AND FOREFEITURE OF AIRCRAFT.—Any aircraft used in connection with a violation of section 6 or any regulation, license, or order issued to carry out that section shall be subject to seizure by and forfeiture to the United States. All provisions of law relating to the seizure, forfeiture, and condemnation of articles for violations of the customs laws, the disposition of such articles or the proceeds for the sale thereof, and the remission or mitigation of such forfeitures shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under this subsection, insofar as such provisions of law are applicable and not inconsistent with the provisions of this Act; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Department of the Treasury shall, for purposes of this subsection, be exercised or performed by the Secretary of Transportation or by such persons as the Secretary may designate.

SEC. 9. NEGOTIATIONS; REPORTS TO CONGRESS.

The President shall, by means of both bilateral and multilateral negotiations, including through the United Nations, attempt to persuade the governments of other countries to adopt restrictions on activities with respect to South Africa consistent with the provisions of this Act. The President shall submit annual reports to the Congress on the status of negotiations under this section. Each such report shall include a description of—

(1) the extent to which other countries have adopted restrictions consistent with the provisions of this Act; and

(2) the extent to which nationals of those countries have complied with any such restrictions, or have taken actions to diminish the impact on South Africa of the provisions of this Act.

SEC. 10. REPORT TO CONGRESS WITH RESPECT TO DIVESTITURE; TERMINATION OF PROVISIONS OF ACT.

(a) REPORT BY THE PRESIDENT.—The President shall, after May 31, 1988, and before June 30, 1988, report to the Congress on whether the Government of South Africa has met the conditions set forth in subsection (d). If the President determines that the conditions have not been met, the President shall include in the report his recommendations as to whether United States persons should be required to divest themselves of their investments in South Africa.

(b) DETERMINATION OF MET CONDITIONS.—If the President determines, at any time after the report made under subsection (a), that the conditions set forth in subsection (d) have been met, the President may submit that determination, and the basis for the determination, to the Congress.

(c) CONGRESSIONAL ACTION TERMINATION PROVISIONS OF THE ACT—Upon the enactment of a joint resolution approving a determination of the President under subsection (a) or (b) that the conditions set forth in subsection (d) have been met, the provisions of this Act, and all regulations, licenses, and orders issued to carry out this Act, shall terminate.

(d) STATEMENT OF CONDITIONS.—The conditions referred to in subsections (a) and (b) are that the Government of South Africa—

(1) has freed Nelson Mandala and all political prisoners, and has entered into good faith negotiations with truly representative leaders of the black majority for a new political system; or

(2) has totally dismantled the apartheid system.

SEC. 11. DEFINITIONS.

(a) IN GENERAL.—Subject to subsection (b), for purposes of this Act—

(1) UNITED STATES PERSON.—The term "United States person" means any United States resident or national and any partnership, corporation, or other entity organized under the laws of the United States or of any of the several States, of the District of Columbia, or of any commonwealth, territory, or possession of the United States.

(2) INVESTMENT IN SOUTH AFRICA.—The term "investment in South Africa" means—

(A) a commitment of funds or other assets (in order to earn a financial return) to a business enterprise located in South Africa or owned or controlled by South African nationals, including—

(i) a loan or other extension of credit made to such a business enterprise, or security given for the debts of such a business enterprise;

(ii) the beneficial ownership or control of a share or interest in such a business enterprise, or of a bond or other debt instrument issued by such a business enterprise; or

(iii) capital contributions in money or other assets to such a business enterprise; or

(B) the control of a business enterprise located in South Africa or owned or controlled by South African nationals, in cases in which subparagraph (A) does not apply.

(3) SOUTH AFRICA.—The term "South Africa" includes—

(A) the Republic of South Africa;

(B) any territory under the administration, legal or illegal, of South Africa; and

(C) the "bantustans" or "homelands", to which South African blacks are assigned on the basis of ethnic origin, including the Transkei, Bophuthatswana, Ciskei, and Venda.

(4) BUSINESS ENTERPRISE.—The term "business enterprise" means any organization, association, branch, or venture which exists for profitmaking purposes or to otherwise secure economic advantage, and any corporation, partnership, or other organization which is owned or controlled by the Government of South Africa, as determined under regulations which the President shall issue.

(5) BRANCH.—The term "branch" means the operations or activities conducted by a person in a different location in its own name rather than through a separate incorporated entity.

(6) SOUTH AFRICAN NATIONAL.—The term "South African national" means—

(A) a citizen of South Africa; and

(B) any partnership, corporation, or other entity organized under the laws of South Africa.

(7) CONTROL BY SOUTH AFRICAN NATIONALS.—South African nationals shall be presumed to control a business enterprise or foreign bank if—

(A) South African nationals beneficially own or control (whether directly or indirectly) more than 50 percent of the outstanding voting securities of the business enterprise or bank;

(B) South African nationals beneficially own or control (whether directly or indirectly) 25 percent or more of the voting securities of the business enterprise or bank, if no other person owns or controls (whether directly or indirectly) an equal or larger percentage;

(C) the business enterprise or bank is operated by South African nationals pursuant to the provisions of an exclusive management contract;

(D) a majority of the members of the board of directors of the business enterprise or bank are also members of the comparable governing body of a South African national;

(E) South African nationals have the authority to appoint a majority of the members of the board of directors of the business enterprise or bank; or

(F) South African nationals have the authority to appoint the chief operating officer of the business enterprise or bank.

(8) CONTROL BY UNITED STATES PERSONS.—A United States person shall be presumed to control a business enterprise in South Africa if—

(A) the business enterprise is operated by the United States person pursuant to the provisions of an exclusive management contract;

(B) a majority of the members of the board of directors of the business enterprise are also members of the comparable governing body of the United States person;

(C) the United States person has the authority to appoint a majority of the members of the board of directors of the business enterprise; or

(D) the United States person has the authority to appoint the chief operating officer of the business enterprise.

(9) LOAN.—The term "loan" includes an extension of credit as defined in section 201(h) of the Credit Control Act (12 U.S.C. 1901(h)).

(10) BANK.—The term "bank" means—

(A) any depository institution as defined in section 19(b)(1)(A) of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A));

(B) any corporation organized under section 25(a) of the Federal Reserve Act (12 U.S.C. 611 et seq.);

(C) any corporation having an agreement or undertaking with the Federal Reserve Board under section 25 of the Federal Reserve Act (12 U.S.C. 601 et seq.); and

(D) any bank holding company as defined in section 2(a) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(a)).

(11) POLITICAL PRISONER.—The term "political prisoner" means any person in South Africa who is incarcerated or persecuted on account of race, religion, nationality, membership in a particular social group, or political opinion, but the term "political prisoner" does not include any person who ordered, incited, assisted, or otherwise participated in the persecution of any person on account of race, religion, nationality, membership in a particular social group, or political opinion.

(b) ADDITIONAL DEFINITIONS.—For purposes of—

(1) section 2(a)(1)(C)—

(A) the term "energy sources" includes both mineral and nonmineral fuel resources, including solar, geothermal, fossil, nuclear,

electrical, and synthetic fuel energy resources;

(B) the term "development" includes those activities conducted to make energy sources available or usable, including drilling and the construction or other preparation of facilities or other means for the removal or conversion to usable form of any energy source;

(C) the term "production" includes those activities conducted for the removal or conversion to usable form of any energy source, including refining, milling, any other processing, generation, transmission, and storage; and

(D) the term "services" includes construction, engineering, design, management, and maintenance services;

(2) sections 2(a)(1)(D), 2(a)(2), and 8(b), the term "foreign bank" has the meaning given that term in section 1(b) of the International Banking Act of 1978 (12 U.S.C. 1301(b)); and

(3) sections 2(a)(2) and 8(b), the terms "agency", "branch", "Federal agency", and "Federal branch" have the meanings given those terms in section 1(b) of the International Banking Act of 1978.

SEC. 12. APPLICABILITY TO EVASIONS OF ACT.

This Act and the regulations issued to carry out this Act shall apply to any person who undertakes or causes to be undertaken any transaction or activity with the intent to evade this Act or such regulations.

SEC. 13. CONSTRUCTION OF ACT.

Nothing in this Act shall be construed as constituting any recognition by the United States of the homelands referred to in section 11(a)(3)(C).

STATEMENT OF THE NATIONAL EDUCATION ASSOCIATION IN SUPPORT OF FURTHER ECONOMIC SANCTIONS AGAINST THE GOVERNMENT OF SOUTH AFRICA

We consider it to be an unfortunate and sad circumstance to have to appear again in support of deeper economic sanctions against the racist Government of South Africa. But that Government, of its own free will, allows us no choice.

The National Education Association has joined with other sincere supporters of the free South Africa movement in previous press conferences here in the Capitol and State Department. We have joined in demonstrations at the Embassy of South Africa. We were with many of you in support of H.R. 1460, last year's Anti-Apartheid Act, and we are here again today in support of more elaborate sanctions than those called for in the previous act, those sanctions that were in part aborted by the Executive order. If need be we will be coming back again and again until our national policies toward South Africa promote equality, freedom, and justice in that unjust land.

We have spoken here before about the disproportionate burden carried by the child victims of apartheid. Families are broken through forced separation, children die of inadequate nourishment and an absence of proper medical care, educational opportunity is denied and 60 percent of black children drop out of school in their first 5 years, student leaders and activists are intimidated and detained by Government forces, violence permeates the township, villages, and schools, and the killing of schoolchildren and black youth continues.

Since we last appeared with you, we have met in Southern Africa with our colleagues in the Black Teachers' Union. We have pledged to them that we will do all that is in our power to support their aspirations for their students and families, their aspirations for the multiracial equality they seek in the democratic future of their country. We view our participation today as a part of that pledge.

NEA remains confident that continued United States economic pressure and a renewed moral leadership will be important in producing actions by the South African Government toward ending the inhumane policies of apartheid.

Of those who would criticize as too severe, the sanctions we are here to support, we ask that they realize that it takes only the release of a man unjustly imprisoned for nearly a quarter of this century and good faith negotiations with black leadership to make these sanction moot. The legislation properly offers the Government of South Africa the opportunity to avoid entirely the suffering threatened by a further depressed economy. The choice is theirs.

We wholeheartedly, and with hopes for a rapid end to the injustice, support the steps now proposed by the Subcommittee on Africa. We look forward to the day our friends in South Africa invite our country to celebrate peace and justice when it finally, and inevitably, comes to that troubled nation.

STATEMENT BY THE RT. REV. JOHN T. WALKER, EPISCOPAL BISHOP OF WASHINGTON

The Anti-Apartheid Act of 1986 is an important one calling for strong action against South Africa for its attacks on Zambia, Zimbabwe and Botswana. It is not enough to simply decry the South African Government's attack. Sanctions, at least as strong as those voted by Congress, are now needed. The Anti-Apartheid Act of 1986 serves that purpose extremely well.

It is to be hoped that the Congress of the U.S. will take the lead by supporting this legislation. There may yet be time for a peaceful settlement in Southern Africa. It will, however, slip away if appropriate legislation is not passed.

STATEMENT OF THE WASHINGTON OFFICE ON AFRICA IN SUPPORT OF STRONG UNITED STATES SANCTIONS AGAINST SOUTH AFRICA

The Washington Office on Africa, a church and trade union sponsored lobbying and research organization, reiterates our goal of working for the implementation of total comprehensive sanctions against South Africa. Today, we acknowledge the efforts of our Congressional allies to work for stronger sanctions against South Africa. The legislation being offered today, while falling short of comprehensive sanctions, contains a number of important provisions which would apply increased pressure on Pretoria to dismantle apartheid. This selective sanctions bill could send an important signal to the white minority that U.S. patience with apartheid is fast running out. We are particularly pleased with the incorporation of a section calling for U.S. corporations to withdraw from Namibia. The struggle of Namibia's people against apartheid's colonialism has been greatly overshadowed by events in South Africa and throughout the region.

This week's unprovoked military raids by South Africa into Botswana, Zambia, and Zimbabwe; Pretoria's continued illegal occupation of Namibia; and the Botha regime's continued brutal war against its people demonstrate the urgent need for strong comprehensive economic sanctions by the U.S. against South Africa. Comprehensive sanctions imposing a total trade embargo, requiring full corporate disinvestment and ending nuclear and military cooperation are the only viable and non-violent means remaining to effectively pressure South Africa to end the evil system of apartheid.

Over the next weeks and months we look forward to working with the congressional sponsors of this legislation to fashion the strongest possible sanctions bill. We will be offering suggestions and amendments aimed at achieving effective and comprehensive sanctions legislation. Throughout this process we will be lobbying the Congress and mobilizing the American people to push for the toughest measures against Pretoria.

All of South Africa's most popular black leaders and organizations have now called for sanctions, including the African National Congress, the Pan-Africanist Congress, the United Democratic Front, and the Congress of South African Trade Unions. In addition, South African church leaders have appealed for sanctions, including Bishop Tutu, the Rev. Allan Boesak, Dr. Beyers Naude, and Father Smangaliso Mkatshwa. Their pleas to the World Council of Churches' Emergency Meeting in Harare, Zimbabwe in December, 1985 were pivotal to the American church's intensified efforts to obtain complete and immediate sanctions. Most recently, in the wake of South Africa's barbarous attacks, Prime Minister Robert Mugabe of Zimbabwe and President Kenneth Kaunda of Zambia reiterated their call for comprehensive and mandatory economic sanctions against Pretoria.

Nearly 2,000 persons have now died, mostly at the hands of South African security forces. Thousands of black men, women and children are being detained, tortured and butchered by Botha's government. South Africa has shown its utter contempt for human life, civilized values and peace. In the final analysis—given the violence, intransigence and arrogance of the Botha regime—comprehensive sanctions will communicate to South Africa the serious U.S. commitment to the speedy abolition of apartheid. Today, we urge Congress to act swiftly to pass comprehensive sanctions and for President Reagan to sign such legislation into law.

STATEMENT OF TRANSAFRICA IN SUPPORT OF THE ANTI-APARTHEID ACT OF 1986

Last September, the President of the United States derailed the Congressional initiative to impose stringent sanctions against the Republic of South Africa by implementing his own set of sanctions far weaker than the punitive measures being considered by Congress at the time. TransAfrica wasted little time to condemn President Reagan's Executive Order, for the intransigence of the South African government in the past had taught us that a mere slap on the wrist by the Reagan Administration and other apologists for apartheid would do little to move the Pretoria regime into dismantling the insidious system of racial separation.

Tragically, the events which have unfolded in South Africa during the nine months the Executive Order has been in effect, have proved that our initial assessment was indeed correct—the Executive Order has done nothing to alleviate the deteriorating situation in South Africa. As evidenced by the continuing detention of anti-apartheid activists by South African Security forces; the staggering increase in the number of people being killed daily in the townships and homelands; and most recently, by

South Africa's unprovoked attack upon three sovereign nations; the regime in Pretoria has no intention of negotiating with legitimate black leaders to establish a new political and economic order in that country. Nor does the government have any misgivings about using brute force to violently suppress even non-violent opponents of apartheid.

Every significant anti-apartheid organization within South Africa has urged the international community to apply economic pressure on the apartheid regime. Nobel Laureate Bishop Desmond Tutu has publically stated that international sanctions on South Africa remain the last hope for peaceful change in South Africa.

TransAfrica welcomes the Anti-Apartheid Act of 1986 as another positive step towards the removal of international support for the government of South Africa. It is our hope that Congress ratifies this bill without delay.

● Mr. WEICKER. Mr. President, today I join with Senator KENNEDY and others in introducing the Anti Apartheid Act of 1986.

Once again the Congress is being asked to help shape the United States role in South Africa and once again, this debate occurs at a time of crisis for South Africa and the entire region.

In only one area of this debate has there been an advance and that has not been progress, but rather a grim progression in the number of South African dead. In March, 171 lives were lost, the greatest toll of death in a single period since 1984.

The administration's discredited constructive engagement policy continues to isolate the United States from the entire region. That isolation intensified this week after the desperate attacks by South Africa against three neighboring nations. Despite the words from the White House and State Department Monday, the administration's inaction supports only the status quo and allies this Nation only with a potential race war in a region where the majority seek racial peace.

Despite proclamations to the contrary, there has been no change in the structure of apartheid by the South African government. Even with the symbolic abolishment of the pass system, the government maintains strict segregation and migration control and has granted itself new emergency powers to deal with unrest. At the same time, it guarantees the unrest will continue by keeping leaders of the South African majority in prison and refusing even basic discussions of democracy.

In the face of this political stagnation and personal tragedy, it remains for Congress, in response to the will of the American people, to break the cycle. This bill is a clear message to the South African government and the South African people. It says we will no longer subsidize efforts that strengthen the former at the expense of the latter. American investment and technology can no longer ride shotgun while the South African government circles the wagons around its repressive society.

The question each Member of Congress will face in this debate is "how can we afford to abandon South Africa?" The answer to that question is simple. Our call is not to abandon South Africa. In reality, we embrace South Africa—the future, democratic South Africa—by abandoning apartheid.

Assistant Secretary of State Chester Crocker said recently in testimony before a committee of the House of Representatives, "we take it as a given that apartheid is a doomed system. What matters is how it ends and what follows it." No government can dictate South Africa's future. But the question the American people must consider is whether this Nation should continue to resist inevitable change in league with South Africa's apartheid past, or respond to the leadership of South Africa's future.

But our time is short. The killing in South Africa continues and the voices of moderation founder in a gathering storm of revolution. Bishop Desmond Tutu, an unassailable prophet of peace, told the world in March, "our land is burning and bleeding and so I call (on) the international community to apply punitive sanctions against this government to help us establish a new South Africa, non-racial, democratic, participatory and just. I have no hope of real change from this government unless they are forced."

The time has come to apply that force. With a clear voice, the American people stand on the side of a democratic rebirth in South Africa. We can only fail our people and the people of South Africa by a continued static witness of the death rattle of apartheid.

I urge the Senate to consider this legislation without delay.●

● Mr. LEAHY. Mr. President, I am very pleased to be an original cosponsor of this important legislation.

Last year I supported the conference report agreed to by the Senate and House, which called for economic sanctions against South Africa if that country did not take significant steps to dismantle apartheid. Unfortunately, that legislation never became law because of the President's much weaker Executive order.

I supported antiapartheid legislation last year because I believed that the Congress of the United States should speak to the evil of apartheid through law, not through Executive order. I also believed, as did so many others who supported that legislation, that the Executive order was far too weak to bring about the reforms which were required to prevent an escalation of the bloodshed in South Africa.

In the past 12 months, over 1,200 blacks have been killed in racial violence in South Africa. Government reforms, such as the abolition of the pass laws, have not addressed the fundamental issues of continued white political domination and the segregation of residency and education.

Yet while these pillars of apartheid remain intact, during the past year we have seen the strengthening of forces for negotiated political change in the white community. White businesses have called more strongly for major political change, young Afrikaners have talked with the exiled African National Congress, and more whites have been talking about sharing power with blacks. These groups understand that nothing less than serious progress toward black majority rule will prevent a full-scale civil war in South Africa.

Regrettably, the Botha government's recent air strikes against alleged ANC sites in Zimbabwe, Botswana and Zambia have cast an ominous new cloud over these positive changes.

Mr. President, South African apartheid is a moral outrage. As the leader of the free world, the United States has a responsibility to use its economic, political and moral powers to bring about an end to this abhorrent system. This administration's policy of constructive engagement has been a profound disappointment to those of us who expect our Government to set an example that is consistent with our principles as a nation.

One of the central features of this legislation is to stop the United States from funding apartheid. The President's Executive order has not done that. Far from being heavy-handed, the "Anti-Apartheid Act of 1986" would impose sanctions in stages. It calls for the South African Government to enter into good faith negotiations with representative leaders of the black majority, for a new political system based on an undivided South Africa with majority rule. More severe sanctions would be imposed only if the South African Government refused to take significant steps to dismantle apartheid.

The South African people have looked to us for help in their struggle. If we again fail to act, we continue to bear responsibility for supporting racism and prolonging the bloodshed. We owe it to the black majority to send the strongest message that we can that we are behind them in their struggle for freedom, and that we are true to the founding principles of our own country. I strongly urge my colleagues to send that message by supporting this legislation.●

● Mr. PROXMIRE. Mr. President, I welcome this opportunity to voice my strong support for the renewed effort we are commencing today to have Congress, at long last, enact into law measures demonstrating America's abhorrence of South Africa's immoral

apartheid system. The Anti-Apartheid Act of 1986 is not designed to punish South Africa, but rather to send encouragement to all those people of good will in that country who are striving to being about a peaceful end to an evil racial system.

Last year we in Congress, by passing bills imposing economic sanctions on the South African Government, forced the Reagan administration to change its failed policy of constructive engagement in dealing with South Africa. We sent a clear signal that America could no longer continue business as usual with South Africa's Apartheid Government. The actions taken last year were only a warning shot of the further steps Congress would take if real change was not forthcoming in that country.

President Botha, in his January speech opening the Capetown Parliament said "South Africa has outgrown apartheid" and give us hope that South Africa might be taking heed of the worldwide revulsion against its benighted racial system. Since then, however, while the South Africa Government has done some minor tinkering with aspect of its oppressive system, it has made no real effort to deal with the key question—institution of a government by the consent of the governed. South Africa's race classification system remains in place unchanged. Under that system all rights a person may exercise throughout his life in South Africa are determined by his race classification at birth, that is, white, Asian, colored or black. The 70 percent of the population who are classified black have no political rights under that system. Since blacks have no political rights, it makes it difficult for them to achieve a gradual peaceful change in that country's racial policies and violent change becomes an attractive alternative. As President Kennedy once said "Those who make peaceful change impossible make violent change inevitable." Violent change in South Africa is not in our interest nor in the interest of white or black South Africans.

The bill we are introducing today, the Anti-Apartheid Act of 1986, is specifically designed to help the process of peaceful change in South Africa. It does set forth sanctions against the Government, but it is not a disinvestment bill. It makes clear to South Africa that political change must be instituted if American corporations are to play a growing role in that country's economy. All of the sanctions in the bill which include: First, a prohibition on new bank loans and investment in South Africa; second, a ban on imports of coal, uranium and steel from South Africa; third, a ban on landing rights in the United States for South African aircraft; and fourth, a conditional disinvestment of our computer companies from South Africa after 18 months can be waived if certain conditions are met. The conditions are designed to help bring change. They require only that the President be able to certify to Congress that the Government of South Africa "has freed Nelson Mandela and all political prisoners, and has entered into good faith negotiations with truly representative leaders of the black majority for a new political system" or has dismantled the apartheid system. If Congress agrees with either of these certifications, the sanctions are removed.

It is our hope that the bill will lead to the good faith negotiations that are South Africa's hope. In April Archbishop Tutu called on the international community to pressure the Government by means of economic sanctions to move toward nonviolent change. In May the Southern African Catholic Bishops Conference called on the world community to put economic pressure on the Apartheid Government and to link such pressure with negotiations with accepted leaders of the people. The Protestant South African Council of Churches has long called for economic sanctions against the Government. Our country should respond to the moral voices of the South African people—both white and black. This bill is designed to do just that.

I will work with my House and Senate colleagues to ensure the passage of this legislation because it is the right thing to do, and is also in our national interest.●

● Mr. LEVIN. Mr. President, the situation in South Africa is at a most critical juncture. Repression of black leaders is intensifying and the immoral influx control measures are being tightened. Clashes between the black community and security forces are a daily occurrence.

Since the lifting of the state of emergency, the death rate has increased from 3 to 5 per day. The mild sanctions which the President imposed against the regime last September did not represent any significant change in U.S. policy toward the region.

For years Members of Congress have made statements and filed resolutions decrying the policies of South Africa and urging the President to stop asking Pretoria to change and begin acting in ways which would produce change.

Many of us have done that. I have filed resolutions urging freedom for Nelson Mandela and urging South Africa to adopt a one-person one-vote policy. And all of that, while it may have given some hope to those seeking change, has not produced change in South Africa or in the White House.

Well, this bill does not ask for general changes in attitude or broad shifts in policy. It details a specific series of steps which the United States will take until South Africa makes certain changes.

This bill reflects our frustration; but it also reflects our considered belief that this is the best—the only—way to create the conditions that all people who love freedom and respect human dignity want to see in South Africa.

Over a year ago Bishop Tutu expressed his hope, our hopes, when he explained to his "dear white fellow South Africans" what black South Africans are about. "We too," he explained, "love to be with our wives everyday, we too want our children to rush out to meet us as we come back from work, we too would like to live where we can afford it. We too want to be able to move freely everywhere in the land of our birth, we too want to have security of tenure. We too want to participate in the decisions that affect our lives. These are not extravagant demands. They are the expectations of any human being." We want to have a new kind of South Africa. Where we all, black and white can walk tall together . . ."

They are our expectations as well. And with this bill, I hope they will be realized.●

By Mr. DANFORTH:

S. 2501. A bill to extend for 3 years the existing suspension of duty on triphenyl phosphate; to the Committee on Finance.

SUSPENSION OF DUTY ON TRIPHENYL PHOSPHATE

● Mr. DANFORTH. Mr. President, today I am introducing legislation which would extend the duty suspension of triphenyl phosphate, a chemical used primarily as a flame-retardant additive in films, plastics, and other products.

The duty on triphenyl phosphate was first suspended in the 97th Congress because there was no domestic source of the chemical for commercial use. The domestic supply situation has not improved in the last 3 years.

The bill represents the Senate counterpart of H.R. 2300, introduced last year by Representative GEPHARDT.

I ask unanimous consent that the text of the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2501

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That item 907.01 of the Appendix to the Tariff Schedules of the United States is amended by striking out "9/30/85" and inserting in lieu thereof "9/30/88".

SEC. 2. The amendments made by the first section of this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after October 1, 1985.●

By Mr. ABDNOR (for himself, Mr. HELMS, and Mr. EAST):

S. 2502. A bill entitled the "Workers Freedom of Choice Act"; to the Committee on Labor and Human Resources.

WORKERS FREEDOM OF CHOICE ACT

● Mr. ABDNOR. Mr. President, many people talk about individual freedom and make overtures toward it. We have, today, an opportunity to act. I am introducing, S. 2502, the Workers Freedom of Choice Act.

Many legislative attempts have been made that supposedly were designed to help the workers of our country. The intent is admirable, yet I believe the point is missed. If we really want to protect the freedoms of individuals, we should pass the Workers Freedom of Choice Act.

This legislation gives all employees a choice: a choice of joining or not joining a union. It doesn't take anything away from anyone or give anyone an advantage. All this legislation does is give individuals the freedom of choice—one of the principles which our Nation was built on.

Section 7 of the National Labor Relations Act states the right to not joining a union can be denied to workers "to the extent that such right may be affected by an agreement requiring union membership as a condition of employment." There is no choice.

Where is the freedom when a precondition of employment is set? Where is the individual choice?

It is not a question of union membership, or a question of labor versus management or management versus unions. It is a question of choice, and I believe individuals must have the right to choose. Forcing individuals to join a union prior to employment is wrong. An individual has the ability to choose if given that opportunity. Why must a group make a decision an individual is qualified to make? Whatever happened to individual choice or freedom?

Attempts have been made to limit the freedom of choice; and if any of those attempts are made here, I will offer this act as an amendment to every attempt made.

Mr. President, the Workers Freedom of Choice Act is a basic piece of legislation, one that will return the right to choose to individuals where it rightfully belongs.

Additionally, Mr. President, I want to thank my colleagues, Messrs. HELMS, and EAST, for joining me in this effort. I also look forward to adding others to the list as we move this legislation.

With unanimous consent, I ask that the text of the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2502

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 7 of the National Labor Relations Act is amended by striking out "except to the extent that such right may be affected by an agreement requiring membership in a labor organization as a condition of employment as authorized in section 8(a)(3)".

By Mr. CRANSTON:

S. 2503. A bill to clear certain impediments to the licensing of the vessel *Wanderbird* for employment in the coastwise and fisheries trades; to the Committee on Commerce, Science, and Transportation.

LICENSING OF VESSEL WANDERBIRD

Mr. CRANSTON. Mr. President, today I am submitting legislation to permit the licensing of the sailing vessel *Wanderbird* to engage in the coastwide and fisheries trade.

Wanderbird is an oak-planked, copper-sheathed schooner built in Germany in 1883. She is an 85-foot pilot schooner originally commissioned by the German government to help guide ships through the complexities of the North Sea Coast.

In the 1880's, competition among pilots to earn piloting fees resulted in races to meet incoming vessels. Winning those races meant more money for the owners. Accordingly, they sought the fastest, sturdiest vessels available. The pilot schooners were designed to be fast whether going upwind, crosswind or downwind and they were designed to be easily handled by a short-handed crew.

The *Wanderbird* was such a vessel, fast, sturdy and easy to handle in tough, cold waters.

For 43 years *Wanderbird* worked the North Sea and then, a journalist—Warwick Tompkins—purchased her and re-outfitted the vessel in 1929. Subsequently, he sailed her to a transatlantic record run of 16 days.

In 1936, Warwick Tompkins took *Wanderbird* to San Francisco via Cape Horn. In 1969, the current owner, Harold Sommer, purchased the historic vessel and began a painstaking restoration. By 1981 *Wanderbird* was ready to sail again.

She currently is moored at Sausalito, CA. Her present owners, Harold and Annaliese Sommers, would like to be able to use the *Wanderbird* as a commercial crusing vessel in San Francisco Bay and along parts of the coast of California.

A survey by a reputable yacht surveyor which has been furnished to me and will be forwarded to the Subcommittee on Merchant Marine reports *Wanderbird* "cannot be faulted in any way."

Of equal importance, the survey report says of the rebuilding of *Wanderbird,* "There is no part of the vessel which has not received the very best American craftsmanship and materials."

This bill will enable *Wanderbird* to earn her keep again as a working cruise vessel under sail. She will be a welcome, beautiful sight in San Francisco Bay and along the lovely coast of California.

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2504. A bill to authorize certain transfers affecting the Pueblo of Santa Ana in New Mexico, and for other purposes; to the Select Committee on Indian Affairs.

SANTA ANA PUEBLO LAND TRANSFERS

● Mr. DOMENICI. Mr. President, I am most happy to join Senator JEFF BINGAMAN today in introducing legislation to settle several important land issues for Santa Ana Pueblo in our home State of New Mexico. All three New Mexico Congressmen in the House of Representatives are introducing an identical bill today. We are united as a delegation in our support for the provisions of this bill.

This bill will accomplish three land-related goals for the Pueblo of Santa Ana. First, we will ensure that the pueblo has the rights to the sand and gravel for about 494 acres that the pueblo purchased from private individuals. This will promote the economic viability of the tribe's commercial sand and gravel operation on the land. Second, our bill corrects technical errors that were made in the 1978 transfer of lands to the tribe in Public Law 95-498. Third, a legislative solution is needed to carry out the agreement between the tribe and the University of New Mexico settling the trespass on Santa Ana lands at the State-run Coronado State Park and Monument. The land for this park and monument is owned by the University of New Mexico. Finally, this legislation includes general provisions protecting any existing and valid claims of any person with current rights of ownership, use, or access to any of the lands affected by this bill.

GRAVEL RIGHTS

As a long-time supporter of self-determination, I am very proud of Santa Ana Pueblo's effort to commercialize the available and abundant supply of sand and gravel for the benefit of the entire tribe. Their initiative was apparent from the very beginning of this venture when the tribe purchased private land from non-Indian owners in September 1981. A tribal sand and gravel business has been established on these lands.

In 1983, the United States Supreme Court in *Watt* v. *Western Nuclear Corp.* changed the legal status of the tribe's gravel by including gravel in its definition of "coal and other minerals." This action had a very negative impact on the growing sand and gravel

business as the tribe no longer owned the gravel. The gravel would henceforth be under the control of the Bureau of Land Management, U.S. Department of the Interior. The Santa Ana Pueblo had determined that gravel was not a "mineral" under existing law when the land was purchased in 1981. The value of the gravel was a major factor in the original decision to buy the land. It also played a major role in determining the price of the land purchased for this purpose. The Supreme Court decision clearly upset the gravel cart.

Our bill transfers all mineral rights to the tribe and declares them "to be held by the United States in trust for the benefit of the Pueblo of Santa Ana." It also "waives any claims the United States may have against the Pueblo of Santa Ana" for any exploitation by the Pueblo of Santa Ana of any mineral rights, including, of course, gravel.

TECHNICAL AMENDMENTS

The errors made in the descriptions of the lands affected by Public Law 95-498 are comprehensively corrected in this bill. There is no net increase or decrease in acreage. Erroneous references, descriptions, easement rights, and other technical changes are made.

CORONADO MONUMENT

A small strip of this State-run park and monument is located on Santa Ana lands. The United States, at the Pueblo's request, filed suit against the state and the University of New Mexico, the land owners, for trespass. The parties have reached an agreement and this bill implements the settlement.

This site was the winter headquarters of Spanish explorer Francisco Vasquez de Coronado and his men in 1540-41, during their famous explorations of the American Southwest. The State of New Mexico has since developed picnic and camping sites on Santa Ana land adjacent to the Coronado Monument. In 1940, after the trespass became known, the Congress authorized a trade of lands to compensate the Pueblo of Santa Ana for the small strip of the University of New Mexico patent that extended on to the Pueblo's land. Santa Ana did not consent to the trade and took the case to court after the State of New Mexico fenced off the Indian land in question.

This bill provides the authority for settlement of the dispute in accordance with the agreement reached between the parties. Under this plan, the University of New Mexico will be allowed to convey about 120 acres of land on the west and north sides of the patented parcel to the Pueblo of Santa Ana in exchange for the Pueblo's land being used at the Coronado State Monument (about 26 acres). There are also protections in the bill for any possible adverse impacts on the Monument of any development of the lands within 100 yards of the Coronado Monument boundary.

GENERAL PROVISIONS

These provisions are generally applicable to the three parts of the bill discussed above. All existing rights of ownership or access are protected. Any mineral leases, including oil and gas leases, are continued in full force. Any pending applications for leases will be rejected upon passage of this bill. No valid existing rights will be affected since no application has yet been issued or approved on the lands in question.

Finally, those lands which are to be held in trust for Santa Ana Pueblo will be subject to the laws and regulations applicable to other trust property.

In conclusion, I urge my colleagues to support this legislation on behalf of Santa Ana Pueblo. By passing this bill we will be helping tribal economic self-sufficiency by removing a major obstacle to their sand and gravel business. We will also be clarifying and settling important land boundaries and the dispute with Coronado State Monument. After the careful work of the New Mexico Congressional Delegation on this matter, I am confident that passage of this bill will be a positive step forward for the Santa Ana Pueblo.●

● Mr. BINGAMAN. Mr. President, I am pleased to introduce a bill today with my colleague, the senior Senator from New Mexico, Mr. DOMENICI, that would clarify many outstanding land issues concerning the Santa Ana Pueblo.

I have been working with the pueblo since the last Congress to reach a workable and fair compromise. I believe the version we introduce today will accomplish the ends of all parties concerned.

The legislation has four major components that I wish to highlight. The first provision conveys to the pueblo mineral interests in a tract of land the pueblo purchased from private land owners for the express purpose of a tribally-owned sand and gravel operation. At the time the pueblo purchased the land in 1981, it was believed that gravel was not a mineral within the terms of the Stock-Raising Homestead Act. The Supreme Court however, in 1983, held in Watt versus Western Nuclear Corp. that "coal and other minerals" includes gravel. Consequently, this decision has removed pueblo title to the gravel which has undercut the viability of a tribal sand and gravel operation. With this transfer of mineral title, the pueblo will once more be able to continue an enterprise that promotes employment for the peublo and economic development for the entire State. The conveyance of the mineral interests is made to the United States to be held in trust for the pueblo.

The second provision of this bill corrects the legal description of land conveyed to the pueblo pursuant to Public Law 95-498. Several errors were made in the description of the lands affected by that act. The Southern Pueblo Agency of the Bureau of Indian Affairs prepared these corrections and has attested to their accuracy. No new change in current land status is made by these corrections.

The third provision of this bill authorizes the exchange of lands between the Santa Ana Pueblo and the University of New Mexico due to the trespass of the Coronado Monument. I am pleased that the parties in litigation over the trespass issue have reached an agreement and have decided to abide by this accord. The executed agreement signed by all the interested parties, the New Mexico Governor's Office, the Natural Resources Department of New Mexico, the U.S. attorney's office, the Bureau of Indian Affairs, the Pueblo of Santa Ana, the University of New Mexico, and the Museum of New Mexico, contains a deadline of December 31, 1986, for passage of a land exchange bill. As a result, it is appropriate for the Congress to meet this deadline to carry out the terms of the negotiated settlement. The agreement provides that the Pueblo will relinquish to the university 26.57 acres along the east side of Coronado Park and Monument, in exchange for 120 acres just west of the Park and Monument, and that two 4-year tuition scholarships each year for a total of 5 years, will be awarded to qualified Santa Ana students. The agreement states in pertinent part the following:

> Each of the parties of this agreement acknowledges that the conveyances required by this agreement can only be completed if approved by the Congress of the United States and other State and Federal agencies. The university requires congressional approval because its patent restricts the university's power to alienate the property and restricts the use of the property to archeological purposes. The United States and the Pueblo require congressional approval because the Indian Non-Intercourse Act (25 U.S.C. section 177) and other congressional acts restrict the power of the Pueblo to alienate any of its real property.

The agreement further states that the Pueblo is charged with the responsibility of taking the necessary steps to seek congressional approval with the concurrence of the other parties.

And finally, the last provision of the bill assures that all pre-existing legal rights are protected and any mineral leases, including oil and gas leases are continued in full effect. Any pending applications for leases however, have not yet been issued or approved, and therefore no valid existing rights have vested in the applicants.

Mr. President, I believe that this legislation will finally bring us closer to a

reconciliation of many outstanding matters concerning the use of the Santa Ana Pueblo's land and resources. I urge my colleagues to support this effort. Senator DOMENICI and I have the full support of the other members of the New Mexico delegation and a similar bill has also been introduced in the House.

Thank you, Mr. President.●

By Mr. HECHT (for himself and Mr. LAXALT):

S. 2506. A bill to establish a Great Basin National Park in the State of Nevada, and for other purposes; to the Committee on Energy and Natural Resources.

GREAT BASIN NATIONAL PARK ACT

● Mr. LAXALT. Mr. President, It is with a sense of pride and anticipation that I introduce a bill, with my distinguished colleague [Senator HECHT], to provide for the creation of the first national park in Nevada.

The park site is indeed a gem. It incorporates a significant portion of the South Snake range in eastern Nevada and includes the second highest peak in the State, Wheeler Peak. It will include some of the oldest living trees in the world, the Bristlecone pine (some being over 5,000 years old). It will also incorporate Lehman Caves National Memorial. The park will offer to the Nation the first interpretive example of a vast area of our national land mass called the Great Basin. Thus, the name chosen for the park will be the Great Basin National Park.

Mr. President, the Great Basin covers some 200,000 square miles of western desert. It includes almost all of Nevada and extends into portions of four other western States. It represents a significant proporation of our total land mass. It is called Great Basin because all the drainage systems are internal. They do not reach the ocean.

The Great Basin topography is characterized as "basin and range," alternating valleys and mountain ranges. This vast area includes a(rich and varied flora and fauna, including a number of unique species. If I may paraphrase a description from author John McPhee, the mountain ranges of the basin and range stand on their own, like warships, "and the Great Basin is an ocean of loose sediment with these mountain ranges standing in it as if they were members of a fleet without precedent."

Great Basin ranges are not created by compressional forces which pile them on top of each other but rather by plate fractures which cause them to be created independently. The basins which separate them are 10 to 15 miles wide and are generally bone dry. Thus the faunas in the high ranges tend to be distinct from one another because of the island nature of each range. "Supreme over all is silence * * * a soundless immensity with mountains in it." Such is the nature of the Great Basin we propose to interpret through a Great Basin National Park. Perhaps no area can adequately represent such a vast area with its isolated and distinct faunas. And certainly no park can adequately preserve the serenity extant in much of it, but the Snake Range and surrounding area are very representative and beautiful in their own right.

The park has, in fact, been the subject of considerable interest in the past. Two bills have been introduced to establish the park in the same Wheeler Peak area. It is my hope we may succeed this time.

Specific features of our proposed park are 13,063-foot. Wheeler Peak, the ancient bristlecone pine forests, the natural rock bridge known as Lexington Arch, one of the few active permanent glaciers in the lower States, Lehman caves, and many still unexplored caves, and numerous lakes, some of which are glacially fed.

The park boundaries have been drawn so as to preserve within the immediate vicinity of the park the traditional ranching and mining activities which have characterized man's activity since his arrival, providing that additional historic resource to park visitors.

The unique and fragile beauty of the Great Basin has, so to speak, been a candle kept under a bushel. Nevada's unique beauty includes the basin and range topography, as represented by the proposed Great Basin Park. It is time to make such beauty available to all our citizens.●

By Mr. METZENBAUM:

S.J. Res. 352. Joint resolution to designate the week beginning September 7, 1986, as "Gaucher's Disease Awareness Week"; to the Committee on the Judiciary.

GAUCHER'S DISEASE AWARENESS WEEK

● Mr. METZENBAUM. Mr. President, today I am introducing a joint resolution designating the week beginning September 7, 1986 as "Gaucher's Disease Awareness Week." This is a companion to House Joint Resolution 615 introduced in the House by Congressman LAWRENCE SMITH on April 29, 1986.

Gaucher's disease is an inherited, genetic disorder which occurs among all known racial and ethnic groups. It is the most common disorder in the family of painful and deadly enzyme diseases, and even more prevalent than Tay-Sachs among Eastern European Jews. Gaucher's disease may best be described as a genetic timebomb. With a carrier rate of 1 in 12 persons, the next generation is at high risk.

The disease is caused by the body's failure to produce an essential enzyme. The absence of this enzyme causes the body to accumulate abnormal quantities of lipids in the spleen, liver, bone marrow, and, in some cases, lungs, heart, and brain. It can cause deterioration of the nervous system, bone degeneration, enlarged spleen, and severe damage to the liver and other organs.

In the infantile form, death occurs within 2 years. In the juvenile form, the life span is dramatically foreshortened. In its chronic form, the occurrence and severity of symptoms are variable. There is no treatment as yet, but there is promising research.

At a number of medical centers in the United States and abroad, research focuses on three aspects of the disease: enzyme replacement, gene repair, and treatment programs. The research serves as a model for unlocking the mysteries associated with all the many enzyme disorders, and an estimated 300 other genetic diseases.

In 1984 the National Gaucher Foundation was established to promote and support Gaucher's research and to increase public awareness regarding this disease. It is essential to raise awareness of the genetic nature of Gaucher's disease, the critically high number of carriers, the possibilities inherent in prevention and treatment in this era of gene engineering, and the potential for victims of other genetic diseases.

Therefore, Mr. President, I urge my colleagues in the Senate to support this joint resolution so that we may focus attention on understanding and finding a cure for the victims of Gaucher's disease and for the victims of other genetic disorders. I ask unanimous consent that this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 352

Whereas Gaucher's disease is caused by the failure of the body to produce an essential enzyme;

Whereas the absence of such enzyme causes the body to store abnormal quantities of lipids in the liver and spleen and frequently has an adverse effect on tissues in the body, particularly bone tissue;

Whereas among Jewish persons, Gaucher's disease is the most common inherited disorder affecting the metabolism of lipids, which are one of the principle structural components of living cells;

Whereas there is no known cure for Gaucher's disease and no successful treatment of the symptoms of the disease;

Whereas the increased awareness and understanding of Gaucher's disease by the people of the United States can aid in the development of a treatment and cure for the disease;

Whereas the National Gaucher's Disease Foundation provides funds for research in the United States with respect to the disease; and

Whereas research and clinical programs with respect to Gaucher's disease should be increased: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning September 7, 1986, is designated "Gaucher's Disease Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.●

By Mr. CHILES (for himself, Mr. BURDICK, Mr. ZORINSKY, Mr. HOLLINGS, Mr. BRADLEY, Mr. HECHT, Mr. ABDNOR, Mr. STENNIS, Mr. MATTINGLY, Mr. LONG, Mr. NUNN, Mr. BUMPERS, Mr. DOLE, Mr. MOYNIHAN, Mr. LEVIN, Mr. THURMOND, Mr. DECONCINI, Mr. COHEN, and Mr. CRANSTON):

S.J. Res. 354. Joint resolution to designate the week of October 5, 1986, through October 11, 1986, as "National Drug Abuse Education and Prevention Week"; to the Committee on the Judiciary.

NATIONAL DRUG ABUSE EDUCATION AND PREVENTION WEEK

● Mr. CHILES. Mr. President, today I am introducing a joint resolution to designate October 5-11, 1986, as "National Drug Abuse Education and Prevention Week." I am delighted to be joined in this effort by Senators BURDICK, ZORINSKY, HOLLINGS, BRADLEY, HECHT, ABDNOR, STENNIS, MATTINGLY, LONG, NUNN, BUMPERS, DOLE, MOYNIHAN, LEVIN, THURMOND, DECONCINI, COHEN, and CRANSTON.

I am also pleased to have the support of the National Federation of Parents for Drug-Free Youth. The federation will be holding its national convention during the week we are designating as "National Drug Abuse Education and Prevention Week."

In recent years we have done much toward reducing the supply of drugs coming into our country. We have strengthened our border patrols, Coast Guard, and other police forces to curb the influx of illegal drugs into our cities and towns. But today drug abuse remains a national tragedy.

In addressing drug abuse, though, we too often focus only on the supply side of the program. The resolution I am introducing also encourages us to examine the demand side: the pressures that influence our young people to begin misusing drugs. It is my hope that National Drug Abuse Education and Prevention Week will stimulate interest in education programs both in school and at home which provoke discussions about drugs and encourage young people to develop realistic views about drug abuse and the resulting harmful effects. In addition to traditionally abused drugs, I hope that these discussions will include information about designer drugs, the most recent phenomenon in the illicit drug market.

I would like to take this opportunity to acknowledge the Drug Education Program which Ms. Joanne Riviere conducts in her fifth grade class at Palmetto Elementary School in Miami, FL. Last May, as part of their class study, her students wrote to me about a problem they had perceived with regard to certain chemicals which are diverted from legitimate industrial purposes to the production of illicit drugs. Their main concern was the chemical ether which is often used in the filtering stage of cocaine processing. In investigating this matter, I found that many other legitimate drugs are similarly used in producing illicit drugs.

On October 8, 1985, I introduced legislation—S. 1746—which directs the Attorney General to study and recommend methods to control the diversion of legitimate precursor and essential chemicals to the production of illegal drugs. This bill is now pending in the Judiciary Committee. I urge that committee to address this important issue expeditiously, and I again applaud the efforts of Ms. Riviere and her students which led to this legislation. I further hope that the joint resolution I am introducing today for "National Drug Abuse Education and Prevention Week" will encourage other teachers, students, and parents to focus their attention on this national problem.●

ADDITIONAL COSPONSORS

S. 419

At the request of Mr. GRASSLEY, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 419, a bill to amend the Internal Revenue Code of 1954 to allow a deduction for one-half of the expenses paid by a self-employed taxpayer for individual health insurance premiums.

S. 1704

At the request of Mr. MCCLURE, the name of the Senator from Nebraska [Mr. ZORINSKY] was added as a cosponsor of S. 1704, a bill to authorize an increase in the appropriation ceiling for the North Loup Division, Pick-Sloan Missouri Basin Program, Nebraska.

S. 1766

At the request of Mr. MATHIAS, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1766, a bill to designate the Cumberland terminus of the Chesapeake and Ohio Channel National Historical Part in honor of J. Glenn Beall, Sr.

S. 1917

At the request of Mr. BRADLEY, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 1917, a bill to amend the Foreign Assistance Act of 1961 to provide assistance to promote immunization and oral rehydration, and for other purposes.

S. 1941

At the request of Mr. DENTON, the names of the Senator from North Carolina [Mr. HELMS] and the Senator from Virginia [Mr. TRIBLE] were added as cosponsors of S. 1941, a bill to protect the security of the United States by providing for sanctions against any country that provides support for perpetrators of acts of international terrorism.

S. 1942

At the request of Mr. DENTON, the names of the Senator from North Carolina [Mr. HELMS] and the Senator from Virginia [Mr. TRIBLE] were added as cosponsors of S. 1942, a bill to amend title 10, United States Code, to improve the security of United States military installations.

S. 2064

At the request of Mr. WARNER, the names of the Senator from Florida [Mr. CHILES] the Senator from Ohio [Mr. METZENBAUM], and the Senator from Washington [Mr. GORTON] were added as cosponsors of S. 2064, a bill to require the President to make an annual report on the national strategy of the U.S. Government to certain committees of Congress and to require joint Committee meetings to be held on such report.

S. 2081

At the request of Mr. STAFFORD, the name of the Senator from New York [Mr. MOYNIHAN] was added as a cosponsor of S. 2081, a bill to reauthorize the Head Start Act, the Low-Income Home Energy Assistance Act of 1981, the Community Services Block Grant Act, for deferred cost care programs, and for other purposes.

S. 2083

At the request of Mr. STAFFORD, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 2083, a bill to amend the toxic Substances Control Act to require the Environmental Protection Agency to set standards for identification and abatement of hazardous asbestos in the Nation's schools, to mandate abatement of hazardous asbestos in the Nation's schools in accordance with those standards, to require local educational agencies to prepare asbestos management plans, and for other purposes.

S. 2220

At the request of Mr. CRANSTON, the names of the Senator from Ohio [Mr. METZENBAUM] and the Senator from Connecticut [Mr. WEICKER] were added as cosponsors of S. 2220, a bill to provide for a mutual, verifiable moratorium on the testing of nuclear warheads, and for other purposes.

S. 2230

At the request of Mr. ROTH, the names of the Senator from Virginia [Mr. TRIBLE] and the Senator from New Hampshire [Mr. HUMPHREY] were

added as cosponsors of S. 2230, a bill to improve the management of the Government by establishing an Office of Federal Management in the Executive Office of the President, and for other purposes.

S. 2274

At the request of Mr. KASTEN, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 2274, a bill to provide that certain individuals who are not citizens of the United States and certain persons who are not individuals shall be ineligible to receive financial assistance under the price support and related programs administered by the Secretary of Agiculture.

S. 2286

At the request of Mr. DECONCINI, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2286, a bill to prohibit the sale, donation, or other transfer of Stinger antiaircraft missiles to democratic resistance forces in Afghanistan and Angola unless certain conditions are met.

S. 2291

At the request of Mr. BIDEN, the names of the Senator from West Virginia [Mr. ROCKEFELLER] and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 2291, a bill to amend the Energy Reorganization Act of 1974 to create an independent Nuclear Safety Board.

S. 2294

At the request of Mr. WEICKER, the name of the Senator from Utah [Mr. HATCH] was added as cosponsor of S. 2294, a bill to reauthorize certain programs under the Education of the Handicapped Act, to authorize an early intervention program for handicapped infants, and for other purposes.

S. 2332

At the request of Mr. BOSCHWITZ, the names of the Senator from Minnesota [Mr. DURENBERGER] and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of S. 2332, a bill to provide credit assistance to borrowers of loans made by commercial lending institutions, Farm Credit System institutions, and the Farmers Home Administration, and for other purposes.

S. 2333

At the request of Mr. DURENBERGER, the names of the Senator from North Dakota [Mr. BURDICK] and the Senator from Connecticut [Mr. DODD] were added as cosponsors of S. 2333, a bill to amend title XIX of the Social Security Act to strengthen and improve Medicaid services to low-income pregnant women and children.

S. 2401

At the request of Mrs. KASSEBAUM, the names of the Senator from Michigan [Mr. LEVIN], the Senator from Rhode Island [Mr. PELL], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of S. 2401, a bill to prohibit the manufacture or distribution in, or the importation into, the United States of certain firearms.

S. 2410

At the request of Mr. BAUCUS, the names of the Senator from North Dakota [Mr. ANDREWS], the Senator from Texas [Mr. BENTSEN], the Senator from Oklahoma [Mr. BOREN], the Senator from North Dakota [Mr. BURDICK], the Senator from Maine [Mr. MITCHELL], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of S. 2410, a bill to amend the Social Security Act to provide for improved treatment of small rural hospitals and sole community hospitals under title XVIII and XIX of such Act, and for other purposes.

S. 2411

At the request of Mr. D'AMATO, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 2411, a bill to prohibit possession, manufacture, sale, importation, and mailing of ballistic knives.

S. 2421

At the request of Mr. GORTON, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 2421, a bill to amend the Truth in Lending Act.

S. 2444

At the request of Mr. STAFFORD, the name of the Senator from New York [Mr. MOYNIHAN] was added as cosponsor of S. 2444, a bill to reauthorize the Head Start Act, the Low-Income Home Energy Assistance Act of 1981, the Community Services Block Grant Act, the dependent care State grant program, and for other purposes.

S. 2453

At the request of Mr. COHEN, the name of the Senator from Florida [Mr. CHILES] was added as a cosponsor of S. 2453, a bill to enhance the capabilities of the United States to combat terrorism and other forms of unconventional warfare.

SENATE JOINT RESOLUTION 134

At the request of Mr. BIDEN, the name of the Senator from New York [Mr. MOYNIHAN] was added as a cosponsor of Senate Joint Resolution 134, a joint resolution to designate "National Safety in the Workplace Week".

SENATE JOINT RESOLUTON 169

At the request of Mr. MATHIAS, the names of the Senator from Utah [Mr. HATCH], the Senator from Missouri [Mr. EAGLETON], and the Senator from California [Mr. CRANSTON] were added as cosponsors of Senate Joint Resolution 169, a joint resolution to commemorate the bicentennial anniversary of the first patent and the first copyright laws.

SENATE JOINT RESOLUTION 244

At the request of Mr. DECONCINI, the names of the Senator from Nevada [Mr. LAXALT], the Senator from Georgia [Mr. MATTINGLY], the Senator from Oklahoma [Mr. NICKLES], the Senator from Georgia [Mr. NUNN], the Senator from Virginia [Mr. TRIBLE], and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of Senate Joint Resolution 244, a joint resolution to designate October 8, 1986, as "National Fire Fighters Day."

SENATE JOINT RESOLUTION 322

At the request of Mr. LAUTENBERG, the names of the Senator from Nebraska [Mr. EXON], and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of Senate Joint Resolution 322, a joint resolution to designate December 7, 1986, as "National Pearl Harbor Remembrance Day" on the occasion of the anniversary of the attack on Pearl Harbor.

SENATE JOINT RESOLUTION 338

At the request of Mr. RIEGLE, the names of the Senator from South Carolina [Mr. HOLLINGS], the Senator from Nebraska [Mr. ZORINSKY], the Senator from Florida [Mr. CHILES], the Senator from North Dakota [Mr. BURDICK], the Senator from Iowa [Mr. HARKIN], and the Senator from Nevada [Mr. HECHT] were added as cosponsors of Senate Joint Resolution 338, a joint resolution to designate November 18, 1986, as "National Community Education Day."

SENATE JOINT RESOLUTION 346

At the request of Mr. HEINZ, the names of the Senator from Maryland [Mr. MATHIAS], and the Senator from Maine [Mr. COHEN] were added as cosponsors of Senate Joint Resolution 346, a joint resolution to designate June 21, 1986, as "National Save American Industry and Jobs Day."

SENATE JOINT RESOLUTION 347

At the request of Mr. LEVIN, the names of the Senator from Washington [Mr. GORTON], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 347, a joint resolution to designate the week of May 19, 1986, through May 24, 1986, as "National Homelessness Awareness Week."

SENATE CONCURRENT RESOLUTION 131

At the request of Mr. HART, the names of the Senator from Oklahoma [Mr. BOREN], the Senator from Nebraska [Mr. EXON], the Senator from Nevada [Mr. HECHT], the Senator from Vermont [Mr. LEAHY], the Senator from Oklahoma [Mr. NICKLES], the Senator from Illinois [Mr. SIMON], and the Senator from Virginia [Mr. TRIBLE] were added as cosponsors of Senate Concurrent Resolution 131, a concurrent resolution expressing the

sense of the Congress that the Soviet Union should immediately provide for the release and safe passage of Naum Meiman and Inna Kitrosskaya-Meiman.

SENATE CONCURRENT RESOLUTION 138

At the request of Mr. DOLE, the name of the Senator from Louisiana [Mr. JOHNSTON] was added as a cosponsor of Senate Concurrent Resolution 138, a concurrent resolution expressing the sense of the Congress with respect to Farm Credit System agricultural loan restructing.

SENATE CONCURRENT RESOLUTION 140

At the request of Mr. HELMS, the names of the Senator from New Mexico [Mr. DOMENICI], the Senator from Kansas [Mr. DOLE], the Senator from California [Mr. WILSON], the Senator from North Carolina [Mr. EAST], the Senator from South Carolina [Mr. THURMOND], the Senator from Iowa [Mr. GRASSLEY], the Senator from Maine [Mr. COHEN], the Senator from Washington [Mr. GORTON], the Senator from Georgia [Mr. MATTINGLY], the Senator from Mississippi [Mr. COCHRAN], the Senator from Alabama [Mr. DENTON], the Senator from Utah [Mr. HATCH], the Senator from Pennsylvania [Mr. HEINZ], the Senator from New York [Mr. D'AMATO], the Senator from Wyoming [Mr. WALLOP], the Senator from Virginia [Mr. WARNER], the Senator from Virginia [Mr. TRIBLE], the Senator from Indiana [Mr. QUAYLE], the Senator from Oregon [Mr. HATFIELD], the Senator from New Hampshire [Mr. RUDMAN], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Idaho [Mr. MCCLURE], the Senator from Washington [Mr. EVANS], the Senator from Pennsylvania [Mr. SPECTER], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Florida [Mrs. HAWKINS], the Senator from Illinois [Mr. SIMON], the Senator from Massachusetts [Mr. KERRY], the Senator from Montana [Mr. MELCHER], the Senator from Arkansas [Mr. PRYOR], the Senator from Iowa [Mr. HARKIN], the Senator from Oklahoma [Mr. BOREN], the Senator from New York [Mr. MOYNIHAN], the Senator from West Virginia [Mr. BYRD], the Senator from Florida [Mr. CHILES], the Senator from Vermont [Mr. LEAHY], and the Senator from Nevada [Mr. HECHT] were added as cosponsors of Senate Concurrent Resolution 140, a concurrent resoluton to pay tribute to the late William C. Lee and to designate June 6, 1986, as "William C. Lee Day."

SENATE CONCURRENT RESOLUTION 141

At the request of Mr. D'AMATO, his name was added as a cosponsor of Senate Concurrent Resolution 141, a concurrent resolution expressing the sense of Congress for full representation by American ethnic groups in the awarding of Statue of Liberty medals.

SENATE RESOLUTION 330

At the request of Mr. DENTON, the name of the Senator from Virginia [Mr. TRIBLE] was added as a cosponsor of Senate Resolution 330, a resolution establishing a Special Committee on Families, Youth, and Children.

SENATE RESOLUTION 409

At the request of Mr. MATTINGLY, the names of the Senator from Oklahoma [Mr. NICLKES], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Nevada [Mr. LAXALT], the Senator from Indiana [Mr. QUAYLE], the Senator from Alaska [Mr. STEVENS], the Senator from Massachusetts [Mr. KENNEDY], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Resolution 409, a resolution to express the sense of the Senate that the tax reform legislation, when that bill is signed into law, remain unchanged for a minimum of five years, for the purpose of promoting economic growth and opportunity.

AMENDMENT NO. 1729

At the request of Mr. DOMENICI, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Amendment No. 1729 intended to be proposed to S. 1004, a bill to authorize and direct the Secretary of Energy to establish a program to provide for reclamation and other remedial actions with respect to mill tailings at active uranium and thorium processing sites.

SENATE CONCURRENT RESOLUTION 143—URGING THE RESUMPTION OF THE UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES ORDERLY DEPARTURE FROM VIETNAM

Mr. DECONCINI (for himself and Mr. MURKOWSKI) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 143

Whereas the United Nations Orderly Departure Program for Vietnam has enabled more than 100,000 persons to leave Vietnam without facing the hazards of departure by sea, which has exposed thousands of Vietnamese to the risks of weather, unseaworthy vessels, and the depredations of pirates;

Whereas the international community, the United States Government, and the American people have expressed their support for the agreement reached between the United Nations High Commissioner for Refugees and the Vietnamese authorities in 1979 to establish the Orderly Departure Program for Vietnam (hereafter in this preamble referred to as the "Departure Program");

Whereas that agreement provides for both "family reunion and humanitarian cases" to depart Vietnam through the Departure Program and for the Government of Vietnam to provide the United Nations High Commissioner for Refugees and the receiving countries with every facility to implement the Departure Program;

Whereas the President, in consultation with the Congress, proposed in September 1984, and reaffirmed in September 1985, that the United States was prepared to receive (1) persons of special humanitarian concern from Vietnam, in particular the "re-education camp" prisoners, thousands of whom remain imprisoned because of their past associations with United States programs and policies in the region or with the former Government of the Republic of Vietnam; and (2) the Amerasian children and their mothers and other close relatives remaining in Vietnam;

Whereas the United States and other concerned governments have earnestly sought improvements in the operation of the Departure Program at meetings organized by the United Nations High Commissioner for Refugees with representatives of the Socialist Republic of Vietnam; and

Whereas the authorities of the Socialist Republic of Vietnam on January 1, 1986, suspended the inverviewing and processing of all applicants in Vietnam for resettlement in the United States, thus threatening to interrupt the flow of departures from Vietnam by those found eligible for admission to the United States as refugees or immigrants: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress hereby calls upon the Government of the Socialist Republic of Vietnam—

(1) to permit the immediate resumption of interviewing and processing of applicants in Vietnam who have received preliminary approval from the United States Government for resettlement in the United States under the United Nations High Commissioner for Refugees Orderly Departure Program for Vietnam; and

(2) to permit the orderly departure of "re-education camp" prisoners, Amerasian children, and other persons of special humanitarian concern to the United States.

● Mr. DECONCINI. Mr. President, on behalf of myself and the distinguished chairman of the Senate Committee on Veterans Affairs, Senator MURKOWSKI, I am submitting today a concurrent resolution expressing the sense of Congress that the Socialist Republic of Vietnam should (1) immediately resume the interviewing and processing of applicants in Vietnam who have received preliminary approval from the U.S. Government for resettlement in the United States under the United Nations High Commissioner for Refugees [UNHCR] Orderly Departure Program, and (2) permit the orderly departure of "re-education camp" prisoners, Amerasian children, and other persons of special humanitarian concern to the United States.

Mr. President, our good friend from Florida, Congressman MICHAEL BILIRAKIS, who traveled to Vietnam with Senator MURKOWSKI, Congressman MCEWEN, and myself in January, will be introducing companion legislation in the House of Representatives.

While the congressional members of the Murkowski Codel were in Hanoi pursuing the POW/MIA issue with Vietnamese officials, other members of our staffs visited the Phanat Nikhom Refugee Camp in Thailand. In subse-

quent reports to us, they underscored the importance of the Orderly Departure Program [ODP] continuing in an unimpeded manner.

Mr. President, the Orderly Departure Program was negotiated in 1979 between the Socialist Republic of Vietnam [SRV] and the United Nations High Commissioner for Refugees in response to the flood of boat people who fled Vietnam in 1978 and 1979. Many of these "boat people" traveled in unsafe vessels and unnecessarily died as a result of storms, drownings, and attacks by pirates. The Orderly Departure Program was established to provide a humane and orderly way in which refugees could leave Vietnam and resettle in nations willing to accept them.

The Orderly Departure Program works like this:

Interest expressed. A person in the United States or in the SRV contacts the ODP office at the American Embassy in Bangkok, or a voluntary agency in the United States, expressing interest in the ODP. The ODP office requests an immigrant visa petition from the relative in the United States or proof of a past close association with the United States.

Documentation. Upon receipt of an approved immigrant visa petition [I-130] or of evidence of close past ties with the United States, the ODP office in Bangkok opens a file and requests the documents required to complete the application. When the ODP is satisfied with the documentation submitted, it then adds the name of the applicant to the list of names of those approved for entry to the United States which is periodically forwarded to the Vietnamese authorities through the UNHCR representatives. The ODP office simultaneously issues a letter of introduction for use by the individual in Vietnam to obtain an exit permit, although this has often not been required by the Vietnamese authorities.

Exit permit. After the Vietnamese authorities issue an exit permit—which may take anywhere from 6 to 24 months, from the time of the initial request—they may then arrange for the applicant to be interviewed by UNHCR interviewers in Ho Chi Minh City—which may easily be another 18 months, or longer, after issuance of the exit permit.

Medical exam. During the week following the UNHCR interview, the applicant undergoes a medical examination at Cho Ray Medical Center.

ODP office review. The UNHCR interview file, along with the results of the medical exam, is then forwarded to ODP Bangkok for final review and approval. Final approval may take several months, depending on the existing backlog and/or whether or not more documentation is required.

UNHCR role. Upon final approval, the name of the applicant is telexed to the UNHCR for submission to the Vietnamese authorities for manifesting on the earliest possible flight out of Vietnam.

U.S. Government exit interview. Immediately prior to departure, an exit interview is conducted by a consular officer of the U.S. Government at the Tan Son Nhut Airport in Ho Chi Minh City.

Transportation. Travel, food, and lodging are provided by the Intergovernmental Committee for Migration under the terms of an agreement with the Bureau for Refugees Program, Department of State. However, all ODP applicants are expected to repay the transportation cost to ICM. These loan collections are then used to finance the transportation of future departees.

Training/U.S. arrival. The individual transits Bangkok for a brief period—not to exceed 12 days—and continues traveling to either the United States or, if qualified, to English as a second language and cultural orientation training in Bataan. During this period, private voluntary agencies find sponsors to care for the individual when he/she arrives in the United States.

Since the Orderly Departure Program was established in 1979, over 105,000 people have left Vietnam, 45,000 of whom have been or will be resettled in the United States. Despite any problems we may have had with the SRV, with regard to the ODP, those statistics represent positive progress.

As you may be aware, the President of the United States, in consultation with the Congress, expressed in September 1984, and reaffirmed in September 1985, our desire to receive persons of special humanitarian concern from the SRV. The groups of particular concern to us are the "re-education camp" prisoners, thousands of whom remain imprisoned because of their past associations with United States programs and policies in the region, or with the former Government of the Republic of Vietnam; and the Amerasian children, their mothers, and other close relatives remaining in Vietnam. While the SRV has not responded in a very positive manner to this initiative, the ODP must proceed so that thousands of refugees and immigrants can be resettled.

Regrettably, on January 1, 1986, the SRV unilaterally suspended UNHCR interviewing and processing of applicants in Ho Chi Minh City for departure to the United States. This resolution is intended to send a strong signal to the SRV that the suspension of the interviewing and processing of applicants is a matter of grave humanitarian concern to the U.S. Government and the U.S. Congress. It is extremely important that the SRV know that the executive and legislative branches of our Government speak with a strong and united voice on this important issue.

I urge all of our colleagues to join with Senator MURKOWSKI and myself in cosponsoring this resolution so there can be no doubt as to where the U.S. Congress stands on the importance of the UNHCR Orderly Departure Program. Hopefully, enactment of this resolution will convince the SRV to immediately resume the UNHCR interviewing and processing of refugees under the ODP.●

SENATE CONCURRENT RESOLUTION 144—PROVIDING FOR AN ADJOURNMENT OF THE SENATE AND THE HOUSE

Mr. DOLE submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 144

Resolved by the Senate (the House of Representatives concurring), That when the House adjourns on Thursday, May 22, 1986, pursuant to a motion made by the Majority Leader of the House, or his designee, in accordance with this resolution, it stand adjourned until 12 o'clock meridian on Tuesday, June 3, 1986, and that when the Senate adjourns on Wednesday, May 21, 1986, pursuant to a motion made by the Majority Leader of the Senate, or his designee, in accordance with this resolution, it stand adjourned until 2 o'clock p.m. on Monday, June 2, 1986, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution.

SEC. 2. The Speaker of the House, after consultation with the Minority Leader of the House, and the Majority Leader of the Senate, after consultation with the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

SENATE RESOLUTION 412—THANKING THE HONORABLE MARGARET THATCHER

Mr. WALLOP (for himself, Mr. MATTINGLY, Mr. MCCLURE, Mr. QUAYLE, Mr. WARNER, Mr. HECHT, Mr. HELMS, Mr. SYMMS, Mr. GOLDWATER, Mr. GARN, Mrs. HAWKINS, Mr. HOLLINGS, Mr. TRIBLE, Mr. GRAMM, Mr. MURKOWSKI, Mr. ARMSTRONG, Mr. LAXALT, Mr. THURMOND, Mr. EAST, Mr. HATCH, Mr. WILSON, Mr. RUDMAN, Mr. GORTON, Mr. DENTON, Mr. CHAFEE, Mr. GRASSLEY, and Mr. LUGAR) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 412

Whereas the Government of the United States, having obtained irrefutable evidence that the present regime in Libya did engage in an act of war against the United States by ordering a bombing of a crowded building in Berlin frequented by American citizens in which an American serviceman was killed and others wounded, along with many civilians; and

Whereas the Government of the United States both before and after this incident has received reliable information that the same Libyan government has been systematically planning, aiding, and abetting similar terroristic attacks which constitute acts of war against the United States of America; and

Whereas the President of the United States, in response to these outrages and acting within his constitutional prerogatives and pursuant to his solemn obligation as commander in Chief to defend the United States and its citizens, did resolve to launch an airstrike against selected military targets in Libya involved in support of these acts of terrorism aimed at the United States; and

Whereas the President, in order to make this airstrike effectively, requested the permission of our NATO ally, the United Kingdom, permission to dispatch some of our aircraft from bases in the United Kingdom; and

Whereas this permission was graciously granted by the Prime Minister of the United Kingdom, Margaret Thatcher; and

Whereas Margaret Thatcher has been subjected to harsh domestic criticism for supporting this American operation; and

Whereas Margaret Thatcher has forcefully defended in Parliament her decision as follows:

"Terrorism is a scourge of the modern age. Libya has been behind much of it and was planning more. The United Kingdom has itself suffered from Libya's actions. The United States, after trying other means, has now sought by limited military action to induce the Libyan regime to desist from terrorism. This is in the British interest. It is why the government supports the U.S. action"; and

Whereas in taking her decision and defending it with courage and uncommon eloquence, she has demonstrated her friendship for the United States, and her government has given the world a lesson in what it means to be a courageous and dependable ally against a common danger:

Resolved, that it is the sense of the Senate of the United States that we are deeply grateful to the Prime Minister and to the British Government for their timely and loyal support and for giving the United States the assistance it requested to facilitate the efforts of our Government to take action to deter terrorist attacks by the Libyan regime against America and its friends and allies.

Be it further resolved that on behalf of the American people we express our heartfelt thanks to the people of the United Kingdom for this welcome expression of friendship and solidarity.

Mr. WALLOP. Mr. President, I stand today to submit a sense of the Senate resolution to thank Margaret Thatcher, her government, and the people of the United Kingdom for their support in our hour of need; in this case, allowing the United States to use British air bases for launching an American retaliatory strike against those who support, train, and equip international terror in Libya.

Our two great English-speaking nations have often come to each other's aid when others would not. While we have our differences over many matters of policy, there has never been any doubt in my mind that the British and American people share the strongest of bonds: the love of freedom and the moral strength and capacity to see that liberty and justice prosper in what often seems to all of us a barbarous world.

International terrorism is not a phenomenon born of social misery or unrest. It is not the cause of freedom fighters who seek to liberate their country from some foreign power or despot. It is most often directed at those countries that have the most democratic forms of government, and its targets are almost always innocent civilians, many women and children.

No; as Benjamin Netanyahu stated correctly, international terrorism "is rooted in the political ambitions and designs of expanionist states and the groups that serve them. Without the support of such states, international terrorism would be impossible."

Margaret Thatcher, who exemplifies the best qualities of British leadership, understands this. Although she has come under harsh domestic political criticism for her support of this legitimate American response to international terror, she stands firm and has staunchly defended her actions.

She states eloquently in the parliament:

Terrorism is a scourge of the modern age. Libya has been behind much of it and was planning more. The United Kingdom has itself suffered from Libya's actions. The United States, after trying other means, has now sought by limited military action to induce the Libyan regime to desist from terrorism. This is in the British interest. It is why the government supports the U.S. action.

I should like to take a moment to read into the RECORD the words of another great British statesman in his expression of admiration for Franklin Roosevelt. I believe it aptly captures the feeling those who sponsored this resolution have for Prime Minister Thatcher.:

I have always taken the view that the fortunes of mankind in its tremendous journey are principally decided for good or ill—but mainly for good, for the path is upward—by its greatest men and its greatest episodes.

I therefore hail it as a most fortunate occurrence that at this awe-striking climax in world affairs there should stand at the head of the American Republic a famous statesman, long versed and experienced in the work of government and administration, in whose heart there burns the fire of resistance to aggression and oppression, and whose sympathies and nature make him the sincere and undoubted champion of justice and of the freedom, and of the victims of wrongdoing wherever they may dwell.

We Americans are fortunate indeed that the British democracy is headed today by a woman who embodies those qualities which Winston Churchill so graciously bestowed upon President Roosevelt 45 years ago. We are moreover fortunate that the British people have, in their wisdom, seen fit to place such a statesman as Prime Minister Thatcher at the helm of the British ship of state. For this, and for their welcome expression of friendship and solidarity toward the United States, we also offer our heartfelt thanks to the people of Great Britain.

I encourage my colleagues who have not yet become cosponsors of this resolution of thanks to do so.

SENATE RESOLUTION 413—RECOGNIZING THE DEVOTION OF BOB HOPE ON HIS 83D BIRTHDAY

Mr. DENTON (for himself, Mr. ABDNOR, Mr. BOREN, Mr. BUMPERS, Mr. BURDICK, Mr. BYRD, Mr. COCHRAN, Mr. CRANSTON, Mr. DECONCINI, Mr. DIXON, Mr. DOLE, Mr. DURENBERGER, Mr. EAST, Mr. GOLDWATER, Mr. GRASSLEY, Mr. HATCH, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mrs. KASSEBAUM, Mr. KASTEN, Mr. LAXALT, Mr. LEVIN, Mr. LUGAR, Mr. MCCLURE, Mr. MURKOWSKI, Mr. PRESSLER, Mr. ROTH, Mr. SIMPSON, Mr. STAFFORD, Mr. STENNIS, Mr. SYMMS, Mr. THURMOND, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, Mr. WILSON, and Mr. ZORINSKY) submitted the following resolution; which was considered and agreed to:

S. RES. 413

Whereas the favorite and most beloved entertainer in America, Bob Hope, will observe his eighty-third birthday on May 29, 1986;

Whereas Bob Hope has staunchly supported American values and the interests of the Nation;

Whereas Bob Hope has entertained the men and women of the Armed Forces, both at home and overseas, since 1941; and

Whereas Bob Hope has received many awards including a Congressional Gold Medal and the Medal of Freedom: Now, therefore, be it

Resolved, That the Senate reaffirms its recognition of the devotion of Bob Hope to the United States and to the members of the Armed Forces and extends its best wishes to Bob Hope on the occasion of his having attained the age of eighty-three years young.

SENATE RESOLUTION 414—RELATING TO THE RESUMPTION OF TECHNICAL MEETINGS RELATED TO AMERICANS MISSING-IN-ACTION IN SOUTHEAST ASIA

Mr. MURKOWSKI (for himself, Mr. DECONCINI, Mr. THURMOND, Mr. DENTON, Mr. BOSCHWITZ, and Mr. ABDNOR) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 414

Whereas, 2,435 servicemen are still unaccounted for in Southeast Asia;

Whereas, significant progress has been made in the ongoing talks between the United States and Vietnamese governments toward the resolution of issues surrounding American military persons who served

during the Vietnam war and are still listed as missing in action;

Whereas, both the United States government and the Vietnamese Foreign Minister Nguyen Co Thach have agreed that such talks should proceed as a humanitarian effort, apart from all other political issues;

Whereas, during the past five years, Vietnam has steadily increased the level of its cooperation in resolving the POW/MIA issue and, during 1985, Vietnam agreed to increase the technical meetings to at least six a year, has repatriated more remains than during any year since 1973, carried out the first U.S. Vietnamese joint crash site excavation, and announced Vietnam's intention to resolve the MIA issue "within two years";

Whereas, the level of U.S./Vietnamese cooperation must be accelerated, not suspended, if the POW/MIA issue is to be resolved within two years;

Now, therefore, be it

Resolved, That—

(1) the U.S. government continue to make every effort to have the technical meetings between high-level representatives of Vietnam and the U.S. government resume as expeditiously as possible;

(2) The U.S. government continue to underscore the importance of proceeding on an accelerated track to pursue the resolution of the POW/MIA issue as a humanitarian effort, apart from all other issues; and

(3) the U.S. government give the highest priority to efforts to resolve all aspects of the POW/MIA issue.

SEC. 2. (a) This resolution may be cited as the "POW/MIA Technical Meetings Initiative of 1986".

(b) The Secretary of the Senate shall transmit a copy of this resolution to the President, the Secretary of Defense, and the Secretary of State.

● Mr. MURKOWSKI. Mr. President, I rise at this time to submit, along with my distinguished colleague Senator DENNIS DECONCINI of Arizona, and others Senate Resolution 414.

This resolution expresses the sense of the Senate regarding the presumption of technical meetings with the Government of the Socialist Republic of Vietnam on the issues of the repatriation of remains of American servicemen, joint excavations of crash sites and investigations of so-called live sighting reports. It is fitting that Senator DECONCINI and I introduce this legislation for our colleagues consideration at a time when our Nation commences its observance of Memorial Day. I am also pleased to join with Senator DECONCINI as an original cosponsor on a Senate resolution expressing grave concern with the recent turn of events regarding the Orderly Departure Program.

In the debate and rhetoric about the political and moral dimensions of warfare that will inevitably take place on Memorial Day, let us not lose sight of the human sacrifices that comprise the true nature of war. It is the men and women who have made that final and painful sacrifice in the name of duty that we must honor. As a nation we were divided in the 1960's and 1970's over the war in Indochina. Let us today set aside these bitter controversies and unite in honoring most solemnly those who lost their lives in that arena just as we honor those who fell in other wars fought by the United States.

There can be no more fitting commemoration of Memorial Day than to redouble our efforts on behalf of those servicemen who remain unaccounted for from the Vietnam war. It would be a shame if we were to spare any effort to determine the fate of those still missing in action. We must keep with the families of the MIA's who bear the agonizing hope that, against all odds, their missing ones might still be alive as prisoners of war, a hope that cannot be resolved until a full accounting has been made of every young man who fought for his country in Vietnam.

Moreover, on this Memorial Day let us keep faith with those Vietnamese who have suffered in the new Vietnam by virtue of their past association with the American presence. After 1975, South Vietnamese of the Republic of Vietnam who had been associated with Americans during our long common struggle became prime targets for persecution by the Hanoi government. As is well known, a million Vietnamese fled by boat subsequently to escape the new Communist regime.

A valuable program exists to help Vietnamese seeking to leave Vietnam legally. It is the Orderly Departure Program [ODP] and the United States is fully committed to it. The ODP was established under the auspices of the United Nations High Commissioner for Refugees and has enabled over 100,000 persons to leave Vietnam safely since 1979. Of these, about one-half have come to the United States. This program is the best means to reunite families torn apart by war and offers an alternative to flight by boat. Through the ODP, we have a particular concern for three specific groups: for Amerasian children, for Vietnamese citizens who were employed by us until 1975, and for former officials of the South Vietnamese government and military.

Since January 1986, Vietnam has ceased cooperation with the ODP program. American working for the UNHCR in Ho Chi Minh City have been summarily ordered out of the country. Because all candidates for American visas must be interviewed personally, Hanoi has, in effect, left the program to dry up.

There are, at this moment, between 600 and 1,000 fully processed applicants waiting for Vietnam to finally manifest them on the flight to Bangkok and freedom. In addition there are between 9,500 and 10,000 applicants who are fully processed but who have minor technical complications hold up their departure.

We have urged Hanoi to get the process moving again, but without success to date. As with the MIA issue, I fear to say that Hanoi may be tying the ODP program to political issues. This would be most unfortunate—and contrary to Hanoi's own interests—that humanitarian issues should be so merged with political issues.

It is also regrettable that Vietnam has refused to engage in a sincere dialog regarding "reeducation camp" prisoners still held in Vietnam. In 1984, Foreign Minister Nguyen Co Thach pledged to release all reeducation detainees if the United States would accept them. In spite of the enormous problems involved in accepting tens of thousands of refugees, the United States welcomed Thach's proposal and sought ways to implement it. Thach's proposal, however, turned out to be misleading. Hanoi more recently has insisted that it would carry out its pledge only if the United States would restrict the exercise of free speech and political expression of these refugees once they were in our country. He based this demand on Vietnamese national security considerations. This demand is, of course, wholly unacceptable, given the constitutional rights all our residents enjoy. Hanoi must have been aware of our position on this fundamental question.

In spite of these difficulties, Memorial Day should thus be the occasion for us to renew our efforts not only on the MIA/POW issue but also on behalf of the ODP program and of the reeducation camp inmates. The United States must not forget the Vietnamese who fought for the independence of the Republic of Vietnam until 1975.

Mr. President, I am taking this opportunity to introduce a resolution to express my very strong concern and that of Senator DECONCINI regarding the suspended talks with the Vietnamese to resolve the issues surrounding Americans still missing in Southeast Asia.

On April 28, I met in New York for more than 2 hours with Bui Xuan Nhat, the Vietnamese Acting Permanent Ambassador to the United Nations. The specific purpose for this meeting was to discuss the importance of resuming the technical meetings regarding Americans still missing in action in Southeast Asia. The Vietnamese canceled the ongoing technical talks scheduled for April, and threatened to delay the meetings indefinitely after the Vietnamese denounced the United States antiterrorist strike in Libya. I shared with the Ambassador the extensive conversations I had with Foreign Minister Thach in Hanoi on this subject and of the Foreign Minister's commitment to me that the resolution of the MIA issue was a humanitarian one which must not be linked to other matters.

Ambassador Nhat and I made significant progress on this issue. He told

me that the technical talks will be rescheduled shortly. I believe the Vietnamese agree that in order to proceed with our mutually shared goal of a full MIA accounting, we must not link this issue to any political or economic end. It is for this reason that I believe this Senate resolution endorsing the resumption of these talks as a very high priority, humanitarian effort, will go a long way to demonstrate to the Vietnamese Government our country's commitment to the resolution of this issue.

I am pleased that my colleague on the Senate Veterans' Affairs Committee and a member of the congressional delegation I led to Southeast Asia early this year, Senator DECONCINI, has joined me as an original cosponsor in this important effort. I urge my colleagues support of this measure.●

SENATE RESOLUTION 415—AUTHORIZING REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 415

Whereas, in the case of *Commonwealth of Virginia* v. *Scott Bonner Benton, et al.*, Crim. No 761GC86004126-00, pending in the General District Court, Richmond, Virginia, the prosecution has obtained a subpoena for testimony of Senator Paul S. Trible, Jr.;

Whereas, Carol Ann Johnson, Richmond Office Assistant to Senator Trible, has by agreement with the Assistant Commonwealth's Attorney been substituted as a subpoena respondent;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a)(2) (1982), the Senate may direct its counsel to represent Members or employees of the Senate with respect to subpoenas issued to them in their official capacity;

Whereas, by the privileges of the United States Senate and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of employees of the Senate is or may be needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Senator Paul S. Trible, Jr., Carol Ann Johnson, and any other staff assistant of Senator Trible who may be asked to testify in the case of *Commonwealth of Virginia* v. *Scott Bonner Benton, et al.* or subsequent related proceedings.

SEC. 2. That Carol Ann Johnson and any other staff assistant of Senator Trible who may be asked is authorized to testify in the case of *Commonwealth of Virginia* v. *Scott Banner Benton, et al.* including any appeals thereto, except concerning matters which may be privileged.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will be holding a hearing on Thursday, June 12, 1986, in Senate Russell 485, at 9:30 a.m., on S. 830, a bill to amend the Indian Education Act and other acts relating to Indian education to include native Hawaiians. Those wishing additional information should contact the committee at 224-2251.

SUBCOMMITTEE ON WATER AND POWER

Mr. MURKOWSKI. Mr. President, I would like to announce for the information of the Senate and the public, that the Subcommittee on Water and Power of the Committee on Energy and Natural Resources has scheduled a hearing on Tuesday, June 24, 1986, beginning at 10:00 a.m. in Room SD-366 of the Senate Dirksen Office Building, Washington, DC.

The purpose of this hearing is to receive testimony on the general relationship between the Federal Energy Regulatory Commission and related State public utility regulatory commissions and S. 1149, to amend the Federal Power Act to allow State commissions to determine whether to exclude all or part of a rate set by the Federal Energy Regulatory Commission based on construction cost.

Those wishing to testify or submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Water and Power, U.S. Senate, Washington, DC 20510. For further information regarding this hearing, please contact Ms. Debbi Rice or Mr. Russell Brown at 202-224-2366.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. DOMENICI. Mr. President, I would like to announce for the information of the Senate and the public that the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources will conduct a field hearing on Thursday, September 4, 1986, beginning at 9:00 a.m. at the Albuquerque Convention Center, Albuquerque, NM, on Technology Transfer.

The hearing will be jointly held with the House Science and Technology Committee for the purposes of exploring how technology is transferred from national laboratories to private industry, and how that process can be improved.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Energy Research and Development, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510.

For further information regarding this hearing, please contact Mr. K.P. Lau or Ms. Marilyn Meigs of the subcommittee staff at 202-224-4431.

SUBCOMMITTEE ON FOREIGN AGRICULTURAL POLICY

Mr. HELMS. Mr. President, I wish to announce that the Subcommittee on Foreign Agricultural Policy of the Committee on Agriculture, Nutrition, and Forestry chaired by Senator RUDY BOSCHWITZ, has scheduled a series of hearings entitled "Preparing for the GATT: a review of agricultural trade issues."

The schedule of hearing dates and the topics to be discussed are as follows:

Tuesday, June 3, Prospects for world food production (short-term and long-term).

Tuesday, June 17, Part I: Agricultural Export Commission Part II: FAS cooperators (market development).

Tuesday, July 22, Barriers to agricultural trade—market access and export subsidies around the world (including the United States).

Tuesday, July 29, Impact of the 1985 farm bill on world agricultural trade.

Tuesday, August 5, GATT negotiations—What's at stake for U.S. agriculture?

Each day's hearing will begin at 9:30 a.m. and will be held in room 332 Russell Senate Office Building.

If further information is needed regarding these hearings, please contact Dan Pearson of Senator BOSCHWITZ' staff at 224-5641 or the committee staff at 224-2035.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER, AND RESOURCE CONSERVATION

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public that a public hearing has been scheduled before the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources on Friday, June 20, 1986, at 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC 20510.

Testimony will be received on the following measures: S. 2266, to establish a ski area permit system on national forest lands established from the public domain, and for other purposes; S. 2287, to amend the Wild and Scenic Rivers Act to designate a certain portion of the Great Egg Harbor River in the State of New Jersey for potential addition to the Wild and Scenic Rivers System; S. 2320, to amend an act to add certain lands on the Island of Hawaii to Hawaii Volcanoes National Park, and for other purposes; S. 2351, to revise the boundaries of Olympic National Park and Olympic National Forest in the State of Washington, and for other purposes; and S. 2466, a bill to designate a segment of the Saline Bayou in Louisiana as a component of the National Wild and Scenic Rivers System.

Those wishing to testify should contact the Subcommittee on Public

Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources, room SD-308, Dirksen Senate Office Building, Washington, DC 20510. Oral testimony may be limited to 3 minutes per witness. Witnesses may be placed in panels, and are requested to submit 25 copies of their testimony 24 hours in advance of the hearing, and 50 copies on the day of the hearing. For further information, please contact Tony Bevinetto or Patty Kennedy of the subcommittee staff at (202) 224-0613.

SUBCOMMITTEE ON NATURAL RESOURCES DEVELOPMENT AND PRODUCTION

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Natural Resources Development and Production Subcommittee of the Senate Energy and Natural Resources Committee.

The hearing will take place on Thursday, June 26, 1986, beginning at 10 a.m. in room SD-366 of the Dirksen Senate Office Building in Washington, DC. Testimony is invited regarding the prospects for exporting American coal.

For further information regarding this hearing, you may wish to contact Ms. Ellen Rowan on the subcommittee staff at (202) 224-5205. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Natural Resources Development and Production Subcommittee, Committee on Energy and Natural Resources, Dirksen Senate Office Building, Washington, DC 20510.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the Committee on Agriculture be authorized to meet during the session of the Senate on Wednesday, May, 21, 1986, in order to conduct a business meeting until 1:30 p.m. on the nominations of Peter Myers, to be Deputy Secretary of Agriculture, and Christopher Hicks, to be General Counsel, United States Department of Agriculture.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the Committee on Banking, Housing and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, May 21, to hold a hearing on the following:

Housing bill; H.R. 237, Fair Debt Collections Practices Act; and nomination of David Goldberg to be Director of SIPC.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Wednesday, May 21, 1986, in order to conduct a business meeting on the following items:

S. 2255, Senate Concurrent Resolution 123, House Concurrent Resolution 301, and the use of the Official Office Expense Account to defray the cost of drug testing for Senate staff, and requests from the Sergeant of Arms that his office assume responsibility for office automation training and that funds from the Computer Center budget be reprogrammed.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC AND THEATER NUCLEAR FORCES

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the Subcommittee on Strategic and Theater Nuclear Forces of the Committee on Armed Services, be authorized to meet during the session of the Senate on Wednesday, May 21, 1986, in order to receive testimony concerning S. 2199, the fiscal year 1987 Department of Defense authorization, and also to receive testimony concerning nuclear reactor safety.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

INTERNATIONAL ECONOMY

● Mr. DANFORTH. Mr. President, I am pleased to be able to share with my colleagues an article from the SAIS Review by Senator JOHN HEINZ entitled "The United States and the New International Economy: Facing the World as It Is."

Senator HEINZ' provocative article takes a realistic view of the world economy today and offers trade policy alternatives to help America cope. He attempts to go beyond the simplistic labels of "free trade" and "protectionism" that so often dominate the trade debate and offers a thoughtful and timely contribution to ongoing deliberations in Congress over U.S. trade policy.

Mr. President. I ask that the article by Senator HEINZ be printed in the RECORD.

The article follows:

THE UNITED STATES AND THE NEW INTERNATIONAL ECONOMY: FACING THE WORLD AS IT IS

(By John Heinz)

American trade policymakers can resolve the country's trade crisis only by adapting its free-trade philosophy to fit the modern world. The first challenge is to understand the limitations of U.S. economic power in a world very different from that of thirty, or even twenty, years ago—where financial flows now dwarf trade flows. The second task is to recognize the limitations of traditional analysis about the implementation of free-trade philosophy as it was understood in the postwar era. The world economy actually operates quite differently from the way economics textbooks tell us it should, and nations do not always act in the rational way economists would lead us to expect. If the United States is to meet these two challenges, it must act more aggressively in support of both the liberal international trading system and the nation's own economic interests. While the present system should not be abandoned, the United States cannot afford to base its trade policy solely on preservation of the status quo.

"Free trade is not a principle. It is an expedient." In an era that venerates free trade, it is useful to remember Benjamin Disraeli's dictum of 1843. Trade was both a principle *and* an expedient for the British, whose industrial development, dominance of the sea lanes, and far-flung empire allowed them to benefit from the art of trading as well as from the results of such activity. This happy circumstance fostered a marriage of convenience between enlightened self-interest and an economic theory that, in the age of mercantilism, was not yet so highly regarded.

Although Europe and especially Asia have not forgotten Disraeli's insight, since the Franklin D. Roosevelt administration the United States has espoused a laissez-faire, free-trade philosophy regardless of whether or not this furthered the national interest. As the country recovered from the Depression and World War II, this philosophy worked well. During the two decades following the war, U.S. economic dominance resembled that of Britain in the late nineteenth century. The United States accounted for some 60 percent of the free world's gross domestic product (GDP). Moreover, historians commonly agree that during the 1950s and early 1960s America's great strength allowed the nation to absorb economic burdens—which for it were modest—in the interest of maintaining the trading system and sustaining economic recovery in war-ravaged Europe. As long as the total pie was expanding, sacrifices were easy. The cost was small and the political and economic gains were immediate and real. In short, the United States benefited from the principle of free trade, satisfying both theological purists and American economic interests.

In the present period, however, the United States' continued pursuit of what is now an outdated interpretation of free trade defies reality rather than accommodates it. As economic growth has slowed in so many parts of the world, the consequences of the nation's failure to adjust its vision have become obvious. The report of the President's Commission on Industrial Competitiveness, which appeared in January 1985, summarized:

"Most dramatic, perhaps, is our declining position in the world trading arena. . . . The deterioration of our trade balance began more than a decade ago, when the dollar was widely thought to be weak. In industry after industry, U.S. firms are losing market share. Even in high technology—often referred to as the 'sunrise' industries—

the United States lost world market share in 7 out of 10 sectors." [1]

Looking more closely at the trade deficit, the National Association of Manufacturers (NAM) has concluded that virtually all of the deficit increase from $69 billion in 1983 to $123 billion in 1984 was attributable to a $50 billion increase (to $89 billion) in the deficit for manufactured goods. Only three years earlier, in 1981, the United States had shown a $5 billion surplus in that sector. This astounding deterioration resulted from a 36 percent jump in manufactured imports in 1984 over 1983, accompanied by exports continuing at a level lower than in 1981. The NAM made the following observations:

"The trade balance worsened as much in capital goods and 'high technology' products, sectors in which the United States is thought to be especially competitive, as in other industrial sectors. Hi-tech imports since 1980 have grown at a 21 percent annual rate, while exports have increased at an average rate of only 5 percent. This emphatically contradicts the assumption that the trade crisis only threatens uncompetitive or 'smokestack' industries".[2]

The significance of these developments for the U.S. economy cannot be underestimated. According to the NAM,

"The recovery of 1983-84 stimulated U.S. industrial production, but manufacturing employment and capacity utilization have remained well below levels of earlier peak periods. The Federal Reserve's industrial production index has fallen in the past 12 months, thus reversing its growing trend of 1983-84.

"Beginning in mid-1984, the worsening U.S. balance in 'net exports' has acted as a drag on GNP growth and may well shorten the present economic growth cycle. Had exports only remained constant instead of worsening since the middle of last year, the annual rate of GNP growth would have been 4.9 percent instead of 2.2 percent. This contrasts with previous recoveries in the 1970s, when U.S. export growth strengthened and prolonged domestic growth cycles".[3]

In short, U.S. policies during the last several years have led to a severe—and possibly permanent—contraction in the nation's manufacturing sector, with all the political, economic, and national-security consequences this implies. That six to eight million new service jobs have been created is good news, but it does not mitigate the fact that two million individuals have been permanently deprived of their manfacturing jobs and are unprepared to cope with the economic changes that are occurring. As William R. Hawkins, assistant professor of economics at Radford University in Virginia, has said, "The long-run replacement of high value-added industry by low value-added industry will undermine the American economic strength. Wealth and power ultimately rests on the power of production, not consumption." [4]

Although the events and policies of the last four years have brought the U.S. economy to the trade crisis evidenced by the huge U.S. trade deficit, the nation's continued failure to respond to changes in the world trading system (particularly since the early 1970s) and the decline in its share of free world GNP (from 60 to 25 percent) have also figured significantly. At this point I would highlight what appear to be the most important changes.

Exposed Economies. The increasing speed and sophistication of transportation and communications systems have created a true world market—for services as well as goods. For example, who would have thought, even ten years ago, that over half the country's daily supply of fresh carnations and chrysanthemums would be shipped from overseas? Satellite communications and electronic financial systems now permit virtually instantaneous transfer, not only of news but of data and business and financial transactions. Approximately $30 trillion of foreign-exchange transactions occurred in 1984 (or more than $11 billion every working day), a volume of transactions that dwarfs trade flows by a factor of ten. These developments have made virtually every economy accessible to every other, excluding those choosing to restrict such access.

Growth of the Trade Sector. The decline in the rate of domestic economic growth in the United States has made foreign markets more important—both for American producers perceiving them to be a means of growth and for foreign producers seeking to take advantage of the U.S. open market to promote their own growth. While foreign trade represented 7 percent of U.S. GNP in 1970, in 1984 it amounted to 14.7 percent. This was still behind the ratio of most European nations, but a significant increase nonetheless. In part it reflected the slowdown in expansion of the total "pie," which has occurred over the last ten years because of slower domestic growth. Thus, renewed attention was focused on foreign trade, where growth was more likely, if only at the expense of others.

Demand for Discipline. Both of the developments mentioned above have worked together to create pressure for stronger international standards on the conduct of commercial activities and for a better means of enforcing those standards. It is no longer only such "declining" import-impacted industries as steel, footwear, and textiles that are sensitive to these problems; now such modern, technologically competitive industries as machine tools and semiconductors, as well as growing segments of the agricultural sector, are joining the chorus of complaints about access to foreign markets and subsidized imports. These complaints translate not so much into cries for protection as into demands for equitable treatment; hence the newly popular term "fair trade."

Failure of Adjustment. This greater insistence on discipline in the rules of multilateral trade has been heightened by the almost universal failure of developed countries to pursue and implement successfully adjustment strategies for industries that are no longer competitive. In steel, for example, the United States and the European Community (EC) represent constrasting extremes of failure. The United Stats, having virtually no policy, has forced the industry to adjust in the most painful way possible. The result has been abrupt reductions in employment (from 453,000 in 1979 to 215,000 in May 1985) and a rise incoporate bankruptcies (Wheeling-Pittsburgh, McLouth) and mergers (LTV-Republic). The EC, on the other hand, has consistently postponed adjustment by continuing subsidies and attempting to regulate levels of production between the member nations. The result has been an adjustment so slow that it has done little more than transfer the burden for shrinkage to the United States. To the extent that developed nations with mature economies fail at adjustment, they increase the number of constituencies demanding protection and slow down a process that would allocate resources efficiently.

Breakdown of Consensus of Rules. The world has witnessed the growing importance of non-Western trade players, whose standards, practices, and approach to business are at variance with the essentially Western trade system drawn up by the United States and its European allies in the postwar era. The growing problem of patent piracy and other forms of theft of intellectual property (for example, books, recordings, and tapes) is a manifestation of the fact that many of the less developed countries LDCs) and newly industrialized countries (NICs) do not accept or have not developed Western legal standards and even regard them as instruments of economic exploitation.

Recognition of Economic Change. The difficulties that the United States and other developed nations have experienced in responding to the rapid industrialization of certain LDCs has been matched on the LDCs' part by a reluctance to accept the additional responsibility that accompanies development. For the United States, admitting that a Korea or Brazil can manufacture products of equal quality to ours at less cost has been a painful adjustment. Likewise, for countries such as Korea or Brazil to realize that industrialization must be coupled with a phasing out of LDC preferences and that a market-oriented system without subsidies offers the best hope of further balanced growth, will be equally painful yet no less necessary.

The Debt Bomb. The United States must come to terms with the devastating effect of the LDC debt crisis. In recent years nearly 40 percent of U.S. exports went to Third World markets—more than to Europe and to Japan combined—but debt problems and the inability to finance previous levels of imports caused a $22 billion deterioration in U.S. exports to Latin America alone between 1981 and 1984 as well as a loss of 550,000 jobs. While action on the part of the International Monetary Fund (IMF) in 1983 and 1984 staved off catastrophe, there is a growing suspicion that those steps were only palliative postponing but not preventing crisis. At the same time the debtor nations complained that IMF austerity programs had failed and should be replaced by more humane, development-oriented approaches with greater World Bank involvement, (although few, if any, of the nations in question have fully implemented or tested their IMF programs). At the annual IMF/World Bank meeting in Seoul in October 1985, Treasury Secretary Baker offered a plan to lend an additional $29 billion, a sum that some LDSs feel is too small and some U.S. banks consider too large. Growing private bank reluctance to provide new funds in the face of increasing LDC resistance to repayment cannot be unexptected, but it demonstrates the difficulty of arriving at any long-term solution.

These changes have produced a very different trading system, one in which the United States is no longer the dominant player and in which no widespread agreement exists on the rules of the game. The implications for American firms doing business internationally are clearly spelled out in a speech by Cordell Hull, director and senior vice president of Bechtel Power Cor-

poration, a company on the cutting edge of large-scale engineering and construction technology. Commenting on the growing need for subsidized government support of exports, Hull said,

In the 1960's the U.S. engineering and construction industry did not need as much credit support from Eximbank with respect to other international activities because:

—This country held a commanding lead in technical know-how, equipment quality, and price position backed by strong project management capabilities. . . .

—Competition from the newly industrialized countries was virtually non-existent. . . .

—Foreign exchange rates were stable and, for the most part, predictable.

Moving into the 1970's, economic storm clouds gathered as:

Host countries became more directly involved in project development and consequently required financing for their projects; in response, foreign engineering and construction competitors quickly emerged supported by subsidized government loans. . . .

—Emerging foreign competition secured increasingly larger shares of the engineering and construction market with their government's subsidies and support. Further, some of these competitors were state enterprises, directly owned and backed by their governments, able to take extraordinary risks with impunity.[5]

"Men learn from their mistakes how to make new ones." U.S. policymakers could benefit from this observation of British historian A.J.P. Taylor. They have lost their way in the transition to a new economic world, but they have not lost their baggage—theirs is still the classic laissez-faire, free-trade theology of the past. Does the suggestion that free-trade concepts are irrelevant mean they should be abandoned for a return to the celebrated days of Smoot-Hawley protectionism? Of course not. The theory—and the textbooks—are still useful. The question is how to apply them to a contemporary economic world. This demands not only a deep understanding of the changes in the system but also a redefinition of the term "free trade" so that it will be relevant for the present and for the remainder of this century.

The high priests of free trade make two mistakes in defining the principle to which they cling. They focus exclusively on the entry of foreign goods into the United States, while expecting the country to maintain the trading system single-handedly, and they persist in adhering to an artificial, stylized model rather than coming to terms with the human reality of trade.

The tunnel vision of American free traders is perplexing. In reality, free trade means, or ought to mean, the operation of free-market principles in the movement of goods, services, and capital across national borders. Today, of course, this would dictate that all parties lower tariffs, remove barriers to access, and resist new protectionist devices. However, free trade also means the free market operates in the production process and government decisionmaking. It means that dumping, subsidization, and government ownership of the means of production are not permitted. It means an end to arbitrary standards and testing requirements and protectionist government procurement policies, aggressive prosecution of patent piracy or other intellectual-property infringements, the lifting of constraints on services, and capital transfers, and the imposition of constraints on targeting of resources, including capital, to specific sectors. In short, free trade means permitting the most efficient allocation of economic resources *globally* and operating *all* economies on the basis of the principle of comparative advantage.

In modern times, however, achieving real free trade has been complicated by nations with interventionist governments, which have been able to "create" comparative advantage by subsidizing production, managing growth, and restricting competition, both foreign and domestic. For example, the Japanese economy has demonstrated that strong companies can be created by a combination of government-encouraged investment, protection of infant industries from imports, and forced consolidation of production to eliminate "damaging" domestic competition. With the government's blessing, these companies dominate their domestic markets and do not have to contend with import competition until they have achieved maturity, if then. Yet in a market exposed to global competition such entities would not have developed the same way, and resources would not have been diverted in an arguably less efficient direction.

From a narrow point of view the Japanese system has been extraordinarily successful. Through adroit management of the country's currency and capital market, through careful government guidance, and through the close cooperation of social groups (that in the United States are dedicated adversaries), the Japanese have created a dynamic, growing economy well positioned to take advantage of technological change.

Yet the cost of this industrial policy cannot be ignored, because it is the United States and others outside Japan who pay it. In some sectors products that can compete are simply excluded—blatantly in agriculture, more subtly in many industrial products. In other sectors foreign competition is excluded only until the Japanese have an equal, or superior, product. Then, when it no longer matters, the door is opened. The result is market distortion. Compared to a free-market philosophy, perhaps this is more clever; certainly it is more successful. Still, the person with the better idea, with the competitive edge, is out in the cold—unless, of course, he is Japanese.

One nation practicing this philosophy is a problem. If every nation practiced it, commerce would be paralyzed completely. Yet the trend, at least in Asia, is to imitate the closed-market model of the Japanese. Coping with this distortion of the free market is a challenge with which neither Gatt rules nor U.S. law are yet equipped to deal. If the United States fails to recognize it as a problem, however, it certainly will never be resolved.

The second mistake free traders make is to approach the international economic system as if it were a finely balanced clock instead of a Rube Goldberg contraption. In this mechanistic view all problems are caused by the high value of the dollar, which is itself the result of the federal budget deficit and the failure to cut spending. Simplistically presented, the budget deficit causes higher interest rates because the government competes with the private sector in the capital markets. Higher interest rates lead to an inflow of capital investment and a greater demand for the dollar, which in turn raises the value of the dollar in relation to other currencies, thereby encouraging imports and discouraging exports. Then, to reverse the tide, the United States cuts spending and reduces the deficit, thereby bringing interest rates down and prompting foreign investors to move out of dollars and into other currencies. After a time lag, this will right the U.S. trade balance.

The only problem with this elegant, seamless, and simple theory is that it does not reflect what has actually happened. It provides only a limited explanation for the trade deficit. This is not to say the theory is entirely wrong, only that it is incomplete. The United States has had a substantial trade deficit since 1976. In 1979, when the government intervened to stabilize the rapidly sliding dollar, the country still registered a $40 billion trade deficit. The trade deficit is now three times higher, but the fact remains that there have been significant deficits with both a low and a high dollar. While the dollar has no doubt been overvalued, one should have no illusions that its depreciation will either eliminate the deficit or solve the system's fundamental problems.

A second consideration is foreign investment. Has it risen during this period of supposedly high interest rates and a rising dollar? In fact, it has increased less than one would expect. Capital inflows totaled $75 billion in 1981, $94 billion in 1982, and $84 billion in 1984. The main reason for the sharp deterioration in the current account is the large decline in the export of U.S. capital ($110 billion in 1981 versus only $18 billion in 1984), which previously had offset the foreign inflows.

A third factor is interest rates. The prime rate peaked at 22 percent in 1980. Since then, it has moved more or less steadily downwards (thanks to the Reagan administration's policies). In the fall of 1985 it had fallen to 9.5 percent, a significant decrease over four years. What happened to the dollar during this period of declining real and nominal rates? It went up—until last February. In the following eight months it declined in value 31 percent against major European currencies and over 22 percent against the yen.

What happened in February to cause this welcome event? There was no significant change in interest rates. Nor did the United States reduce spending. It did not have a budget then, and there was little to indicate that it would get one. Indeed, the country had no budget until 1 August, and the one finally developed was generally considered a disappointment in terms of reducing the budget deficit. In fact, the sharpest decline against the yen came after the 21 September G-5 meeting in which Secretary Baker and his colleagues announced a program of greater macroeconomic policy coordination. There were no changes in economic fundamentals that could fully explain the significant effects the new policy has had. Perhaps because of this, economists have criticized the program as largely one of smoke and mirrors. (What this demonstrates if anything, is the value of smoke and mirrors in the foreign exchange markets.)

In other words, exchange rate management is more complicated than textbook theory suggests. Had the administration not overestimated the rationality and foresight of the market and had it understood the roles that psychology and intuition play, it could have tempered the dollar's rise over the past four years. It also needn't have dallied until September 1985 to improve coordi-

[5] Cordell Hull, speech at the "Trade 1984" conference, U.S. State Department, Washington D.C., 25 October 1984.

nation of macroeconomic policies among the major trading nations, which is absolutely essential to balanced exchange rates. The alternative to more aggressive exchange-rate management by the administration and the Federal Reserve Board is legislated exchange-rate stabilization schemes involving continued Federal Reserve activity in the market. Variations of this theme have been proposed in Congress, but it would be difficult to design in legislation a program that would be as flexible and that would be undertaken administratively.

To summarize, the view that exchange rates fluctuate according to rational evaluations of short-term economic indicators is an overly simplistic explanation of a much more complex reality—a reality in which intuition and expectations figure as significantly as perceptions of the reality, and in which the United States is generally considered to be a "save haven" for investment in an increasingly uncertain world. The dollar may or may not fall, regardless of spending reductions (although this is an important objective for a host of other reasons); its fall will not by itself cause the current-account balance to return to equilibrium. As noted, the U.S. trade balance was in trouble long before the dollar began its climb.

Furthermore, there are other systematic flaws that transcend the issue of exchange rates. The yen, for example, is not weak against all currencies. According to conventional theory, Japan's exports ought to be declining and its imports increasing in countries that have weak currencies vis-à-vis the yen. In the case of Korea, however, although the yen appreciated 48 percent against the won, Korean exports to Japan have increased only 2 percent per year. In Germany, the yen appreciated 28 percent against the mark, yet German exports to Japan have grown only 1 percent per year.

The problem of the dollar, therefore, will be best handled by recognizing the complexities of the trading and international financial system instead of relying on theories that ignore them. Although an understanding of the limits of traditional models or modes of thinking will not lead to different conclusions on what must be done about the budget deficit, interest rates, or the dollar, it should lead to a realization that these are not the *only* areas that require attention.

To say that we do not yet fully understand the operating principle of free trade in the contemporary economy would be an understatement. But we are slowly beginning to recognize the complexities of the world and the creativity and determination with which governments and individuals invent new means of distorting the free market to serve their short-term political or economic ends at the expense of others. For example, does the fact that most foreign producers in the steel industry—many of them government-owned, with no profit expectations—have engaged in dumping and subsidizing put the question of steel import restraints in a different light? If not, does the fact that the European Community has once again extended its subsidies to European steel producers—after promising three times in six years to eliminate them—suggest that the free-market concept is a bit tarnished around the edges? Is it in the interest of the United States to permit unemployment to be exported to its shores?

The policymakers with free-trade tunnel vision would suggest that the two issues are unrelated. EC subsidies are deplorable and every bit as market distorting as has been suggested. Yet that does not, the argument continues, imply that the United States should compound the error by retaliating. This is precisely the point where so many in Congess part company with the theoreticians—if not in the case of steel, then in any of a hundred other instances.

The United States must act more aggressively in such situations for two reasons. First, the two issues most certainly are related. In the case of steel, EC subsidies are violations of GATT rules (which the Ec has accepted) and U.S. law. They severely depress prices in the U.S. market, often to a degree out of proportion with the amount of steel actually involved. The International Trade Commission recognized this problem explicitly in a 1982 case involving Spanish steel: "In a market where discounting is now commonplace, the mere presence of an offer from an importer of steel at a lower price can have a discernible impact." [6] Price suppression has prevented the U.S. steel industry from earning enough money to make the new investment necessary to remain competitive. The EC action, as well as that of numerous other producers, affects the U.S. industry; by definition, it ought to affect U.S. policy as well.

The argument that the United States should welcome cheap imports when European taxpayers have picked up part of the tab is also dangerously misleading, because the strength of any economy rests on production, not consumption. The presence of a domestic industry competing with imports not only has national-security implications in such cases as steel, it also has major price implications for the long term, because it guarantees continued competition in the classic Western sense. In the textile industry, for example, the last U.S. producer of velveteen went into bankruptcy in 1984. Within a few months the price of imported velveteen had risen 33 percent. Although velveteen, unlike steel, may not be essential to U.S. defense, this example illustrates even the short-term consequences of permitting the demise of an American industry. In my judgment it is a high price for consumers, not to mention the unemployed, to pay for cheaper fabric in this year's fashions. Such an approach literally sacrifices future economic strength for the sake of a few lower prices today.

The enactment of legislation in 1984 requiring country of origin labeling on apparel has also provided a valuable lesson in pricing. For the first time consumers can see, in catalogues and in stores, that identical items from the United States and abroad have the same retail price, despite the fact that the foreign goods almost certainly cost less to produce. The benefit in these cases goes not to the consumer but to the retailer who, not suprisingly, prefers the larger markup he can obtain with foreign goods.

The second reason that the United States should act more aggressively is a tactical one. The United States has for years tried to establish some international discipline over subsidized export financing practiced by its trading partners. As the following example proves, and aggresive policy may be the only way to force an offending country back into the market system.

Export credit subsidies, which virtually all economists condemn, give export contracts not to the most efficient producer, the best-quality product, or even the lowest price, but to those companies with the biggest pot of government money behind them. Since many credits involve major projects such as nuclear or conventional power plants or civil aircraft, thousands of jobs and hundreds of millions of dollars are at stake. Because no one pays cash for projects that will take years to build, the critical element is not the bid price but the financing terms, which will determine the total cost.

While this problem has not been solved, thanks to the persistence of mixed credits some of the worst offenders were eliminated by the 1983 OECD agreement. This was achieved partly because of a congressional commitment to a "war chest"—a proposed $1 billion fund that would be available to match the subsidies employed by U.S. competitors—and partly because on several occasions the administration actually did supply a match through regular Export-Import Bank programs. In other words, the United States succeeded only after it had demonstrated its commitment to act unilaterally if necessary (a commitment exemplified by the then-deputy secretary of the treasury Tim McNamar in his famous "deep pockets" speech of June 1981). Of course, progress was delayed for several years by the inexplicable refusal of the Office of Management and Budget to support a subsidy fund. This was penny-wise and pound-foolish. By late 1985, however, the administration had reversed its position and as of this writing is supporting a similar approach to combat mixed creidts. Like the proverbial mule who had to be hit over the head with a two-by-four to get his attention, some of our trading partners require more than gentle remonstrance to be persuaded to rectify what they and we know to be distortions of the free market and violations of GATT. On occasion U.S. pressure has even been welcomed by a foreign government convinced that remedial action was needed but not willing to accept its political consequences. In those cases the foreign government can foist the blame for an unpopular measure on the United States.

Because of countervailing political pressures, the United States has often failed to take actions it knows are necessary. Trade policy usually loses to other considerations. The Defense Department and the National Security Council, for example, opposed strong actions against Japan when the United States was trying to persuade the Japanese government to increase its defense spending. Similarly, U.S. reluctance to press such countries as China, Mexico, and Korea on a variety of trade issues is related to the desire to maintain good political relations.

Clearly, the actions of foreign governments affect U.S. industries directly and adversely (a fact often conveniently forgotten by free traders). Often the only way to respond to those actions is through threatened or actual retaliation. Trade policy consists of a series of determined efforts to resolve discrete problems. The philosophical framework within which those actions are taken does not constitute policy, but merely rhetoric. It is action that shapes policy—action on such issues as steel, citrus, textiles, a new Round, services, and government procurement—and it is these specific cases that the United States should concentrate its efforts.

The following principles do provide a basis for a true "free trade" policy as well as a contex for specific actions that should be taken on particular problems.

Adjustment. A healthy economy is a changing economy; yet a changing economy creates victims—people and companies left behind as they lose their competitiveness. Victims of change caused by dumped im-

[6] USITC, Pub. No. 1331, December 1982.

ports or blocked market access abroad are particularly angry, since their unemployment is not due to market forces. In either case, however, these victims are lobbyist for protection, and they rarely distinguish among themselves as victims of "free trade" or "unfair trade."

A proper approach to adjustment, therefore, is essential both to the long-term economic health of the United States and to its political interest in reducing the constituency for protectionism. As noted before, however, neither the United States nor any other country has undertaken adjustment very effectively. It is difficult. Employees in import-impacted industries (footwear, textiles, apparel) are often at the low end of the wage, job, skill, and education scales. Plants are often located in rural areas where alternative job opportunities are limited. In other cases, like that of steel, workers are often highly paid, highly skilled, proud of their job, and reluctant to change, particularly since most alternatives would pay less.

Nevertheless, it should be recognized that import restraint will often be an integral part of adjustment. Article XIX of the GATT acknowledges this and allows procedures for providing such relief on the conditions that it be temporary, declining in effect, and undertaken pursuant to a determination of domestic injury. The purpose of such temporary relief is to provide an umbrella under which an orderly adjustment to the new competitive reality can occur, either through an orderly phasedown or the creation of an economic climate conducive to new investment and the restoration of competitiveness. (The affected industry, of course, invariably defines its objectives as the latter, despite the fact the former might be more appropriate. Article XIX would permit import restraint for either purpose.)

Free traders frequently miss this point. The real issue in the footwear Section 201 case, for example, was not whether a protectionist action would or would not be taken, but rather whether the industry could become more competitive (as it claimed) and whether import restraints were necessary to accomplish that. This is the kind of analysis the government should undertake. Legislation that I originally proposed in 1983, and that has been included in the Senate's bipartisan Trade Enhancement Act, would ensure analysis of this kind and create a requirement for a quid pro quo among industry, labor, and the government, in which import relief could be provided in return for an industry adjustment plan and appropriate commitments toward its implementation.

The fact that adjustment is difficult does not decrease its importance either to affected workers or to the United States' continued leadership of the trading system. U.S. failure to face and resolve adjustment problems domestically can only discourage other nations from meeting their responsibilities; since equalizing the pace of adjustment among countries is essential to maintaining trade "peace," this failure will also retard general systemic change.

Systemic Reforms. It is not news to suggest that the GATT is weak compared to what was promised in the International Trade Organization in the 1940s and the reality of existing counterpart institutions. Its disciplinary process is extremely slow and often ineffective, as "losing" countries (including the United States) block adoption of panel reports. As of September 1985 the United States had secured favorable panel reports in five cases (pasta, citrus, canned fruit, leather, and EC use of the value-added tax in government procurement); no remedial action has yet been taken.

It is not the purpose of this article to launch into an extended discussion of structural reform. However, of the changes that could be made, probably the two most useful would be (1) a move away from consensual decisionmaking, thereby permitting a less-than-unanimous vote to authorize action, and (2) expansion and redefinition of code coverage.

The first option is not new; indeed, I proposed it in a 1983 speech. As was true of the notorious Polish *liberum veto* of the Middle Ages, the requirement of unanimity is a guarantee of paralysis. Since virtually every finding will hurt someone in the short run, it is easy to find at least one opponent on any given issue. Bitter experience has shown that not everyone is equally committed to open markets, but if the system is to function at all it must be assumed that at least a majority is committed to an open market in any given case. The system should be revised to reflect this reality.

The second change that has been proposed—code redefinition and expansion—reflects the experience of the United States in the Tokyo Round, in which America essentially traded quantitative concessions on tariffs for promises of good behavior. It was subsequently discovered that vague phrases and limited coverage of the GATT codes made differences of interpretation the rule rather than the exception. In many cases, such as the definition of what constitutes subsidy, the United States needs to plug holes left over from the Tokyo Round as well as broaden coverage to reflect new market distortions that have been developed in the last six years in order to circumvent the MTN codes' strictures. Only through this kind of revitalization can we breathe new life into this moribund institution. Perhaps the forthcoming new round will provide that opportunity.

Exchange-Rate Management. While there are those who call for a return to fixed rates or the creation of a new system of fixed or semifixed bands within which currencies would fluctuate, the weight of evidence suggests that the floating-rate system is adequate to U.S. needs. What has been lacking is careful, foresighted management of the system, as well as an understanding that good management depends upon a mix of policy tools.

Obviously reduction of the U.S. federal budget deficit is a necessary step. Better psychological management, as discussed above, is also a critical element; it can mitigate, but not reverse, fundamental trends. Equally important, particularly with respect to Japan, is better macroeconomic policy coordination among the developed countries. As long as Japanese consumption is depressed, savings are high, and interest rates are low, capital will go elsewhere. In its first term the Reagan administration interpreted "policy coordination" to mean persuading everyone else to follow U.S. policies. It also took a "macho" approach to exchange rates. A strong dollar meant a strong economy. Recently, under the guidance of Secretary of the Treasury James Baker, the administration has shown itself to be more flexible and accommodating in the interest of obtaining policy consensus and more skilled in talking the dollar down. One way to continue the move toward policy consensus is to broaden discussion on it. Those calling for a "new Bretton Woods," as I did in 1983, recognize the need for better macroeconomic policy coordination and for an institutional framework within which this can occur. As mentioned earlier, congressional proposals have called for mandatory exchange rate intervention by the Fedeal Reserve Board under specified circumstances. Although this kind of mechanical approach is not to be preferred, Congress may conclude that it has no alternative if the dollar does not settle at an appropriate level.

Encourage Market-Oriented Policies. There have been numerous instances of market-distorting practices in a wide variety of countries and economic systems. The United States needs to emphasize the gradual but definite elimination of such practices, not only with respect to such "classic" protectionist actions as extraordinarily high tariffs or low quotas on selected items or other barriers to market access, but also with respect to the fundamental market orientation of other nations' domestic economies. Our trading partners must be encouraged to take such measures as phasing out subsidies, eliminating state control of enterprises, refusing to permit the government to set prices, and encouraging competition. Painful though they might be in the short run, steps such as these will not only bring countries more in line with their international obligations but will promote healthier, more balanced growth. This is particularly important for the NICs and LDCs carrying heavy international debt burdens. The simple fact of access to the U.S. market cannot by itself solve their debt problems, nor will it lead to long-term balanced growth domestically. Their pursuit of market-oriented policies is good for both the United States and for them.

More Aggressive Tactics. This article has demonstrated the need for both new policies and new *tactics* premised on new attitudes toward policymaking and negotiation. The challenge is occasioned not only by a changed world but by common sense. Granted, any country is subject to domestic political pressures, and it would be foolish not to expect these to prevail at times, as they so clearly have in the cases of European farmers and numerous special Japanese interests. Obviously, nations are free to pursue what policies they deem appropriate, but when the United States is hurt by these policies, it should pursue policies of its own to balance the costs.

It has been apparent for years that international institutions are not in any condition to make cases for the United States, however legitimate these might be. It continues to make sense to work within those institutions, as we have in numerous Section 301 cases. However, when the United States has been determined to be in the right, it should design follow-up policies that will enforce rights as well as strengthen the system in the process. To fail to do so is not only to earn the reputation of an international patsy—a reputation the United States has already acquired on trade issues in numerous countries—but also to contribute to further deterioration of international discipline.

In many respects both the pressure for action from the American public and the great free-trade debate among politicians are questions of tactics, not objectives. Everyone would probably agree that market deviations ought to be eliminated. The question is not the objective but rather how to achieve it. The last ten years have demonstrated that to threaten and complain alone

are inadequate. On occasion retaliation will have to be the answer.

Avoidance of protectionist actions at home has not been included in the foregoing policy recommendations. The omission is intentional. If the United States successfully pursues the other proposed policies—adjustment at home and restoration of international discipline and market-oriented policies abroad—pressures for unilateral trade restraint will diminish. To act otherwise is to treat symptoms rather than causes.

The policy recommendations described here reflect goals that are broadly shared by U.S. politicians and economists with regard to the kind of economic system that would be good for the United States and the world: a market system in which barriers are removed and strong international discipline ensures that they stay removed. It is more on matters of emphasis that I differ with the recommendations of others. However, that difference is based on an appreciation of the way the world has changed since World War II—and how it continues to change—and of the need for the United States to understand and adapt to those changes rather than to pretend they have not occurred. Only by meeting these challenges can U.S. policymakers make the principle of free trade an expedient for U.S. and world economic interests.●

THE RESULTS OF FURTHER DEFENSE CUTS

● Mr. GOLDWATER. Mr. President, I invite the attention of my colleagues to an article written by Senator DAN QUAYLE that appeared in the Washington Times on Monday, May 12, 1986.

In this article Senator QUAYLE has highlighted many of the consequences that will inevitably result from further reductions in the President's defense budget.

Those with short memories may not recall the conditions of the late 1970's that resulted from our systematic underfunding of defense requirements throughout that decade. Senator QUAYLE does an excellent job of reminding us of those consequences and gives fair warning that if we continue to hack away at the defense budget we will soon recreate those conditions.

I commend Senator QUAYLE for this outstanding article and I encourage every Member of the Senate to read it carefully.

Mr. President, I ask that this article be printed in the RECORD.

The article follows:

[From the Washington Times, May 12, 1986]

HACKING AWAY AT DEFENSE

(By Dan Quayle)

After weeks of painstaking give and take, the U.S. Senate on May 2 voted 70-25 to approve a budget for the 1987 fiscal year that meets the Gramm-Rudman-Hollings deficit target in a responsible manner—by further reducing domestic spending, by curbing the amount of new revenues, and by sustaining the investment we must make to safeguard our national security.

A majority of Senate Republicans *and* Democrats voted for the compromise budget package, which calls for the bare minimum we should allocate for defense spending—$301 billion.

At long last, the U.S. House of Representatives in preparing its version of the 1987 budget. Given that the House Budget Committee has now reported a plan that cuts new military spending authority from this year's level of $287 billion to $285 billion—and that House Republicans are proposing $292 billion for defense in 1987—I think it's time to set the record straight on defense spending.

As a candidate for re-election, I recognize the political advantages of railing against the Pentagon. With the electorate still reeling from spare-parts "horror stories," anyone calling for defense cuts is on politically safe ground.

But before members of Congress begin the stampede to see who can cut defense the most, they should consider carefully the consequences of hacking away at defense for the fourth consecutive year.

Last year the Congress cut $36 billion from the president's defense request. For the first time in 15 years, that produced a defense budget with negative real growth (6 percent less than the preceding year's budget). While the budget the Senate has approved for 1987 provides $19 billion less than the president requested for defense, it at least allows for enough growth in defense spending to cover inflation costs. But the defense levels being discussed by both House Democrats and Republicans would, if adopted, yield two consecutive years of negative defense growth just eight months after Congress committed itself to maintaining 3 percent *real growth* for defense in both 1987 and 1988. Some commitment!

Some members of Congress have encouraged the popular but spurious notion that growth in the defense budget created the deficit and must therefore be slashed. That idea is directly contradicted by the facts. During the last two decades (during which most of our national debt was amassed), for every dollar of growth realized in the defense budget, non-defense programs grew seven dollars. That's right: non-defense growth (including all domestic and entitlement programs) outpaced defense spending increases by more than 7-to-1 over the past 20 years. Defense spending *did not* create the deficit.

It will surprise some members of Congress to learn that the defense budgets proposed by the president will actually *decline* as a share of gross national product over the next four years. From a high of 6.4 percent of GNP in 1985, the defense share declines steadily until it levels off at 6.1 percent in the years 1988-90. Since 1940, only during the 1970s have we maintained a lower average share of GNP for defense (6 percent) than would be maintained under the Reagan defense budgets (6.2 percent). And all of us remember the calamities brought about by that "decade of neglect" as we systematically underfunded our defense requirements. We are paying today for our shortsightedness of the 1970s.

The question is not whether we can afford to spend 6.2 percent of GNP for defense, but whether we can afford *not* to. A second year of severe defense reductions will have serious long-term consequences. They include: Slowing our conventional and strategic force modernization.

Dramatic cuts will lead to program stretch-outs delaying the delivery of new equipment to the inventory. Our forces, already at a numerical disadvantage, will gradually lose their qualitative edge as Soviet technological advances continue. Critically important but expensive programs such as the Advanced Tactical Fighter, Advanced Tactical Aircraft, MV-22 Osprey (JVX), LHX light helicopter, and C-17 airlift programs—all designed to maintain our technological advantage—will likely be terminated under further defense cuts. Our inability to maintain adequate conventional forces will compel a greater reliance on nuclear weapons. The capabilities of our strategic forces and our national military communications, warning, and surveillance systems will be diminished, shifting the delicate balance between the United States and the Soviet Union.

Prospects for meaningful arms control agreements will be reduced.

Many of the staunchest advocates of defense reductions are also the most vocal in support of arms control agreements. Yet by slashing the defense budget, we hand the Soviets results they could not hope to achieve at the negotiating table. Such unilateral reductions only encourage Soviet intransigence and delays: why negotiate at all when the U.S. Congress is willing to hand over one concession after another for nothing in return?

Defense cuts will jeopardize procurement stability and drive up costs.

Efficient production rates and vigorous competition cannot be maintained in a declining budget. Defense cuts will force a return to sole-source procurements and stretched-out, uneconomical production rates for aircraft, ships, tanks, missiles, and other weapons systems.

One of the Packard Commission's key recommendations is simply this: if you want to cut the cost of defense, stabilize the budgeting process.

Defense cuts will jeopardize readiness and sustainability.

Invariably, when major defense reductions are made, a significant share is taken from the Operations and Maintenance accounts and other areas that directly affect readiness and sustainability. The rapid spendout rates of these accounts produce attractive outlay "savings" unlike the slower spending procurement accounts. These reductions in flying hours, training days, steaming hours, spare parts, and munitions may contribute to solving short-term budgetary problems, but in the long run will cost us dearly.

Must we repeat the cycle that led to the defense crises of the late 1970s when we had ships that couldn't sail, aircraft that couldn't fly, and a "hollow" Army filled with Category IV recruits (those having the lowest aptitude for military service)?

Will we have to wait until another Desert One disaster awakes us and the headlines shout "U.S. Military Unprepared" before we realize we have skimped just a little too much in our attempt to buy defense "on the cheap"?

Investment in national security is the insurance we pay for our freedoms. Freedom is America's most cherished commodity, and we ought to be willing to pay for it.●

NATIONAL TOURISM WEEK

● Mr. DOMENICI. Mr. President, when someone takes a vacation they are getting an education on different social atmospheres, cultures, and economic situations. Little do they know that they are also contributing to the

economy of the regions they're visiting. Vacationers spent $244 billion in 1984 on travel and tourism in this country. This accounted for 6 percent of our gross national product. Travel and tourism is the third largest retail or service industry, and the second largest employer, in America.

Tourism lets a person explore the lifestyles and cultures of different areas. Traveling gives a person the chance to see other areas that are different from his own. The traveler can experience different geographical settings, cultures, people, food, and interesting places that played a role in the development of our great Nation.

One hundred and fifty-one million Americans and twenty-one million foreign visitors travel for either business or pleasure in the United States every year. Tourism has produced $51 billion in U.S. wages and salaries, and supports 6.9 million jobs directly and indirectly. Along with producing jobs and bringing in revenue, tourism and travel brings in $25 billion in local, State, and Federal taxes.

Mr. President, more and more people will be traveling throughout the United States in the coming months. It is important that people realize the effects of tourism. The week of May 18–24, 1986, is designated as "National Tourism Week." The purpose of this week is to increase the awareness of Government officials and the public of the role tourism and travel plays in the social, cultural, and economic welfare of America. I urge my colleagues and all America to join me in celebrating "National Tourism Week."●

A TRIBUTE TO ANDREI SAKHAROV ON HIS 65TH BIRTHDAY

● Mr. HATCH. Mr. President, I am honored to join my colleagues today in paying tribute to Dr. Andrei Sakhorov on his 65th birthday. The world-renowned nuclear physicist, human rights advocate and winner of the 1975 Nobel Peace Prize has courageously stood up for peace, freedom, and human rights in spite of the harsh reprisals meted out to him by the Soviet Government.

When Sakharov learned in 1961 that the Soviets were about to violate the United States-Soviet nuclear test ban, he protested. For his efforts to stop multimegaton atmospheric tests, he received a stinging rebuke from Nikita Khrushchev who reportedly said, "Leave it to us who are specialists in this tricky business to make foreign policy. I would be a slob and not chairman of the council if I listened to the likes of Sakharov."

After the publication of his 1968 work, "Progress, Coexistence and Intellectual Freedom," in the West, Dr. Sakharov's security clearance was abruptly canceled and his brilliant scientific career was squelched. His unceasing efforts on behalf of Soviet dissidents and political prisoners further antagonized the Soviet leadership. When the Soviets invaded Afghanistan in December 1979 Sakharov again refused to be silent. He condemned the brutal assault on the Afghan people. Three weeks later, in January 1980, he was sentenced to internal exile in the city of Gorky without even the pretense of a trial.

In the first years after Dr. Sakharov's exile, his wife, Yelena Bonner, continued to travel freely between Gorky and Moscow, but the situation changed drastically in May 1984 when Dr. Sakharov initiated a hunger strike in support of his wife's efforts to go abroad for medical treatment.

The Soviet authorities accused Yelena Bonner of plotting with the United States embassy in Moscow to take refuge there and to use Dr. Sakharov's hunger strike to mount an anti-Soviet campaign. She was eventually convicted of anti-Soviet slander and was also sentenced to exile in Gorky. At one point the Soviet authorities forcibly took Dr. Sakharov to a hospital where, according to accounts received in the West, he was force-fed and administered mind-altering drugs.

Except for Yelena Bonner's current trip to the United States for medical treatment, Dr. Sakharov and his wife have been forced to live in almost total isolation: they have no telephone; the KGB monitors their every action. In return for allowing Yelena to come to the United States for medical treatment, the Soviets made Dr. Sakharov sign away his right to ever leave the Soviet Union.

Mr. President, as my colleagues are well aware, the Soviets' goal is to reduce Andrei Sakharov to the status of a nonperson. I am firmly convinced, however, that they will not succeed; the truth of the matter is that the Soviet leadership is afraid of Andrei Sakharov. Just think of it, the Soviet Union—with its vast military arsenal—still cannot silence the voice of freedom. The Soviets can persecute Andrei Sakharov, force him into exile and even torture him, but they cannot change the fact that he has become a symbol of freedom to millions of people all over the world.

Mr. President, I am deeply honored to pay tribute to Dr. Andrei Sakharov, one of the greatest freedom fighters of our time. I ask that an article from Reader's Digest entitled "The Persecution of Andrei Sakharov" be printed in the RECORD in its entirety.

The article follows:

THE PERSECUTION OF ANDREI SAKHAROV

It is January 22, 1980, a cold, gray Tuesday in Moscow. A policeman stands in the center of Leninsky Prospekt, one of Moscow's main streets, searching the southbound traffic. At 2 p.m. he sees what he is looking for—a black, chauffeur-driven Volga limousine—and signals it to the curb. A stoop-shouldered man with a wisp of white hair and deep-set eyes is sitting in the back.

Passers-by turn to watch while plainclothes police, whose high-handed self-assurance marks them as KGB, get into the car, which then melts into the traffic. One more comrade is being hauled off to confront the error of his ways.

But there is a difference. This comrade is Andrei Sakharov—one of the towering intellects of our time and the outspoken soul of the beleaguered human-rights movement in the U.S.S.R. Unable to silence him, afraid to rouse the ire of the civilized world by murdering him, the Kremlin has decided to isolate Sakharov.

It all goes quickly. Sakharov is driven to the office of the procurator general of the U.S.S.R. and informed that for anti-Soviet activities he is to be stripped of his decorations and awards, and deprived of the right to live in Moscow, the city where he has spent nearly his whole life. That afternoon, he and his second wife, Elena Bonner, are flown 250 miles east to Gorki, a drab military-industrial city closed to foreigners and far from the academic stiumulation essential to Sakharov's work.

On days when the wind wasn't blowing too hard, the exile would walk in the dreary district where he was made to live. Usually Elena Bonner walked with him, slowly, both with ailing hearts, both suddenly turned old. Sakharov would carry a heavy shoulder bag crammed with manuscripts, journals, a radio. He took it everywhere, even when he went to buy bread. Why? "Because the police would break in, smash the radio and steal the papers," said the exile. They had done it before.

Ironically, Andrei Sakharov had once been a pillar of the establishment, among the most privileged of Soviet citizens. Although he never joined the Communist Party, the men in the Kremlin considered him one of their own, their scientific prodigy. They showered him with every honor and material comfort.

But Sakharov was not one of them. In 1953, he had made the decisive contribution to the Soviet hydrogen bomb in the belief that once both superpowers held this catastrophic weapon they would be forced to negotiate their differences. Gradually he felt driven to speak out against the nuclear threat to humanity. Then he began raising issues that no one wanted to talk about, taking the side of those who were in trouble with the KGB because of what they said or believed.

Dissent in the U.S.S.R. is a lightning rod; eventually it called down on Sakharov's head the thundering fulminations of the wardens of Soviet orthodoxy. He was unmoved; he did not lust for power or the material rewards that separated the classes in the so-called classless society. But to people who spend endless hours waiting in line just to buy the day's necessities, Sakharov was impossible to understand. "What does he want?" they asked in bewilderment. "He had everything and he threw it away."

The Sakharovs are installed in a KGB-controlled apartment: four small rooms on the ground floor of a building across from the police station. The police can—and do—look directly into their windows. There is no telephone; soon after they move in, a police post is established outside their door—a table, a chair, four six-hour shifts every day.

Still stunned by what has happened to them, they are grateful for the couple

across the hall. "If you need anything, just knock," says the husband. A woman who lives upstairs befriends them; her child suffers from an allergic rash, and Elena Bonner, a pediatrician, prescribes a successful treatment.

But the KGB sees everything. One day the couple deliberately turn their backs on the Sakharovs. And when the woman upstairs next sees Bonner, she cries out, "Whore! It would have been better for my child to rot than be touched by your dirty hands!"

Andrei Dmitrievich Sakharov was born in Moscow on May 21, 1921, and grew up in a lively, intellectually invigorating household. Like many Russian families, this one suffered during the Stalin terror—nine close relatives were arrested as "enemies of the people," and seven of them disappeared in camps or internal exile. But Andrei's father, a well-known author and physics teacher, was spared, and the boy went on to Moscow State University. He was the most brilliant physics student anyone there could remember.

Graduated in the spring of 1942, Sakharov was detailed to a munitions factory on the Volga, where he could apply his genius at physics and mathematics to solving engineering problems. Afterward he returned to Moscow, pursued his studies, married, published several significant scientific papers. Then, one day in 1948, he disappeared from public view; not a word was heard of him for nearly ten years. In deepest secrecy, Sakharov had been put to work with the handful of scientists racing to develop a thermonuclear weapon.

On August 22, 1953, the Soviets successfully detonated a hydrogen bomb, and three months later, at age 32, Andrei Sakharov was secretly elected to the Soviet Academy of Sciences, the youngest man ever so honored. But his subsequent efforts to stave off the "criminal" multi-megaton tests in the atmosphere brought a warning from Premier Khrushchev: those decisions would be made in the Kremlin; they did not concern scientists.

It was a turning point. When the tests went on, Sakharov was "seized," as he put it, "with an awful sense of powerlessness . . . it was terrible. After that I was a different man."

He protested other government policies: openly disagreeing with Khrushchev's plan to send students to work in factories or on farms; opposing the influence of Trofim Lysenko, the quack geneticist whose malign power had debased Soviet biology and genetics; decrying the industrial pollution of Siberia's once-magnificent Lake Baikal. In 1966, after writers Andrei Sinyavsky and Yuli Daniel were sent to prison for "slandering the U.S.S.R.," Sakharov and other intellectuals wrote the new Soviet leader, Leonid Brezhnev, that a revival of the Stalinist repression would be "a great disaster."

Still, the men in the Kremlin were willing to gloss over his addled notions—what could a nuclear scientist understand of politics?—if only he would shut up. Not one understood the passion that drove him. The year was 1968 and Sakharov's "manifesto," Progress, Coexistence, and Intellectual Freedom, a major statement of his worldview, was already circulating in the Russian underground press. In it, Sakharov detailed his vision of a future free of the tensions and repressions afflicting men and nations, and with an enlightened Soviet Union joining the West to save mankind from the disasters of civilization—war, pollution, starvation.

When the document was published in the West, it made Sakharov world-famous. But the more he was hailed abroad, the testier grew the Soviet leaders. They began to react with venom: Sakharov's security clearance was abruptly canceled; he was dropped to the lowest possible work for his academic ranking, his brilliant career forced into a scientific backwater. In the midst of these travails, his first wife died of cancer.

By the terms of his exile, Sakharov is forbidden to leave Gorki or communicate with foreigners and "criminal elements." Friends are turned away at the door and threatened with jail if they return. Whenever Sakharov steps out of his building, plainclothes policemen follow. Once, he and Elena Bonner are walking in a thick aspen grove, and their guards lose sight of them. Within minutes a helicopter comes booming out of the sky to search for the couple.

More and more Sakharov's first concern was to help victims of the Soviet system. And more and more his own fate became intertwined with theirs—human-rights advocates, Tatars not allowed to live in their Crimean homeland, fundamentalist Christians persecuted for practicing their faith, Jews who had lost their jobs because they asked to live in Israel. He spent days answering the thousands of letters that now came to him, writing appeals, interceding with the authorities or consulting lawyers on behalf of imprisoned dissidents. It was a struggle with few victories. But he did not give up.

He began to appear at the trials of those charged with political offenses. It was at such a trial, in October 1970, that Sakharov met Elena Bonner. She was a force in her own right, a tough-minded activist, 47 years old. Her mother had spent 17 years in labor camps and internal exile, and her father had died in prison, before both were "rehabilitated" by a regretful motherland. Sakharov, the middle-aged widower with three grown children, and Elena Bonner, long divorced with two grown children, fell deeply in love. They were married the following year.

The government-orchestrated pressures against Sakharov built relentlessly. Two alleged Arab terrorists broke into his apartment in 1973 and threatened him with "something worse than death" if he continued to make public statements about Israel. In Moscow—where there are no street maps worthy of the name—the idea that two foreigners could even locate Sakharov's apartment without police connivance is ludicrous.

Around the same time, Elena Bonner's daughter was expelled from Moscow University and her son was denied entry. She herself was called in by the KGB four times and abusively interrogated. Depressed, the weariness in his face reflecting tremendous burdens, Sakharov protested against this official "thuggery."

Elena Bonner in his lifeline. As long as the police allow her to leave Gorki, she travels to Moscow regularly and is able to let the free world know something of Sakharov's life in exile. Returning, she brings news, scientific books and papers, and fresh food rarely available in Gorki.

But the KGB watchdogs are biding their time; they know what to do. When Sakharov is effectively isolated, when the world can no longer learn what he is doing or thinking, or the state of his health—in short, when he has become a non-person—the Kremlin will have resolved the Sakharov problem.

In December 1982, Bonner is subjected to a humiliating body search aboard the Moscow train, put off and forced to walk to the nearest station. The following April in Gorki, she suffers a massive coronary seizure, but appears to recover. Later in 1983 she suffers a second severe heart attack. But she is indomitable. In only a few weeks she is bound again for Moscow, carrying what she fears may well be Andrei Sakharov's last message from exile.

In October 1975, electrifying news came to Sakharov: he had just been named winner of the Noble Peace Prize. His friends around the world exulted, certain this new high exposure would ensure his safety. But the fury in the Kremlin was now unbounded. No Soviet citizen had ever before been so honored. That the coveted prize should now go to their most dangerous and implacable foe was intolerable. With malice aforethought, the hierarchy refused to grant Sakharov a visa to accept the award when he applied. In the end Bonner went to Oslo and read his speech to the distinguished gathering.

Democratization of the Soviet system is essential to world peace, he said, and international security inconceivable without an open society. He called for an amnesty of all Soviet political prisoners, named 120 "known to me" and begged forgiveness from others not mentioned. "Every single name, mentioned and unmentioned, represents a hard and heroic destiny, years of struggling for human dignity."

When Soviet forces invaded Afghanistan in late December 1979, Sakharov condemned this brutal violation of international law. Three weeks later, he was exiled to Gorki without even the pretense of a trial. But he continued to plague the Kremlin leaders. When they refused an exit visa for his daughter-in-law, Liza Alexeyeva, who wanted to join her husband in the United States, he and Elena Bonner began a hunger strike that riveted world attention on this latest Soviet exercise in malevolent injustice. After 18 desperate days, during which both Sakharovs came close to death, the Kremlin capitulated. Liza Alexeyeva was given her visa.

But that success was only one more score to be settled. In the fall of 1983, following Bonner's second heart attack, Sakharov petitioned the state to permit her to go abroad for treatment. He feared for her life if she were to be hospitalized in Russia, he said frankly, "and her death would be my own." Last February Sakharov petitioned once more. There was no reply.

On April 24, friends in Moscow received a telegram from Elena Bonner saying she would arrive on May 2. When she did not appear, it was recalled how she had repeatedly emphasized that her failure to keep pre-arranged travel plans could mean only that she was being held against her will.

On May 6, Irina Kristi, a close friend, took the train to Gorki and, as specified in a contingency plan long before, met the Sakharovs in front of their apartment building. Hastily they gave her the grim news: that Bonner was confined to Gorki and under investigation for "defaming the Soviet state," and that she had also been threatened with a charge of treason, a crime that carries the death penalty; that Sakharov had begun a hunger strike on May 2 and meant to "fast to the end if they do not let her go abroad for medical treatment."

At that point, an impenetrable curtain of silence descended around the Sakharovs. Official disinformation abounded, however, At the end of May, Soviet officials blandly declared that Sakharov "was well, eating

regularly and leading an active way of life." But subsequent evidence passed on to the international press by reliable sources inside the U.S.S.R. suggested that Sakharov was being force-fed in a Gorki hospital and treated with mind-altering drugs. Responding to rising concern in the West, the Soviets released a month-old videotape late last August. In in, Sakharov appeared to have aged "significantly and dramatically," according to his son-in-law Efrem Yankelevich. Around the same time, it was reported that Bonner had been sentenced to five years of internal exile after being convicted of "slandering the Soviet state."

In the judgment of Elena Bonner's daughter, Tatiana Yankelevich, who lives in the United States, the Kremlin's goal has been "to bury the Sakharovs in Gorki—alive or dead." Will the Soviet authorities succeed? So far, they have ignored the formalized representations of Western leaders. But can they turn a deaf ear if ordinary people from all over the world join their voices in a combined crescendo of protest? Follow the instructions below and let the Kremlin know that attempts to make a non-person of Russia's most admired citizen have failed. Let Soviet officialdom see that the free world will not forget Andrei Sakharov.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Committee on Foreign Relations.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification has been received.

Interested Senators may inquire as to the details of this advance notification at the office of the Committee on Foreign Relations, room SD 423.

The notification follows:

DEFENSE SECURITY
ASSISTANCE AGENCY,
Washington, DC, May 20, 1986.

Dr. M. GRAEME BANNERMAN,
Staff Director,
Committee on Foreign Relations,
U.S. Senate, Washington, DC.

DEAR DR. BANNERMAN: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b)(1) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country for major defense equipment tentatively estimated to cost $14 million or more.

Sincerely,

PHILIP C. CAST,
Lieutenant General, USAF,
Director.●

ARTICLE BY MOSHE YEGAR, CONSUL GENERAL OF ISRAEL IN NEW YORK

● Mr. D'AMATO. Mr. President, I rise today to share with my colleagues an article written by a dear friend of mine, Moshe Yegar, the Consul General of Israel. Mr. Yegar has been an outspoken advocate for Jews in the Soviet Union. His article clearly articulates the plight of Soviet Jewry and the urgency of increasing emigration levels for refusniks.

Mr. President, it is a great honor for me to submit Mr. Yegar's article for the RECORD, and I ask that this article be printed in the RECORD in its entirety.

The article follows:

[From the New York Times, May 8, 1986]

IN THE SOVIET UNION, MANY SHCHARANSKYS

(By Moshe Yegar)

Anatoly B. Shcharansky arrives in New York today, his first trip abroad since he left the Soviet Union for Israel in February. Mr. Shcharansky has come home to Israel, and he is free to travel as he likes, but the plight of Soviet Jews persists.

On July 14, 1978, Mr. Shcharansky was convicted of treason, espionage and anti-Soviet agitation. No one in the West believed these charges, and it was clear that the Soviet authorities had singled him out because he was a courageous and outspoken activist on behalf of Jewish emigration.

Mr. Shcharansky came out of his ordeal—the prolonged interrogation, threat of execution, eight years in prison and labor camp, tortures of cold and hunger, months in solitary confinement, years without mail or visiting rights—in remarkable physical and mental condition. He is indeed an extraordinary man, a unique and heroic figure. There is no question that few could have survived the hardships he endured.

There are, however, many Shcharanskys in the Soviet Union. By attempting to crush him, the authorities hoped to break the spirit of the Jewish community in the Soviet Union. Instead, they galvanized the Jewish community not only there but around the world as well.

The reawakening of Jewish identity and purpose in the Soviet Union is one of the miracles of our time. Sixty-eight years ago, Russian Jews—relentlessly persecuted by the Czarist regime—welcomed the Bolshevik Revolution. Anti-Semitism has, however, remained endemic in the Soviet Union, and the persecution of Jews is just as characteristic of the regime now as it was under the Czars.

The Soviet Union is the only country outside the Arab world in which virulent anti-Semitic literature is officially sanctioned by the Government—often but not always masquerading as "anti-Zionist" propaganda. Most synagogues have been closed, worshippers threatened and religious practices suppressed; study of Hebrew and possession of Hebrew books are criminal offenses; and Jews suffer discrimination in higher education. This is in marked contrast to the treatment of other national minorities whose languages and cultures are studied with relative freedom.

But what makes the Soviet leaders immeasurably worse than the Czars is their policy on emigration. One would have expected that, like the Czars, they would want to rid themselves of these "undesirables." From the time of the problems of the 1880's until the eve of World War I, more than two million Jews were allowed to leave. In contrast, the Soviet authorities bar Jews from leaving, discriminate against and punish them. Why? Perhaps the notion that anyone would prefer the "decadent" West to the "workers' paradise" is seen as a dangerous heresy. Perhaps the authorities fear that if Jews were granted the right to emigrate, other minorities would demand it, too.

Moscow did temporarily open the gates, allowing more than 250,000 Jews to leave between 1968 and 1979. But since then, the flood of emigrants has been reduced to a trickle, and, despite Mr. Shcharansky's release, there is so far no sign of a thaw. Many of the 400,000 Jews who have taken the first step in the arduous emigration procedure, by requesting invitations from relatives abroad, have been threatened with harassment. Those who have applied for exit visas and been turned down—there are 15,000 such "refuseniks"—are dismissed from their jobs, publicly vilified, physically assaulted, confined in mental institutions and arrested on fabricated charges.

Yet the spirit of Soviet Jews remains indomitable. Mr. Shcharansky was speaking for all of them at his trial when he said: "For more than 2,000 years the Jewish people, my people, have been dispersed. But wherever they are, wherever Jews are found, every year they have repeated, 'Next year in Jerusalem.'"

Moscow ought to heed these words now and avail itself of a golden opportunity. By permitting unrestricted Jewish emigration to Israel, the Soviet authorities could establish their credibility as supporters of the most basic right—emigration. It would serve their own interests to do so. For the Soviet Union cannot realistically expect an easing of international pressure on this issue so long as a single Jew is denied his dream to join his people in Israel.●

AN AGENDA FOR UNITED STATES-SOVIET EXCHANGES

● Mr. SIMON. Mr. President, since I came to Congress in 1975, I have given considerable thought to Soviet-American relations, and worked on education and exchange program legislation. Today I would like to offer, in my first detailed address before the Senate on the subject of United States-Soviet relations, some thoughts on the connection between our foreign policy goals and exchange programs.

When I speak on this issue, I do not do so as a partisan, because I am pleased to note the emphasis President Reagan gave to exchange programs at his Geneva meeting with Secretary Gorbachev. I particularly appreciate the leadership of Charles Wick and Ambassador Stephen Rhinesmith at the U.S. Information

Agency (USIA) who understand the importance of exchanges and have made a significant contribution to the Nation through the promotion of exchanges.

THE POWER OF IDEAS

Throughout history, ideas have moved people and armies. Jesus, Marx, and Jefferson have changed more lives than military conquerors. The invention of the printing press revolutionized the medieval world and laid the basis for progress in every field of endeavor. Ideas spread quickly. And centuries ago, what seemed like a quick spread of ideas through books over a period of months, has been changed into a spread of ideas in minutes throughout the world. That is part of the information revolution in which we find ourselves.

Information is power, and the ability to communicate effectively can alter the balance of power as surely as a squadron of fighter planes or a naval flotilla. Public diplomacy sometimes can prove more decisive than the blunt instruments of war, and we must rely on it more—one of the failures of U.S. foreign policy in recent years.

Unfortunately, we still need the instruments of war as well as the instruments of diplomacy. It would be ideal to work always with friends and adversaries with logic, fairness, and common sense. This is not the state of the world, nor will it be. We must prepare for threats to our Nation's security, and give assistance to others who need a shield for their defense.

But we also owe it to ourselves to examine whether these threats are real, and if they are real, whether we have been given a balanced picture. We should regularly question our assumptions. We must seek balance as we allocate resources to further American foreign policy.

Today we find ourselves aboard an imbalanced ship of state, perilously close to capsizing economically, because of our excessive reliance on the military to carry out policy aims. We are losing precious cargo from that ship of state in a shortsighted quest with too heavy a military emphasis on superiority. Security can only come when we see the world as it is, not as we would like it to be. In my years of public life, I have seen us spend more and more and more on military security and achieve greater and greater and greater insecurity, not only for ourselves but for all the world. Like a greyhound at a dogtrack, we chase the rabbit of permanent military superiority, but like that greyhound, we shall never catch it. Those in the stands observing us know that. But like the greyhound, we do not. We expend greater and greater efforts for an illusory prize. The military-industrial complex—about which President Eisenhower warned us—cheers us on, but if we want something more than those cheers, we must always be thoughtful and deliberate in advancing our foreign policy objectives.

On a future occasion, I will address the fundamental question which needs reexamining: What should be the basic objectives of U.S. foreign policy? Today, I want to discuss one aspect of implementing our current policies.

PEOPLE-TO-PEOPLE

What I propose today is a significant expansion of our exchange programs with other countries. Our foreign policy will improve as we learn more about other countries and as others learn more about us. Americans, at their best, have not been content simply to learn facts; we have also wanted to understand the nature of things. That is true of others also. There is a need for other nations to understand our values, our political system, our aspirations, and our weaknesses and strengths. It is pure gain for us to learn more about others and for them to learn more about us. An understanding of their cultures, their languages, their hopes and fears will lead to less internation tension.

President Reagan confirmed this with his people-to-people exchange initiative at the November summit in Geneva. I applaud his leadership on this. We need to get serious about exchanges, and the President's ideas and our tradition serve as an important start. The costs are not significant when we consider the scope of the Federal budget. But they must come from somewhere. There is only one large discretionary pool of funds, and that is the Department of Defense budget. Since an exchange program serves the security interests of our country, it is a logical place to look.

When the Fulbright program was under consideration in 1946, former President Herbert Hoover was asked to comment on the undertaking. Hoover recalled that a similar program, much smaller in size, was initiated in 1920 with Belgium. The exchanges continued until World War II began. Hoover noted that many prominent Belgian graduate students and faculty studied in the United States; one Prime Minister and six cabinet members were exchangees. As a result of this program, Hoover said that he doubted "whether there is a country in Europe where the ideals and purposes of the American people are so well understood and so respected as they are in Belgium." Just before the war, Hoover argued that the old World War I European war debts ought to be converted into funds for exchanging scholars across the Atlantic. The former President said:

> There will thus be created a joint interest with us from which we will generate benefits far greater than we will otherwise receive. The cumulative effect over the years of building up a great body of influential men and women in those countries who would understand our country and believe in us would count greatly both in economic relations and in times of international emergency. And we shall have made a contribution to civilization which may be of no quick material value but which will later serve as a great monument to our foresight.

TRANSPLANTING AMERICAN IDEALS

I've had the experience in many countries, as have many of my colleagues, of walking into a meeting with a cabinet member or high official of another country and learning that that person was a Fulbright Scholar at Northwestern University or the University of Chicago or Harvard, or the University of Illinois or the University of California or some other institution. I remember visiting one country, meeting the cabinet, and finding that the majority of the members of the cabinet had gone to U.S. schools under one program or another. And in this very key country in Africa, there is no question in my mind that the exchange programs have played a role in keeping that country from going in the Marxist direction.

Mr. President, if we look at our efforts in educational and cultural exchanges during the start of the rapid period of decolonization and the emergency of dozens of new nation-states, we see a time when we could have and should have done more. This is starting to change, and I applaud Charles Wick's efforts on this front. And I also applaud our former colleague, Senator William Fulbright of Arkansas, who contributed immensely to world understanding through his efforts. But much more needs to be done.

For example, we need to be training more English teachers for overseas assignments and strengthening the binational cultural centers beyond their already strong base in Latin America. Another program that has struggled back from the lean years between 1979–81 is the "International Visitors" initiative, which a 1982 GAO report said "provides American taxpayers with the best return on their dollars in the foreign policy field." The report also called educational exchanges and the international visitors program the "most effective tools of public diplomacy" and recommended "material" stengthening.

In 1980, I had the pleasure of hosting a British journalist in my office in the other body for 2 weeks under the auspices of the International Visitors Program. The journalist, Ivan Barnes, happens to be the foreign editor of the London Times, although he had never been to the United States. He covered my 1980 campaign as well as the Presidential election, and has since provided the Times with some of the best American reporting that great paper has had.

MISSED OPPORTUNITIES

Another area where the administration has missed a chance to mold future area-specialists is its failure to request any funding, once again, for title VI of the Higher Education Act for foreign language and international studies programs. This falls under section 102(b)(6) of the Fulbright-Hays Act. The Department of Education says that these are well-established progams now, and that the need for further Government support is unfounded. But just a few years ago, in 1982, Secretary of Defense Caspar Weinberger wrote me about the military's problems in foreign language expertise. He wrote then: "We both know that the American educational system is not at present producing fluent non-native speakers in the numbers our national security system requires." He cited testimony of Adm. Bobby Inman, then deputy director of the CIA, as saying that "the foreign language capability of our country is getting worse," not better.

I don't think that Secretary of Education William Bennett would propose scaling back these areas if he knew that only one in three research papers on the Soviet Union or China used original source citations, or that only three in five American scholars can conduct research in the language of their chosen area specialty. Former Ambassador to Italy Richard Gardner told me that he was embarrassed by translations he read by key U.S. personnel serving in Italy. He is one of the few Ambassadors we have had in recent years fluent in the language of the country where he was stationed. Given our sorry lack of foreign language competence, and our generally poor knowledge of international relations, we're clearly moving in the wrong direction with these invaluable programs.

On the plus side, some programs have at least partially recovered from budget cuts, and some others have actually prospered. The Fulbright program, for example, has seen 147,000 American and foreign participants from over 40 countries since its inception in 1946. It is a lasting monument to one of our greatest statesmen, Senator William Fulbright, and a fitting testament to his wisdom and foresight.

In fiscal year 1982, the first year of the Reagan administration, some 5,000 Fulbright scholarships were awarded; in fiscal year 1984, there were some 6,700 grantees and the projection for fiscal year 1985 is in the neighborhood of 7,100. These numbers compare favorably with those of fiscal year 1965, when there were over 5,000 grantees, and fiscal year 1975, when the number had dropped to under 2,500. The estimates for fiscal year 1986 are roughly similar to fiscal year 1985, but I hope that we can continue on the previous upward path and provide even more support for one of the best educational opportunities available today.

A good program is the "Youth Exchange Initiative," which began with a 3-year, $10 million fund for 5,000 exchangees. The focus is on the developing world, and I believe that Mr. Wick is on the right track with this program: By the end of fiscal year 1986, we will have spent a total of $14 million on these youth exchanges since we began this effort. This is exactly the kind of program we need with the Soviet Union, and in October 1985, I introduced, with Senator PELL, the United States-Soviet "Student Exchange-for-Peace Program," which closely parallels the President's November summit proposal to Mr. Gorbachev.

UNITED STATES-SOVIET EXCHANGES

The United States-Soviet relationship is our No. 1 foreign policy concern. Yet in 27 years of exchanges, we have managed to average only 600 Americans and 250 Soviet scholars exchanged each year. Contrast these numbers with an average of 14,000 per year with Japan; 5,500 with Britain; 3,600 with West Germany; 3,000 with France; and 14,000 with the People's Republic of China.

We will probably not soon reach the level of good relations with Moscow that we have with Paris, London, or Bonn, but who would have thought as late as 1968 that we would achieve the far-reaching accord with Beijing which we did following the Nixon summit? Our problems with China in the postwar years were no less real than many of our current problems with the Soviet Union.

We have a staggering task ahead of us in Soviet studies that directly affects our future relationship with Moscow. We need to build a much larger corps of Soviet and Eastern European specialists so that we can draw on a broadly based and reliable cadre of professionals to help formulate policy. While we have a few outstanding scholars and Soviet watchers in the United States, there are not nearly enough full-time Soviet experts and even fewer who have actually spent a significant amount of time studying in the Soviet Union.

For example, this year, only about 200 American and Soviet scholars are being exchanged, about half the Americans through IREX, the International Research and Exchanges Board. There are many more American scholars, however, who would like the opportunity to observe the country of their studies up close, but lack of funds blocked this avenue. The National Council for Soviet and East European Research, which advises the Department of State's Title VIII grants office, reports that they received far more applications for study grants than they could possibly absorb; they could fund only one-sixth of the applicants. There is no dearth of interest, just of means.

According to the National Council:

> The central fact remains that close to 100 promising projects by competent scholars, with a total value of some $10 million, will not be funded . . . [These applications] provide eloquent testimony that the gap between current resources and the needs of the profession and the nation is manifest, compelling, and altogether too great.

Title VIII was given a 10-year authorization for annual funding at $4.8 million. It already has been cut to $4.6 million this fiscal year when the Gramm-Rudman sequester order went through March 1. Now the Office of Management and Budget, in another example of misplaced priorities, has cut back the fiscal year 1987 request to $4 million. I believe this vital program ought to be doubled, but for now it should at least be restored to its original funding level of $4.8 million in this year's budget.

There are 67 universities in the Soviet Union that are universities in the Western sense. Yet only two or three American universities, and one consortium of Midwestern universities, have set up "sister university" programs with just two Soviet schools: Moscow State and Leningrad State. Part of the problem comes from the Soviet end. The prospect of allowing high school or even college-age students to come to the United States for study frightens some of the Soviet bureaucrats charged with overseeing ideological purity within their youth organizations. But we owe it to ourselves to break down these barriers through persistent effort. Now that effort seems to be paying off. It is important for an influential segment of Soviet society to see us as we are, not as the propaganda mills portray us. And we should avoid distortions of the Soviet Union through similar on-the-scene observation.

In terms of officially sponsored exchanges, we expressed our dissatisfaction with the Kremlin by allowing the cultural exchanges accord to lapse in 1980 after the invasion of Afghanistan, as we did with three of the science and technology agreements in 1982 following the imposition of martial law in Poland. The National Academy of Sciences is down to about half the number of exchanges compared to the 1979 level. The real point after Afghanistan should have been that we need greater understanding, not less understanding. I appreciate the motivation of our policymakers in canceling the cultural exchange agreements because of Afghanistan, but that action was a mistake.

Exchanges can be most valuable precisely when relations are strained. Relations grew worse between 1981 and 1985, and two-way exchanges suffered. Would it not have been better to increase direct contact with each other

when hostility was on the rise? Would it not have made more sense to have our youth, scholars, and professionals engaged in routine discussion with the other superpower capable of global destruction?

Clearly, we are not going to see a far-reaching effect on United States-Soviet relations overnight, although I agree with President Reagan on the potential impact a doubling or tripling of our exchange activities might have on Soviet behavior—and on our behavior—in the long term. A major expansion in this area could lead to better relations and better crisis management, despite the reality that our different national interests and social systems will inevitably lead to some tensions and political conflict.

That is why I support the people-to-people initiative. There are now more than 50 proposals in the fields of performing arts, sports, youth, film, education, professionals, citizens, and health care exchanges under consideration. For the first time, Moscow has agreed in principle to exchange high school students. The wisdom of this move is apparent, but my guess is that future generations will view it as a historic acceptance of reality.

For example, had a young Eureka College student named Ronald Reagan spent his junior year in Moscow, and had a young law student named Mikhail Gorbachev spent a year at an American college, relations today between our two countries surely would be better. Given the gulf between our two governments and peoples, bridging it becomes that much more important—particularly in difficult times, when leaders must act quickly.

THE MANDATE OF HISTORY

Never before in history has it been so important that two nations get along with each other. For the first time in history we have two nations who can literally destroy civilization. This is why the recent Cultural Exchanges Agreement is so crucial. Charles Wick, Director of USIA, put it best when he said the agreement "reflected the concept that cold war rhetoric, distortions, misunderstandings, unseemly allegations, and the like have contributed to international tensions and that those tensions and the ever-present fear that they could lead to armed conflict, could be reduced by wider contact between the people of both countries."

Both sides benefit from exchanges. The State Department in August 1983 reported that science contacts overall have "provided us with a better understanding overall of the capabilities of Soviet science." It went on to say that these exchanges give us "an opportunity to conduct joint research in areas where the Soviets are more advanced and/or have unique resources or facilities," and also allow us to directly communicate "American views to an influential segment of Soviet society." This is an invaluable payoff.

Some have charged that exchanges are dangerous, because the Soviets use their people to gather intelligence or steal technology. There have been some problems, and we ought to be careful. But the problem has been blown out of proportion. Most espionage is conducted through illegal means and trade diversion.

In fact, the 1985 DOD-CIA report, "Soviet Acquisition of Military Significant Western Technology," says that academic exchanges gave Moscow just 5 percent of the technology "judged most significant during the late 1970's and early 1980's." Even this accusation comes up a bit short on evidence, when the relevant footnote admits there is "little data indicating that specific scientists were tasked to acquire information for Soviet military research projects." The great danger is not from exchanges, but from not having enough exchanges.

At this point in time, exchanges may be particularly beneficial. Mr. Gorbachev has made numerous personnel changes, reflecting his desire to get a hold of the Soviet Union's economic mess. East-West trade will play an important part in this economic revival. Good relations are no longer just important, they are imperative. In a letter I received from the eminent diplomat George Kennan, he says that he does not think it "impossible, if steady gentle pressure is maintained from our side, that the influence of Gorbachev, obviously a much more flexible and imaginative person than most of those who preceded him, will serve to loosen up the rigidities of Soviet control over these exchanges and to make them more productive." This makes good sense to me, because it is in Mr. Gorbachev's best interest to move in this direction.

LOSING THE SCHOLARSHIP WAR

Are the Soviets blind to these and other benefits flowing from exchange programs? Not at all. In an area of the world that many of us would agree is a vital national interest—Central America—our exchange initiatives have dwindled. In the contest for the hearts and minds of our southern neighbors in the Caribbean, who has stepped in to fill the breach? If you guess the Soviet Union, you are right.

While we debate aid to the Contras, and the elements of the Caribbean Basin Initiative, we failed to include until this year some kind of long-term educational and exchange program with the region; the Soviets have not neglected this vital part of regional strategy. Literacy campaigns, large-scale efforts to teach the peasants how to read and write, are the first initiatives organized by Communist revolutions wherever and whenever they occur.

Between 1977 and 1982, Central American academic exchanges with the Soviet bloc, excluding Cuba, increased by over 300 percent, reaching a level of more than 3,400 exchangees compared with U.S. awards of less than 400. In 1984, the respective numbers were 3,030 to 226. If we include Cuba, there are over 7,000 exchangees with the Soviet Bloc. In just 5 years, then the bloc has increased its total exchange effort seven-fold, while the American effort has fallen dramatically. USIA's new Central American Program of Undergraduate Scholarships [CAMPUS] idea, and attempt to bring more students from the region to study in the United States, has 154 students in attendance this year in American universities. Clearly, we have a long way to go before we approach the Soviet and Soviet-sponsored numbers.

It is simply amazing to me that we are not putting far more money and effort into a regional exchange initiative at a time when the military battle for Central America rages unabated. Whatever the real level of Soviet military aid, the figures I cited demonstrate that Moscow is looking beyond the next move on the Central American chessboard.

In sub-Saharan Africa, we are making the same mistake. Much has been made of the Marxist influence within the African National Congress [ANC]. There are obvious reasons why the ANC and other resistance groups in southern Africa have turned to Soviet assistance; our relationship with the Government of South Africa is a contributing factor. Another factor is the importance the Soviets attach to direct exchanges with African students, and not just in Angola, Ethiopia, or Mozambique.

In Mauritania and Senegal, two countries I visited recently, the comparative numbers are astonishing. There are three government-sponsored Mauritanians studying in U.S. schools; there are more than 300 in Soviet schools. The figures are comparable for Senegal. While there are now almost 35,000 sub-Saharan Africans studying in the United States, only 2.5 percent are here on U.S. Government scholarships. This means that the vast majority are here on their own resources, mostly children of the wealthy elite. As important as children of the elite are—and we welcome them—we need to reach others in the developing countries.

THE COST OF ONE FIGHTER

Where does all this leave us? My hope is that we begin to look seriously at the long-range benefits that stem from exchanges. They can contribute to our foreign policy in more ways than we can guess. When the USIA wants to spend $159 million in fiscal year 1986 on exchange activities—an

increase of $29 million—and Congress balks at providing the full increase, then we need to take another look at our priorities. The increase in question, incidentally, is roughly equivalent to the cost of one F-15 fighter.

Some may ask, "Why all the fuss over a few exchange programs? Why not spend more and more on defense? Why not buy that extra F-15 instead of spending money on exchanges?" The answer is simple. Look at all we have to gain through the spread of American ideas and commerce, and consider the technical and cultural information we gain about other lands. We are building a base of understanding that can make sensible cuts in defense spending possible. The United States and the U.S.S.R. stand to gain the most through exchanges, because we have the special responsibility to avoid nuclear war.

By underfunding exchanges, we cheat ourselves and others.

The entire exchange effort contributes to our foreign policy goals and to the common defense, not only defense against military threats and terrorist attacks fueled by hatred and misunderstanding, but defense against poverty and disease and the afflictions of humanity. Exchanges build a strength gained from knowledge and understanding.

AN AGENDA

As in other areas, our policy on exchanges needs a guiding strategy if it is to be effective. We must know in advance what we would like to achieve, but we also have to identify funding possibilities and realistic goals. I would like to propose several objectives that make sense as we begin the second half of the 1980s:

First, double Title VIII funding in fiscal year 1987 and subsequent years. Title VIII is also known as the "Soviet and East European Research and Training Act," presently funded at $4.8 million. An annual allocation of $10 million per year will enable us to conduct far more Soviet research than we can today, and train a new generation of Russian and other Soviet language speakers. This will fill a critical national need. Doubling title VIII will cost us very little, but the administration has requested a decrease in funding. This is shortsighted. The Modern Language Association has set a goal of 100,000 Russian-speakers by 1988. That target now seems beyond our reach, but why not aim for 1990? Exchanges will only realize their fullest potential when we have mastered each other's languages.

Second, expand the Central American Program of Undergraduate Scholarships [CAMPUS] administered by USIA. We can no longer pretend that military force alone will solve our hemispheric problems. The Soviets and Cubans have a very extensive scholarship and exchange effort underway in the region, and the United States ought not to abandon the educational high ground to Moscow and Havana. A good goal to aim for would be to bring in as many exchangees from Central America as currently attend schools and universities in the East bloc. This year, out of 154 students, only 6 come from Nicaragua. This number must rise if we want to spread American political values. I will propose that we increase this program by $1.6 million, to bring the number of these scholarships up to 200. I hope that with these additional scholarships more students from the warring states of the region can be brought together in the United States.

Third, resurrect the Critical Foreign Languages Study Program enacted in the 1984 Emergency Math and Science Act. No money was appropriated in fiscal year 1986 for this much-needed language training. At a minimum, we should be spending $10 million this year for high school and college students to learn the Slavic languages, Chinese, Japanese, Arabic, Faris, and other languages critical to national security.

Fourth, we ought to encourage American students and faculty to learn more about the Third World, where we have a number of very difficult foreign policy problems. One way to do this would be to convert some of the outstanding military sales credits into an exchange program. The Treasury Department lists these debts annually; they now stand at about $13 billion.

We could allow a small percentage of each country's debt, perhaps no more than 5 percent, to be repaid by establishing on the national university campus an exchange program for U.S. students and scholars. The host country would provide accommodations, tuition, and other necessary arrangements including stipends. Since repayment under the Military Sales Credit Program goes to the Treasury and not to Government agencies, no Department would actually be out any money. And since a great many countries have not repaid their debt, we at least would be seeing some net gain over the present situation where we continue to carry these countries as outstanding debtors.

Fifth, finally, we should establish a National Endowment for International Studies. This idea was introduced several years ago by Michael Sovern, president of Columbia University. While going beyond the limits of international exchanges, a National Endowment in this area would complement and bolster an expanded exchanges effort. Additional savings might even be realized, if we start to channel Government funding for international studies and foreign language training through this one institution.

As laid out by President Sovern, the endowment would begin with a 5-year program for innovative foreign language training at the primary, secondary, and undergraduate levels; would grant competitive graduate fellowships in all areas of international studies, including language studies; and would make use of matching funds to make grants for a variety of research projects in foreign policy analysis. Within several years, dispersed programs like the Department of Education's Title VI for foreign language training centers, and the Department of State's Title VIII for Soviet and Eastern European training would be subsumed under this new endowment. The lack of commitment to title VI, for example, has been demonstrated repeatedly: the Department has not requested any funds since 1981. This kind of negligence would not exist under a National Endowment's auspices.

Startup costs need be only a third or so of the established endowments, or $50 million. Considering the importance of such an undertaking, and the comprehensive nature of international studies, this is a fair expenditure for a new National Endowment. I would hope we can agree on the need for this new endowment in time to approve funds for fiscal year 1988.

BRIDGES TO UNDERSTANDING

These programs are just a start. The cost to the Treasury would be $71.6 million, about one-fiftieth of 1 percent of this year's function 050 defense authorization request. I suggest that the Defense Department authorization be reduced by that amount to cover the cost of these programs.

There are many other new and innovative exchange program ideas now surfacing in the wake of the President's Geneva summit. A boost has been given to private-sector and nonprofit exchanges, which we should encourage. The President has moved deftly on starting to promote United States-Soviet exchanges. It is now up to Congress to build on our present exchanges effort and help bring about a more secure future.●

NATIONAL TOURISM WEEK

● Mr. ABDNOR. Mr. President, I am pleased to note that May 18 to 24 has been designated as National Tourism Week and across our Nation a variety of events are planned to highlight the importance of the tourism industry to the American economy.

Last year alone, travel and tourism was a $225 billion industry, employing nearly 7 million Americans—our Nation's second largest industry.

In my own State of South Dakota, travel and tourism is our second largest industry as well. Tourists provide $1.3 million per day during their visits

to our State and provide over 14,000 jobs to South Dakotans.

May 18 to 24 marks the third national celebration of tourism week and I am pleased, as a member of the Congressional Tourism Caucus, to join with 700,000 South Dakotans in saluting the efforts of the entire tourism industry in educating and informing the public as to the importance of this industry to all Americans.

Tourism, indeed does work for America!●

GENERAL REVENUE SHARING

● Mr. SASSER. Mr. President, on April 24 I delivered a statement on the floor of the Senate in support of the General Revenue Sharing Program.

At that time I also introduced several statistical tables to be included with my prepared remarks. Inadvertently, one of the tables showing the State-by-State impact of eliminating general revenue sharing under two scenarios was only partially included in the RECORD.

Therefore, I ask that the entire table be included in the RECORD to correct this mistake.

The table follows:

TABLE 4.—STATE-BY-STATE IMPACT OF ELIMINATING GENERAL REVENUE SHARING UNDER TWO SCENARIOS

State	Raise property taxes to make up loss	Across-the-board reduction local services to make up loss				
	Percent increase in local government property tax, excluding special districts	Reduction of police officers	Reduction of fire officers	Reduction of teachers	Reduction of human service workers	Reduction of street maintenance workers

ALL-AMERICAN BUCKLE UP

● Mr. DOMENICI. Mr. President, each year over 40,000 people are killed in automobile accidents; another 250,000 are subjected to moderate to severe injuries and still another 2 million receive minor injuries. Public payments when people are seriously injured in auto accidents amount to over $7.5 billion. These payments include medical bills, lost revenue, and direct payments for damages. Not only do the victims suffer physical damages, they also feel the emotional and economic strains when there is an injury or when damage is administered.

It is a proven fact that seatbelts prevent injuries, unnecessary costs to individuals and businesses, and most importantly they save lives. Last year, there were almost as many people killed in car accidents as there were American soldiers killed during our Nation's involvement in Vietnam. Yet, every day Americans fail to take the time to buckle up, even though buckling up can prevent injuries and death. A lot of unnecessary destruction and pain can be prevented with the use of seatbelts.

There is something being done to educate the public on the need to utilize the various passive restraint devices. The Department of Transportation in cooperation with automakers, insurers, safety organizations, and others have started a $40 million a year education program. This program is designed to encourage the use of

safety belts and to educate the public on the mandatory usage laws. Another program is the safety belt contest. The mayor of Santa Fe, NM, has challenged the mayors of all cities with a population of at least 15,000 to this safety belt contest. This contest encourages the development of community programs designed to increase safety belt usage among the drivers of automobiles, vans, and light trucks. The U.S. Conference of Mayors has recognized the accomplishments of this challenge and recently had an awards ceremony recognizing those cities who put forth outstanding effort.

Mr. President, it is essential that the public find some way to realize and overcome the serious problem of motor vehicle fatalities and injuries. I urge all my colleagues and all Americans to join me in observing "All American Buckle Up" on May 22, 1986. "All American Buckle Up" and other programs throughout the country have helped us realize how important seatbelts are to all of us. By buckling up we can all help save lives and unnecessary pain and suffering.●

SALUTE TO DR. THEODORE J. JEMISON

● Mr. LUGAR. Mr. President, I wish to acknowledge the lifelong dedication and contributions of Dr. Theodore J. Jemison to the religious, political, and civic affairs of this Nation.

Dr. Jemison is the president of the National Baptist Convention, U.S.A., with a membership of 7.8 million people. He is also the pastor of Mt. Zion First Baptist Church in Baton Rouge, LA. Dr. Jemison has contributed his time and talent to ensure that the human rights of all citizens are protected, and has received numerous citations and awards for his service and commitment. On June 16, 1986, Dr. Jemison will convene his annual convention in the great city of Indianapolis, IN. I ask my colleagues today to join me in saluting the work of Dr. Jemison and wishing the convention the best of success in this and future endeavors.●

OLDER AMERICANS MONTH

Mr. DOMENICI. Mr. President, it is a privilege and honor to speak on behalf of Older Americans Month. The proclamation to decree the month of May as Older Americans Month has been issued every year since 1963. Even so it is perhaps more meaningful now as we see an increase in the population of our senior citizens. Today there are 28 million Americans over the age of 65 and their numbers are expected to rise. By the year 2000 20 percent of the U.S. population will exceed 65 years of age and the number of those over 85 will double. These elderly Americans utilize services that make up 28 percent of the current Federal budget. Yet even with these expenditures many elderly suffer economic, health, and labor-related problems.

The designation of this month as "Older Americans Month" will kick off activities on the State and local level which will honor older Americans. These activities will allow the public to express gratitude and discover the great impact the elderly have on our country. One example of a senior citizen whose contributions to society can be felt nation-wide is Virginia Crenshaw of New Mexico. Her list of activities include the cochairman of both the 1981 White House Conference on Aging and the Governor's Task Force of Long Term Care in New Mexico. Another service to her State and Nation include a post on the 1986 Planning Commisison titled "Glorieta Conference on Aging." Thus with the recognition of contributing senior citizens such as Mrs. Crenshaw it will become obvious that we owe a special debt of gratitude to our older citizens. After all, older Americans have played a major role in creating the bounties of life that we all enjoy. Furthermore, the elderly are our country's most vital reservoir of knowledge and experience.

All Americans benefit from and appreciate the older segment of our society. None more than the citizens of New Mexico whom I represent. We have over 160,000 Americans over 65 years of age in our State and a projected figure of 299,010 for the year 2000. New Mexico is honoring these citizens this month with the senior Olympics and with numerous banquets throughout the State. I urge other groups to join us in showing appreciation to these citizens who have more experience than any of us about living in a democratic society.●

THE NATIONAL ASSOCIATION OF INTERCOLLEGIATE ATHLETICS' WRESTLERS TRIP TO CHINA

● Mr. ANDREWS. Mr. President, I would like to call to my colleagues' attention an effort currently underway to promote international understanding and cooperation through the timeless practice of athletic competition. On June 6, 1986, the NAIA wrestling team will start a 3-week cultural and athletic exchange tour of the People's Republic of China.

Thirteen outstanding young Americans and three coaches will be afforded a unique opportunity to participate in and observe the lifestyles and culture of mainland China. These athletes will also serve as unofficial ambassadors from the United States. To this end, I am confident that both the Chinese hosts and their American guests will benefit positively from this personal interchange.

Mr. President, I am particularly proud of two specific members of the exchange team: Mike Olson, team leader for the tour, and Kelly McNary. Both of these fine North Dakotans are from Dickinson State College and epitomize ideals synonymous with American youth and those who teach and guide them. I wish my fellow North Dakotans and all the team members well as they undertake this journey of understanding to the People's Republic of China.●

TAX OVERHAUL TAKES WING

● Mr. DURENBERGER. Mr. President, on May 7, after nearly 2 months of markup, the Finance Committee ordered reported sweeping tax reform legislation that could change the economic landscape of the country. The committee's deliberations were often difficult and pressured. However, we ultimately achieved a bill that I believe will benefit the entire country.

Recently I came across an article in Newsday providing an "insider's" view of the Finance Committee deliberations. The article was written by my distinguished colleague from New York, Senator PAT MOYNIHAN. I believe the article provides an excellent insight into how the committee achieved its tax reform bill.

Mr. President, I ask that the text of Senator MOYNIHAN's article be printed in the RECORD.

[From Newsday, May 18, 1986]

TAX OVERHAUL TAKES WING

HOW A HANDFUL OF SENATORS FASHIONED A SWEEPING REVISION OF THE U.S. TAX CODE. AN INSIDER'S ACCOUNT

(By Daniel Patrick Moynihan)

It was an inauspicious beginning, but by the time we finished, the Senate Finance Committee had hammered out a sweeping plan that could change radically, and for the better, the way Americans pay their taxes. Sen. Bob Packwood (R-Ore.) tells the story, so I see no reason it shouldn't be recorded:

It is Friday morning, April 25. The Finance Committee, which Packwood chairs, is finishing up its second week of writing a tax reform bill. It has not been going well for the chairman. He had prepared a long (221-page) detailed proposal that generally followed President Ronald Reagan's original tax proposal. Like the president, Packwood sought to lower tax rates for both individuals and businesses by removing many exemptions, thereby maintaining federal revenue. In addition, both the president and the House of Representatives (which adopted a bill last December) proposed to increase business taxes in order to reduce individual rates still further.

This was the Packwood plan. But the Finance Committee—the Senate's tax-writing panel, with 11 Republican and nine Democratic senators—wasn't going along. Amendment by amendment, the committee restored favors to particular industries that Packwood proposed to eliminate to raise revenue and thereby cut rates. Our low point came when we solemnly concluded that the depreciable life of an oil refinery

was five years—an absurd idea for so permanent a structure.

On that Friday morning, Sen. Dave Durenberger (R-Minn.) and I had assembled the votes to strike the provision ending the deductibility of state and local taxes. This involved something more than a financial interest. It was to us a matter of constitutional principle: that the federal government not invade the fiscal reserves of the states and their subdivisions. The president himself had once denounced such a proposal as a "tax on a tax."

Packwood did not disagree. But he recognized that our amendment would be followed by dozens more. His proposal was in ruins. He banged the gavel and announced there would be no more votes that day, and no more meetings until further notice. Tax reform was promptly pronounced dead.

Thank God it was Friday. Or so you might think if you hold with tax reform, as I do. Packwood summoned his chief of staff, Bill Diefenderfer, and together they wandered off to The Irish Times, a tavern near the Capitol. They ordered a pitcher of ale and asked themselves: What next?

Defeat was certain, dishonor not. Packwood is not that sort. Nor Diefenderfer, a bulldog of a man with a sea captain's beard and a bos'n's girth and way of staying on deck. (I have seen him literally on his feet in the committee room for 14 hours). Both are of that genus known as progressive Republicans. Diefenderfer, assistant director of the Domestic Council under President Gerald R. Ford, had come back into government specifically to help with the tax bill.

At the tavern, they decided that if they were to go down to defeat, it would be in the cause of the most extraordinary tax bill in our history.

In the Finance Committee, they would be going against the history's tide. Years ago William Jennings Bryan described big business as "nothing but a collection of organized appetites." For going on two centuries, something such has been the role of the Finance Committee, at least where taxes are concerned. This is not a role to be deprecated. It is what James Madison assumed representative government would be like and, indeed, the committee was established in 1815 in response to his call for a uniform national currency.

Rufus King of Jamaica was one of the five original members, but thereafter New York interest dropped off. Jim Wadsworth of Geneseo served for two years under President Calvin Coolidge. That was that until I asked to join in 1977.

New York has paid for being off Finance for so long. The whole era of modern taxation, trade legislation and Social Security legislation has come into being with no New York say on the subject, as far as the Senate side is concerned.

Not so other states, especially the new ones, formed after the Union. Finance was where the money was, and that was where they needed to be. The oil and gas states, the mining states, the timber states all needed to be on Finance and were.

Their presence was evident that week of April 20, when Packwood saw his original tax proposal unravel, and when he then decided to go for broke.

The following Tuesday I was asked if I would meet next morning in Packwood's office with a group of Finance members who were still willing to fight for a bill. The Soviet disaster at Chernobyl was on everyone's mind, and no one noticed us. Three Republicans and three Democrats gathered. On the Republican side: Packwood, Rhode Island's Sen. John Chafee and Missouri's Sen. John Danforth. On our side: myself, New Jersey's Sen. Bill Bradley and Maine's Sen. George Mitchell.

Packwood's proposition was plain. We were getting nowhere in trying to change the old code sentence by sentence. Every such sentence represented some victory by some interest at some point in the past. Those interests would have someone on the committee to fight for them.

We were six. We thought we might have a few absent friends. The administration wanted a bill. What was there to lose, given that we had already lost? The next seven days may well have made history.

The "core group," as we commenced to call ourselves, made two basic decisions. Rather, Packwood did and presented them to us. Would we join? The first was to adopt Bradley's idea of two drastically lowered income tax rates: 15 percent for families with incomes of up to $42,300 and 27 percent thereafter. (This included the president's all-important proposal to raise the "personal exemption" to $2,000, so children in a family once more become a factor in the tax system). This, of course, meant a sharp cutback in familiar "deductions" such as interest payments, apart from mortgage interest.

The second decision, less-noticed, was a proposition I first introduced three years ago, and sponsored again last year along with Chafee. In somewhat oversimplified terms, this proposal divides income into "active" and "passive" categories. Active income is what you earn as salary, as well as any interest or dividends. Passive income is the "paper" gain or, in the usual case, loss from investments in businesses in which the investor is not actively involved; such businesses are often designed to create artificial tax losses that offset salary or interest income.

The idea was given to me by Donald Schapiro, an eminent New York tax lawyer, as a feature of my minimum tax proposal, designed to ensure that at least a minimum tax is paid by people with large, "sheltered" incomes. I almost got it into the 1984 tax bill, losing 10-9 in a closed committee session. A year ago I reintroduced it with Chafee.

Now David Brockway, chief of staff of the Joint Committee on Taxation, which is pretty much the tax brains of both Finance and the House Ways and Means Committee, came up with a startling idea. If we were to take Schapiro's concept and apply it across the board, we would pick up $50 billion over five years. Fifty billion dollars! The president's proposal had required raising $120 billion over five years from the corporate sector; Ways and Means, $140 billion. We could cut this figure back to $100 billion or so simply by putting a stop to tax shelters. Not one of us had any idea how huge the practice had grown.

By now the whole committee was meeting in the back room of the Finance Committee suite, with the "core group" meeting first each morning in Packwood's office. Our discussions made their way, naturally enough, to the press corps (and the lobbyists, by the increasing hundreds—thousands?) in the corridor outside.

On Friday, May 2, the Wall Street Journal reported of the Brockway proposal:

"The effect would be to nearly wipe out tax shelters that are a major force in financing commercial real estate construction, oil and gas drilling and certain agricultural activities, such as cattle feeding."

The Journal story displayed an unintended irony: An advertisement on the bottom of the page, indeed directly following the story, read:

"Feeding Cattle Could Help Reduce Your Tax Bite. Alta Verde Industries, a long-time South Texas custom feed lot, is now placing cattle on feed for sale in early 1987. The ratio of 1986 expense to equity required is approximately 3 to 1. If this interests you as an individual or closely held corporation, check with your accountant, tax attorney or professional financial adviser and write or call for more information with no obligation."

I have no bones, you might say, with the fold at Alta Verde, but such a tax shelter works like this: By investing, say, $100,000 in cash to buy cattle and borrowing $300,000 to buy the grain to fatten them, you get a paper "loss" of $300,000 by feeding them (thus, "equity . . . 3 to 1") and this loss can be deducted from your income this year. When the cows are sold next year, they are recorded as "capital gains," which are taxed at 40 percent of the sale price. Result? Well, put it this way: Last year 60 percent of the nation's millionaires paid less than 20 percent in taxes, while 20 percent of these paid less than 10 percent in taxes.

Since we also decided to abolish capital gains, in effect we abolished capital gains for feed lots, box cars, barges, thoroughbred horses and so on through the $50-billion scandal—I use the word carefully—of tax shelters under the current income tax code.

In the end, it was as simple, or as complex, as that. On Saturday, May 3, the "core group" met all day, and individually into the night, and worked out the hundred details. Strange thing—both the press corps and the lobbyists assumed we were taking the weekend off and so they did. No one was outside in the corridor. Sunday, May 4, we finished up.

The next day the full committee commenced meeting and by 12:30 in the morning of May 7, we had a bill. Oil and gas got a bit back by way of tax shelters. Mining did. In the Finance Committee, they always will. But the basic bill remained, and it carried 20-0 for the simple reason that whatever our state or regional interests, we all knew something radical had to be done and there would never be a better time to do it.

I hope something like this passes the Senate, and that something close emerges from a conference committee with House Ways and Means (My colleagues, Rep. Charles B. Rangel, fourth-ranking member of Ways and Means, has been hugely supportive.) If it does, Americans can start making economic decisions in economic terms and not in terms of the tax code. That is the great object, and we have come as close as anything we ever dreamed of.

There will be more than a little dislocation, and for some persons, some pain.

Although state and local taxes, local property taxes, personal property taxes (as on a mobile home) continue to be deductible, sales taxes are not. First I, then Durenberger, moved to retain present law, but lost 13-7. We will continue to press the issue. The House bill preserves the deductibility and we may yet succeed.

There is a case to be made for three rates rather than two—say, 35 percent for the highest income groups. But consider: Six million to 7 million poor persons will be off the income tax rolls altogether, and some four-fifths of households will be at the 15 percent rate.

On balance, I hold that we did a week's work. If it comes to nothing, don't expect it to be tried again soon.

When the final vote came, the Finance Committee rose as a man to applaud Bob Packwood. A large basement room of the Dirksen Senate Office Building, jammed with an overflow of lobbyists listening to the proceedings, broke out in hissing.●

ANDREI SAKHAROV

● Mr. BRADLEY. Mr. President, today I join my colleagues in celebration of the 65th birthday of Andrei Dmitrievich Sakharov, a Nobel Peace Prize winner, distinguished physicist, and defender of human rights.

Mr. Sakharov is the leader in the Soviet Union in the fight for peace and human rights, a hero to freedom-loving people throughout the world. He is a lonely voice speaking out against oppression, urging the Soviet Government to provide its citizens with the rights and freedoms that it promised them when it signed the Helsinki Final Act. He has continued his struggle for individual freedom through articles, interviews, and hunger strikes, including a hunger strike to help his wife, Yelena Bonner, obtain an exit visa for medical treatment. He has sought food for the starving people of Kampuchea, argued on behalf of the right of the Tartar people to live in their Crimean homeland, and fought for the freedom to emigrate from the Soviet Union. In 1975, Mr. Sakharov was awarded the Nobel Peace Prize in recognition of his ideals and courageous struggle for individual freedom and civil rights.

Unfortunately, on this day, Mr. Sakharov will be spending his birthday in isolation in Gorky, where Soviet authorities have held him since 1980, when he condemmed the Soviet invasion of Afghanistan. In Gorky, he is separated from his family and friends, barred from scientific work and normal social activities. In other words, he is being subjected to perhaps the most cruel type of torture—intellectual and emotional isolation.

Recently, the President signed a resolution making May 21, 1986, National Andrei Sakharov Day, a day on which we can celebrate Mr. Sakharov's continued commitment to peace and human rights. It is for this struggle that we honor this brave man, and for these principles that we cherish his story. As the Nobel Peace Prize Committee so aptly dubbed him, Mr. Sakharov is "the conscience of mankind."●

LAUTENBERG LEADERSHIP ON COMBATING RADON

● Mr. BRADLEY. Mr. President, residents of New Jersey and of probably every other State in the country are becoming more aware of a potential health threat that we have had little experience in combating. That is the threat of radon in our homes. This gas which can build up in enclosed areas, such as homes, is feared not only because it can cause cancer, but because it cannot be seen or smelled. It is a silent threat to our homes and families.

Both my colleague from New Jersey and I have been working to alert New Jerseyites to this potential problem, to help New Jerseyites find reasonably priced methods to discover whether their homes have a radon problem, and to get EPA to undertake research on ways to retrofit homes to eliminate radon buildup. Senator LAUTENBERG also recently went to Sweden to learn about techniques they have developed to deal with this problem.

All New Jerseyites were pleased last week when Senator LAUTENBERG unveiled a public-private effort to build 100 new homes in New Jersey to demonstrate construction techniques to prevent the buildup of radon. The "New Jersey Radon-Proofing Project" was recently described in articles written by Gordon Bishop for the Newark Star Ledger. I ask to insert those articles in the RECORD so other Senators may learn of this innovative program. Senator LAUTENBERG is to be commended for his leadership in the effort to combat radon contamination in New Jersey.

The articles follow:

RADONPROOF HOMES TO BE BUILT IN JERSEY

(By Gordon Bishop)

The nation's first radonproof homes will be built in New Jersey this year as models for the housing industry in building new homes and correcting older ones affected by harmful radioactive emissions escaping from the ground.

The plan to build the first 100 radon-free homes in the Garden State was unveiled yesterday by U.S. Sen. Frank R. Lautenberg (D-N.J.) at a press conference in his Newark office.

The radonproofing project, estimated to cost $270,000, will be funded by federal, state and private resources, Lautenberg announced.

The 100 homes will be built throughout northern New Jersey in varying geological conditions and will be ready for testing by this winter, Lautenberg said.

Construction sites will be assessed for radon risk along the Reading Prong, a geologic formation containing radioactive materials—uranium, radium, radon and other cancer-causing substances.

"The homes will be built incorporating a variety of techniques designed to prevent radon contamination," Lautenberg said. "The goal of the project is to develop effective measures which can then be incorporated at virtually no cost into the design and construction of new homes."

The senator, a member of the Senate Environment and Public Works Committee, said New Jersey is ahead of the country in identifying radon sources and setting up programs to mitigate the dangers.

"We are now entering a new phase: Building new homes in identified 'hot spots' that will have state-of-the-art protection against contamination," Lautenberg stated. "Our efforts will serve as a model for the rest of the country."

Joining in the radonproofing program will be the National Association of Homebuilders Research Foundation, the New Jersey Builders Association, the State Department of Community Affairs (DCA), which regulates the housing industry, and the U.S. Environmental Protection Agency (EPA).

The homebuilders have put up the first $85,000 as "seed money" to get the program started, according to David Jackson of Summit, past president of the New Jersey Homebuilders Association, which has 2,300 members.

State Sen. John Dorsey (R-Morris) announced the DCA will be assuming a $140,000 share of the program, and the EPA the remainder, or $45,000.

About 1.6 million residents of New Jersey living along or near the Reading Prong in 10 northern-central counties may be exposed to various levels of the naturally occurring radon gas emanating from certain granite and gravel formations in the ground.

More than 6 million people may be affected by radon emissions nationwide, based on preliminary estimates by the EPA and Department of Energy. At least 30 states are known to have radon "hot spots."

The radonproofing project came about following a task force investigation of radon problems in Sweden. Lautenbeg led a delegation of local, state and federal officials and organizations to Sweden last January to learn how it responded to its environment-health radon problem in the late 1960s and early '70s.

The "radonproof" homes project was originally intended as a three-state proposal, inlcuding New Jersey, Pennsylvania and New York. But the other states have not moved on it as quickly as New Jersey's builders, according to Lautenberg.

The Reading Prong, which originates in easten Pennsylvania, traverses through New Jersey and lower New York before terminating in southwestern Connecticut.

"The national and New Jersey homebuilders wanted to get working on the new homes construction project right away in order to select the participating builders and have the homes built in time for the fall-winter heating season," Lautenberg explained.

"Once the results of the work are in, within a year, the aim will be to incorporate the effective measures into normal building practices in radon-prone areas."

Jackson said buyers of new homes will, as a result of the Lautenberg plan, receive a certificate validating that the structure is safe from radon gas.

"It will be the same as having proof that a home has been checked and certified against termites," Jackson said. "This is just one more safety check in the building code."

Also participating in the press conference was Marlene McMahon of Basking Ridge, executive director of the Builders Association of Somerset-Morris which has 260 members.

McMahon commended Clinton Town Mayor Robert Nulman for responding to the radon problem in several homes in his community by dealing with the public in an "informational rather than inflammatory way."

LAUTENBERG LEADS WAY ON RADONPROOFING

(By Gordon Bishop)

U.S. Sen. Frank R. Lautenberg (D-N.J.) has once again taken the lead in protecting

New Jersey's homes against potentially lethal radon gas emissions.

Under a $270,000 program unveiled by Lautenberg this week, 100 new homes in North Jersey will be built with radon-prevention systems. It is the first such project in the United States designed to solve the problem of deadly particles trapped inside structures sitting on geological formations containing radioactive substances.

The 100 new dwellings will serve as a working laboratory in which all kinds of "radonproofing" techniques will be tested. The Lautenberg radon program eventually will help builders in New Jersey and throughout the nation to install effective and the least expensive devices in both new and existing homes where harmful gases are escaping from the ground.

The goal of the radonproofing project is to make all buildings safe from radioactive emissions occurring naturally in granite bedrock containing uranium deposits.

After the program has been completed and guidelines are established, purchasers of new and old homes will receive a certificate assuring them that their investment is fully protected against radon emissions.

As a member of the Senate Environment and Public Works Committee, Lautenberg has brought together a team of local, state and federal organizations ultimately responsible for responding to the radon health issue affecting some six million people in more than 30 states.

In New Jersey, more than a million residents in 10 counties may be exposed to radon gases in their homes and workplaces. It is a natural environmental condition that becomes a problem only when an improperly insulated building is placed on land underlain with radioactive materials.

Lautenberg and New Jersey have taken a leadership position because the Garden State has the greatest concentration of people affected by radon particles. But the environmental-health problem, Lautenberg repeatedly stresses, is solvable.

At a press conference in his Newark office this week, Lautenberg announced his pioneering remediation "New Jersey Radon-Proofing Project" with the National Association of Homebuilders Research Foundation.

At the senator's side were David Jackson of Summit, past president of the New Jersey Homebuilders Association (2,300 members); Marlene McMahon, executive director of the Builders Association of Somerset-Morris (260 members), and State Sen. John Dorsey (R-Morris), whose district falls within the radon-bearing formation known as the Reading Prong.

The Lautenberg plan involves a $270,000 investment in radon remediation approaches that will become the models for those areas of America where "hot spots" have been detected.

The builders have put up $85,000 as seed money to start the project. Sen. Dorsey said he expects the State Department of Community Affairs (DCA), which regulates the building industry, to come up with another $140,000, while the U.S. Environmental Protection Agency (EPA) will round out the balance with a $45,000 matching grant.

Lautenberg established a Radon Task Force last January when he led a delegation to Sweden to learn how that Scandinavian country was dealing with its radon problem. The EPA's top radon official was part of the Lautenberg delegation.

After returning from Stockholm, Lautenberg immediately put together a radon detection and prevention plan-of-action at the federal level, working with both the EPA and the New Jersey Department of Environmental Protection (DEP).

The DEP earlier this year launched a radon "test-and-correct" program funded by the state Legislature. The DEP this past winter began its search for the radon "hot spots" under a $2.6 million program. The Department of Health was given $600,000 to conduct epidemiological studies to determine the link between radon gas and lung cancer.

Because of Lautenberg's and the DEP's extensive investigation into radon sources and the steps needed to correct them, New Jersey avoided what could have been a wholesale panic by property owners selling out as quickly as possible and moving to safer grounds.

Instead, property owners, builders and the real estate industry have informed the public and prospective homebuyers exactly what the situation is and what can be done to correct it.

As a result, residents living along the Reading Prong have not fled out of ignorance and lost their greatest investment in the process.

Lautenberg knows first-hand about the impact of radon on property values. He lives in Montclair, just a few blocks from rows of fine homes that were built on radon-contaminated soil. That is a manmade problem, one the state is handling.

The natural radon emissions are being addressed by the Lautenberg remediation plan.●

NATIONAL ANDREI SAKHAROV DAY

● Mr. BOREN. Mr. President, I am pleased to take this opportunity to join with my colleagues today in recognizing "National Andrei Sakharov Day." Unfortunately, it is necessary to continue to dramatize the plight of those like him to whom the Soviet Government has denied basic human rights.

Dr. Sakharov remains in exile in Gorky for his staunch stance in support of human rights in the Soviet Union. The Nobel Committee has called Dr. Sakharov, "The Spokesman for the Conscience of Mankind," And indeed, he is. Despite his imprisonment, Dr. Sakharov continues to speak out on such issues as peace and disarmament, freedom of association, freedom of movement, freedom of information, and freedom of opinion. He also remains a strong international voice against capital punishment, on environmental protection, and on nuclear powerplants.

There are strong signals being sent back and forth between the White House and the Kremlin that every issue is negotiable. That does offer a glimmer of hope, but what is really needed is substantive policy changes. By openly supporting such human rights activists as Dr. Sakharov, our Government shows the world, including the Soviet Union, that the United States is a supporter of human rights.

Mr. President, we do indeed have a stake in this battle for human rights. My colleagues and I continue to be concerned with bringing justice to those so unfairly oppressed. In keeping with the U.S. concern for human rights, I vigorously join my colleagues in recognizing National Andrei Sakharov Day in hopes that change will occur and the oppressed will be freed.●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. RUDMAN. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD notices of Senate employees who participate in programs, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35, for Mr. S. Richard Rolf, a member of the staff of Senator MARK O. HATFIELD, to participate in a program in Turkey sponsored by the Turkish Foreign Policy Institute, from May 22 to May 28, 1986.

The committee has determined that participation by Mr. Rolf in the program in Turkey at the expense of the Turkish Foreign Policy Institute is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Ms. Christine Dawson, a member of the staff of Senator DANIEL J. EVANS, to participate in a program in Turkey sponsored by the Turkish Foreign Policy Institute, from May 22 to May 28, 1986.

The committee has determined that participation by Ms. Dawson in the program in Turkey at the expense of the Turkish Foreign Policy Institute is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Mr. Christopher A. McLean, a member of the staff of Senator EXON, to participate in a program in Taiwan, sponsored by the Tamkang University from May 23 to May 30, 1986.

The committee has determined that participation by Mr. McLean in the program in Taiwan at the expense of the Tamkang University is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Ms. Brenda Sanford, a member of the staff of Senator PAUL LAXALT, to participate in a program in Taiwan

sponsored by the Soochow University, from May 21 to May 30, 1986.

The committee has determined that participation by Ms. Sanford in the program in Taiwan at the expense of the Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Mr. Matthew Gerson, a member of the staff of the Patents, Copyrights and Trademarks Subcommittee, to participate in a program in Taipei, Taiwan, sponsored by the Soochow University, from May 22 to May 29, 1986.

The committee has determined that participation by Mr. Gerson in the program in Taipei, Taiwan, at the expense of the Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Mr. William C. Jacobs, a member of the staff of Senator DANIEL J. EVANS, to participate in a program in the Republic of Turkey, sponsored by the Turkish Foreign Policy Institute, from May 22 to 28, 1986.

The committee has determined that participation by Mr. Jacobs in the program in the Republic of Turkey, at the expense of the Turkish Foreign Policy Institute, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Ms. Diana Rubin, a member of the staff of Senator FRANK LAUTENBERG, to participate in a program in the Republic of Turkey, sponsored by the Turkish Foreign Policy Institute, from May 22 to 28, 1986.

The committee has determined that participation by Ms. Rubin in the program in the Republic of Turkey, at the expense of the Turkish Foreign Policy Institute, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Mr. Peter Kinzler, a member of the staff of Senator CHRISTOPHER DODD, to participate in a program in Taipei, Taiwan, sponsored by Soochow University, from May 22 to 29, 1986.

The committee has determined that participation by Mr. Kinzler in the program in Taipei, Taiwan, at the expense of Soochow University, is in the interest of the Senate and the United States.

The select committee has received a request for a determination under rule 35, for Mr. Paul Manchester, a member of the staff of the Joint Economic Committee, to participate in a program in Taipei, Taiwan, sponsored by Tamkang University, from May 23 to 31, 1986.

The committee has determined that participation by Mr. Manchester in the program in Taipei, Taiwan, at the expense of Tamkang University, is in the interest of the Senate and the United States.●

S. 1990, THE EDUCATION AND TRAINING PARTNERSHIP ACT

● Mr. QUAYLE. Mr. President, S. 1990, the Education and Training Partnership Act, is a bill I introduced as a first effort to improve the Federal role in administering labor market related programs.

Since 1982, Congress has reformed the administration of some major labor market related programs, including the Job Training Partnership Act, the Wagner-Peyser Act, and the Carl D. Perkins Vocational Education Act. The rationale for this reform was to eliminate barriers to coordination among related programs and to give the private sector, who are the consumers of job training, a significant role in setting policy and in program administration. States and localities are implementing these reforms.

As a leader in developing those administrative reforms, I believe it is time Congress turned to an examination of administration at the Federal level to determine whether improved coordination and private sector involvement would enable us to more effectively meet the national goals that our labor market programs are designed to address. For further elaboration on these points, please refer to statements I inserted in the CONGRESSIONAL RECORD last year on April 3, with accompanying statements by Senators HATCH and KENNEDY, the chairman and ranking minority member, respectively, of the Labor Committee, and on December 19, when I introduced S. 1990.

So far, I am pleased with the public debate that has taken place on S. 1990. This bill has served as a focal point for discussions, throughout the country, about the Federal role in the labor market. It has been a hotly debated topic in national meetings of educators, job trainers, and public and private personnel professionals. In Senate hearings, on February 19 and 25, the Secretary of Labor, Bill Brock, and the Secretary of Education, Bill Bennett, testified on S. 1990, along with a host of other witnesses from the public and private sector.

Although strong support for S. 1990 was expressed, particularly its objectives, serious concerns were also raised regarding its specifics. In order to explore possible changes to S. 1990 or alternative proposals, I am soliciting examples of the need for improved coordination or private sector involvement at the Federal level that would enhance program effectiveness.

I understand that introduction of S. 1990 has already had some positive impact by spurring better efforts at coordination among State and local entities. Although I am delighted to learn of that side effect, the discussion should now focus on the objectives of S. 1990: The need at the Federal level for improved coordination and private sector participation. Specifically, we need information about situations where, given all the best intentions and goodwill, more effective delivery of services cannot be achieved because the policy or regulations developed at the Federal level inhibit or prevent it.

For example, I am very interested in responses to the following questions:

First, do Federal regulations or statutory requirements prevent the coordination of related programs to address the labor market needs of individuals or populations eligible for services under Federal programs? If so, please give examples.

Second, if private sector participation is valuable at the State and local levels, would it also be beneficial at the Federal level? If so, please explain. If not, why not? Examples?

Besides promoting more effective and efficient administration, S. 1990 establishes a mechanism that can provide leadership at the national level in setting long range policy goals. Under S. 1990, the private sector and the heads of key agencies are brought together in a forum in which they can serve as advocates for the coordination of policies that affect the labor market but which are independently developed by a broad array of agencies. Also in this forum, current labor market programs may be assessed as a whole to determine whether they can adequately meet the emerging needs that are indicated by labor market trends—worker dislocation and skill shortages—and demographics—high illiteracy rates and increasing numbers of disadvantged and minority youth.

One, is there a need for such a mechanism at the Federal level? If so, should any modifications be made to S. 1990 or are there alternative mechanisms to perform this function?

I welcome all suggestions for improvements to S. 1990, changes or alternatives, especially if they can be made in conjuction with concrete examples of the need for better coordination or private sector involvement. I would like to see this request for information widely distributed by national, State, and local organizations. The responses I receive will be compiled for use in further discussions.●

AN OPEN LETTER TO THE SOVIET ACADEMY OF SCIENCES ON BEHALF OF ANDREI SAKHAROV

● Mr. MITCHELL. Mr. President, today I join my colleagues in honoring Andrei Sakharov. Physicist, activist, and hero of the international human rights movement, Mr. Sakharov shall

not be forgotten—despite the illegal efforts of the Soviet Government to isolate and silence him.

In an effort to be of assistance to Mr. Sakharov and his wife Elena Bonner, I have written a letter on their behalf to be sent to Mr. Sakharov's colleagues in the Soviet Union. Top officials of the Soviet Academy of Sciences enjoy direct access to the Government of the Soviet Union and could discuss Mr. Sakharov's case with the KGB. Copies of the letter will also be sent to other important Soviet officials. At the present, such public attention is Andrei Sakharov's only form of protection from the actions of the Soviet Government.

I ask that the letter be printed in the RECORD.

The letter follows:

U.S. SENATE,
Washington, DC, May 21, 1986.

ANATOLIY P. ALEKSANDROV, D.PM.S.,
President, Academy of Sciences, U.S.S.R., Leninskiy Prospekt #14, Moscow 117901, U.S.S.R.

DEAR DR. ALEKSANDROV: I am writing to you today to urge you to do all you can to help your colleague, Dr. Andrei Sakharov, who now languishes in internal exile in the city of Gorky.

Dr. Sakharov is well known in the West as both a scientist and an activist in the area of human rights. His basic research into the peaceful uses of thermonuclear energy and his insights into the possibilities of proton decay are invaluable contributions to the body of scientific knowledge. His commitment to the linkage between scientific progress, world peace and human rights, for which he was awarded the Nobel Peace Prize in 1975, has made a permanent impression on the people of the United States.

The isolation of Dr. Sakharov from his colleagues, family and friends is tragic. The world is being deprived of one of its great minds and those close to Dr. Sakharov are suffering great personal hardship. All the more terrible is the fact that Dr. Sakharov is forced to live in Gorky in violation of the Soviet constitution. He has never been convicted of any crime nor has he ever been tried. The decree of the Presidium of the U.S.S.R. Supreme Soviet which banished him to Gorky has never been seen—probably because it would be unconstitutional.

The Congress of the United States has declared May 21, 1986 "Andrei Sakharov Day" to honor Dr. Sakharov on his birthday for his contributions to the world community and to draw attention to the nature of his current situation. We understand that you, as President of the Academy of Sciences of the U.S.S.R., enjoy direct access to the leaders of your country. Won't you do all you can to help a valuable colleague and an important member of the world community?

Respectfully yours,

GEORGE J. MITCHELL,
United States Senator.●

VIEWS OF ECONOMIST ELIOT JANEWAY

● Mr. MOYNIHAN. Mr. President, we all know Eliot Janeway for his distinguished work in economics and journalism. He is, of course, a man of many talents. On May 4, he showed us another: Eliot Janeway preached a sermon—a fine sermon about our children and the economy—at the Unitarian Church of All Souls in New York City.

Mr. President, it is not unusual to hear cogent economic and political arguments from Eliot Janeway. It is somewhat unusual to hear his arguments from the pulpit. In any event, Eliot Janeway's words deserve our fullest attention, and I ask that the text of his sermon be printed in the RECORD.

OUR ECONOMY IS AS HEALTHY AS THE CHILDREN WE REAR: CAN WE AFFORD TO ABANDON THEM?

(Sermon preached by Eliot Janeway)

A sense of inspired duty accompanies me to this pulpit, distinguished by the worthy son of Senator Frank Church, my late comrade in arms in the cause of peace. All of us remember the missionary spirit Senator Church injected into the tawdry world of the political game. All of us see the leadership role Forrest is reasserting for religion. The tradition established by the statesman father lives on in the work of the evangelical son.

But in paying my respects to the pragmatic charisma Forrest personifies, I confess to feeling some professional concern over the competition he is giving to us writers. Selfishness prompts me to hope that he will continue to give away his wisdom from the pulpit, and not compete with harassed authors in selling it at retail. Of one market forecast, however, I have no doubt whatever: runaway success as a best seller for his new book, The Devil and Dr. Church. I am here today to claim equal time for Forrest's wily and resourceful silent partner. I boast certain qualifications to speak in behalf of this universally maligned fellow-traveler of Forrest's.

When modern society was being born, Spinoza gave it a birthday present in the form of his monumental Tractatus Thelogicus-Politicus, secularizing the medieval concept of the Heavenly City. We are overdue for a Tractatus Theologicus Economicus. Religion in America is alive, if not necessarily well. Economics may or may not be alive; at best, however, it is not well. If you don't believe this yet, you will by the end of 1986.

The economy is tapping out a message for you. We have all heard about the business cycle and how it does or does not work. But I can tell you one thing about the way we work when it doesn't: we go activist. The time has come for us to do so again. The performance of our economy is failing to heal the wounds in our society. Instead, the wounds in our society are infecting the fiber of our economy.

Our economy and our government—between what they are doing and what they are not doing—are hurting millions of people. Some of these victims of our policies, and of our lack of policies, are young enough to be innocent of any responsibility for their own behavior. Others are old enough to pack a vicious retaliatory punch. So whether we know what is best for us all, or whether we merely know what is good for us alone, the message the economy has for us is surfacing into the biggest open secret in circulation. It is a worrisome one. Even Wall Street is hearing rumors that Utopia is a bit behind schedule.

Yet economics, for all its lapses, has a mission of mercy to perform for its most defenseless victims. The devotees of economics who practice politics are ignoring the dropouts from our society. The aim of this mission, in the spirit of the Tractatus Theologicus-Economicus we need, is to activate our religious institutions to render educational first aid to our victimized young. Our mission is to show how to help youngsters who cannot help themselves, and whom the economy cannot help. Our religious institutions can offer economics a challenge to regain relevance. They can join with economics in reaching across the gap that divides the earning participants in our economy from the alienated members of our society.

Having legitimized economics for use from the pulpit—at least in a dissenting version—here goes. Employability in our high-tech society depends on two stern conditions—literacy (including math literacy) and health (including preventive health).

When our high-tech society was being born, Veblen emerged as its prophet. This most distinctive of American social thinkers, this most creative of critics of the technological revolution which dominates the twentieth century, is entirely ignored by the teachers of our Yuppie MBAs. He foresaw our evolution into a high-debt society; though debt was not de rigueru in Veblen's day. Yet our economists and their political clients are still astounded to discover the high-debt consequences for our high-tech society: longer life expectancy on lowered retirement income expectancy. If you don't believe me, ask Exxon, a blue-chip legendary for being cash-rich. It has just batted up a fielders' choice to 25 percent of its work force: give up pensions or accept severance.

Increasingly, every young person literate enough to join the work force will labor under pressure to stay in it as long as health permits. Incomes are falling, but health costs are soaring, along with the cost of health insurance. The poor can't afford it; even the skilled are losing coverage. Permit this aging history buff to remind you that it was John Locke, physician by training and philosopher by vocation, who discovered that babies are born with their brains entirely susceptible to environmental impressions, and who dedicated the first Constitution adopted to this country to "Life, liberty, *health* and the pursuit of happiness." There's progress for you. We surrendered responsibility for the physical foundations of happiness before we set up our government to help us in pursuit of it. Let me call on you from Forrest's pulpit to dedicate ourselves to the pursuit of this abandoned vision of Locke's. Locke knew something that we have forgotten.

Historically, cheap and ignorant labor was deemed an asset, from early slave societies until the Victorian age. Young to work and young to the grave; the less you know, the less you need to know, to devalue the wisdom of the poet.

In our time, we have achieved dramatic progress in establishing literacy and health as requirements for employment, and in providing both. But our government has stopped buying these admission tickets for millions of youngsters deprived of family support to finance their graduation from society into the economy. Nor does our society provide meaningful standby support. Our population of single-parent families is exploding, and aggravating the problem. For the gory details, read the eloquent and searching book, *Family and Nation*, by our Senator, Pat Moynihan.

Far be it from me to enter a plea of extenuating circumstances for Gramm-

Rudman. My friend Senator Hollings, the law's co-sponsor, has a ready answer for questions about the meaning of the Act: "Ask Ted Kennedy," says Senator Fritz, "he voted for it." "BGR" (*Before* Gramm-Rudman), the money the government spent on education and health was not buying an acceptable minimum of either for our abandoned young—no more than, in Senator Church's day, the money we sprayed into the bog of Vietnam bought us victory.

If you can keep a secret, Gramm-Rudman was born dead. April 15th has come and gone without a budget. Congress hasn't waited for a second successive quarter of complaints from back home to give Gramm-Rudman a silent burial. When Congress stops talking, and starts operating, it means business. And when Congress means business, business is bad. So say what you will about how quick the members of Congress may or may not be, they were quicker to get the message of distress from the economy than the wizards of Wall Street. Not, however, that burying Gramm-Rudman will restore the cuts it decreed for education and health. Think of what happens when oxygen is cut off in an intensive care unit: the cuts are fatal, but turning on the oxygen again won't restore the patient to health.

Motivation is needed as well to make the difference. In the private sector, small business provides more jobs than big business—it did even before blue chip employers began mass-producing pink slips. Ghetto youngsters can't qualify for jobs without help. But, increasingly, small business can't pay for training or health care. Only one economic oasis in the social jungle still provides both plus security: the armed services. Aspiring young Blacks, Hispanics and Asians—of both sexes—at the secondary school level have been grasping at the opportunities opened to them by the military. Neither the private sector, nor such social programs as government still provides, are even in the running with alternative offers. Only minority youngsters already able to pass rigorous scholastic and health examinations can take advantage of this career option. But seizing it means putting on a uniform and taking orders. I am indebted to Senator Nunn's staff for the revelation that, in lackluster years, the ratio of minority enlistments remains static, suggesting that the pool of eligible minority youth is stagnant. Which tells us what a long way we have to go to get to where in our smugness we think we are. The opportunities we believe we offer are mockeries.

Once the motivated and qualified minority of minority youth find their own way out of the ghetto, only the young victims are left. Government has cut them off, and society has no solution for them. Yet their plight is an urgency for everyone in society with any sense as well as conscience.

Hence, voluntarism. Translated programmatically, voluntarism calls for a little bit of money, a great many facilities (which is one way religious institutions can lead), plus all of us who care—not just about the lost generation we are failing to rear, but about the promise we have failed to keep to provide freedom from fear, and freedom from want, from the cradle to the grave.

Having exhorted you to embrace voluntarism as the desperate but pragmatic strategy it is, let me make one thing perfectly clear, as the most eminent alumnus of Watergate used to say. Voluntarism won't solve the problem of tomorrow's employability presented by today's uncared for and untrained children. But it will advertise the need for solutions on a scale larger than any of us can provide. Even so, voluntarism is, at best, a miniature of the solution. Only the government can mount the full-fledged offensive that only voluntarism can spearhead.

Again and again, our history has vindicated today's dissenters as tomorrow's prophets. The life of Frank Church proves that. But the purpose of expressing, then acting out, our dissent is to do more than preserve our peace of mind, more than just to make ourselves feel good, more than to invite caricature of ourselves as frustrated do-gooders. It is to turn what's right into what works.

The way to do that is to open the eyes of the kids in the streets to see the lives they can make for themselves. Let us help them grasp the helping hands that can teach them skills they need to grow up into the economy. Voluntarism challenges us to motivate them to accept the boost that our government denies them but that we can begin to bring them.

But where to begin? How to reach the young victims of malign neglect? By tailoring our efforts to attract their attention. Their world is studded with rock stars, sports stars, TV stars and, yes, crime stars—all with glamour available for role modeling. I said crime stars, and I mean it. Headlines grabbed by shrewd DAs making plea bargaining deals with busted crime stars change nothing. Crime marches on, relentlessly spawning new and richer crime stars. What have we to lose if we invite DAs to take a broader view and try a new kind of deal with their wised-up catches? What's wrong with motivating these phony Robin Hoods to warn their proteges off the streets and into schools?

The starts that have been made via show biz will not help youngsters across the literacy gap or the health gap. The money the stars raise will not buy the necessary motivation or discipline. Putting it in the bank is not enough to graduate youngsters from the streets into productive and healthy lives in the economy. But money raised by stars can open an avenue for organized voluntarism. It can enlist the folk heroes of our ghetto culture—yes, including its crime stars—to catch the attention and fire up the motives of the youngsters whom the economy needs and who need the economy.

Our religious establishments are the obvious places to look for hospitality and for dedicated helpers—of course, under strict vows not to proselytize. Both the places and the people can also provide the community support long overdue for employed single parents, who are established within the economy, but who lack community support facilities for child care as well as educational opportunities, neither of which they can afford. We want a three-shift economy, worked by parents in their prime, paying taxes as trade-off for their benefits. We need community support for our full workforce to support prosperity for us all.

Nervous Nellies we will always have with us. Efforts at improvement will always be met with accusations of imperfection. Help the young, and risk complaints of indifference to the old. Protect the benefits of the aged, and risk complaints of neglect of the young. Nonsense. We have obligations to our old folks and to our young folks. We can earn wherewithal to pay these debts as we move our victimized young up the social escalator into health and employment. But if we fail to do so, our debts will get us.

The alliance between young and old is a natural match, if not made in heaven, then made to make life better on earth. The old are the teachers from whom the young are most apt to learn, without suspicion, fear or jealousy. Their mutuality of interest is financial as well as emotional, as we stand to learn the hard way the next time we return to an expanding economy. If we tolerate the present drift, the unemployability of the disabled young will run us into costly shortages and rampant inflation in the early stages of the next honest-to-God recovery. Retirees on fixed incomes will be the first to suffer.

Economic anemia is easier and quicker to cure than a social cancer. Devising new ways to get the economy moving again will take only a few of the hard years at hand. But growing a new crop of literate, employable teenagers will take half a generation from the time we start, if we start yesterday.

Ask Forrest where to begin. He is ready with a list of people and places volunteers can look to for the training they will need. Volunteers will need all the help they can get to shame the government into picking up from where they leave off. Who knows, even this devil's advocate may be able to lend a helping hand. As Senator Church would have told you, the devil speaks a language which even our sovereign truant in Washington can be made to understand.●

FREE SAKHAROV

● Mr. D'AMATO. Mr. President, today we celebrate the 65th birthday of one of the world's genuine heros, Dr. Andrei Sakharov. Both the Senate and the House have adopted resolutions designating today as "National Andrei Sakharov Day." But this is not a typical birthday celebration to mark the passage of yet another year. Rather it is a celebration of the triumph of the human spirit over the forces of repression and intolerance. Sakharov's birthday has become a rallying point for his friends and supporters.

Andrei Sakharov was born in Moscow on May 21, 1921. His father was a well-known physics teacher and author of many textbooks and popular science books. His childhood was spent in a large communal apartment where traditional values, including respect for hard work and ability, mutual aid, and love for literature and science, were fostered.

In 1945 he became a graduate student at the Lebedev Physical Institute. Three years later, Sakharov was included in the research group which developed a thermonuclear weapon. The next 20 years were spent in various research centers throughout the U.S.S.R. In 1950, in collaboration with Igor Tamm, Sakharov engaged in some of the earliest research into controlled nuclear reactions. He was elected to the prestigious U.S.S.R. Academy of Sciences in 1953.

His social and political views underwent a major evolution during the 15-year period between 1953 to 1968. Sakharov's work in the thermonuclear field was to have a profound impact on his attitudes on many issues in these areas. During the 1950's he began a

campaign to halt the testing of nuclear weapons. His initial involvement in human rights issues date back to the late 1960's when he made a series of appeals on behalf of victims of Soviet repression.

A detailed statement of his views on these matters was included in his essay entitled, "Thoughts on Progress, Peaceful Coexistence, and Intellectual Freedom," which was published in 1968. Sakharov has noted that the essay was a real turning point. It received widespread attention in the West and became the subject of increasing criticism in the Soviet press. Official reaction included termination of many privileges previously enjoyed by Sakharov and his family. In addition, he was barred from work on classified projects. Nevertheless, he continued to speak out openly in opposition to Soviet human rights violations.

In 1975, Andrei Sakharov was awarded the Nobel Peace Prize. The citation issued by the Nobel Committee recognized Sakharov as a "spokesman for the conscience of mankind."

On January 22, 1980, Sakharov was detained by Soviet officials and informed that a decree of the Presidium of the Supreme Soviet had stripped him of all decorations and awards. Furthermore, he was told that an order had been issued to banish him to Gorky, a city off limits to foreigners.

This illegal act represents an attempt by Soviet authorities to isolate Sakharov and his wife, Yelena Bonner. Together, they have been subjected to constant harassment by the KGB and denied their basic human rights. For example, they are prohibited from leaving Gorky without official permission, from meeting or corresponding with foreigners, even with family members who live abroad, and others. Sakharov is also required to report regularly to the local police.

Meanwhile, the Kremlin has orchestrated an extensive disinformation campaign designed to divert Western concern over Sakharov's well-being. This effort has failed miserably and only raises additional questions regarding Sakharov's plight. In an appeal to the West, Sakharov has asked that "the government leaders in States signing the Helsinki Final Act, * * * defend me on legal and humanitarian grounds and to oppose new acts of repression."

Their brutal treatment of Dr. Sakharov and many others, who dare speak out in defense of human rights, is a clear demonstration of the Soviet leadership's disregard for human rights commitments which they have voluntarily accepted. It also raises serious questions regarding the Kremlin's willingness to live up to other agreements, particularly those in the area of arms control.

Mr. President, I request that the text of an article by Yelena Bonner describing her husband's travail be printed in the RECORD.

Mr. President, as Chairman of the Commission on Security and Cooperation in Europe, I pledge to continue to speak out until Sakharov is allowed to return to his home in Moscow or emigrate. Perhaps the Soviet authorities will permit Sakharov to celebrate his next birthday in freedom with his family.

The article referred to follows:

YELENA BONNER: MY LIFE WITH SAKHAROV

(By Yelena Bonner)

During my five-month visit to America, there have been many receptions, lunches, dinners, and serious conversations about my husband Andrei Sakharov and his ordeal. The questions vary, but sometimes it is abundantly clear that the questioner knows nothing about him. The questioner doesn't even know why he came to ask his question. Everyone was asking, so he asked, too.

It's that way back home in Russia, when you see a line in the street. That means something has been put out for sale, so you get in line, too. You don't know what they're selling. And the people ahead of you don't, either. It doesn't matter, you'll figure it out later.

But even friends who know quite a lot about Andrei ask: "Who takes care of Andrei while you are here?"

No one. He is alone, Alone, He cleans up, mops the floor in the kitchen, does the laundry. He goes to the store, buys food, brings it home and cooks it. He eats alone, then washes the dishes.

"Does he really know how to manage?"

Yes, he knows. And it does not bother him. He does not think that household chores divert him from "eternal" and "immortal" matters. He respects such tasks, and is willing to help even when I am home, sometimes snatching work right out of my hands. It is in fact important to understand his attitudes toward people. Just as there are no little people or unimportant lives, there is no insignificant work.

He gets annoyed when someone asks: "Andrei Dmitrievich, you are such a great man you need peace and quiet. Why should you risk your health going on hunger strikes for Liza and Yelena and Bukovsky and Ogurtsov and Moroz?" He finds it difficult to reply to people who do not understand the roots of his behavior.

Sometimes people have asked him: "Why bother writing about some Jew who would like to emigrate?" Such questions he finds offensive, and he is puzzled that people who have met him do not know him at all.

He approaches household matters and everyday life with the same simplicity and respect as he does people. But it is difficult for him to be alone. He does not have time for everything he wants to do. Things require much more effort than they do in America. Sometimes he lacks the physical strength to cope.

"And when you were living alone, was your life like that, too?" people ask me.

"Yes, just like that."

"How did you manage if you needed six cardiac bypasses?"

I managed. I did what I could. Two years ago I could not wash the windows before I sealed them for the winter. I washed them last summer, but I was feeling worse again in the fall, so over the winter they were dirty. I have money to pay a window cleaner, but I am forbidden to have contacts with people.

One day my television set broke down. I found the telephone number of a repair shop in the phone book and went outside to call. I did not have to look too far for a pay phone; the first two were out of order, but the third was working. I was still dialing the number when my secret service escort (or KGB agent—I don't know what to call him in order to avoid being accused of slander) pulled open the door and held down the button. He chewed me out, saying I knew very well that I was not allowed to use the telephone. Then he agreed to tell his boss that I needed a television repairman. Two days later the policeman who stands guard at our door politely told me: "The repairman is coming tomorrow."

"Why did you have to go to a pay phone? Can't you call from your house?" people ask.

We have no phone in our apartment. Academician Sakharov has been living in Gorky for six years without a telephone. There have been times when I needed urgent medical assistance, not a television repairman. Andrei would have to run outside, even in freezing weather, to look for a phone booth. In winter, still fewer work properly. But now he is alone, and I don't know what would happen in case of a medical emergency.,

In Soviet-made films shown in the West, Andrei speaks quite a bit on the phone. It is a deliberate attempt to convince the audience that he has a telephone. While I have been in America, they have allowed us the luxury of speaking to each other. Andrei is summoned to a telephone center, but not the usual one for international calls. Post Office 107 is specially equipped with a hidden camera, and the films have demonstrated how easily, with no regard for the law, they listen to and record conversations between a husband and wife. I don't know who makes the movies, but I think the sequences exposing our family affairs to the whole world are anti-Soviet. In any democratic country, where the law protects the individual and not the state, Andrei and I would win a court case against the anonymous peeping Toms who direct the films and the government officials who authorize them. Remember Watergate. A President was forced to resign because of wiretapping.

"Do you listen to the radio?"

Yes, we do. In order to turn in, we travel to the extreme edge of town, to the racetrack or to the cemetery. There we can pick up some Western stations. It isn't bad in spring and summer, but it is cold and windy in winter. The days are short; we don't like to drive at night because the roads are often not clear—you can see that in one of the films the authorities made—and they are slippery. So we seldom listen to the radio in winter.

"Why don't you listen at home?"

Because it is jammed. In our house, or at least in our apartment, since I don't know about the rest of our 10-story building, some device has been installed which prevents us from listening to the radio, which interferes with our television reception and also with our phonograph. The jamming occurs around the clock. We have tested it morning, afternoon, evening and night.

Is it harmful for your health?"

Andrei has thought about this and does not know. I don't understand such things at all.

"Can you read newspapers and magazines?"

All the Soviet ones we want. The Western magazines which we had managed to collect over four years, among them issues of Newsweek, Time, Paris Match, U.S. News and World Report, were all taken during the search of May 8, 1984. They have not been returned, nor have our clippings from Western newspapers. Even our Soviet press clippings were confiscated.

"What else do you read?"

Andrei does not read a lot—I am speaking about belles-letres where he usually follows my recommendations. He spends more time on scientific journals and reprints. I read a great deal, mostly Soviet intellectual magazines, both fiction and non-fiction; they contain much that is interesting. I also read books. While I was able to go back and forth between Moscow and Gorky, I would get English and American detective stories. My English is not up to more serious reading, but I am quite able to understand my favorite heroes, Nero Wolfe and his sidekick Archie the ladies' man. I also read Agatha Christie and John le Carre (difficult for me), among others. Occasionally, Andrei also reads English mysteries.

"Where do you get the Russian books and magazines? Do you buy them?"

Some newspapers we simply buy. We have yearly subscriptions for most of the literary journals and the newspapers. Subscribing is rather complicated in the Soviet Union, because many publications are "limited." That means that there is a ceiling on subscriptions and very few copies ever appear on sale. This may seem astonishing to people in the West—there are willing customers who cannot buy what they want, but that's the way it is. I don't know if there is any other explanation for the limits besides the paper shortage, but often the limits are on the most popular publications. There is also a shortage of books that people would want to buy.

Andrei Dmitrievich and I have no problem getting subscriptions, and we can order practically anything we want, with the exception of the magazines America and England. That is because I am a war veteran, and war veterans may subscribe to whatever they desire without worrying about limits. All I have to do is show my papers and pay for the entire year. For 1986 I spent nearly 500 rubles on subscriptions—and by Soviet standards, especially bearing in mind the low prices of our publications, that is a lot of money. As the saying goes, "Read until you can't stand it."

We have no problems with obtaining books, either. As long, as Andrei Dmitrievich is an academician, he may order many of the books published in the U.S.S.R. from the Academic Bookstore in Moscow. In the past, we used to go there every month and what a pleasure it is to dig around in books! The two of us were like Karl Marx, who when asked, "What is your favorite pastime?" replied: "Digging around in books."

Now we order books from the Academic Book catalogue and receive them by mail. That's less exciting. And for some reason, the best books often don't reach us. On the average, we order 25 to 30 rubles' worth of books a month. Books and magazines are the luxury of our life, just as they had been in my life before I met Sakharov.

Besides the things necessary for everyday living, we have made few purchases in our year's together. In Moscow we did not buy any furniture except for some things for the kitchen and the bed we slept in. In Gorky, I bought a desk, a book shelf, a table and a few table lamps. We have not purchased a single carpet or crystal objet d'art (material, albeit superficial, indicators of life-style in our society). And we're not overly extravagant in terms of clothing, either. Look how far the question of reading material has taken me. But I think that the reader, interested in much or even in everything about Andrei Dmitrievich, will forgive me.

"What is the food situation in Gorky?"

It's not catastrophic and probably very much the way it is in any Soviet city other than Moscow or Leningrad. I will simply list what there is in the stores—not even in stores in general, but in the one where we market. It is located two or three blocks from us, perhaps a bit more. The return trip is uphill, and carrying groceries is too much for me since my heart attack. So I drive to the store. Andrei usually walks.

The grocery store always has sugar, tea (very poor quality), salt, some sort of cookies, rice, vegetable oil, several types of candy, semolina, and sometimes other grains and macaroni, but there has not been any buckwheat in the last six years. There is no butter, they do have margarine, sometimes cheese, almost always eggs. As for other food products—meat, chicken, sausage, fish—when they appear, so do long lines.

The dairy store almost always has milk and yogurt in the mornings, and often has cottage cheese and sour cream, and sometimes regular cheese. The vegetable store sells potatoes, carrots and beets, and very rarely squash or cauliflower. Apples, grapes and other fruits create very long lines—especially for bananas or oranges. There are always juices.

The bakery has bread, black and white, during the day, but runs out in the evening, especially on Fridays, when people shop for their weekend trips to the country.

There is also a wine and vodka shop. They don't always have vodka, and long lines form when it's on sale. As a war veteran, I can shop without standing in line, simply by showing my papers. I sometimes use(that right, especially to buy cottage cheese or fruit. Once I used it to purchase vodka. In the summer of 1985 I had lost weight drastically and developed abscesses under my arm. Concerned that the infection might spread, I decided to disinfect the skin thoroughly. Neither alcohol-saturated pads nor alcohol is available, so I went to buy some vodka. I picked the wrong day, a Friday, and the line was long. I took out my papers and people let me through to the front of the line. I asked for a bottle and then for two—it would save me a trip if the infection spread. When I came out of the store, a bottle of vodka in each hand, my KGB escort said, "Yelena Gaeorgiyevna you don't use to drink, did you?"

"You'd drive anyone to drink."

I don't know whether he believed I had taken to drink or not. But this was during the gloomiest days of June 1985.

Gorky has several outdoor farmers' markets. On the average, the prices are three times what they are in the stores, and for some items, even higher. For instance, meat in the store costs 2 rubles a kilogram and between 6 and 8 rubles at the market. Potatoes in the store are 10 kopeks a kilogram and 30 to 50 kopeks in the market. Cottage cheese is 1 ruble at the store and 4–5 rubles in the market. To all intents and purposes, berries and certain fruits and vegetables exist only at the markets.

In the winter, the selection is very poor, and in order to get anything at all, you must arrive before eight in the morning. I always oversleep. In the summer, the market is much more festive—there are flowers, berries, and colorful fruits, primarily from the southern republics.

But the prices are horrifying. On a television program for New Year's Eve 1985, one of our comics joked that the Division for Combatting Embezzlement of Socialist Property would do well by arresting anyone shopping for melons or pears at the market; they would never go wrong, because no one can afford them on his salary alone. That's an exaggeration, of course, but there is a grain of truth in it, even though I see many shoppers at the markets.

Once again, my status as a veteran of the Great Patriotic War (World War II) allows us not to worry too much about groceries. Every city has special stores for this category of people. When I was exiled, I requested that I be put on the eligibility list of one of these stores. Before that, I used to bring almost all of our groceries from Moscow. Once I was assigned, we visited the special store twice a month to pick up our allotments.

Each allotment includes 1.5 kilograms of meat, one chicken, 1 kilogram of fish, buckwheat groats, peas, mayonnaise, 600 grams of butter, canned goods and a half kilogram of cheese. That food order really helps us out—especially in winter.

As I said, we used to go twice a month. But it was a form of social contact—with other customers, with the salespeople—and so we were forbidden to visit the store. Now the order is delivered to our apartment. Unfortunately, the privileges accorded veterans of the Great Patriotic War are not extended to other handicapped persons, who could use this sort of help to alleviate the hardships of their life.

One of the most frequent questions: "In the past, Andrei Dmitrievich did not want to emigrate. What is his attitude now?"

It seems to me that as soon as Andrei began to have contacts with journalists in 1972, they started asking this question. We were living on Chkalov Street, never suspecting that we would wind up in Gorky. Andrei would reply in a few words, most often in one brief sentence: "I don't discuss hypothetical situations."

In 1973 he received his first invitation to spend a year at Princeton University as a visiting professor. He accepted with thanks, but said he was not ready to emigrate and he was not preparing to do so. He added that he did not consider emigration possible for himself and gave several reasons why. This conversation was not reported accurately by the correspondent who discussed the invitation with him; the second half was simply omitted. To the best of my recollections, Andrei did not make any official attempt to go to Princeton.

When he received the Nobel Prize, he applied to the Office of Visas and Registration (OVIR) for a visa and was refused.

In 1977 he accepted an invitation to attend the AFL-CIO convention in America, although he did not reach OVIR in the application process. The Academy of Sciences did not issue one of the needed documents, so it was impossible to proceed.

In early 1983, Andrei received an invitation from the Norwegian government to take up permanent residence in Norway. The invitation was sent at the behest of the Norwegian parliament and all of the parties voted for it. Andrei replied to the invitation with the following letter:

To: The Norwegian Government

I accept with gratitude the invitation of the Norwegian government to move with my family to Norway for permanent residence. Any possibility for my departure from the USSR depends on the decision of the Soviet authorities. I was earlier (1975 and 1977) denied permission to take trips abroad and reference was made to the secret character of my work until July 1968. I hope you will ask the authorities about the possibility of my departure at this time.

In the case of a refusal, I hope the Norwegian government will support the following request which is of vital importance for our family. In September 1982, my wife Yelena Bonner submitted an application to travel to Italy for ophthalmological treatment including possible eye surgery. Her eye disease is the result of a concussion she suffered at the front during World War II. Because of the special conditions under which we live, medical treatment in the USSR is not possible. . . .

Respectfully,

Andrei Sakharov.

"What is your attitude toward the reports that your husband will be exchanged soon?"

My attitude is negative—not toward an exchange but toward the reports. I consider them disinformation. I think the story about an exchange on May 18 appeared in the press to make people forget that May 21 will be Andrei Dmitrievich's 65th birthday and to deter the kind of open and solemn ceremonies which have marked that day in past years.

"Are you planning to return to the USSR and, if so, when?"

I am planning to return and have even drawn up a list of the things I should buy, although I have not yet made the actual purchases. I expect to fly back toward the end of May.●

BONNER'S RETURN TO EXILE

● Mr. D'AMATO. Mr. President, I rise today to focus attention on the case of Yelena Bonner, wife of Nobel laureate Andrei Sakharov, who will soon rejoin her husband in exile in the closed city of Gorky. The Moscow Helsinki Group, organized by Bonner and 10 other Soviet human rights advocates, was established on May 12, 1976. The primary purpose of the group was to promote human rights in the U.S.S.R. and monitor Soviet violations of the Helsinki final act. Soviet authorities arrested Bonner, a founding member of the group, and charged her with "slandering the Soviet state" in 1984 in connection with her human rights activities. She was subsequently sentenced to 5 years' internal exile and permitted to join Sakharov in Gorky, where he had been banished since 1980.

Soviet authorities have arrested, detained, imprisoned, and exiled other group members as well. These harsh reprisals underscore Soviet contempt for the concept of human rights and for those who speak out in support of these rights. In addition, they highlight Soviet disregard for their human rights commitments, especially those included in the final act, which they have voluntarily accepted.

Mr. President, I request that a brief biographical sketch of Yelena Bonner, as well as a recent article by her, be printed in the RECORD.

Mr. President, as Chairman of the Commission on Security and Cooperation in Europe, I commend Yelena Bonner for her steadfast commitment to human rights and dedication to the principles contained in the Helsinki accords. Perhaps one day soon she and her husband, will be able to live in the comfort of their own home, free from the constant harassment they face in Gorky. Until that day, let us persist in our efforts, both public and private, to secure their freedom.

The material referred to follows:

ELENA GEORGIEVNA BONNER

In 1937, Bonner's father, Gevorg Alikhanov, head of the Comintern Employment Section, was shot. Her mother, Ruf Bonner, was tried in December of the same year for the "crime" of being married to an "enemy of the people." She subsequently spent 17 years in labor camps and exile until she was rehabilitated in 1954. Elena moved to Leningrad to live with her grandmother during this period.

For one year before the war, Bonner studied at the Philological Faculty of Leningrad State University. During the war, she served as a nurse aboard a medical train. Bonner was wounded on the battle-front, leading to loss of vision in one eye and progressive blindness in the other. She graduated from the Leningrad Medical Institute in 1954 and practiced medicine in Leningrad clincis until 1961, when she moved to Moscow and took a position at the Medical School for Nurses there.

Bonner became a member of the Communist Party in 1965, but withdrew from membership in 1971. She married Andrei Sakharov on August 7, 1971.

She is an invalid of the second category due to contusions she suffered during the war. These wounds have engendered a serious eye condition which led to her retirement from the medical profession in 1971.

In 1975, Bonner traveled to Oslo to accept her husband's Nobel Peace Prize. This was the first of several trips to the West for medical treatment. In 1983, she suffered her first heart attack. Despite her declining health, Bonner has been denied permission by the Soviet authorities to obtain treatment in the West.

In 1984, she was arrested, tried, and sentenced to 5 years of internal exile for "slandering the Soviet state." Her term of exile is being served in Gorky, the closed city where her husband has been banished illegally since 1980.

After several delilitating protest hunger strikes, Bonner was finally permitted to go to the West for medical treatment in late 1985. She has also visited her mother, children and grandchildren in Massachusetts, while appealing to the Soviet authorities to allow Sakharov to return to Moscow or emigrate.

[From the Washington Post, May 18, 1986]

AMERICANS DON'T WANT WAR—THEY WANT HOUSES, WITH YARDS, AND SO DO I

(By Yelena Bonner)

I am convinced that Americans want peace. I don't know about America—I'm not a specialist, like the schoolchildren who travel around the world on peace missions and can explain everything about rockets and so on. But while I am not as competent to judge, I maintain that Americans do not want war.

What Americans want is a house. No matter their place on the social ladder, their salary, capital, inheritance, winnings in the lottery or on the stock market (for me with my lack of education in these matters it is almost one and the same, even though I do know that people win more frequently—and lose more frequently!—playing the stock market than the lottery), they want a house of their own.

They want a house and the ground it stands on, and a surrounding bit of land. That's all. Some own a tiny house, like a toy cottage, and only the soil is in their flower boxes; others have lots of bedrooms, baths, and extensive lawns. The desire to own a house is not a class ambition; it encompasses upper, middle, upper-middle, or lower-income groups, and is an expression of a national trait, a desire for privacy.

Even one of New York's homeless, huddling in a blanket over a grating, will be insulted if you invade his privacy. A house is the symbol of independence, not even a material one, but some sort of combined spiritual and physical independence. The American feeling about his house expresses the main traits of Americans—the desire for privacy and independence. But that attitude gives rise to a third trait, "my house is my pride and joy."

And from that comes "My city, my state, my country is my pride and joy." There is no aggression or parochialism in that attitude. It is open and kind and caring both toward the house and toward everything that it stands for, the soil in the flower boxes and the lovingly-tended lawn, even if it's only three yards square. And, I say this shows that Americans care about land in general and about the whole world. Only the other day my son told me that according to a poll, 43 percent of all Americans prefer growing flowers to any other outdoor pastime.

Americans do not want war. They want a house. The first lady says that when the president retires, they will sell the house in which they lived before the presidency. The children are grown and the place is too big for them, so they will buy a smaller house. A wonderful plan! And it's wonderful that the whole country knows it. The president doesn't want war, he wants a new house.

I also want a house, in addition to my usual wants that everyone be together and healthy and that there be no war. With enough land around it, and no more, for me to plant flowers. For the sake of nostalgia I could grow an ordinary Russian cornflower and an ordinary Russian daisy and a single birch tree. But to tell the truth, I find nostalgia a form of play acting.

I don't need a lot of bedrooms, just one for us and one for mother, a guest room and one more so that I'm always ready for our grandchildren. And I'd like a room where I could at last spread out my books and where Andrei could make a mess. What nonsense I'm writing! I want a house! This is me, who should be counting the days, no, the hours of my freedom to do what I want, even to type this freely, to type all my unattainable nonsense, such as "I want a house."

But you know, I'm sixty-three, and I've never had a house; not only that, I've never had a corner I could call my own. I started out like everyone else: a normal childhood, but then came a strange orphanhood—father and mother arrested and no one

knowing whether they were alive or not. I lived in a single room with my grandmother, brother and sister. On the other side of the wall (we could hear everything) lived a man named Fyodorov with his wife and four children. When he got drunk he beat them. If they managed to get away, they would spend the night with us, sitting on the old trunk. Fyodorov never broke into our room. He was afraid of grandmother—everyone was afraid of her except me. I had my own fears, of course, but ever since my parents' arrest, I have never allowed myself to show my dread of anything.

Then there was the army. I guess there was a time when my "house" was a compartment in the hospital train, where I was head nurse. The war ended, and many people shared my room with me, like girl friends in Leningrad after the evacuation was over. Later, we had a room in a communal apartment—my first husband, two children, my mother, and I; often we had friends staying the night. There were 48 people in one apartment, and one toilet.

Later in Moscow, we had two rooms in the apartment where my mother, the children and I lived, and then we were joined by my son-in-law, and then by Sakharov. I think that the first time I was mistress of my own place was—it's hard to believe—in Gorky, in exile.

I do not want that. I want a house. My daughter has a house in Newton, Mass. It makes me so happy to think that she has a house. Her family is caught up in our affairs, in our Gorky horrors and suffering, and our cares. They have forgotten the pleasure of their house. I want them to go back to caring about it. It has done so much for them—my daughter and her husband and their two children have been living in the house since their arrival in 1977. My son came there, followed by his wife, and their daughter was born there. Two families shared the house in a most un-American way—it was almost a communal apartment and it had almost a third family: my mother arrived and the impossibility of going back to Russia has kept her there close to six years. Where else could she go—to live in exile in Gorky?

My dream, my own house, is unattainable for me and my family—that is, for my husband and myself, as unattainable as heaven on earth. But I want a house. If not for me, then for my son and his family. My son and I plan to buy one. And I am learning many new things. The house should be near good schools, my grandaughter is three and schooling is not far off in the future. It should be in the suburbs—vacations are short and a child should not have to grow up in a polluted city. It should be close to their work—both parents have jobs and there is only one car. It should have a full foundation and basement (I had never known such considerations to exist). It should have three bedrooms so that my mother can be with them, or at least visit. It should have a room and bath in the basement for guests. It should have a studio—Alyosha wants more than a house, he needs a workroom for his mathematics. But the cost is . . . oh! I want, I want, I want. More than the children, I want. But it's time for me to pack my bags. Not tomorrow, but very soon. The children live here, I live over there.

My time here has been a highlight of my entire life. For instance, I went to the Virgin Islands. I had never seen a climate like that near palm trees—coconuts really do fall! My bare feet had never felt sand like this. This warm and quiet sea splashed just twenty steps away from me. I would call it paradise, but paradise is not simply a question of climate, or sand, or sea, or even apples (or pears—that historical argument from the Garden of Eden has yet to be solved). Paradise is being with people you love and treasure and not worrying about them. I wish Andrei were here. I wish my mother could sit in a rocker in the shade near those sweet, sleep-inducing oleanders, and I wish I could pick up the phone once a week and hear the calm voices of my children. Paradise, it turns out, is so simple and, it turns out, unattainable for me.

Long, hot hours on the white, hot sand; the sea—light blue, dark blue, turquoise. The bay is small—even with my ailing legs I managed to wander all the way to its left point one day, and to its right on another. I will always remember that arc, a smooth edge of sand, and the sea, which doesn't roar, but whispers, babbles, I'm afraid of lapsing into sentimentality (I think I already have, in fact), but I've never seen such a sea . . . it has such tranquility.

Perhaps I have grown more tranquil here. I am grateful that I was invited to that island and that it was so simple to give me five days to catch my breath, to work, and to have peace. Maybe those days let me regain my senses—to stop losing my temper with my family; to understand that I can change nothing or correct nothing; to stop tormenting my heart (the six bypasses may not be able to take it) and the hearts of others—hearts I love.

My husband told me just five months ago (God, I haven't seen him in five months and want to be with him so much), "The world is further away from war than it has been in a long time." I believe him, and on that score, I live calmly, especially since I have more than enough worries, cares, and misfortunes of my own.

What difference does it make if Gorbachev and Reagan meet in June or some other month? What difference does it make which of them is being cranky? first Gorbachev plays hard to get, like a girl invited for a date, pouting, considering; "I don't know, I have to think about it, probably not." Then Reagan sounds like a jealous girl, "It's her or me. Now or never." A recent newspaper article set me thinking along these lines, actually, all three are alien to me—the newspaper and the two governments. I must be one of the world's least interested people in the problems that Reagan and Gorbachev are threatening to discuss or not discuss, when and if they meet or don't meet.

I want a house. I don't want war. Americans want a house, too. Americans don't want war.

So now with my surgically repaired organ of feelings and circulation I am writing in a hotel in New York, which is simulataneously a city and a country and a world. I am on the eighth floor in a corner room. One window opens on 61st Street, the other on Central Park. In two directions, unfolding from an angle, stretches a panorama that needs nothing added to it. Against the blue of the sky are the gray silhouettes of buildings that piece it (light gray in the sun, darken in shadow), lines, lines, lines. How can anyone say that New York is not beautiful? For me it is the city of cities, ready for the future.

Today I saw something amazing from the windows of this room.

I got up early, a bit after six. The haze of burgeoning buds barely showing over the trees, and the grass had not yet taken on a greenish hue. It was still yellow, the color of grass shoots. And now it's noon, and there is a delicate green smoke over the trees and the grass has turned green, a tender, tender green. So quickly, spring came in six hours. Lord, I want the whole world to feel this good. They say New York is at its best in springtime. And now I'm going downstairs into the city.●

NEEDS OF INDIGENT CITIZENS

● Mr. DANFORTH. Mr. President, following a recent trip to Springfield, MO, the distinguished Senator from New Mexico [Mr. DOMENICI] brought to my attention a series of articles concerning the needs of indigent citizens who are mentally or emotionally disturbed. This sensitive and insightful series addresses a broad range of issues and presents a disturbing picture of the limits on our ability to help some of the most unfortunate and troubled Americans. I commend these three articles by Sarah Overstreet of the Springfield News-Leader to my colleagues, and ask that they be printed in the RECORD.

The articles follow:

[From the News-Leader (Springfield, MO), Apr. 6, 1986]

SAFETY NET MISSES INDIGENT MENTALLY ILL

(By Sarah Overstreet)

Until this year, Janet and Helen lived on the streets of Springfield.

Both women are seriously and chronically mentally ill. Both receive small government subsidy checks. Until they were taken in by a group of Franciscan nuns and the Springfield parish of the Catholic Church, which bought the old Missouri Hotel on Commercial Street to run as a boarding home for indigents, the women followed the same routine every month:

On the day they received their checks, they would take some of the money and get drunk. A day or two later they would come into the sisters' soup kitchen, bruised and penniless from being robbed and beaten. Intermittently, they would gain a warm place to stay by turning to prostitution.

Janet and Helen (not their real names) are among the many indigent mentally ill in southwest Missouri who are slipping through the holes of a bureaucratic safety net.

Over the last 30 years, state institutions have gradually relinquished care of people like Janet and Helen. But the states have been sporadic about providing mental health care in communities, which were to assume the care the institutions relinquished.

Without the constant supervision of the institution, hordes of mentally ill patients have disappeared from the system, often turning up among the numbers of homeless "street people."

Lacking any kind of formal supervision and too ill to keep up medicines that control their illness, they often receive no care unless it is undertaken by charitable organizations.

Such is the care administered by the Franciscan nuns and the Catholic Church.

Of the approximately 325 needy people cared for at The Kitchen, the meal distribution center operated by the sisters at 420 E. Commercial St., Sister Lorraine Biebel esti-

mates that at least 10 percent are in need of some kind of psychiatric intervention.

She can only guess because these are the people whose histories are hardest to trace. In our metropolitan areas, studies have indicated that approximately 50 percent of the cities' skid row populations are chronically and seriously mentally ill. Of those, 75 percent suffer from schizophrenia, a biochemical disease that manifests itself in delusions and psychoses.

From the sparse biographies Biebel has been able to glean from the people she serves, she has found that some of them have been in mental institutions in the past.

Psychiatric professionals agree that these people are not derelicts or winos, or individuals who simply do not want to work for a living. They are people whose mental illness causes them to have serious trouble providing the basic necessities of life for themselves.

When indigents in Springfield have needed hospitalization for crises stemming from their mental illness, Biebel has been able to arrange it through the Burrell Community Mental Health Center. The Missouri Department of Mental Health allots six beds in Springfield for hospitalization of mentally ill indigents in crisis.

But there are no services in Springfield for mentally ill indigents who need chronic custodial supervision. Biebel and others from the Catholic Church have tried to fill the void, but it's a difficult job. Missouri law makes it illegal to involuntarily commit a mentally ill person for hospitalization unless the person is dangerous to himself and others.

Uncooperative mentally ill indigents can go where they want, and often get into trouble.

"No matter how obnoxious or out-of-control they get, we can't do anything unless they are dangerous to themselves or someone else," Biebel said. "Some of them are very hard to take, but we are the only facility in town that will take them. We tolerate a lot, just to keep them off the streets."

And six beds for the indigent mentally ill apparently are not enough. The DMH projects that this area needs 105 beds.

For decades, St. John's Regional Health Center has taken in the excess. "For years, St. John's has been 'City Hospital' here, because the sisters won't turn them away," Springfield psychiatrist Dr. Philip LeFevre said.

Chris Thompson, St. John's vice president, said 17-18 percent of the hospital's yearly services are charity cases.

"When I came to Springfield in 1971, there were three psychologists in town, and we'd admit seven to nine psychiatric patients (to St. John's) a night, get them stabilized, and put them out on the street again," LeFevre said. "That has continued to the present; they're just divided up among 12 psychiatrists now."

Sometimes the indigent mentally ill seek help from other local private hospitals during crisis periods—times when they are disoriented, psychotic, perhaps even dangerous to themselves or others.

Lee Callahan is public relations director for the Alliance for the Mentally Ill, a Springfield support group of family and friends of the mentally ill. She recalls an experience that occurred while she was waiting in a doctor's office near a local hospital:

A young man wandered into the doctor's office and cowered with his thin coat around his face. Callahan gained his confidence enough to look in his bag, and saw prescriptions for drugs used to treat severe mental illness.

"The doctor's nurses ordered him out of the office, and it was freezing cold," Callahan remembers. "I went into the hall and called the hospital where the prescriptions were from, and found he had been discharged. The hospital had called a taxi to take him to Burrell, but didn't give him any money to pay for it. The taxi driver kicked him out in front of the doctor's building."

Callahan called the police, and she and officers called other hospitals and Burrell Center, but were unable to find a shelter for him.

"The police ended up taking him to a group home run by the Greene County Association for the Mentally Retarded for the night," Callahan said. "I don't know what happened to him after that."

Lt. John Brooks of the Springfield Police Department said the incident described by Callahan is not an isolated occurrence in Springfield.

"I've had some of the sergeants inform me of times when there were no facilities available for these people," Brooks said. "Our greatest problem with dealing with the mentally ill who have lost control is the resources available to us after normal working hours. We often find there is no one for us to get hold of locally."

Brooks said that there are many times when Burrell Center's allotted beds are filled, and officers have to take mentally ill patients to the state hospital in Nevada.

"One sergeant told me that more often than not, if they're not under a doctor's care or if they don't have insurance, we'll end up taking them to Nevada," Brooks said.

A trip to Nevada pulls two officers off their beats for five hours, and a dispatch call of "possible mental involved" requires three or four officers on the scene, Brooks said. Often, these confrontations take several hours, he said. "That's not without some effect on protection for the rest of the community," he said.

LeFevre said some of the people constantly bounce back and forth from dangerous episodes here to the state mental hospital in Nevada. "We had a paranoid schizophrenic kid here who set fire to his parents' house and was sent to Nevada. Two days later he was back on our doorstep, discharged from Nevada with the diagnosis of 'nothing wrong'."

In 1968, while a physician in New York City, Springfield psychiatrist Dr. Emasue Snow conducted a psychiatric study in the five boroughs of the city, in which she interviewed all the women who were arrested in one 24-hour period. She found that 45 percent were chronically mentally ill and living on the streets.

"An indigent mentally ill person is a real problem to the community," Snow said. "They're either being anti-social, setting fires, getting undressed in the road, or they're in a hospital, or they're in jail.

"I don't have any statistics on the extent of the problem here, but I know it's one we deal with, seemingly, all too frequently," Brooks said.

"Sometimes, they'll float through town, come in on a bus, and they're completely disoriented. A lot of times they'll do pretty well as long as they're on medication, but they'll come out of institutions and get only a minimal amount of medication when they're released, and run out, and don't know how to get it."

Biebel said she encountered a man who had been handed a bus ticket to Springfield from another large metropolitan area. The man had no idea of where he was or why he was here when he arrived.

The Catholic sisters at the Missouri Hotel run a health screening program in which hotel residents and low-income non-residents are regularly monitored by health professionals, and prescriptions for medicine are kept current and filled.

However, monitoring the mentally ill at the hotel is a slow and difficult process, and the sisters have just begun to assess needs and obtain prescriptions, Biebel said. "We're having a hard enough time catching up with the elderly people and those who are cooperative, so we haven't done too well with the mentally ill yet."

Area Services, Funds Called Inadequate for Mentally Ill

Treatment services for the severely mentally ill in southwest Missouri are incomplete, and funds available for treatment of the needy mentally ill are woefully inadequate, say local mental health professionals and families of the mentally ill.

Critics trace inadequacies to the late 1950s and early 1960s, when problems with the United States' mental institutions became the subject of national attention. At that time, many institutions' successes were overshadowed by stories of overmedication, cruel warehousing and outright abuse of patients.

The national Community Mental Health Centers (CMHC) Act in the mid-1960s set about to rectify the situation by getting patients out of faraway institutions and into outpatient care through mental health centers located in their own communities. The movement was called deinstitutionalization, and it was heralded as the liberation of the mentally ill.

Indeed, therapists had reason to hope for a brighter tomorrow. In 1957, a new drug was discovered that had, for the first time, a positive and controlling effect on some forms of biochemical mental illness. Even better drugs soon followed. It was believed that patients who took these miracle drugs could become functioning members of society, as long as they continued taking their medication.

Today, two decades later, critics are accusing the CMCH Act of failing the mentally ill and society in ways that are just as crucial—although different—as those in which some of the institutions failed.

What happened?

First, critics argue, the community mental health centers cannot treat those whom they cannot reach. In many states, including Missouri, laws against involuntary hospitalization—except in cases where the person is thought to be dangerous to himself or others—make it easy for seriously mentally ill people to go untreated.

Second, critics of the CMHC Act point out that when legislators implemented the act, they did not make provisions to ensure that funds would follow patients from the institutions to community treatment.

In Springfield, that criticism picks up a third factor: Compared with the need, there is very little supervised care available for the chronically mentally ill who need supervision, families of patients say.

Some services do exist in Springfield for the mentally ill in acute or "crisis" situations, but not nearly enough. However, government statistics indicate patients outnumber the available service slots.

Since the CMHC Act was implemented, patients have been released from institutions in numbers that reduced the population by as much as 80 percent in some institutions. The Missouri Department of Mental Health says statistics are not available for the 1960s, but in 1974, 3,657 patients were cared for in state psychiatric hospitals. In 1984, that number had dropped to 1, 642, a loss of almost 56 percent.

However, today the state allots money to pay for the hospitalization of only 33 psychiatric patients statewide outside its institutions, and those funds are earmarked for use only for paOients in acute situations.

The Missouri Department of Mental Health projects a need of 105 state-funded adult in-patient psychiatric beds in Springfield, but the department has been allotted only six state-funded beds—and only for patients in crisis situations, not for the care of the chronically mentally ill.

"It's absurd," says Todd Schaible, executive director of Burrell Community Mental Health Center, Inc., which has the contract to disburse the state-allotted beds for indigents here. "These people have a right to treatment in their communities."

Yet Schaible remains a strong supporter of the CMHC Act, which he believes is a sound idea that most state legislatures have failed to follow up adequately.

"In terms of state appropriations, we are way down at the bottom," he says.

Of Springfield's mentally ill who are not indigent, some are well enough to participate in group homes and supervised apartments administered by Burrell Center, which can house only 74 patients in varying stages of semi-independence.

However, many are forced to live at home with families who are often ill-equipped to cope with patients suffering devastating depressions and detachment from reality. There are no psychiatric boarding or nursing homes here.

Often, families of mentally ill members have no insurance for treatment, and private care in competent psychiatric facilities available in other regions of the state costs thousands of dollars a month.

The families of patients who need more supervision than are available in Burrell Center programs, or who are not able to get into the Burrell programs, are left with two options:

To care for their seriously mentally ill loved ones in their homes and have them treated as outpatients here.

To send them to the state mental hospital in Nevada.

However, just getting a mentally ill patient admitted to Nevada can be difficult, families say.

"It's almost as hard to get into Nevada as jail," says Wes Curtis, president of the local support group the Alliance for the Mentally Ill. "You have to prove some very sticky points. Because the old system (institutionalization) was abused, the law says no one can be admitted unless they are shown to be dangerous to themselves or others, and then only for short periods of time."

Springfield psychiatrist Dr. Emasue Snow says Burrell Center statistics for average length of stay in acute psychiatric hospital care—11 days—seems brief for treatment of a severely mentally ill person.

Severely mentally ill patients are difficult to manage even under the best hospital conditions, says Springfield psychiatrist Dr. Philip LeFevre. Caring for the family member at home is fraught with frustration, failure and the restriction of normal life for family members, he said.

Leaving a loved one in a mental institution far from home can be equally as painful.

When Wanda Donaldson's adult son began to have psychotic episodes in 1968, she and her husband decided they couldn't care for him at home with four other children to care for. They sent him to Nevada.

"It seemed worse than a prison," Donaldson, a Springfield nurse, remembers. "The patients were 'bombed' out of their minds on drugs to make them totally ineffective. One of the times my son was in, his therapist had 170 patients."

Donaldson recalls that on several occasions, her son was released from Nevada with no prior notice to the family.

"One time he called us from the intersection of Highway 13 and I-44, and asked us to come get him. Another time he was discharged, he showed up with his feet blistered and bleeding, and didn't know where he was.

"It's funny how they know how to get home, but sometimes they don't. Sometimes they disappear forever."—Sarah Overstreet.

MENTAL HOSPITAL NEED VIEWS DIFFER

Some local professionals and families of the mentally ill believe the state should build mental hospitals in several locations statewide to adequately care for the mentally ill.

Other professionals and family members fear this option, saying it would be a step backward toward the problems encountered in mental institutions several decades ago.

Building several state mental hospitals throughout Missouri, including Springfield, was one of the possible options recommended in January by consultants hired by the Missouri Department of Mental Health.

However, the state Mental Health Commission, a board of governor's appointees who direct the DMH, charged that the DMH consultants' recommendation overlooked local health care facilities already in place.

Todd Schaible, executive director of Burrell Community Mental Health Center, agrees with the Mental Health Commission. He thinks the state should appropriate money to utilize existing psychiatric hospital services here, and augment them with other needed services.

"The Mental Health Centers Act (the act that mandated community mental health centers in the mid-1960s to get patients out of institutions) was intended to create programs such as specialized services for drug abuse and adult day treatment, and to create some system of coordination for these services," Schaible said. "But the act didn't provide ways to provide for group farms and group homes for the chronically ill person. We have only begun to do what needs to be done. The money hasn't yet been spent here."

To build mental hospitals without first exploring all the medical resources already here is reactionary, simply the "easy way out," Schaible says.

Yet Springfield psychiatrists Philip LeFevre and Emasue Snow believe a mental hospital is needed here—a modern, progressive research and treatment facility.

LeFevre and Snow believe it is impossible to attract the cream of the medical crop to a community like Nevada, home of the state hospital. They favor construction of a mental hospital here, where the already strong medical community could work in tandem with a mental hospital.

Some local families of the mentally ill favor the security of a mental hospital within their own community, where patients would be supervised and cared for and where families could visit often. Others, like Alliance for the Mentally Ill President Wes Curtis, favor the establishment of extensive community mental health operations where several stages of treatment are available.

"We need a center (a hospital) that would have acute care for the chronics, those who are always in trouble; a psychiatric care home; a psychiatric boarding house; and a supervised apartment program in close proximity to the hospital," Curtis said. "They need stages they can work through."

The center should include psychosocial programs for the patients, Curtis said. There are none available in Springfield now, he said.

However, Curtis would like to see the federal and state governments out of the picture, and see local communities support programs for the mentally ill through a mill tax. He and other AMI members were disappointed when county residents voted down a mill tax last April that would have provided for the care of mentally ill. There are already mill taxes that raise funds for the mentally retarded and developmentally disabled here.

LeFevre, Snow and some members of AMI dislike the fact that severely chronically mentally ill patients are not always seen by a psychiatrist at Burrell Center, even though a psychiatrist is on call. They also object to a chronically ill patient being seen by several different clinicians, who often are not psychiatrists, during the course of treatment at Burrell.

"Schizophrenics need to have the same psychiatrist over a long period of treatment," LeFevre said. "They have a very difficult time relating to anyone, and at Burrell, they'll finally build up trust in someone, and then are taken away."

"They (Burrell center staff) are not aware of the degree of illness they're working with," Snow said. "I sent a schizophrenic patient to Burrell recently for adult day treatment, and they canceled the treatment because he was late. He was afraid to go in. He was too sick for someone to expect him to be aggressive or take any initiative for his own care."

Schaible said he had no way of knowing which patient Snow was referring to, but he thought the circumstance she mentioned was unlikely. "I don't know if she's relying on what the patient said, but we have a certain percentage of patients who cancel their appointments, and we spend a great deal of time trying to reschedule them." Burrell's chronically mentally ill patients often cancel or miss appointments, he said.

Schaible said the Burrell Center tries to keep chronic patients under the care of one primary therapist, despite the high turnover that exists in all treatment programs that depend on limited state monies for salaries.

"We are doing the best we can with the resources made available to us," Schaible said. "If we had a staff of psychiatrists, and that's where we put all our money, we'd reduce our services probably by 80 percent. And even if the monies were available to meet every need, I'm not sure this is the best use of a psychiatrist's skill."

LeFevre said despite his criticism of Burrell Center, he thinks a good state mental hospital could be administered in conjunction with, and function as part of, Burrell Center. "But I think the state should hire a

good psychiatrist to run the hospital."—Sarah Overstreet.●

NATIONAL HOMELESSNESS AWARENESS WEEK

● Mr. GORTON. Mr. President, today I have the pleasure of adding my name as a cosponsor to Senate Joint Resolution 347, a resolution that designates the week of May 19 as National Homelessness Awareness Week.

We live in the wealthiest country on Earth, yet thousands of our fellow citizens are forced to live in the streets. Although we are enjoying a nationwide economic recovery of unprecedented strength, recent reports from my State indicate that the recovery has yet to reach many of our least fortunate citizens.

Puget Sound emergency shelters report that the number of people turned away from shelters continues to grow despite an increase in temporary accommodations for the homeless. Emergency shelters in King, Snohomish and Pierce Counties in Washington State turned away 4,641 homeless people last year because they were filled to capacity, a 26-percent increase from 1984. According to a recent survey, the region's shelters can serve only 20 to 30 percent of those who request assistance. The Federal Government must do more to help stem this homelessness crisis.

I am happy to report to my colleagues that the Senate Banking Committee has just approved a measure that will greatly enhance our response to homeless Americans. Modeled after a bill that I introduced jointly with Senator MOYNIHAN, the measure would provide a three-part program for helping homeless Americans: It helps homeless Americans meet their emergency food and shelter needs, provides capital assistance to those rehabilitating or converting buildings into shelters, and establishes a demonstration program for helping homeless Americans get back into traditional housing.

Since 1983, Congress has provided for an Emergency Food and Shelter Program to help homeless Americans. The program provides grants to local homeless programs to assist in meeting the needs of homeless citizens. By all measures the program has been a resounding success, providing assistance to the homeless with a minimum of overhead. Last year, the Emergency Food and Shelter Program provided an estimated 68 million meals at an average cost of 75 cents, and 6.2 million nights of shelter at an average cost of $2.25. The program provided assistance to 6,223 agencies in 1,360 counties and cities.

The Emergency Food and Shelter Program is unique in that it is administered by a collection of national private charities in conjunction with the Federal Government. This National Board of Charities had brought its expertise to bear on the problem of homelessness, and has provided assistance to service providers in a timely and cost-effective manner. Up to this point in time, however, Congress has attached an authorization for the program to appropriations bills. This has resulted in an ad hoc, year-to-year Federal response to the problem of homelessness.

The bill just approved by the Banking Committee ends the uncertainty created by the earlier congressional approach to this program. It provides an authorization of $73 million for this program in 1987, and allows appropriations in 1988.

The Emergency Food and Shelter Program, however, is not designed to meet the problems of homelessness in two important respects. First, while the Emergency Food and Shelter Program has been essential in reducing the suffering of our Nation's hungry and homeless, it is not designed to help these Americans return to traditional housing and independent living. There needs to be an examination of the avenues open for helping homeless Americans return to independent living.

The Senate Banking Committee has approved a Transitional Housing Demonstration Program that will allow homeless persons to have an address, a place to take a shower, and an opportunity to save some money for a deposit for traditional housing. This program will allow the Secretary of Housing and Urban Development to develop models for helping the homeless make a transition to independent living. Up to $10 million may be spent for this program in 1987.

The second problem not addressed by the Emergency Food and Shelter Program is the capital needed to establish a shelter for homeless persons. The Banking Committee provides an Emergency Shelter Grants Program to help satisfy this need. States, local governments, and local nonprofit charitable organizations would be awarded Federal assistance that could be used to rehabilitate or convert existing structures into emergency shelters. The committee would authorize about $40 million for this program.

Mr. President, although I have no illusion that these provisions will solve the problem of homelessness, I do believe that the Banking Committee's action is a positive step forward in addressing the issue. During this week of awareness on the crisis of homelessness, I urge my colleagues to join me in endorsing this measure.●

OUR FINE CAPITOL POLICE

● Mr. BOREN. Mr. President, we are extremely fortunate to have a fine dedicated group of men and women serving with the U.S. Capitol Police. We are sincerely grateful to them for their public service.

Recently, Senator KASSEBAUM and I wrote a letter to Hon. James J. Carvino, Chief of the Capitol Police, on an issue of police policy. I ask that the text of our letter be printed in the RECORD.

The letter follows:

MAY 21, 1986.

Hon. JAMES J. CARVINO,
Chief, U.S. Capitol Police,
Washington, DC.

DEAR CHIEF CARVINO: We want to commend you for your decision to restore the past policy of regular assignments as opposed to rotating assignments for Capitol Police officers. Such policy is broadly favored by the police officers themselves and helps police morale.

In addition, regular assignments enhance Capitol security as officers become familiar with those persons who usually work and pass through the physical areas for which they have responsibility. They are also a great convenience to Members and their staffs and visitors who become personally acquainted with police officers who work near their offices.

Building a personal acquaintance between officers and Members of the Senate creates a more harmonious and pleasant working environment for everyone.

Thank you for taking this action.

Sincerely,

NANCY KASSEBAUM,
U.S. Senator.
DAVID L. BOREN,
U.S. Senator.

ETHNIC REPRESENTATION IN THE AWARDING OF STATUE OF LIBERTY MEDALS

● Mr. D'AMATO. Mr. President, I rise today to cosponsor S. Con. Res. 141, sponsored by my good friend and colleague, the distinguished junior Senator from Arizona. This resolution addresses the problem of ethnic representation in the awarding of Statue of Liberty Medals.

The Statue of Liberty Commission has announced a list of 12 foreign-born Americans to be honored for their contributions to the United States. These medals will be awarded at the Fourth of July national celebration of the Statue of Liberty. Although I commend the idea, I am very concerned that major ethnic groups have been omitted from the list of 12. Such major groups as Irish, Italian, Polish, and Greek Americans are not included in the current list.

The Statue of Liberty celebration is especially important to Americans of ethnic decent. The Statue of Liberty and Ellis Island are symbolic of the freedom many of the immigrants sought when they came to America. This is why it is imperative that the list of 12 be expanded to ensure full representation of all ethnic groups.

The contributions of ethnic Americans are immeasurable. During the

Fourth of July celebration of one of the most enduring figures of American freedom, the Statue of Liberty, we should recognize the accomplishments of all ethnic Americans.

Mr. President, I commend Senator DECONCINI and Congressman BIAGGI, the sponsor of a similar bill in the House of Representatives, for their initiative on this important matter. I urge my colleagues to join me as cosponsors of S. Con. Res. 141.

Thank you, Mr. President.●

QUASQUICENTENNIAL OF IMMANUEL LUTHERAN CHURCH

● Mr. RIEGLE. Mr. President, today I would like to pay special tribute to Immanuel Lutheran Church in Bay City, MI which is celebrating the 125th anniversary of its founding.

Immanuel was founded in 1861 by a Bavarian missionary and a small group of German Lutherans who wanted to form their own church. This missionary, Rev. Ferdinand Sievers was one of several German Lutheran pastors sent to Michigan to form agricultural colonies and bring Christianity to the Indians.

Their first building, purchased in 1862, was an 18 by 30 foot rough board building seating 48 people that they obtained for $150. Over the years the city and the congregation experienced a rapid population growth, and in 1890 a much needed new church was dedicated that seated 750 members. The church grew with the community and after 60 years it soon became apparent that another new building would be needed to accommodate the needs of the growing congregation. Ground was broken for the current structure on May 5, 1957, and after holding services in the school auditorium during its construction, the new church was dedicated on December 14, 1958, and has stood strong ever since serving the citizens of Bay City and surrounding towns.

Over its 125 years Immanuel Lutheran Church has grown to be an active, involved congregation of almost 2,700 members. Generations of Michigan families have been a part of Immanuel from baptism, through confirmation, marriage; for their entire lives. Throughout the years of the Civil War, social uprisings and national problems, the church has been a constant source of comfort and enlightenment for the many families who have sat in its pews.

Throughout 1986 Immanuel will be holding special events and reunions bringing together thousands of people from Michigan and the rest of the country whose lives have been enriched by membership in its congregation and education in its school.

Again, I wish to congratulate Immanuel and Reverend Tyvela on this important milestone and wish them much success in all future endeavors.●

QUOTAS ON EUROPEAN GOODS

● Mr. LEVIN. Mr. President, on Friday May 16, 1986, the Washington Post ran a headline which promised some good news. "Reagan Imposes Quotas on European Goods," it said in bold face type; and then there was a subhead that said "Action Retaliates for Portugese Curbs."

The headlines looked good. With hope in my heart, I put on my glasses to read the rest of the story.

As I read on, however, things went downhill. Paragraph 2 revealed that "the White House * * * said the new retaliatory quotas would have no immediate effect on EC [European Community] sales in this country. Paragraph 3 explained why:

White House spokesman Larry Speakes said the import limits were set high enough to avoid harming European sales because EC restrictions on grains and oil seeds, largely soybeans, would not pinch American exports until the end of the year. Speakes warned, however, that Reagan will lower the quotas or impose tariffs when the EC restrictions begin to hurt American farm sales.

"Well, another example of the administration making a tough speech and taking a weak stand," I thought.

But Mr. President, it was even worse than that. The tough speech, and the threats it contained, are not going to scare the European Community. Not if they were smart enough to keep reading that Post story which went on to conclude—in paragraphs 12 and 13—that the EC restrictions were not just a "threat"; they were actually harming American farming interests. The story indicated that Mr. Speakes admitted that "Spanish tariffs 'began to pinch right off the bat.'" And Deputy U.S. Trade Representative Alan Woods said that "American farmers have sold no grain to Spain since March 1." Yet the story concluded with this observation:

Nonetheless, the presidential action to retaliate against the EC for the Spanish tariffs will not take effect until July 1 to allow time for negotiations over compensation to the United States for lost grain sales.

Now Mr. President, first the story says we will retaliate; then it says we will only retaliate when other people's actions start to hurt us; and then it concludes by saying that their actions are hurting us already—but we will not retaliate until we give the people who are hurting us time to decide whether they want to compensate us for the suffering they have already caused.

Mr. President, I may have had to put on my glasses to read the fine print in that story. But the members of the EC are not blind—the message is pretty clear to them: They can get away with what they are doing now for as long as they want to. And the American people are not shortsighted either, Mr. President, they know that we are being robbed blind and they want something done about it.

I believe the Senate can do something about it. I ask that the full text of the story appear in the RECORD at this point so that my colleagues may have this information available to them when we move—as I hope we will very soon—to consider trade legislation.

The article follows:

REAGAN IMPOSES QUOTAS ON EUROPEAN GOODS

(By Stuart Auerbach)

President Reagan yesterday imposed quotas on imports of white wine, chocolates and other products from the European Community in retaliation for Common Market restrictions on U.S. farm sales to Portugal.

But the White House, apparently to defuse what has threatened to become a major transatlantic trade war, said the new retaliatory quotas would have no immediate effect on EC sales in this country.

White House spokesman Larry Speakes said the import limits were set high enough to avoid harming European sales because EC restrictions on grains and oil seeds, largely soybeans, would not pinch American exports until the end of the year. Speakes warned, however, that Reagan either will lower the quotas or impose tariffs when the EC restrictions begin to hurt American farm sales.

"What we are attempting to do here is to mirror the actions of the EC. When they put a hit on us, we'll come back and do a like action against them that will have the same dollar effect," Speakes said.

He described the president's actions as a "fair and measured" response to the EC's "illegal" and "unfair" quotas, and urged negotiations to avoid a transatlantic trade war.

"This is a dispute the United States sought to avoid," he said. "We hope the EC will respond in a way that will help us settle this dispute without further damaging our trading relationship."

This is the second major administration trade action in two days, and it comes as Congress is about to consider a major trade bill that President Reagan has attacked as protectionist and harmful to the nation's economy. Although Speakes denied there was any connection between the president's announcement of retaliation and upcoming congressional action on trade, he attacked a bill due to come to the House floor Tuesday as "heavily protectionist" and "catastrophic."

The administration intensified its assault on that Democratic-sponsored bill, releasing a letter to all congressmen from nine Cabinet members that called the bill "defensive and defeatist."

This legislation would severely damage our economy, reduce our international competitiveness, destroy American jobs and embroil as in trade conflicts with virtually all our significant trading partners," the letter said. It was signed by Secretary of State George P. Shultz, Defense Secretary Caspar Weinberger, Commerce Secretary Malcolm Baldridge, Education Secretary William Bennett, Treasury Secretary James A. Baker III, Agriculture Secretary Richard E. Lyng, Labor Secretary William E. Brock,

Budget Director James Miller and U.S. Trade Representative Clayton Yeutter.

Although the statement of presidential action appeared to postpone an immediate trade war, European and American officials emphasized the seriousness of the dispute between the United States and the EC over agricultural trade that arose when Spain and Portgual joined the 10-nation Common Market.

In integrating those two countries into Western Europe's agricultural policies, the EC established quotas on grain and oil seeds bought by Portugal and tariffs on Spain's purchases of grains. U.S. officials estimated these restrictions could cost American farmers $1 billion.

Speakes said the Spanish tariffs "began to pinch right off the bat." Deputy U.S. Trade Representative Alan Woods said American farmers have sold no grain to Spain since March 1.

Nonetheless, the presidential action to retaliate against the EC for the Spanish tariffs will not take effect until July 1 to allow time for negotiations over compensation to the United States for lost grain sales.●

PRC ARMS SALE

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD):

● Mr. MURKOWSKI. Mr. President, in the last 2 weeks the Senate has taken two important decisions regarding this Nation's policy toward the sale of arms to other countries.

One was widely publicized. By a substantial margin, the Senate voted to object to a proposal to sell $354 million worth of air defense missiles to Saudi Arabia. The other received a great deal less attention: on May 9, the Congress having failed to register objections, the administration became free to proceed with an even larger proposed sale of arms to the People's Republic of China.

This sale involves $550 million worth of advanced technology to upgrade the avionics capability of China's F-8 fighter-interceptor aircraft. It will provide them with an all-weather, day/night, look-up-look-down capability they do not presently have. The Chinese believe they need that capability to maintain a defensive balance on their northern border with the Soviet Union.

Mr. President, I do not oppose this sale as such. I have followed its development closely. Viewed as an individual proposal, it makes sense, and I support it. My concern is that, while we have carefully reviewed the details of this particular sale, we have not thought through sufficiently the long-term policy on which it means we are embarking.

This is not the first arms transfer to the PRC to be approved by Congress since U.S. policy was amended to envision such agreements.

Last September, Congress considered and did not object to the sale of a munitions factory to the PRC. This was the first official government-to-government arms transaction under the Foreign Military Sales (FMS) Program. The Defense Department had originally estimated the potential value of that sale at $98 million, though I understand now that the Chinese may decide to purchase only 37 million dollars worth of its components.

Prior to this, there had been a number of private commercial sales which did not require congressional review. In fiscal year 1982 and fiscal year 1983, there were approximately $1 million in commercial sales. In fiscal year 1984, the figure had risen to $22 million. In fiscal year 1985, it was $30 million. And in the first 6 months of fiscal year 1986, we have delivered approximately $35 million worth of arms to China through commercial sales, with licenses granted for up to a total of $118 million.

These items included the civilian version of the Sikorsky S-70C helicopter; a set of six General Electric LM-2500 naval engines; and a large number of smaller items in the communications and other areas.

So this is not the first such sale. However, it represents a quantum leap—both in dollar terms and in the level of sophistication we are willing to provide—in our evolving arms supply relationship with the PRC. I strongly agree with my colleagues that we need to take a careful look at that relationship and exercise great caution and restraint as it develops.

A number of my concerns are addressed by the Foreign Relations Committee's letter to the President regarding three criteria to be applied to any future military sales proposals involving the PRC. Such sales:

Should not increase the threat to members of ASEAN or China's other non-Communist neighbors;

Should be clearly defensive in nature; and

Should not upset the existing military balance between the PRC and Taiwan.

I want to commend the distinguished chairman of the Foreign Relations Committee for the constructive and conciliatory role he played in working out this agreement. It is typical of his style of leadership. The Senator from Indiana is doing his country a major service in this difficult assignment by the way in which he is helping create a broad consensus on these issues about where our national interest really lies.

Even if these assurances are provided, however, I remain concerned about where we are going over the long run with this kind of sale. We need to know more clearly how its fits into our expanding military relationship with China and, in turn, where this military relationship fits into our still limited political relations.

Under the Taiwan Relations Act, we have an obligation to provide Taiwan with the arms it needs to maintain a stable military balance with the PRC. At the same time, however, we have a commitment under the 1982 Joint Communique with the PRC to gradually reduce arms transfers to Taiwan.

It will be very difficult to meet both these obligations in the context of an expanding arms supply relationship with the PRC. We have three things here: expanding arms sales to the PRC; selling Taiwan what it needs to balance out those new arms; and gradually getting out of the business of selling arms to Taiwan. You can do any two of those things, but you cannot do all three.

Mr. President, last fall we approved a sale of $98 million for a munitions factory. We then approved, or acquiesced in, a sale of 550 million dollars' worth of advanced technology for military aircraft. My question is, what are we likely to be asked to approve next? Where are we going?

U.S. policy on this issue should not be shaped by a series of ad hoc arms sale opportunities. Nor should we allow it to become a spiraling, open-ended relationship in which we sell more to both Taiwan and the People's Republic of China to keep the balance which exists today. Instead, we need a clearly articulated, long-term policy against which each individual arms sale opportunity will be weighed.

Mr. President, a decade ago, in Iran, we made the mistake of letting our arms supply relationship get out ahead of our overall political relationship. We and our friends in the Persian Gulf are still paying for that mistake. This time, as we embark on what appears to be a major arms supply relationship, let us make sure we have thought through carefully exactly where we want to go.●

THE EFFECTS OF THE LIABILITY INSURANCE CRISIS

● Mr. McCONNELL. Mr. President, I wish again today to bring to the attention of my colleagues in the Senate the latest consequence of the ongoing crisis in the liability and insurance areas. As you know, over the past few months few problems facing our country have occupied more of my attention than this one. These latest examples of the crisis are particularly troublesome, because they demonstrate graphically the extent to which this crisis is affecting Americans from all walks of life.

First, an article from the Lexington Herald-Leader recently points out that the Cumberland County, KY, jail has been closed because the liability insurance for the facility was canceled. The local jailer, Mr. Bobby Riddle, noted that "it's an added expense for the taxpayers, but there was nothing else I could do * * * it's a shame."

A more extensive article, Mr. President, points out that the insurance

crisis has affected nearly every aspect of business and society in Kentucky. Among other areas, this article notes that the crisis has disrupted recreation, day care, municipal government, public agencies, physicians and health care, schools, small businesses, farmers, clergy, and others.

For example, the Lexington Ice Center has been without insurance since last year. The city of Highland Heights has nearly lost its police force. Members of the clergy have had to take out pastoral insurance. There are other examples too numerous to mention. And Kentucky is just like every other State in this respect, for the problem is national in scope.

Finally, Mr. President, I bring to my colleagues' attention an article from the New York Times, pointing out that the Boy Scouts of America will begin imposing a $20 fee for every boy scout troop and cub scout pack in the country to help pay the liability insurance costs. The fee is the first of its kind in the history of the organization. In explaining the need for the fee, Mr. Lawrence F. Potts, chief financial officer of the Boy Scouts, noted that "if a scout is injured at a den or troop meeting, given the practice of today, that scout's family will be besieged by attorneys who tell them they should be compensated in some way."

There is no doubt that we as a body must come to grips with the problems represented by these incidents. The Judiciary Committee as well as the Commerce Committee now has before it legislation that will deal with the fundamental, underlying problem, the excesses of the tort law system. I hope we will take up that legislation at the appropriate time before this session ends, because the problems are significant, and they will not go away.

Mr. President, I ask that the three articles I mentioned be printed in the RECORD.

The articles follow:

CUMBERLAND JAIL CLOSED OVER LACK OF INSURANCE

(By Bill Estep)

Cumberland County Jailer Bobby Riddle closed his 14-bed lockup early yesterday because its insurance company had refused to renew liability coverage for the facility.

Insurance for the jail, written by a local agent representing a national company, expired April 14, Riddle said, but the company continued to cover the facility until yesterday.

The grace period ran out yesterday and he had not yet obtained insurance from another company, so he closed the jail, Riddle said.

Riddle said four prisoners were in the jail in Burkesville when he shut it down.

One was scheduled for release, and a second was released for the weekend and may receive some form of alternate sentence so he does not have to be incarcerated next week, Riddle said.

Jail employees transferred the other two prisoners to the Monroe County Jail in Tompkinsville, about 20 miles west of Burkesville, he said.

Riddle, reached by telephone at the empty jail yesterday, said that he thought he had lined up another company willing to insure the facility, but that it would take a "few days" to work out details of the policy.

He said the jail probably would not be able to reopen for 10 days to two weeks.

Any people arrested before them will be transported to the Monroe jail, he said.

"It's an added expense for the taxpayers, but there was nothing else I could do," he said. "It's a shame. A lot of people in this county are mad about it."

Riddle said the Cumberland County Jail held prisoners on occasion for neighboring Adair County, because the jail there is closed while a new regional holding facility is being built.

"This puts them in a hard spot, too," he said.

Riddle said he did not know why the jail's previous insurer, which he identified as Penco, declined to renew its coverage this year.

He said the estate of an inmate who died in the jail last year filed a $3 million lawsuit against the jail and the county hospital, but the case has not been heard.

"We've not had any other claims," he said.

The local broker for the insurance company Riddle identified could not be reached for comment.

Problems in getting and keeping insurance and giant increases in rates have plagued many government agencies in Kentucky this year, as insurance companies struggle to recover from years of high claims, industry price wars and poor investments.

Riddle said he did not think the liability policy he was seeking with a new insurance company would cost much more than the old policy. He did not know the cost of either policy.

The county jail in nearby Taylor County closed last year after a lawsuit judgment against it, Riddle said.

Riddle said he did not know what to expect with the weekend coming up and the jail closed.

"Sometimes it gets pretty busy," he said. "But I don't think there'll be any big problems—we'll just take 'em on to Monroe County."

THE INSURANCE CRISIS IN KENTUCKY

(By Jacqueline Duke)

A county jail in Kentucky has had to close, city goverments have considered suspending their police forces, and a transit authority has had to raise its fares. The reason: the insurance crisis.

The soaring cost and scarcity of insurance have affected nearly everyone, from doctors, who are changing the way they practice medicine, to farmers, who are taking their chances with uninsured crops. Ultimately, the insurance crisis is forcing all consumers to pay more for their coverage and for nearly every service and product.

The crisis has hit Kentucky and every other state in the nation, topping legislative agendas and commanding attention from the White House. In Kentucky, soaring costs and scarcity of insurance have prompted the General Assembly to order an investigation of the entire insurance industry.

More immediately, the crisis has hurt businesses large and small. The University of Kentucky, for example, has been without liability insurance for 10,000 employees since February. And the owner of a Lexington tobacco warehouse who could not reinsure the building took a $300,000 to $400,000 loss when was it destroyed by a recent fire.

Homeowners and motorists have not been immune, either. In the Lexington area, homeowners insurance has increased about 5 percent, while automobile insurance has gone up as much as 30 percent, according to local agents.

The difficulty in obtaining fire and auto insurance is reflected in the number of people who must buy it through state-established risk pools. The number of risk-pool automobile policies doubled between 1984 and 1985, preliminary figures for this year indicate even larger increases; the number of homeowner policies increased by 50 percent.

Between 1981 and 1985, premiums on individual health insurance policies written by Blue Cross-Blue Shield of Kentucky, the state's largest health insurer, doubled.

The reasons for the insurance crisis are varied and complex. Price wars among insurance companies backfired when interest rates started dropping in the early 1980s, claims began pouring in, and the money to pay them was locked into suddenly unprofitable investments. To create more capital, the companies raised their rates. Meanwhile, litigation escalated and jury awards soared.

The results of the crisis are simple: Insurance of nearly every type, when it can be had, is costly and will become even more so. Policies for cities and certain businesses have been canceled without explanation. And fewer and fewer insurance companies are willing to write new ones.

Examples of policy cancellations and exorbitant premiums abound in Lexington and elsewhere in the state. Here are a few:

RECREATION

The Lexington Ice Center takes a tremendous gamble every time someone steps onto the skating rink. That's because the ice center has been without liability insurance since late last year, when its policy was canceled, manager Eddie Yeast said.

"The only thing we have to protect ourselves is our assets," he said. "We can't feasibly afford insurance."

In 1985 the ice center paid $24,000 for liability insurance. This year the same coverage would cost between $180,000 and $200,000.

Liability insurance for Lexington's YMCA has doubled in the past year, going from $12,000 to $24,600, director Dale Packer said. So far, the organization has not had to pass that cost on to members.

"The only reason we don't have to is the growth we're having in new members," Packer said.

DAY CARE

Like many day-care operators, Camille Haggard of Lexington learned last year that her insurance company would not renew her policy. Since January, Ms. Haggard, who operates Big Bird East, had searched without luck for a new policy she could afford. As president of the state day-care association, Ms. Haggard also has had the burden of keeping members up to date on the gain insurance outlook.

Just this month a lone insurance company came through for Ms. Haggard and other Kentucky day-care operators. Continental Insurance has agreed to write policies for Kentucky day-care enters if they apply directly and meet the many requirements. The price, for $1 million worth of liability insurance, is $15.90 per child per year.

Other companies wanted $50 a child, Ms. Haggard said.

"My attitude is the company has come through when no other company in the nation has," she said.

CITIES

A lawsuit almost cost the city of Highland Heigh's its police force and has left it with lingering problems. The Northern Kentucky city was informed that its police liability insurance was not being renewed because an Ohio man fleeing police in that state sued Highland Heights after his car crashed into a city police cruiser set up as a roadblock.

City officials managed at the last possible minute to obtain insurance in January. But it cost nearly three times as much as the year before—$3,300 compared with $1,265—and

"If we had been unable to get a policy, we had thought about taking our men off the street. It could have put us out of business," said Roy Bartlett, city administrator.

To pay for additional coverage for its police force and other city officials, Highland Heights has passed a 7 percent tax on insurance premiums.

Even with the surcharge, the city might not be able to afford the extra insurance, Bartlett said.

The city of Elsmere, meanwhile, has no liability insurance for its police cruisers, refuse trucks and other city vehicles. No company would write a policy, said Nancy Bowman, the city clerk.

The general liability insurance Elsmere managed to obtain is double the cost of last year, $21,000.

In Versailles, the cost of liability insurance has soared from $9,000 to $23,000.

PUBLIC AGENCIES

On Friday the Cumberland County Jail was closed because its liability insurance expired and the insurer refused to renew it. Prisoners were transferred to the Monroe County Jail, 20 miles away in Tompkinsville.

The Lexington-Fayette County Health Department had two months to find liability and medical malpractice insurance when its longtime insurer, Integrity of New Jersey, decided to discontinue writing general liability for such agencies.

"You didn't know whether you would have to close down or not," said Dr. John Poundstone, director of the health department.

The health department managed to obtain general liability insurance, but with half as much coverage as in 1985. Last year the agency paid $27,917 for a broad package of liability insurance. This year's more limited policy costs $22,000. The health department is spending an additional $10,000 to buy separate malpractice insurance for its physicians, or $32,000 in all.

Furthermore, an obstetrics clinic was suspended because of insurance problems facing the volunteer obstetricians. Their 1986 coverage apparently does not extend to the residents they supervise, Poundstone said. Rather than take the risk, the health department assigned clinic patients to the volunteer obstetricians, who see them in their private offices.

"They didn't want to take the risk of having the residents do the deliveries," Poundstone said.

The Lexington Transit Authority raised its rates 10 cents this month, partly to compensate for the huge increase in the cost of liability insurance. This year's premium is $222,000, compared with $65,000 in 1985.

"We feel we were lucky to get liability insurance," manager Pat Hamric said.

With federal transit cuts likely under the Gramm-Rudman deficit-reduction law, LexTran officials are wondering how the transit authority can afford another huge increase.

PHYSICIANS, HEALTH CARE

When Dr. Preston Nunnelley began practicing medicine in 1974, he recalled, he paid about $3,500 for malpractice insurance. This year, Nunnelley, who specializes in obstetrics and gynecology, is paying about $40,000.

Ob/gyns pay among the highest malpractice premiums of any physicians in Kentucky. And Nunnelley predicts many of them will begin to give up the practice of delivering babies—something that he said already was happening in other states.

"It's getting to the point where I expect in the next year or two, unless we have some type of relief. you're going to see more and more people drop out of obstetrics," he said. "It's still probably one of the most gratifying professions, but it also is becoming more and more tense as the fear of litigation continues."

Family practitioners, meanwhile already have stopped delivering babies in some parts of Kentucky, said Dr. Jerry Martin, outgoing president of the Kentucky chapter of the American Academy of Family Physicians.

Martin said one colleague recently gave up obstetrics after his malpractice insurance for obstetrics alone went up $5,000. The physician, Martin said, would have had to increase his delivery fees by $125 just to break even.

"Women will just have to go somewhere else to get delivered or there's going to have to be something done" to relieve physicians, he said.

Comprehensive Care Center in Lexington has seen huge jumps in two types of insurance it carries. Professional liability for counselors and physicians has increased from $19,473 last year to $31,087, or 60 percent. Fire and casualty insurance has gone from $5,700 to $9,400, a 65 percent rise. Officials predict liability insurance for board members, now $2,300, will double this year.

"We're eating all these losses so far," said Joe Toy, head of purchasing for Comprehensive Care, which serves a 17-county area.

Director Robert Walker predicts that patient fees eventually will have to increase to compensate for the high price of insurance.

"We have a record of no suits," said Walker, who called the insurance increase "incredible."

The Bluegrass Association for Retarded Citizens is having difficulty obtaining professional liability insurance, which it is seeking for the first time as a precautionary measure. The association supervises residential placement of the mentally handicapped.

"Finding companies that have a good rating that are even willing to provide insurance is hard to find," director Rick Christman said, "It's a terrible problem."

SCHOOLS

The Fayette County public schools could not renew their liability insurance this year and had to turn to the Kentucky School Boards Association Insurance Trust. The trust provides liability insurance to the majority of Kentucky schools.

For that particular policy, the school system paid $28,103; it paid $9,753 in 1985. In addition, Fayette County had to spend an extra $25,000 for athletic insurance because that coverage was excluded from the general policy.

For school systems across the state, general liability premiums increased an average of 260 percent, said David Keller, executive director of the insurance trust.

SMALL BUSINESSES

Acme of Kentucky once competed with other window-cleaning companies for jobs on Lexington's tall office towers and other buildings. But this year, Acme has restricted its work to two-story structures. With its insurance estimated to increase tenfold, the company could not afford to remain competitive.

"If I had continued to do high work, then I don't know if I could have continued to get insurance or not," said Dave Wilson, an owner of the company.

FARMERS

James Barton's 1,300 acres of field crops and tobacco will go uninsured this year.

"It got so high we had to drop it," said Barton, who lives in northern Fayette County. "We can risk a disaster every 10 or 20 years."

Crop insurance has gone up an average of 35 percent.

That has made other area farmers think twice about renewing policies.

Hampton Henton, a Woodford County farmer, is insuring only his 20 acres of tobacco. He will take the risk on his other crops, he said, "because of the cost."

CLERGY

When people started suing ministers several years ago, the Rev. Wayne Holcomb of Lexington added pastoral insurance to the church's liability policy.

"Most all of us carry that kind of insurance now," said Holcomb, the pastor at Hill 'n' Dale Christian Church.

The cost is minimal, he said, but the implications are not.

"I think that it's a sign of the times. People have become sue-happy," he said. "They sue over the most ridiculous things."

RESPONSE

Nearly everyone needs insurance of some type. And insurance companies can choose to write or withhold it. Consequently, the cost and scarcity of insurance have caused anger, frustration and a sense of helplessness among individuals and business people.

Several groups in Kentucky are doing something about the insurance stranglehood. For lawyers, skating rink operators and municipalities, self-insurance is becoming increasingly attractive. In some cases, it is becoming a necessity.

The 1986 General Assembly failed to pass legislation to limit damage awards against cities in civil lawsuits. As a result, the Kentucky Municipal League is organizing a pool insurance program for cities, which have been hit with premium increases ranging from 40 percent to more than 800 percent.

The league hopes to have insurance available by September.

"It's about the only option cities have at the current time," said Ed Griffin, the executive director.

The Lexington Ice Center and other skating rinks across the country that have been unable to get liability insurance are exploring the possibility of forming their own insurance company, Yeast said.

And Charles English, president-elect of the Kentucky Bar Association, said a survey was being conducted of the group's 9,000 members to determine interest in forming a legal malpractice insurance company. The average price of legal malpractice insurance has gone from $800 a year to $3,000, he said.

"I'm hopeful that it will be a reasonable alternative and that it will provide Kentucky lawyers with access to an insurance market with a reasonable cost," English said.

Experts say that expensive premiums probably are here to stay. However, the pace of the premium's escalation is expected to slacken, they say.

State Insurance Commissioner Gilbert McCarthy predicts that insurance prices will begin to level off in the beginning of 1987. Other, experts do,. too.

"The rate of increase will diminish, but not the rates themselves," said Paul Wish, vice president of A.M. Best Co., a New Jersey data gathering business.

[From the New York Times, May 20, 1986]

BOY SCOUTS PLAN A SPECIAL LIABILITY INSURANCE FEE

(By Robert Pear)

WASHINGTON May 19—The Boy Scouts of America will impose a $20 fee on every Boy Scout troop and Cub Scout pack in the country to help pay liability insurance costs, officials of the organization said today.

The fee is the first of its kind in the Scouts' 76-year history and reflects their commitment, in the words of the Boy Scout motto, to "be prepared" for the liability insurance crisis, the officials said.

Lawrence F. Potts, chief financial officer of the Boy Scouts, said there had not been an extraordinary number of accidents of claims. But he said: "Boy Scouts don't just sit around and read books. They row boats, go skiing, play basketball and football. A certain number of them get injured."

The $20 fee will be imposed on each of the 51,586 Cub Scout packs, 49,639 Boy Scout troops and 21,142 Explorer posts, as well as on similar units like Varsity Scout teams, the officials said. They hope to raise about $2.5 million, or one-fourth of the total liability insurance premium for the year. The remainder comes from the national organization, based in Irving, Tex., and from local councils, scattered around the country. More than 3.7 million youths 7 to 20 years old are enrolled in American scouting organizations.

SHARP RISE IN PREMIUMS

Mr. Potts said the Boy Scouts' insurance costs had risen from $2 million in 1984 to $4 million in 1985 and $10 million this year. Insurance now accounts for about one-fourth of the organization's total budget, he said.

The new fee comes as liability insurance premiums have been rising dramatically for many other individuals and entities, including physicians, local government agencies, amusement parks, day-care centers and manufacturers of vaccines and athletic equipment.

Scouting officials acknowledged that the insurance fees could hurt membership in some low-income neighborhoods, but he said Boy Scouts, being resourceful, could pay the new surcharge by selling popcorn or candy or washing cars.

Ted Accas, a spokesman for the Boy Scouts, said it was the organization's "fervent hope" that the new fee would not be a barrier to membership. The $20 charge, he said, will be just another item in the budgets of most Boy Scout troops. But he said the cost would not be entirely negligible for "kids in East Harlem or in the Watts section of Los Angeles."

The Greater New York Council of the Boy Scouts, with more than 80,000 youngsters, is the largest in the country. The council's contribution to liability insurance costs is rising from $47,000 this year to $106,000 next year, according to Robert A. Williams, a spokesman for the council. This contribution is in addition to the $20 fee to be paid by each unit, he said.

BESIEGED BY ATTORNEYS

Mr. Potts, the chief financial officer of the Boy Scouts of America, said the insurance was provided by "a conglomeration of different companies and different policies."

"If a scout is injured at a den or troop meeting, given the practice of today, that scout's family will be besieged by attorneys who tell them they should be compensated in some way," Mr. Potts said.

Nevertheless, he said, the number of claims, about 200 a year is "minuscule" in view of all the sailing, boating, swimming, camping, hiking and other outdoor activities done by Scouts.

In a separate action, the Scouts are raising individual membership fees in September. The fee for Cub Scouts and Boy Scouts now $3 a year, will be increased to $4, according to Paul I. Ernst, registration director for the national organization. For Explorer Scouts, which offers career programs for young men and women, the fee will rise to $4 from $3.50.

These changes are due to increases in costs generally, not just insurance costs, Mr. Ernst said.

NO FEE BY GIRL SCOUTS

Gordon v. MacKay, controller of the Girl Scouts of the U.S.A., said his organization had no plans for a special insurance fee. He said that premiums had been rising, but he would not give details.

The Boy Scouts of America is a member of the steering committee of the American Tort Reform Association, a coalition urging Federal and state legislators to impose limits on damage awards in personal injury lawsuits. Other members include the American Medical Association, the Food Marketing Institute, the National Association of Home Builders and the Business Roundtable, which is composed of chief executive officers from about 200 major companies.

Scouting officials said the details of the new insurance fee might be reported soon in Boys' Life, the monthly magazine better known for adventure stories and hobby articles.●

THE GOVERNMENT IS WATCHING YOU

● Mr. COHEN. Mr. President, over the past few years, I have become increasingly concerned over the Federal Government's widespread use of computer matching and the implications that this practice has for the privacy of American citizens. In computer matches, Federal Government agencies routinely exchange thousands of records on individuals with other Federal and State agencies to detect fraud and abuse in their programs, or to determine whether persons are eligible to receive Government benefits. Many of these matching programs involve highly sensitive information about individual citizens, such as Federal income tax and earnings data.

While the Government must take full advantage of the technology and computerization available to it to ensure that it is spending tax dollars wisely, too little attention has been paid to where these information practices are leading us as a society. The massive collection and exchanges of personal information about citizens—often without their knowledge—can pose threats to the privacy and due process rights of the persons whose records are matched. Matching programs also raise questions about how the information will be used, and whether it will be subject to abuse, either by overzealous bureaucrats or by persons who gain unauthorized access to the information. Further, it raises questions of whether individuals will have their Government benefits wrongfully terminated or suspended based on faulty or out-of-date information used in computer matches.

Since 1981, the Subcommittee on Oversight of Government Management, which I chair, has been investigating and monitoring the growth of computer matching. Hearings held by the subcommittee have revealed that computer matching is being widely promoted by this administration and the Congress, without adequate consideration being given to the due process and privacy side of the equation. This summer, my subcommittee will hold additional hearings on computer matching by Federal and State agencies.

Mr. President, an article that recently appeared in the Washington Post Magazine provides an excellent discussion of the issues raised by computer matching. I ask that the article entitled, "Watching Me, Watching You," by Pete Early, be printed at this point in the RECORD.

The article follows:

WATCHING ME, WATCHING YOU

(By Pete Earley)

John first spotted her on his commute to work: midthirties, chestnut hair, driving a steel-blue Mercedes with a vanity plate that read MINE.

He rushed to his office, turned on his computer, pulled out his file of codes and went to work. Tracking down this beauty would be cinch, he muttered to himself, scanning in his mind the access he had as a social worker to numerous public and confidential government records. Checking out people had become a natural part of his day—it was part of his job to separate valid welfare applicants from chislers. John pressed a few buttons on the keyboard, entered the authorizing code, hit the "execute" button, accessed files from the Department of Motor Vehicles, typed in the license tag M-I-N-E, pressed the "search" button and waited. It seemed like forever, then, filling the screen like magic was this:

License tag: MINE. Vehicle: 1984 Mercedes Benz 190e. Owner: MARCI HAMILTON. 2727 Skyline Drive. Drivers License No. 524-64-6789. Date of birth: 9-5-51. Sex: Female. Weight: 105. Height: 5-6.

John smiled. He knew from experience that the number on Marci Hamilton's license was also her Social Security number. He entered 524-64-6789 on the keyboard

and told the computer to search wage records that employers are required to file every quarter with state unemployment compensation and tax offices:

524-64-6789. MARCI HAMILTON. Employer: Bivens Manufacturing Co. From: 5-26-76 to current. Position: National Sales Director. Gross pay 1985: $66,134. First Quarter earnings: $16,526.

Not bad, John thought. He typed Marci's address into the computer and told it to search the local Register of Deeds' records:

2727 Skyline Drive. Block 221, Lot 5. Land Assessed: 25,072. Improved Assessment: 65,251. Total Assessment: 90,323. Built 1980. Use: residential. Deed of Trust recorded: 11-3-81. Loan Instrument: 23489. Amount: $65,000, between Albert Jacob and Marci Hamilton Stratford, and First National Security Bank. Other personal assets: 25 foot sailboat, assessed at $15,000.

John paused. Marci Hamilton had once been Marci Stratford. He decided to check county divorce records:

Divorce 5-7-85: Marci Hamilton Stratford versus Albert Jacob Stratford. Married: 12-7-78. Number of Children: two; Andrew Thomas: born 5-5-79; Lynn Carroll Richards, born: 7-8-75. Grounds for divorce: infidelity. Divorce sought by: wife. Custody of children: wife. Race: husband; Caucasian; wife; Caucasian. Number of previous marriages: husband; none. wife; one. Date first marriage was terminated: 9-5-76. Place: Reno, Nev.

John considered linking his computer with the State Data Exchange Network, which would give him access to records in other states, such as Nevada, where Marci's divorce had been granted. Instead, he decided to search local school enrollment records for information about their children.

Student enrolled: Lynn Carroll Richards, Somerset School for the Deaf . . . Andrew "Andy" Thomas Stratford, Thomas Edison High, morning; Tri-Area School for Gifted and Talented, afternoons.

John decided to check federal records from the Internal Revenue Service next. Because IRS files are confidential, he could not connect his computer to the IRS computer in Washington. Instead, he put Marci's name on a list that was mailed by the state welfare office to the IRS the next day. A short time later, John received a computer tape from the IRS that contained tax information about Marci's unreported income:

FORM 1090, UNEARNED INCOME:

INTEREST; $2,500 from 25,000 C.D., First National Bank; $5,000 from $50,000 C.D., First National Bank; $3,000 from $30,000 C.D., Central States Bank; $200, Landmark Bank, local Savings Acct.

DIVIDENDS: $1,500, Bevins Furniture, 5,000 shares.

CAPITAL GAINS: $12,000, sale of IBM stock.

OTHER: $7,000, rental from house at 100 Lark Avenue; $5,000 executive sales bonus from Bivens Furniture; $3,245, winnings from wagers at Highland Horse Race Track.

John reviewed what he had learned. Marci was recently divorced after a six-year marriage. She had filed for divorce after charging her husband with adultery. It was her second marriage. Her 10-year old daughter, by her first marriage, had a hearing problem. Her 6-year-old son was above-average in school. Marci had an expensive home; secure, high-paying job; rental and stock earnings; a prestige car; and enjoyed sailing and betting on the horses.

John called Bivens Furniture.

"Good afternoon, this is Ms. Hamilton," a pleasant voice said.

"I don't want to sound too forward," John explained, "but I feel like I already know you. You see, I met some people at a party the other night and they told me all about you and your little girl Lynn, with the hearing problem, and how Andrew, I mean, Andy, is so smart in school."

"Really, who told you about us?" asked Marci.

"This is really embarrasing," replied John, "I mean really embarrassing, but I don't remember their names. It was a big party, you know. Anyway, they said we had a lot in common."

John and Marci are not real persons: They were created to illustrate this story. But the background check that John performed on his desk-top computer is not the stuff of fantasy.

Right now, the Reagan administration is pushing state governments to computerize their records and establish programs that will allow public employees to peek into the financial and personal records of nearly every American.

The White House is doing this as part of a campaign to reduce fraud in federal welfare programs by requiring states to investigate the backgrounds of welfare applicants before adding them to federal benefit rolls. Under regulations published Feb. 28, all states must establish "income verification programs" this fall. The programs will enable social workers to check a welfare applicant's finances by examining state unemployment insurance wage and benefits records; Social Security wage records; and some Internal Revenue Service records. This is the first time the IRS has disclosed information to the states about the individual taxpayer's unearned income from bank accounts, stocks, etc.

Technically, the federal government cannot require a state to computerize its records. But the White House's Office of Management and Budget has written its "income verification programs" so stringently that it will be difficult and expensive for states to meet the Sept. 30 deadline without using a computer.

OMB also has encouraged states to go even further, if it's legally possible—for example, to tap into bank records, private credit-checking agencies or hospital records. States have responded enthusiastically: most have given social workers direct access to state wage information, property records, motor vehicle records and public school enrollment records. Some states are also computerizing birth, marriage, divorce and death records. The White House also has announced that it is drafting legislation that will enable states to inspect information now collected by the Immigration and Naturalization Service and the Veterans Administration. Eventually, states may be allowed to have direct access via their computers to federal records in these and other agencies.

The OMB, which is overseeing this massive state computerization and data-swapping effort, insists that the public has nothing to fear. The federal government is not setting up one, giant computer system, but "54 state/territorial systems, each operating independently," OMB recently said in a press release.

"Pre-screening welfare applicants will reduce error rates and better target precious resources to the truly deserving," OMB Director James C. Miller Jr. explained. OMB's new verification procedures will save taxpayers $375 million next year alone.

But these 54 systems are not separate. They will be able to exchange information, and they will have access to records of all Americans, not just those who apply for welfare.

In effect, the federal government is creating a de facto national data bank through state governments.

"The computer is not the problem," explained David Linowes, former chairman of the now defunct Privacy Protection Study Commission, the last presidential panel appointed to investigate privacy concerns. "The problem is balancing a citizen's privacy rights with the quest for government efficiency."

Nevertheless, the federal government, under Presidents Jimmy Carter and Ronald Reagan, has spent more time devising ways to use computers to ferret out fraud, waste and abuse than it has worrying about Americans' right to privacy.

"When this administration has had to choose between government efficiency, law enforcement and protecting Americans' privacy, it always has come down on the side of efficiency and law enforcement," said Jerry Berman, director of the American Civil Liberties Union's Project on Privacy and Technology.

Robert Ellis Smith, publisher of Washington-based Privacy Journal, says the Reagan administration has paid scant attention to privacy concerns, but has "elevated" the use of computers as weapons against waste, fraud and abuse "to an art form."

In a 1983 report titled "Who Cares About Privacy?" the House Government Operations Committee reached the conclusion that no one in the federal bureaucracy really is paying much attention to the Privacy Act of 1974—the federal law passed after the Watergate debacle to protect Americans from unwarranted government intrusion. That law prohibited the government from collecting information about citizens without their consent. But the Carter and Reagan administrations, in their zeal to improve government efficiency and nab crooks, have weakened the law and inadvertently pushed us to the brink of an Orwellian nightmare.

Big Brother was born Nov. 9, 1977. Joseph A. Califano Jr., secretary of what then was the Department of Health, Education and Welfare, made the delivery. On that date, Califano announced Project Match, an innovative way to catch welfare cheats with the aid of government computers.

Federal investigators, Califano explained, had programmed a computer to compare two huge sets of federal records. One was a list of welfare recipients in 21 states and jurisdictions where there were high numbers of either welfare recipients or federal employes (including New York City and the Washington suburbs). The other list contained information that had been supplied by all federal employes at the time they were hired. In a matter of days, the computer had pulled together the names of everyone on both lists. Obviously, Califano said, there were people gainfully employed by the federal government who were also on the welfare rolls illegally.

Califano, with much hoopla, predicted that this "computer matching" would revolutionize government investigations. But behind the scenes, some Carter administration lawyers were concerned that Project Match was illegal.

Califano todays recalls that some HEW attorneys were disturbed about Project Match

in its early stages, but "the lawyers ultimately okayed everything."

"I was trying to move against fraud . . . in a department that was appallingly unmodern," Califano said. In some cases financial records at HEW were kept in shoe boxes, Califano said. "Our initial idea was to run welfare records against federal tax returns," Califano recalled, "but I was told there was a law which prohibited that. I told my staff to determine what records we could use."

Internal HEW memos, first made public in 1981 by Computerworld, a computer industry newspaper, revealed that HEW attorneys had a difficult time meeting Califano's request—at first.

Project Match, the lawyers warned, appeared to violate the Privacy Act, which specifically prohibited federal agencies from swapping information about Americans without first obtaining their permission. The Privacy Act also said the government couldn't collect information for one reason and then use it for another.

In order for HEW to perform Project Match, the agency had to get federal personnel records from the Department of Defense and the now defunct Civil Service Commission. But both of those agencies claimed the Privacy Act prohibited them from sending the records to HEW. No federal employes had given DOD or CSC permission to send their records to HEW nor had they been told when they went to work for the government that their personnel files might be used as part of a welfare investigation.

In a 12-page memo, HEW attorneys suggested that Califano's office fall back on an old Washington standby—bureaucratese—to circumvent the Privacy Act restrictions. If HEW treated the record exchange "as something other than a disclosure of records" it might be able to avoid Privacy Act problems, the lawyers explained. They suggested that HEW describe its record request as interdepartmental "'assistance' rather than as a transfer of records."

DOD and CSC refused, but both agencies eventually found "loopholes" in the Privacy Act that made it possible for them to help HEW. In effect, the government broadened the definition of "routine information": data that were previously protected by the Privacy Act suddenly could be exchanged.

Some members of Congress were becoming concerned about computer matching. But Richard Neustadt, than a Carter aide, told the White House in a 1978 memo that those members of Congress "have avoided public comment because they are reluctant to attack a procedure that identifies federal employees who are cheating the government."

Neustadt, who now owns a telecommunications company in New York City, said during an interview that the White House also was concerned about the privacy implications of matching. But, he said, "matching showed us a way to really do something about ending fraud."

The White House asked Terril Steichen, an analyst at the White House Office of Telecommunications Policy, to draft guidelines for computer matching so that it wouldn't get out of hand. Steichen's proposal contained three key safeguards. Federal agencies had to justify each match, certify that a computer match was the only way an agency could achieve its goal and prove that the match would save the government more money than it would cost.

"OMB found the guidelines too restrictive," said Steichen, now a vice president at a private telecommunications company. OMB officials "felt none of the proposed computer matches could pass the guidelines."

Steichen unsuccessfully urged for tight control of matching. "It is only a matter of time before the public begins to perceive these matching programs as the beginning of a government data bank,"he warned.

Nearly one year after OMB rejected Steichen's guidelines, it released its own computer matchng rules. Though they were less restrictive than Steichen's proposals, they did require computer matches to be cost effective and federal agencies had to submit a detailed description of a match to OMB and Congress 60 days before conducting it.

"We felt those requirements would protect the public," recalled Neustadt, "especially the public disclosure provision. If an agency was going to do something really dumb, they'd have to tell Congress and OMB first, which could stop them."

Computer matching and Ronald Reagan were made for each other. He had campaigned on cutting federal fat and eliminating waste, and he saw matching as a way of achieving both. He also found just the right group in government to implement computer matches—federal inspectors general.

Carter had never liked the IGs—independent investigators and auditors who work in most large federal agencies. But Reagan invited them to the White House, told them to be as "mean as junkyard dogs" in "digging up waste, fraud and abuse" and sent them off and running with his blessing. The IGs soon were claiming millions of dollars in taxpayer savings because of innovative computer matches.

The story of little José Martinez is typical of the IGs' heavily publicized success stories. Federal welfare investigators learned about the boy when they asked a computer to compare federal Medicaid and welfare records.

José's mother had been receiving financial aid for more than four years for her son, yet she had never filed a Medicaid claim on his behalf. José had never visited a doctor for treatment of a virus, an earache or a broken bone.

"It just didn't seem right," said Howard Pierce, the agent who investigated the case. It wasn't. Little José only existed in federal welfare records. Louis and Angela Lopez had created an entire, fictional family to qualify for higher welfare benefits, collecting $60,000 during a four-year period by using three aliases and make-believe children.

Such stories wowed the press and Congress but unsettled the ACLU and other critics of computer matching. The ACLU took a more detailed look at Project Match.

At a press conference in September 1978, Califano had released the names of 15 HEW employees who, he said, had been indicted on charges of welfare fraud based upon Project Match. None of the persons had been contacted before Califano released their names. The ACLU decided to track down all of the 15 employes and hear their side of the story.

One woman, the ACLU discovered, quit nursing school when she was diagnosed as having cervical cancer; she began accepting welfare. After months of cobalt treatment, she convinced her doctor to let her return to work. She notified the welfare department after she went to work for a federal agency, but the office continued to send her checks.

The woman notified the welfare office once again and told them to stop the payments. They didn't and the woman eventually used the money to pay medical bills. After Califano released her name, the woman lost her job and then was charged with fraud, the ACLU discovered. But the judge dismissed the case against her when he discovered that she had twice informed the welfare department that she had returned to work.

The ACLU learned that of the 15 cases, five were dismissed, four persons pleaded guilty to misdemeanors (theft under $50) and six pleaded guilty to felonies. Federal judges, unimpressed with the government's "best cases," ordered a total repayment of less than $2,000 and refused to levy any prison sentences.

The ACLU continued its study and reviewed all Project Match cases. HEW had found 638 federal employes on welfare rolls but only 55 of those cases were ever prosecuted. The ACLU and others soon claimed that computer matching cost more than it saved.

The White House moved quickly to silence such criticism. On May 11, 1982, OMB announced new guidelines for computer matching. The rules no longer required federal agencies to show that their matches were cost effective. The Carter administration had issued its guidelines after a seven-month period of public notice, debate, and comment. The Reagan administration announced its revisions without any formal notice outside the government.

The new guidelines also said that agencies no longer had to provide Congress or OMB with detailed explanations about matches.

Gone now was any remnant of the Privacy Act safeguards.

In December 1982, the White House ordered the Internal Revenue Service to use its tax records to help the U.S. Selective Service track down young men who the government believed had not registered for the draft—a computer match that wouldn't have had a chance in the early '70s slipped past Congress with barely a murmur.

Computer matching was about to enter a new phase, technically called "front-end verification." Rather than catching crooks after they were on welfare, why not use computer matches to determine whether an applicant was qualified to receive welfare in the first place.

The Grace commission, a group of private businessmen appointed by President Reagan to study federal benefit programs, liked the idea.

It is "inconsistent," the commission said, for the government to say that only poor people can receive welfare and then make no effort to "verify the applicant's assertions." With that in mind, it recommended that states be required to perform vigorous investigations before allowing anyone to receive welfare.

To help the states do this, the federal government had to open up Social Security Administration wage records and some Internal Revenue Service files to the states, the Grace commission said.

In addition, it said, welfare applicants should be required to obtain Social Security numbers and also to submit their federal income tax returns to the government when they applied for benefits.

The commission concluded that states had to computerize, centralize and standardize their records. "A uniform data gathering and entering process makes possible an intrajurisdictional records search," the task force explained. "The past history of each individual will be stored in the computer."

The White House sent the Grace commission's extensive recommendations to Congress, where they were automatically added to the massive Deficit Reduction Act of 1984 by the Republican staff of the House Ways and Means Committee. There was some concern among committee members about the recommendations, a staff attorney recalled, but "no one wanted to be against a program that would help catch people who were cheating the government."

Only Sen. William S. Cohen (R-Maine), chairman of a Senate subcommittee on oversight of government management, raised any questions about the "income verification procedures," by then hidden in the major $50 billion tax bill. Cohen made the procedure more palatable by adding a clause that prohibited welfare agencies from denying anyone welfare benefits based solely on a computer match. Welfare workers had to give the applicant a chance to explain his case in person.

OMB pushed to get its new procedures in place. The rules were published on Feb. 28 of this year and the states were given until May 29 to comply. After a number of states objected to the deadline, OMB agreed to give states until Sept. 30 to comply if they needed extra time.

OMB is so sure that its income verification is a good idea that it already is drafting legislation to expand the program. Families whose children apply for low-interest college loans from the government, veterans who check in at VA hospitals, retired coal miners who request black lung benefits and young families who ask the Farmers Home Loan Administration for a mortgage—all will soon have to undergo the same computer checks as welfare applicants if OMB gets its way.

Linda C. Connelly began as a social worker in North Carolina 16 years ago, moving up the hierarchy to her current job as quality assurance chief of Medicaid. North Carolina already has a State Information Process Center where an IBM 3090 mainframe keeps tabs on 80 percent of all state records.

Within a few minutes, Connelly can use a computer terminal to review any North Carolinian's motor vehicle records and state wage records, which employers must file. She also has access to information sent to the state from the Social Security Administration.

North Carolina has a privacy law that prohibits social workers from disclosing information from welfare records to outsiders. The state also has programmed its computer so that social workers can only look at the specific information that they need. For example, social workers do not have access to motor vehicle records that identify drivers with outstanding tickets. Connelly acknowledged, however, that the state currently could not tell if a social worker in a county office typed his neighbor's name into the state computer out of curiosity.

"We can't say for sure that a social worker isn't abusing the system," she said. "But we hope that they aren't, and if we catch them, they will be in trouble."

Connelly said that she really isn't worried that state employees in North Carolina might misuse the state computer network either now or when it soon begins receiving federal records.

What worries her more, she said, is an apparent shift in the attitude of the federal government toward states. The emphasis from Washington used to be on making sure that states were getting help to the needy as quickly as possible. Now, the emphasis is on "making sure states are complying exactly with the wording of various regulations."

The shift is subtle. It has moved from concern about people to concern about regulations and, in the process, Linda Connelly said, her job sometimes isn't as much fun as it once was.●

CONFERENCE REPORT ON CIVIL SERVICE RETIREMENT

● Mr. MATHIAS. Mr. President, the task we completed last night first faced us 2½ years ago, when the requirement that new Federal workers be put under Social Security took effect under the Social Security Amendments of 1983. From that day, Congress knew it had to develop a retirement plan to cover employees hired after January 1, 1984. As we began this monumental task, we had no magic blueprint for a new plan. The only thing we knew for certain was that whatever we created, it would have to be vastly different from the existing Civil Service Retirement System not only because of the Social Security component, but because we were constrained by mounting cost considerations.

The distinguished Senator from Alaska [Senator STEVENS], who has devoted so much of his time and expertise to this endeavor, faced many frustrations in his early attempts to devise a retirement scheme that everyone—Congress, the administration, and Federal workers—could live with. To accomplish this, he and other Members of Congress rolled up their sleeves and proceeded quietly to work. Publicly, we waited for all of those who had an interest in the new system to realize that we were being forced to break new ground and that the old had to make way for the new. I would say that the wait has been well worth it.

The new retirement plan that we brought to the Senate yesterday is a good one that I believe will be attractive not only to new employees but to employees covered under the old system as well. It has three tiers: Social Security; a basic annuity—defined benefit plan; and a thrift/saving plan. Moreover, it has been tailored in such a way that all workers, whatever their income levels, will be treated basically the same and have approximately the same percentage of salary replaced through their pension—except those workers who are able to take full advantage of the thrift plan.

In important ways, the new retirement system has features that are similar to those in the current plan. For example, certain employees will still be able to retire at age 55 with 30 years of service. This "minimum" retirement age will gradually increase to 57 over a period of years. Employees who have reached the age of 60 and 62 will be able to reitre with unreduced benefits with 20 and 5 years of service, respectively.

In addition, the basic annuity will still be computed on the basis of the average salary of the highest 3 years of service, rather than on the basis of the highest 5 years of service. There will also be cost-of-living adjustments [COLA's] to protect older Federal retirees from inflation. The Social Security portion of the pension will receive a full COLA; the basic annuity will get full inflation protection up to 2 percent inflation. If inflation is higher than 2 percent, the adjustment would equal CPI minus 1 percent.

The retirement plan that has been created distinguishes itself from the current plan in positive ways as well. The most far-reaching distinctions are that employees have more control over their retirement and greater flexibility in employment.

First, a tax-deferred thrift plan gives employees the ability to invest a portion of their retirement contribution so that they can increase their potential retirement income. At present, employees cannot invest the money they have contributed toward their retirement.

More importantly, the Social Security and the thrift tiers of the new plan make it portable. This means that employees will be able to join, rejoin, or leave Government service with greater ease. The Government will benefit from a fresh influx of talented, experienced people from the private sector who want the opportunity to perform Government service. Employees will also benefit because they will not longer have to forgo vested retirement benefits to take more challenging positions in the private sector.

All of these factors add up to a retirement system that is fair to the employee and to the American taxpayer. With this plan, we have substantially reduced the cost to Government of maintaining a retirement program for its employees. But we also have to plan that is generous enough to compare with some of the best pension programs in the private sector. Congress recognized these competing goals when it began the long process of creating a new retirement system and it has achieved both goals admirably. The benefit is twofold: the new retirement system will be a good tool for attracting and retaining qualified people for Government service. It will also better protect Federal employees against attacks on the civil service retirement programs as being too costly, especially in comparison with the private sector.

Since the new retirement system will not take effect until January 1987, Congress has made provision in this bill to continue the interim retirement system through the remainder of this year. The interim plan will be retroac-

tive to May 1, to cover the period when certain employees were forced to make both Social Security and civil service retirement contributions. Therefore, employees who paid an extra 5.7 percent of their salary toward retirement will have that money reimbursed to them as quickly as possible.

Mr. President, it is not often that the Senate, by an overwhelming majority, supports a project of this magnitude. Now that we have adopted the conference report on H.R. 2672, I would like to extend my heartfelt thanks and appreciation to three men in this body who have made this plan a reality—Senator STEVENS, Senator EAGLETON, and Senator ROTH. By putting in long hours, making tough decisions, and guiding us through the rough waters we treaded recently, they have made a potentially explosive issue a virtually painless exercise. I, for one, am grateful to them for their courage and their leadership. And I am gratified that my colleagues have joined me in supporting this excellent work product.●

FIGHTING FRAUD AND MISINFORMATION

● Mr. COHEN. Mr. President, last week, a Wall Street Journal op-ed piece by Paul Craig Roberts, criticizing legislation to strengthen Federal remedies against fraud, was inserted in the CONGRESSIONAL RECORD. This article, which appears on page S6077 of the May 15 RECORD, contains numerous misstatements and inaccuracies that bear rebuttal.

The legislation in question—S. 1134, the Program Fraud Civil Remedies Act—would permit agencies to initiate administrative proceedings in those false claim and false statement cases under $100,000 that the Justice Department declines to litigate. Senators ROTH, LEVIN, NUNN, CHILES, GRASSLEY, GORE, HEINZ, DECONCINI, RIEGLE, DODD, MATSUNAGA, LEAHY, KENNEDY, ROCKEFELLER, and BOREN have joined me as cosponsors.

Fraud against the Government is pervasive. While judicial remedies are available to penalize and deter such fraud, the cost of litigation—particularly for the small-dollar cases—often exceeds the amount recovered, making it economically impractical for the Justice Department to go to court.

The General Accounting Office documented this problem in a 1981 report, which reviewed more than 77,000 fraud cases committed against the Government during a 3-year period. Of those cases referred to the Justice Department, the GAO found that less than 40 percent were prosecuted, in many cases because of the small dollars involved. The Government is, therefore, left without an adequate remedy for many small-dollar cases.

The consequence, according to the Justice Department, is that the Federal Government loses "tens, if not hundreds, of millions of dollars" to fraud each year. Beyond the actual monetary loss, fraud in Federal programs also erodes public confidence in the administration of these programs by allowing ineligible persons to benefit from them.

Since 1981, the Governmental Affairs Committee has worked diligently to fashion a solution to this problem. The Program Fraud Civil Remedies Act, which marks the culmination of that effort, would capture those small-dollar fraud cases that now fall through the cracks of our judicial system. Last November, after careful consideration, the committee reported S. 1134 with only one dissenting vote.

It's worth noting, moreover, that this legislation is supported by the major players in the fight against fraud—the Justice Department, the General Accounting Office, and the inspectors general—as well as the Administrative Conference of the United States, the Federal Bar Association, and the Packard Commission.

The benefits of establishing an administrative proceeding to adjudicate small-dollar frauds, as provided in S. 1134, are numerous. First, it would allow the Government to recover money that, up until now, has been irretrievably lost to fraud. Second, it would provide a more expeditious and less expensive procedure to recoup losses, compared with the extensive investments of time and resources required to litigate in Federal court. And finally, such an administrative remedy would serve as a deterrent against future fraud by dispelling the perception that small-dollar frauds against the Government may be committed with impunity.

Despite the widespread support for S. 1134 and the benefits to be gained, consideration of this legislation by the full Senate has been forestalled through a campaign to misinform the public about its provisions. Much of this misinformation, which is contained in the Wall Street Journal article written by Mr. Roberts, would lead the uninformed to believe that the proposed administrative remedy in S. 1134 is, at best, novel, or, at worst, extremely unfair. Neither is the case.

Approximately 200 statutes authorize the administrative imposition of civil penalties. The civil monetary penalties law, in particular, permits the Department of Health and Human Services to impose penalties administratively against health-care providers who bill the Government for services never provided. Since implementation of this statute in 1983, HHS has been able to recover over $22 million. It should be abundantly clear, therefore, that the administrative proceeding proposed in S. 1134 is by no means novel.

Moreover, administrative remedies are not only effective, but fair. In drafting S. 1134, the Governmental Affairs Committee made sure that elaborate due process protections were built into the Program Fraud proceedings. As Prof. Harold Bruff, a noted administrative and constitutional law scholar, stated in a recent letter to me:

> S. 1134 not only passes due process scrutiny; . . . it goes as far to protect those charged with fraud as is possible without impairing the government's efforts to obtain remedies that will protect the public fisc.

Contrary to Mr. Roberts' assertion that "provisions * * * of S. 1134 do not seem to grant the accused any real right to be heard," anyone alleged to be liable under the bill would have a right to a hearing before an administrative law judge—a trained, independent hearing examiner. The hearing would be conducted according to the provisions of the Administrative Procedure Act, which entitles the person to a written notice of the allegations, the right to be represented by counsel, and the right to present evidence on his or her own behalf. The bill even goes beyond these APA protections by granting the person discovery rights.

The Supreme Court, in fact, has upheld laws that provide far less elaborate due process protections than are afforded by S. 1134.

Mr. Roberts' article contains other errors as well. Typical is the contention that S. 1134 "could easily catch anyone who makes an honest mistake."

This simply is not true. Under S. 1134, the Government would not only have to prove that a claim or statement is false, but also that the person either "knows or has reason to know" that the claim is false. This knowledge standard ensures that a person who makes a false claim or statement through "an honest mistake" would not be held liable. Moreover, this is not a new standard, but one based on court interpretations of present law.

Mr. Roberts also contends that the testimonial subponea authority granted by S. 1134 to inspectors general is both "new and apparently unlimited." Neither charge is accurate.

The authority is not new. More than 65 laws already grant such authority, ranging from the broad power given to te Department of Health and Human Services for investigations of claims for Social Security retirement and disability benefits to the authority given to the Department of Agriculture for investigations under the Horse Protection Act.

Nor is this authority unlimited. As in all investigations, the subpoena must be necessary and relevant. The IGs, who must personally approve the sub-

poenas, the Justice Department, which has veto authority over their use, and the courts of law, where the subpoenas may be challenged, all stand ready to safeguard against abuse. In addition to these safeguards, S. 1134 provides due process protections for those individuals subpoenaed to testify.

Enactment of an administrative remedy for small-dollar fraud cases is long overdue. The fact that the Justice Department is unable, as a practical matter, to pursue most cases where the Government does not sustain a significant monetary loss is an open invitation to those individuals tempted to defraud the Federal Government.

Until Federal agencies are given the power to bring administrative proceedings in such cases, these small-dollar frauds will continue unabated. The Program Fraud Civil Remedies Act will help combat fraud without in any way compromising the rights of individuals accused of wrongdoing.●

HERB BOWDEN, SMALL BUSINESS PERSON OF THE YEAR

● Mr. WEICKER. Mr. President, I take this opportunity to congratulate Herb Bowden, president of Sencore, Inc., in Sioux Falls, SD, for being selected as South Dakota's Small Business Person of the Year. Although Herb is not one of my constituents, I have had the pleasure of working with him in my role as chairman of the Small Business Committee. Herb founded Sencore in 1952 with $800. Today his electronic manufacturing firm is netting more than $15 million in yearly sales and profits of more than $2 million a year.

For 4 years Herb has served as a member of the committee's National Advisory Council. The Council which is the first citizen's advisory group to be established in the Senate, consists of 25 small business owners from all over the United States. Members of the Council come to Washington once a year at their own expense to provide the committee with a grassroots perspective on issues affecting small business. Herb's involvement with the Council over the past few years has been invaluable. His active participation at Council meetings combined with his unique insight into the problems affecting the small business community has been of tremendous help to the committee in formulating its legislative agenda.

Again, I wish to congratulate Herb Bowden for his outstanding contributions to the small business community and his work on behalf of the Senate Small Business Committee's National Advisory Council.●

SMALL BUSINESS WEEK

● Mr. WEICKER. Mr. President, it gives me great pleasure to rise today and speak on behalf of the 14.2 million small businesses in this country and herald the achievements of this important sector of our society. Small business is the key engine of our economy; it has created the lion's share of new jobs over the last several years, and is at the forefront of innovation and research. So as we celebrate small business week I think it is important for the Senate to recognize the importance of small business and encourage the growth of the entrepreneurial spirit in America.

Mr. President, small business week provides me the yearly opportunity to call to the attention of the Senate the achievements of a small business person from my home State of Connecticut. This year's Connecticut small business person of the year is an outstanding citizen and entrepreneur.

This year's winner, Mr. Phil Edelstein purchased in 1970 the Danbury Plumbing Supply Co., which at that point had three employees and a sales volume of $570,000. He set out to expand the company and, with the help of a federally guaranteed SBA loan, he moved the company out of its 100-year-old wooden building into a modern, 12,000 square-foot building with a much-needed outdoor storage yard in Danbury's commerce park. The very small company that Mr. Edelstein purchased in 1970 now boasts 20 employees and a sales volume of $6.8 million. Having outgrown its commerce park home, the Danbury Plumbing Co. is now searching for a new site. The company projects $10 million in sales by 1988 and a total 26 employees, a far cry from the 100-year-old wooden building Mr. Edelstein started with.

Phil Edelstein is not the kind of man who makes a profit and forgets that a successful business has a responsibility to its community. The Danbury Plumbing Supply Co. has an affirmative action program, and a sincere effort has always been made to attract and hire people of minority groups. Minority employment in the company is at 15 percent, and the company has hired part-time workers through the Danbury Association of the Retarded and Handicapped, as well as through the State Department of Labor.

He has said, and I quote:

Our constant support and interest in our community and State has resulted in our feeling that both Danbury and Connecticut has given all of us a quality of life that cannot be equaled. We have always been proud to pay our dues for the privilege of living and working here.

Mr. President, what makes heralding the achievements of Phil Edelstein and the Danbury Plumbing Supply Co. so rewarding is the fact that the Federal Government, and, to be exact, the Small Business Administration, played a role in the success story. And today, there are those who will make the case for terminating the agency. All I will say to the critics is that if they would get away from the anecdotal reports of waste at the agency, examine the record and get a good look at the benefits that have been derived by the Federal Government lending a helping hand to businessmen like Phil Edelstein, then I think we could end this insidious debate and get on with continuing assisting small business in America.●

ABANDONED MINE REHABILITATION

Mr. McCLURE. Mr. President, last night during the discussion on the nomination of Jed Christensen, I committed to the Senator from Tennessee that Mr. Christensen would commit in writing the offer which had previously been made to assist the State of Tennessee in rehabilitation of abandoned mine areas. Although Tennessee has lost the 50 percent State share of collections due to its having given up primacy, I congratulate the Department and the new Director of the Office of Surface Mining Reclamation and Enforcement for their concern. I ask that a copy of the letter from Mr. Christensen be printed in the RECORD.

The letter follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF SURFACE MINING,
Washington, DC, May 21, 1986.

Hon. JAMES A. McCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I very much appreciate the work you and the Committee staff have done in reaching an innovative and equitable resolution allowing priority reclamation of abandoned coal mine lands in Tennessee. We will continue to work closely with Governor Lamar Alexander in the identification of priority sites.

Under Governor Alexander's leadership, Tennessee now has instituted a State-funded AML program that will operate in Fiscal Year 1986. Pursuant to our discussions, the Office of Surface Mining Reclamation and Enforcement (OSMRE) will spend approximately $1 million in Fiscal Year 1986 for high-priority reclamation projects, to be identified in our continuing discussions with Governor Alexander.

The federally-funded AML work will augment the State's AML program on high-priority projects. At the same time, the renewed State AML program will maintain the State AML staff as an active organizational unit, ready to resume full operation of a permanent, federally-funded State AML program when Tennessee once again assumes primacy.

As Tennessee and OSMRE continue working toward their mutual goals of environmentally sound coal mining and the reclamation of abandoned coal mine lands, we will plan to continue operating an appropriately funded federal AML program in Tennessee through Fiscal Year 1987, by match-

ing Tennessee's 1987 State-funded AML program dollar-for-dollar.

It has been your commitment which has led to a workable solution to this problem. Because of your support, we can now continue to build on the cooperation we have enjoyed with Governor Alexander, to address the real concerns shared by all of us.

Sincerely,

JED D. CHRISTENSEN,
Director.●

"MASSACRE IN COLOMBO"

● Mr. DURENBERGER. Mr. President, I would like to draw my colleagues attention to an editorial that appeared May 15 in the Wall Street Journal entitled "Massacre in Colombo."

On May 3 terrorist groups placed a bomb aboard an Air Lanka plane at Colombo's International Airport, destroying the plane and killing 17 passengers—French, German, British, Japanese, Sir Lankans, and Maldives among them. A few days later, on May 7, a bomb was set off in the capital's central telegraph office killing 12 people and injuring over 150. Tamil terrorist groups fighting for a separate state are reported to have been responsible for these two attacks.

The problems and frustrations facing the Government of Sir Lanka are not unlike those which this country confronts in its efforts to combat terrorist groups. President Jayewardene of Sir Lanka has been trying to negotiate with the groups responsible for the attacks, but hitherto with little success. This only reinforces my belief that terrorism cannot be eliminated solely by the efforts of victim governments; each act of terrorism must be regarded as an attack against all mankind. We will only defeat this scourge when the world community comes together to fight against it. It is with this in mind that I think the situation in Sir Lanka deserves our attention and action to lend whatever support we can to resolving their problems. If Sir Lankans strive to restore the ethnic harmony between the Sinhalese and the Tamils, their success in that effort is in the best interest of the United States.

Mr. President, I ask that the text of the editorial be printed in the RECORD.

The editorial follows:

[From the Wall Street Journal, Thursday, May 15, 1986]

MASSACRE IN COLOMBO

Americans may not consider the friendly, scenic island nation of Sri Lanka as a hot spot in the East-West conflict, but don't tell that to the Sri Lankans. In recent days, bombs have ripped apart an Air Lanka jetliner, killing 16, and a telegraph office in downtown Colombo, killing 12 and marking a major escalation of violence. One more Western-leaning country looks like falling into the maw of the international terror network.

Like many such troubles, Sri Lanka's have their roots in ethnic squabbles, in this case between the minority Tamils and the majority Sinhalese. But as in Lebanon or Ireland, whatever legitimate grievances the Tamils do have long ago ceased to be relevant. Radicals quickly polarized matters, terrorizing both Sinhalese and any Tamils moderate and courageous enough to want to negotiate.

The Colombo government has offered some autonomy for Tamil majority areas, but the radicals by now won't settle for anything less than a separate state.

There may have been a time when these local disputes could be fought without outside influence, but that day is long gone. Nowadays radicals anywhere can avail themselves of sanctuaries, training camps and weapons dealers only too willing to promote trouble in a democratic state. The Tamil groups began tying themselves into this network and bragging about it, telling visiting reporters about their links to the radical offshoot of the PLO led by George Habash and about how their men had trained in Lebanon.

"Our basic alliance is still with the PLO. But we maintain active contact with the other groups like the Zimbabwe African People's Union, the Zimbabwe African National Union and the African National Congress," one of the Tamil leaders told an Indian reporter two years ago.

Sri Lankan officials have also claimed to have evidence of East German aid to the Tamils, and, in any case, East Bloc aid to PLO terrorists is old news. The opportunities for mayhem must seem too good to be true. Sri Lanka remains an underdeveloped place with a weak military. Terrorist sanctuaries are available across the Palk Strait in the Indian state of Tamil Nadu, which is dominated by ethnic Tamils who support the separatists. When Rajiv Gandhi's government tried to deport two Tamil terrorist leaders last year, demonstrations broke out in the state, and India backed down. Nor does it hurt that all of the major Tamil groups are avowed Marxists seeking to divide a "capitalist" state. India has done its best to try to mediate this dispute, but its efforts have foundered on the demands of Tamil radicals.

Sri Lankan President Junius Jayawardene said Sunday that his country could be dismembered unless the West comes to his aid with arms and money. "Ours is a democratic country," he said, "and it is being destroyed by the people." It is probably time for the U.S. and other countries to respond to his request. In modern times, terrorism is invasion by other means and the Sri Lankas of the world are the front-line states.●

BURIED ALIVE: THE PLIGHT OF SOVIET JEWS

● Mr. D'AMATO. Mr. President, the editor-in-chief of Reader's Digest, Kenneth O. Gilmore, sent me a copy of an article which will appear in the June edition concerning Soviet Jewry. The article, which is entitled "Buried Alive: The Plight of Soviet Jews," clearly describes the adversities faced by Jews in the Soviet Union. As chairman of the Helsinki Commission on Human Rights in Europe, I realize how important it is to make the public aware of human rights abuses in other nations. This article goes a long way toward educating the public on this very serious problem.

Mr. President, I am pleased to share with my colleagues this article. I ask that it be printed in the RECORD.

The article follows:

[A Reader's Digest Reprint]

BURIED ALIVE: THE PLIGHT OF SOVIET JEWS

(By Lawrence Elliott)

(To be a Jew in Russia today is to face a living death: prospects for a normal life—an education, a job, a future—have never been bleaker; yet even to ask to emigrate is to risk persecution or prison. Can't we in the West help? Do we have the will?)

Anatoly Shcharansky's walk across Berlin's Glienicke Bridge to freedom on a stinging cold morning last February exhilarated the non-communist world. Shcharansky had been the animating spirit of the beleaguered human-rights movement in the Soviet Union. Nervy, iron-hearted, he spoke for the thousands of Jews refused permission to emigrate, then braved the Kremlin's wrath and the KGB's inexorable retribution: a crudely fabricated charge of spying, a sentence of 13 years in prisons and a labor camp.

Now, having served nine years—including 403 days in a frigid punsihment cell where he was fed only every second day—here he came walking into West Berlin, unbroken, uncompromising, mocking his tormenters to the end. At the East Berlin airport they had ordered him to march straight ahead to a car that would take him to the crossing point. Said Shcharansky, "I agree to nothing proposed by the KGB"—and strode off to freedom, zigzagging the whole way.

Millions rejoiced; some even hailed his release as proof that freedom was an irrepressible idea. If so, it was an idea whose time has not yet come for the rest of the Soviet Jews—and Shcharansky was the first to say so. He vowed not to forget "those whom I left in the camps and prisons, who are still in exile, or struggling for their rights to emigrate." Their true numbers are unknown, these people who live in limbo, and for them the only changes have been for the worse.

For Jews in the U.S.S.R. today, life on the always precarious razor's edge has turned critical. Jew-hating is in full fashion, with anti-Semitism rampant in the press, and on radio and television. A Jew's prospects for an education and a decent job are bleaker than at any time since the Revolution. Every expression of Jewish faith and tradition is under attack.

Yet never has it been harder for Jews to leave. Emigration, which exceeded 51,000 in 1979, was below 1200 last year.

Still they keep trying. There is reason to believe that nearly half the Jewish population of two million would ask for visas if they thought they could get them. At least 30,000 have been turned down—some again and again. "Refuseniks" are official pariahs, defamed, routinely dismissed from the jobs, then prosecuted for "parasitism." All they can do is wait, watching helplessly as their creative years slip away in the day-in, day-out struggle to survive.

Your name is Nadezhda Fradkova, and in 1978 you live and work as a linguist in Leningrad. You have been made to feel that being a Jew conflicts with being a loyal Soviet citizen. You apply for a visa to immigrate to Israel.

They tell you your father will not give his permission. You cannot believe your ears. Your father divorced your mother before you were born. You are 31 years old, and

you have never even met him. You protest. And, as often as possible, you reapply for a visa. To no avail.

You lose your job and support yourself as a cleaning woman and by giving private language lessons. Years pass. In March 1983 you start a hunger strike. The KGB drags you off to a hospital where you are drugged and force-fed.

In May the KGB releases you, but soon you are on another hunger strike, and they come for you again. This time, with a friend's help, you smuggle an appeal to the outside world. Your captors let you go—for a moment.

On May 2, 1984, you are arrested and taken to a psychiatric hospital where you are registered as mentally disturbed. In July, you are kept in total isolation. In September, you are judged fit to stand trial.

Never in the history of Soviet jurisprudence has the defendant in a political trial been acquitted. You are sentenced to two years' imprisonment. In September 1985, in a labor camp in Arctic north, you are put in a punishment cell for starting another hunger strike. When you finally complete your sentence, you will apply again for an exit visa. They cannot take away your hope.

Anti-Semitism was banned by law after the Revolution. But under Stalin, Bolsheviks began terrorizing those who clung to a Jewish religious or community life. Unlike every one of the other 100-odd nationalities in the Soviet Union, Jews were expressly denied their own schools, as well as Hebrew newspapers and books. Synagogues were shut down and rabbis persecuted. Even the teaching of Hebrew was made a crime.

The new Israeli nation handed Stalin—and every one of his successors—a fresh pretext for anti-Semitism. When the Kremlin reviled Israel and its "Zionist warmongers," the threat to Jews in the U.S.S.R. was painfully clear.

But something remarkable happened: instead of being cowed by this abuse of Israel, many Jews found that their feelings of Jewishness intensified, and this served to rekindle Jewish thought and tradition. Israel gave them hope. Putting their fears behind them, Jews began demanding the right to emigrate. Though the Kremlin responded with intimidation by the secret police, raids and arrests, the impulse to go swelled. In 1970, after only 1000 exit visas were granted, the bravest of the thousands who had been refused defied authorities; they staged sit-ins, wrote open letters to the United Nations, even renounced their citizenship. "Each person has his quota of fear," said one. "We have used up ours."

You are Vladimir Slepak. Your father is an old Bolshevik whose faith in the Revolution remained unshaken even during Stalin's purges and anti-Semitic spasms, even though he nearly lost his life. When you refuse to join the Communist Party, your father is appalled. Later, when you and your wife, Mariya, put in for visas to Israel, you hear that he goes to the KGB and demands that you be denied permission to leave.

You lose your job as head of a television-research laboratory. Your visa application is turned down repeatedly. You and Mariya make common cause with other refusniks in Moscow. You teach yourself Hebrew and attend classes on Jewish culture and history. You are the rock of the Jewish community. Anatoly Shcharansky is in your apartment when the KGB comes to arrest him.

The KGB watches you. Your apartment is ransacked; you are endlessly questioned, fired from one job after another, twice put in "preventive detention." A KGB officer says you cannot leave the Soviet Union—you know state secrets.

"What secrets?" you ask. "In our lab we were fourteen years behind the West."

He smiles. "That's the secret."

The years pass. Your elder son miraculously gets an exit visa. One day in 1978, you and Mariya hang a banner from your window, "Let us out to our son in Israel." For this you are arrested and sentenced to five years of internal exile. Mariya is given a suspended sentence.

They send you to a place near the Mongolian border where the winter winds cuts like a knife. Here Mariya joins you and you serve out your sentence in a one-room flat without water. When you return to Moscow, you apply again for a visa. You have no illusions. But if the visa comes you could be packed in an hour. You have already waited 16 years.

In the mid-1960's, some 4500 Jewish families who had applied to emigrate years before were suddenly given exit visas. This was unprecedented. But even more remarkable was the rising tide of Jewish emigration that followed—nearly 230,000 let go over the next ten years.

What happened? Compassion had nothing to do with it. On the contrary, Moscow, aware that the Jewish emigration movement had attracted the sympathy of the civilized world, coldly decided to make it pay. In the judgment of William Korey, director of international policy research for B'nai B'rith, the Jewish became hostages: "'You want Jews allowed out?' the Soviets were saying. 'Well, we want your wheat and technology; we want credits and tariff preference.' The more hope they had for increased trade, the more exit visas became available."

The question is why, in 1980, they began closing the tap, until today it is a heartbreaking trickle. Had inherent Russian anti-Semitism reasserted itself? Were they losing too many productive professionals? Was emigration ending along with détente?

There is truth in all of this, but the truest explanation lies in a time bomb Moscow cannot defuse: the shrink percentage of Russians in the Soviet empire (an inflated 52 percent in the most recent census), and the growing size and restiveness of other national groups. If Jews were allowed to leave, how long before disaffected Ukrainians or Lithuanians began asking to be reunited with their families in Sweden, Canada and the United States? What if Estonians, Uzbeks or Georgians began demanding more cultural rights, more autonomy? The men in the Kremlin simply quit while they were ahead.

Will the gates reopen? Listen to what Mikhail Gorbachev said in French-television interview last October: "There is no country where Jews have as many rights as in the U.S.S.R. If there is a problem of reunions among family members, we accept that. When do we prevent the resolution of such problems? When the applicant knows state secrets. Then we given him the possibility of waiting." In other words, nothing is wrong; therefore, nothing will change.

One day in 1978 you apply for an emigration visa. You, too, are turned down. You lose your Moscow residence permit. To avoid being expelled, you must hide from the KGB and give up your job as an English teacher. You are Yuli Edelshtein, age 20, and in the days ahead you face the worst the Soviet state has to offer.

You feel you are marking time; the visa will come. Waiting, you teach Hebrew to young people, as do your friends Aleksander Kholmiansky and Dan Shapiro.

The teaching of Hebrew is no longer illegal in the U.S.S.R., but all the unofficial teachers in Moscow, perhaps 50, have been visited by the police and warned to quit. Few do. In the summer of 1984, several Hebrew teachers are beaten and jailed. Aleksander Kholmiansky is arrested, accused of stepping on flowers in a public park. He spends ten days in jail. Released, he is immediately arrested again for "hooliganism." The rest of you walk a narrow line. "Don't even cross the street against a red light," you warn your students.

It doesn't help. After your house is searched by the KGB, you are arrested on September 4 on false drug charges. Your students are interrogated; Dan Shapiro's home is searched. He is arrested for refusing to identify himself and for attacking a policeman.

At your trial in December a parade of paid witnesses stumble through false accusations until even the judge is embarrassed. Nonetheless, you are sentenced to three years' imprisonment. Six weeks later, Aleksander Kholmiansky gets a year and a half.

In the summer of 1985 your wife, Tanya, is allowed to visit. She brings news of Dan Shapiro. In June he appeared on Soviet television in a carefully rehearsed presentation, and condemned the Jewish activist movement as slanderous and anti-Soviet. In return, he was given a suspended sentence. You tell Tanya that Dan must not be blamed; the KGB has so many ways to break a man.

Tanya complains to the camp commander that you have been mistreated. He replies that they mean to beat the religion out of you one way or another. In March you suffer a bad "accident," with broken bones and subsequent infection.

Can we in the West help Yuli Edelshtein? Can we help Nadezhda Fradkova, Vladimir Slepak and all the other Soviet Jews imprisoned in the Gulag, or buried alive in a land they want to leave? Do we have the right?

The International Covenant on Civil and Political Rights assures anyone the right to leave any country; the U.S.S.R. signed it in 1973. The Helsinki accord obligates the signatory powers to provide exit visas for those seeking reunion with their families; the Soviets ratified it in 1975. So we have the right.

Do we have the means? History tells us the Soviets respond neither to threats nor out of moral or humanitarian considerations; they respond when it is in their own interest to do so. Our job is to persuade them that there can be no agreements or concessions in areas of their interest—no arms-control treaty, no expanded trade under most-favored-nation status, no computer technology—until there is a change in the Soviet policy on human rights and emigration. So we have the means.

Which brings us to the final question: Do we have the will?●

NAUM AND INNA MEIMAN: STRANGERS IN A FAMILIAR LAND

● Mr. SIMON. Mr. President, when a Jew in the Soviet Union wants to emigrate to another country, the process is arduous, frightening and lengthy.

Unlike the West, the Soviet Union requires that each citizen apply to the Government for permission to leave. It is then up to the state to decide one's fate.

Naum and Inna Meiman chose to apply to emigrate. They have been waiting for years for the necessary permission. In that time, the Meimans have been completely ostracized from Soviet society. Naum was forced to retire from his profession as a mathematician. Inna's friends are other people in the same situation. The Meimans' telephone was recently disconnected. The Soviet Government has cut the Meimans off entirely.

My question to the Soviets is: If you do not approve of the Meimans, why not let them go? Isn't it easier to let them go than to continue to use resources to harass them?

I strongly urge the Soviets to allow the Meimans to emigrate to Israel.●

NATIONAL HOMELESSNESS AWARENESS WEEK

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 347, National Homelessness Awareness Week, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, there is no objection to the request to discharge the commitee, and there is no objection to the immediate consideration.

The PRESIDING OFFICER. Withoug objection, it is so ordered.

The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 347) to designate the week of May 19, 1986, through May 24, 1986, as "National Homelessness Awareness Week".

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 347

Whereas an estimated 3,000,000 individuals in the United States are homeless;

Whereas an increasing number of homeless individuals are women, children, families, minorities, mental patients, and elderly individuals;

Whereas the demand for emergency shelter increased by more than 20 percent in 22 cities in 1985;

Whereas many emergency shelters do not have sufficient space to provide shelter for everyone who seeks shelter;

Whereas many emergency shelters are in violation of numerous health and safety standards;

Whereas factors contributing to the problem of homelessness include shortages in housing for low-income individuals, deinstitutionalization of mentally ill individuals, drug and alcohol abuse, and unemployment;

Whereas homelessness is a complex problem that cannot be solved by providing only food and shelter;

Whereas organizations, such as the Community for Creative Non-Violence, Luther Place, the House of Ruth, the National Coalition for the Homeless, Headquartered in New York, LIFE (Love Is Feeding Everyone) in East and South Los Angeles, and Saint Peter's Coalition on Temporary Shelter in Detroit are committed to helping homeless individuals in the United States by providing food, clothes, shelter, and medical treatment;

Whereas public awareness with respect to the problem of homelessness should be increased; and

Whereas efforts by the Federal Government and the governments of States to solve the problem of homelessness should be increased: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of May 19, 1986, through May 24, 1986, is designated as "National Homelessness Awareness Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

1986 SPECIAL OLYMPICS TORCH RELAY PERMISSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be discharged from further consideration of House Concurrent Resolution 311, a House concurrent resolution, permitting the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds on May 30, 1986, or such other date the Speaker of the House or President pro tempore of the Senate jointly authorize, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 311) to permit the 1986 Special Olympics Torch Relay to be run through the Capitol Grounds.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 311) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SEQUENTIAL REFERRAL OF S. 1822

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar No. 654, S. 1822, be sequentially referred to the Committee on Finance for its consideration thereof, that any amendments reported by the Committee on Finance relating to the subject matter of S. 1822, as reported, shall be in order and that the period for consideration by the Committee on Finance shall not extend beyond the close of business on June 11, 1986, provided that, if S. 1822, is not reported by the Committee on Finance at such time, it shall be immediately discharged from further consideration thereof and that the bill be available for consideration on June 12, 1986.

Mr. BYRD. Mr. President, reserving the right to object, if the Chair will bear with me.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. BYRD. Reserving the right to object.

Mr. President, I move my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—H.R. 2672, CONFERENCE REPORT

Mr. DOLE. Mr. President, I ask unanimous consent that the conference report to accompany H.R. 2672, the Federal Employees Retirement System Act, reflect the following changes, which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

USE OF CERTAIN LANDS WITHIN THE SEQUOIA NATIONAL PARK

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to Calendar No. 512, House Joint Resolution 382.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. There is no objection.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 382) to authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project.

The Senate proceeded to consider the resolution, which had been reported from the Committee on Energy and Natural Resources, with amendments as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

H.J. RES. 382

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to issue a permit for ten years, and may issue not more than **[**two renewals**]** *one renewal* of equivalent duration, for portions of an existing hydroelectric project, known as the Kaweah Project of Southern California Edison Company, to continue to occupy and use lands of the United States within Sequoia National Park as necessary for continued operation and maintenance.

SEC. 2. The Secretary shall not execute any permit renewal prior **[**sixty**]** *one hundred and twenty* calendar days from the date the same is submitted to the Committee on Energy and Natural Resources of the United States Senate and to the Committee on Interior and Insular Affairs of the United States House of Representatives.

SEC. 3. The permit shall contain a provision prohibiting expansion of the Kaweah Project in Sequoia National Park and shall also contain such other terms and conditions as the Secretary of the Interior shall deem necessary and proper for the management and care of Sequoia National Park and the purposes for which it was established.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. McCLURE. Mr. President, I am pleased that the Senate is finally able to take action on House Joint Resolution 382, which would authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project.

As my colleagues are well aware, consideration of House Joint Resolution 382 by the full Senate has been delayed pending resolution of several questions regarding an amendment which was to be proposed by the junior Senator from California [Mr. WILSON]. It is my understanding that there is no longer a need for the amendment and that the distinguished Senator does not intend to offer the amendment.

Mr. President, be that as it may, members of the staff of the Committee on Energy and Natural Resources and I worked closely with the Senator from California in the preparation of the amendment the intent of which was to address the need by the Secretary of the Interior for the authority to make a loan for research into the agricultural waste water drainage problems of the Central Valley in California. Circumstances dictate that the need for that authority on the part of the Secretary is no longer necessary. But, for the information of the Senate and concerned members of the water resources and environmental communities who supported the amendment, I think it would be useful to have the amendment and an exchange of correspondence between myself and Secretary of the Interior Donald Paul Hodel printed in the RECORD.

Therefore, I ask unanimous consent that the draft amendment and my letter dated May 16, 1986, and Mr. Hodel's response of May 19, 1986, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McCLURE. Mr. President, although the amendment is not now necessary, I would like to commend the distinguished junior Senator from California for his diligent efforts and cooperation during the course of the amendment's formulation.

EXHIBIT 1

U.S. SENATE, COMMITTEE ON ENERGY AND NATURAL RESOURCES,
Washington, DC, May 16, 1986.

Hon. DONALD PAUL HODEL,
Secretary, Department of the Interior, Washington, DC.

DEAR MR. SECRETARY: I am writing with respect to the proposed loan of $3.7 million for research into the treatment of drainage water within certain areas of the Central Valley Project, including construction of a prototype plant, which the Department of the Interior was urged to make in the Conference Committee Report on the Energy and Water Development Appropriations Act for Fiscal Year 1986 (Public Law 99-141). I understand from correspondence which you have had with certain Members of the House that there is some concern that since funds would come from the construction account of the Bureau of Reclamation, and since the loan would likely be made to the Westlands Water District, the loan might have to be considered a contract for repayment of construction charges, triggering the provisions of the Reclamation Reform Act of 1982. I also understand that you have concluded that the statute referred to in the Report (the 1966 Act) does not provide adequate authority for you to make the loan as urged.

As a Member of the Conference Committee, I believe that I can clarify what the conferees intended. As Chairman of the Energy and Natural Resources Committee, I also can express my intent as to the enclosed amendment. The construction account was used solely as a source of funds and for no other purpose. The conferees believed that based on our experience there would be sufficient funds available in that account to fulfill the other objectives set forth in the statement of managers and also accomplish this loan. The conferees did not specify to whom this loan should be made, but we left the selection to you in the expectation that upon review you would be able to select the most capable entity.

With respect to your concern that the 1966 Act does not provide the necessary authorization for this loan, I have enclosed a draft amendment which I believe would provide the necessary authority as an independent provision of law. It is also consistent with the intent of the Appropriations conferees. I would appreciate it if you would review the amendment and let me know as soon as possible if it will provide you with the necessary authority.

Since neither the attempted use of the 1966 Act nor the enclosed proposed authority is intended to be granted pursuant to the Reclamation laws, the provisions of the Reclamation Reform Act could not be triggered. This is true regardless of the source of funds or the potential recipient. Therefore, absent a specific statement in the draft amendment that the loan is to be made subject to the provisions of the Reclamation law, I would expect the Department to conclude that the provisions of the Reclamation Reform Act would not apply to this loan.

Sincerely,

JAMES A. MCCLURE, *Chairman.*

PROPOSED AMENDMENT

At the end of the bill insert the following new subsection 4:

"SEC. 4. The Secretary of the Interior is hereby authorized to loan $3.7 million from funds appropriated pursuant to Title II of the Energy and Water Development Appropriations Act of November 1, 1985 (Public Law 99-141; 99 Stat. 564). Such loan shall be made to a local government agency or other appropriate entity as determined by the Secretary for the purposes of, among other things, investigating the economic, scientific and technological feasibility of alternative solutions to agricultural waste water drainage problems in the Central Valley of California, establishing a prototype facility to test the feasibility of pretreatment of drainage water, and evaluating various brine disposal techniques: *Provided,* That such loan shall be made on such terms and conditions as the Secretary shall deem appropriate, notwithstanding any provisions of Title VII of Public Law 98-369 (98 Stat. 1175), and shall be repaid within twenty years with interest computed in accordance with section 80(a), of Public Law 93-251 (88 Stat. 34) and 18 CFR 704.39 as in effect February 1, 1986."

THE SECRETARY OF THE INTERIOR,
Washington, May 19, 1986.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I am writing in response to your letter concerning the proposed loan of $3.7 million for research into the treatment of agricultural drainage water within certain areas of the Central Valley Project, including construction of a prototype plant. I appreciate your clarification as a Member of the Appropriations Conference Committee and as Chairman of the appropriate authorizing Committee.

As you correctly indicate in your letter, it was not our intention to suggest that such a research loan must necessarily trigger the provisions of the Reclamation Reform Act, but only that such a loan would trigger the provisions of that Act if it were intended to involve repayment of construction charges by a water district under Reclamation law.

The draft amendment which you provided with your letter would confer the necessary authority for the Department to enter into the loan. It would also be consistent with the intent of the conferees as you have expressed it. Although the independent nature of the authority in the proposed amendment indicates that Reclamation law would not apply to this transaction, I would nevertheless request that your letter clarifying Congressional intent and this response be placed into the legislative history for this amendment when the amendment is passed. Such definitive legislative history would moot the concerns of the Solicitor with respect to the applicability of the Reclamation laws, referenced in my previous correspondence to certain Members of the House. It would be clear that the loan would not be made pursuant to the Reclamation laws and therefore would not involve repayment of construction charges pursuant to such laws, even if the loan is made to the Westlands Water District.

I hope that this letter clarifies our position in this matter.

Sincerely,

DONALD PAUL HODEL.

Mr. WILSON. Mr. President, the House joint resolution before us is a noncontroversial bill that has been agreed to by all interested parties. We probably would have disposed of this bill long before today were it not for an unrelated controversy concerning a proposed loan to a water district in California.

What sparked this delay was my intent to offer an unrelated amendment to the joint resolution before us to authorize a $3.7 million loan to the Westlands Water District in California for use in studying feasible agriculture drainwater technologies. The chairman of the Energy and Natural Resources Committee had most graciously acceded to my request to delay action on House Joint Resolution 382 pending a resolution of a number of problems associated with this proposed loan.

The preparation of this particular amendment which would have authorized this loan had taken several months and much time of the chairman, his staff, and other individuals. Just as this amendment had been finalized and cleared for action, it turns out that the water district who would receive the loan found that it could arrange private financing at a cheaper interest rate than allowed for in the proposed amendment. This new development obviously renders moot the need for this amendment and it is for that reason that I will not be offering it to this joint resolution.

Nonetheless, I am deeply grateful to the chairman and his staff for the considerable time and effort devoted to the preparation of this proposed amendment.

With that, I know of no objection to House Joint Resolution 382 and urge its adoption.

The PRESIDING OFFICER. The joint resolution is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the joint resolution.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution (H.J. Res. 382) was read the third time and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HELD AT THE DESK—H.R. 4530

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate receives from the House H.R. 4530, dealing with members of the Commission on Merchant Marine and Defense, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

TESTIMONY OF SENATE EMPLOYEE IN OFFICE SIT-IN PROSECUTION

Mr. DOLE. Mr. President, on behalf of myself and the distinguished minority leader, Mr. BYRD, I send to the desk a resolution from the Senate Legal Counsel and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 415) to direct the Senate Legal Counsel to represent Senator Trible and his staff, and to authorize the testimony of such staff in the case of *Commonwealth of Virginia* v. *Scott Bonner Benton, et al.*

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, this Thursday afternoon in a Virginia General District Court, nine protestors who conducted a sit-in at Senator TRIBLE's Richmond office on March 21 will be tried for trespassing. Although Senator TRIBLE himself was subpoenaed by the Commonwealth to testify in that proceeding, a member of his staff who actually witnessed the event, Carol Johnson, has by mutual agreement been substituted as a respondent.

This resolution would direct the Senate Legal Counsel to represent both Senator TRIBLE, Ms. Johnson and any other members of the staff who may be asked to testify relative to this particular incident. It would also authorize the testimony of such staff at the initial trial as well as any subsequent appeals. Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 415) was agreed to.

The preamble was agreed to.

The resolution with its preamble, reads as follows:

S. RES. 415

Whereas, in the case of Commonwealth of Virginia v. Scott Bonner Benton, et al., Crim. No. 761GC86004126-00, pending in the General District Court, Richmond, Virginia, the prosecution has obtained a subpoena for the testimony of Senator Paul S. Trible, Jr.;

Whereas, Carol Ann Johnson, Richmond Office Assistant to Senator Trible, has by agreement with the Assistant Commonwealth's Attorney been substituted as a subpoena respondent;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a)(2) (1982), the Senate may direct its counsel to represent Members or employees of the Senate with respect to subpoenas issued to them in their official capacity;

Whereas, by the privileges of the United States Senate and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of employees of the Senate is or may be needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Senator Paul S. Trible, Jr., Carol Ann Johnson, and any other staff assistant of Senator Trible who may be asked to testify in the case of Commonwealth of Virginia v. Scott Bonner Benton, et al, or subsequent related proceedings.

Sec. 2. That Carol Ann Johnson and any other staff assistant of Senator Trible who may be asked is authorized to testify in the case of Commonwealth of Virginia v. Scott Bonner Benton, et al, including any appeals thereto, except concerning matters which may be privileged.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL INTERSTATE HIGHWAY DAY

Mr. DOLE. Mr. President, I ask unanimous consent that the Judiciary committee be discharged from further consideration of House Joint Resolution 636, National Interstate Highway Day, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. BYRD. Mr. President, there is no objection on this side to the request for discharging the committee, and there is no objection to the request for immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the joint resolution will be considered as having been read twice by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The joint resolution (H.J. Res. 636) was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CRITICAL CARE WEEK

Mr. DOLE. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 526, Critical Care Week, and I ask for its immediate consideration.

Mr. BYRD. Mr. President, there is no objection to either request.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 526) designating the week of May 25, 1986, through May 31, 1986, as "Critical Care Week."

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 526) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SEQUESTRATION LIMITATION FOR CERTAIN LOAN GUARANTEES

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2416.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives.

Resolved, That the bill from the Senate (S. 2416) entitled "An Act to revise further the limitation applicable to chapter 37 of title 38, United States Code, for fiscal year 1986, for the purpose of implementing any order issued by the President for such fiscal year under any law providing for the sequestration of new loan guarantee commitments", do pass with the following amendments:

(1) Page 2, line 4, strike out ["$30,900,000,000".], and insert: "$40,000,000,000".

(2) Page 2, after line 7, insert:

SEC. 2. TREATMENT OF CERTAIN ADMINISTRATIVE EXPENSES.

(a) IN GENERAL.—Section 1824(b) of title 38, United States Code, is amended by adding at the end of following new sentence: "For purposes of this subsection, the term 'administrative expenses' shall not include expenses incurred by the Administrator for appraisals performed after February 1, 1986, on a contractual basis in connection with the liquidation of housing loans guaranteed, insured, or made under this chapter.".

(b) USE OF SAVING.—Any saving in the General Operating Expenses Account of the Veterans' Administration that results from the implementation of the amendment made by subsection (a) shall be used by the Administrator of Veterans' Affairs for the purpose of administering the housing, compensation, pension, and education programs in title 38, United States Code, in a more timely manner.

Amend the title so as to read: "An Act to revise further the limitation applicable to chapter 37 of title 38, United States Code, for fiscal year 1986, for the purpose of implementing any order issued by the President for such fiscal year under any law providing for the sequestration of new loan guarantee commitments, and for other purposes.".

Mr. DOLE. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR JOINT REFERRAL ON THE INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1987

Mr. DOLE. Mr. President, I ask unanimous consent that once the Select Committee on Intelligence reports the Intelligence Authorization Act for Fiscal Year 1987, it be referred jointly to the Committees on Armed Services, the Judiciary, Foreign Relations, and Governmental Affairs for the 30 day time period provided in section 3(b) of Senate Resolution 400, 94th Congress; provided that the Committee on the Judiciary be restricted to the consideration of title V and section 603, the Committee on Foreign Relations be restricted to the consideration of title VI, and the Committee on Governmental Affairs be restricted to the consideration of sections 401 and 409; provided that if any of said committees fails to report said bill within the 30-day time limit, such committee shall be automatically discharged from further consideration of said bill in accordance with section 3(b) of Senate Resolution 400, 94th Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. DOLE. Mr. President, I inquire of the distinguished minority leader if he is in a position to confirm any or all of the following nominations on the Executive Calendar:

Calendar No. 784, under the Marine Corps; Calendar Nos. 789, 790, and 791, under the Coast Guard; Calendar Order No. 787, Marvin Duncan; Calendar Order No. 788, Frank Naylor; Calendar Order Nos. 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819; and the nominations placed on the Secretary's desk under the Coast Guard.

Mr. BYRD. Mr. President, reserving the right to object.

Mr. President, there is no objection on this side to the several nominees which have been identified by the distinguished majority leader and we are prepared to proceed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I appreciate the response of the minority leader.

I ask unanimous consent that the Senate go into executive session to consider the nominations just identified and that they be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

IN THE MARINE CORPS

The following-named colonels of the Marine Corps for promotion to the permanent grade of brigadier general, under title 10, United States Code, section 624:

James E. Sniffen	Jeremiah W. Pearson, III
John S. Grinalds	Walter E. Boomer
David V. Shuter	Frank A. Huey
Bobby G. Butcher	John A. Studds
George L. Cates	William M. Keys
Richard H. Huckaby	

FARM CREDIT ADMINISTRATION

Marvin Duncan, of Missouri, to be a member of the Farm Credit Administration Board, Farm Credit Administration, for a term of 4 years, new position.

Frank W. Naylor, Jr., of Virginia, to be a member of the Farm Credit Administration Board, Farm Credit Administration, for a term of 6 years, new position.

IN THE COAST GUARD

Vice Adm. Paul A. Yost, Jr., U.S. Coast Guard, to be Commandant, U.S. Coast Guard for a term of 4 years with the grade of admiral while so serving.

Rear Adm. James C. Irwin, U.S. Coast Guard, to be the Vice Commandant, U.S. Coast Guard with the grade of vice admiral while so serving.

Rear Adm. Donald C. Thompson, U.S. Coast Guard, to be the Commander, U.S. Coast Guard Atlantic Area with the grade of vice admiral while so serving.

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION

Richard J. Fitzgerald, of Illinois, to be a member of the Board of Trustees of the Harry S. Truman Scholarship Foundation for a term expiring December 10, 1991, reappointment.

NATIONAL COUNCIL ON THE HANDICAPPED

Nanette Fabray MacDougall, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987, reappointment.

John F. Mills, of Virginia, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

Robert S. Muller, of Michigan, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

Brenda Premo, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

Phyllis D. Zlotnick, of Connecticut, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

DEPARTMENT OF LABOR

Paula V. Smith, of Missouri, to be Administrator of the Wage and Hour Division, Department of Labor.

John A. Pendergrass, of Minnesota, to be an Assistant Secretary of Labor.

Salvatore R. Martoche, of New York, to be an Assistant Secretary of Labor.

RAILROAD RETIREMENT BOARD

Charles J. Chamberlain, of Illinois, to be a member of the Railroad Retirement Board for the term of 5 years from August 29, 1984, reappointment.

U.S. INSTITUTE OF PEACE

Morris I. Leibman, of Illinois, to be a Member of the Board of Directors of the U.S. Institute of Peace for a term of 2 years expiring January 19, 1987, new position.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Phyllis P. Berney, of Wisconsin, to be a member of the National Council on the Arts for a term expiring September 3, 1990.

Lynne Vincent Cheney, of Wyoming, to be chairperson of the National Endowment for the Humanities for a term of 4 years.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD

Coast Guard nominations beginning Alan R. Dujenski, and ending Robert S. Samuelson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of May 12, 1986.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the several nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONFIRMATION OF THE NOMINATION OF ROBERT S. MULLER

Mr. RIEGLE. Mr. President, I am pleased to support the nomination of Robert S. Muller to serve on the National Council on the Handicapped. Mr. Muller is a resident of Grand Rapids, MI, and has been an outstanding member of the community for many years. He was educated at Aquinas College in Grand Rapids, and has been an active alumnus and faculty member. He has served as chairman of the National Roundtable on Corporate Development for Americans with Disabilities, and has distinguished himself as a strong supporter of opportunities for handicapped citizens. I am sure that his wife, children, and friends in Grand Rapids are justifiably proud of his achievements.

Mr. Muller is also a recipient of the Michigan Handicapped American of the Year Award as well as other awards and honorary degrees which acknowledge his value to the community. I am proud to support such a distinguished nominee from my State, and I am sure that he will serve ably as a member of the National Council on the Handicapped.

CONFIRMATION OF THE NOMINATION OF MORRIS LEIBMAN AND CHARLES CHAMBERLAIN

Mr. SIMON. Mr. President, today we will consider several nominees from the State of Illinois for various positions. They are Morris Leibman, nominee as a member of the U.S. Peace Institute; and Charles Chamberlain, nominee as a member of the Railroad Retirement Board.

Mr. Morris Leibman is a senior partner in the Chicago-based law firm of Sidley and Austin. He has served in Federal Government, he has supported numerous local and national organizations and has been active in the American Jewish community. His personal interest in the Peace Institute and its goals recommend him highly to be a member of the board and I am pleased that the Committee on Labor and Human Resources took action this week and the full Senate has taken action today to confirm him.

Charles Chamberlain has been nominated as a labor member of the U.S. Railroad Retirement Board. He was born in Ashton, IL, and now lives in Crystal Lake, IL. He is a member of the Brotherhood of Railway Signalmen and was originally appointed by President Carter to the Board on October 24, 1977, to fill an unexpired term ending in 1978. He was subsequently reappointed to a 5-year term on the Board and has served well during this time. I am pleased to support his renomination and am glad that his nomination has been confirmed today.

CONFIRMATION OF THE NOMINATION OF LYNNE CHENEY

Mr. KENNEDY. Mr. President, I support the nomination of Dr. Lynne Cheney for the position of chairperson of the National Endowment for the Humanities.

As the ranking minority member of the Committee on Labor and Human Resources, I have a longstanding commitment to the Humanities Endowment. I believe that the agency's role in suppport of the humanities is an important one.

As with its sister agency, the Arts Endowment, the National Endowment for the Humanities acts as a catalyst to bring additional support to exceptional humanities projects and programs. NEH support signals excellence and peer review endorsement.

I am confident that Lynne Cheney will bring leadership and vision to the Endowment. It has been a personal pleasure for me to work with her on the Bicentennial Commission for the last year. She is an exceptionally perceptive and articulate individual whom I am sure will be an effective advocate for the humanities.

Not surprisingly, the entire humanities constituency, scholars, students, members of the higher education community, have endorsed this nomination. She enjoys, as well, the support of the Labor Committee.

I very much look forward to working with Dr. Cheney to develop long-term goals and direction for the Endowment. NEH has an important mission to encourage scholarship and understanding of the humanities and I know that this mandate will be fully realized under her leadership.

I commend her to my colleagues.

CONFIRMATION OF THE NOMINATION OF LYNNE CHENEY

Mr. SIMPSON. Mr. President, it is such a special pleasure to say a few words today on behalf of the nomination of Lynne Cheney to serve as the Chairperson of the National Endowment for the Humanities.

Lynne Cheney is just a very special lady—a superb person. Furthermore, she is remarkably talented. Her background—both in educational credentials and in professional achievements—is rock solid and noteworthy.

She is an accomplished writer—who has achieved national recognition for both her fictional and nonfictional works.

A particular feature of her educational, professional and personal background, which is the source of special pride for Lynne herself and for so many of us who deeply admire her, is her strong and broad roots in the State of Wyoming. She is indeed "one of us."

Lynne Cheney was born in Casper, WY, and grew up there—and married a very sharp and talented young local

fellow named DICK CHENEY who currently represents our State in the U.S. House of Representatives. What a superb pair they are.

Lynne has written extensively about Wyoming in her many publications. Cheyenne, WY, served as the setting for one of her books—Sisters. She has been actively involved in the University of Wyoming—as an instructor and lecturer. In fact, Lynne serves as a unique representative of the many women who have achieved prominence and recognition in our State. Wyoming has a long and very proud tradition of recognizing the contributions of its women—since the first territorial legislature in 1869, when women were accorded full suffrage. Ours is the "equality State"—the first government to extend the right to vote to women.

Lynne has earned this special recognition among her fellow Wyomingites for her well regarded talents as a novelist, feature writer, professor, and editor. She is a can do person in the best sense of the phrase. Lynne has our love and respect because she is just a fine person—and that is also an important quality to bring to Government service.

My deal friend, Congressman DICK CHENEY, Lynne and their two daughters, Mary and Elizabeth, draw strength and support from one another. Ann and I cherish their friendship. They all pursue their goals with the vision and spirit and enthusiasm that comes from such a close union. And that is the extra dimension that Lynne Cheney brings with her to this position—the dimension of a human being who has lived and shared a full life, experiencing the things that serve to round us out.

It would not really be possible for the Senate to consider a nominee more appropriately suited to the task of Chairperson of the National Endowment for the Humanities than Lynne Cheney. Professionally, she has achieved the deep respect of all who have known her. And personally, she is a caring, articulate, thoughtful and compassionate human being.

Lynne Cheney will bring to the National Endowment for the Humanities the same energy, dedication, common sense, great spirit, enthusiasm and intelligence that she has demonstrated in all of her personal and professional endeavors.

The President has made an excellent choice in nominating Lynne Cheney to serve in this important post. I commend her nomination to the full Senate without any hesitation or reservation whatsoever.

CONFIRMATION OF THE NOMINATIONS OF FRANK W. NAYLOR, JR., AND MARVIN R. DUNCAN

Mr. DOLE. Mr. President, today the Senate has confirmed the nominations of Frank W. Naylor, Jr., and Marvin R. Duncan to the Farm Credit Administration [FCA] Board.

FCA BOARD

The Farm Credit Amendments Act of 1985, signed into law on December 23, was an important step taken by Congress and the administration to restore confidence in the Farm Credit System [FCS] throughout the farm belt. It was hoped the legislation would assist the FCS in making the necessary internal reforms needed to remain as a viable and healthy lender of agricultural credit.

The new act restructured the Farm Credit Administration into an independent agency in the executive branch composed of the Farm Credit Administration Board. Under the act, the management of the FCA is left up to the FCA Board consisting of three members appointed by the President with the advice and consent of the Senate. The President was directed to appoint one member as Chairman of the Board and to appoint no more than two members from the same political party. Mr. Naylor has been chosen to head the new Board.

TERMS AND POWERS

FCA Board members will have terms of 6 years, except the first two members appointed to the Board, excluding the Chairman, will serve a term of 2 years and 4 years. The first two members can then be reappointed to a full 6-year term. Otherwise, members will not be allowed to succeed themselves. The Board is directed to meet at least monthly with a quorum consisting of two members.

Included in the powers of the Board are the approval of rules and regulations for implementation of the act and the examination of the condition, regulation, and performance of FCS institutions. The Chairman of the Board is directed to consult with the Secretary of the Treasury, with the Board of Governors of the Federal Reserve System and with the Secretary of Agriculture in connection with system policies on farmers and the agricultural economy.

NOMINATION PROCESS

Mr. President, I have been advised the White House has selected a member to fill the third position on the Board and is in the process of getting a final clearance check before a public announcement is made. I have stated on a couple of occasions on the Senate floor the necessity of getting the FCA Board operative. It is the responsibility of the new FCA Board and the Capital Corporation, once they are appointed and organized, to help alleviate the confusion in the countryside over the contradictory policies being followed by the regional FCS districts and their member institutions.

CONGRESSIONAL INTEREST

Mr. President, many of my colleagues would agree that we should move swiftly on the confirmation of the FCA Board. I believe this has been underscored by recent actions in both Houses. Last week, I introduced Senate Concurrent Resolution 138, a bipartisan resolution sponsored by over 60 Senators urging the FCS to practice forbearance instead of foreclosure on its borrowers and encouraging the FCA to follow the guidelines announced recently by regulators of commercial lenders. A similar measure was passed last week in the House on a unanimous vote.

I would just suggest that a vast majority of Members in both Houses want to ensure that the pending reform of the FCS will proceed in a reasonable and timely manner. We gave assurance today by confirmation of Mr. Naylor and Mr. Duncan.

STRONG CONGRESSIONAL SUPPORT

Mr. President, I would like to comment briefly on the background of Mr. Naylor and Mr. Duncan. Many of my colleagues, especially those on the Agriculture Committee, are aware of Mr. Naylor's involvement in developing the farm bill, the farm credit bill, and other farm-related legislation. I have been personally appreciative of the fine working relationship I have had with Frank Naylor and I know many of my colleagues here would say the same about their working relationship with him.

BACKGROUND OF FRANK NAYLOR

Frank Naylor is a native of Kansas. His family's ancestors homesteaded in Kansas in the 1850's. He grew up in Kansas and attended the University of Kansas in 1961. After serving in Vietnam, he moved to Washington in 1969 as Deputy Director of the Federal Crop Insurance Corporation [FDIC]. He continued to gain experience as a financial manager by becoming Associate Administrator of the Farmers Home Administration [FmHA] in 1973 and Administrator in 1976.

After 4 years in California with the Farm Credit System, he returned to Washington as Under Secretary of Agriculture. This progressive series of responsibilities in the field of agricultural credit has given him a broad background that I feel is essential to anyone taking on the responsibility of guiding the Farm Credit Administration in this time of transition and change.

BACKGROUND OF MARVIN DUNCAN

Mr. President, I have also been able to work with Marvin Duncan on several occasions and have found him very helpful to my efforts. Dr. Duncan is Senior Deputy Governor of the FCA and is responsible for directing strategic planning for the agency.

Before joining the FCA, Dr. Duncan was a vice president and economist with the Federal Reserve Bank of Kansas City where he headed the regional economics group within the Economic Research Department and was responsible for directing research

in agriculture, energy, and regional economics. Dr. Duncan has also spent many years in farm management and agribusiness and has served on the faculties of North Dakota State University and Iowa State University.

CONCLUSION

Mr. President, I would just conclude by stating that the confirmation nominations of Frank Naylor and Marvin Duncan will help to ensure the strength and soundness of the farm credit system.

CONFIRMATION OF THE NOMINATIONS OF FRANK W. NAYLOR, JR., AND DR. MARVIN R. DUNCAN

Mr. HELMS. Mr. President, I am delighted that these nominees have been confirmed by the Senate. Both of these gentlemen are well known to many Senators. Frank W. Naylor, Jr., has served admirably as Under Secretary of Small Community and Rural Development for the Department of Agriculture since 1981. In this capacity, he has been at the forefront of policy development in agricultural credit for the administration. Many of us have worked closely with him over the years and know the depth of his understanding about this most critical subject.

Dr. Marvin R. Duncan has served as Senior Deputy Governor for the Farm Credit Administration since last August and was actively involved with the development of the Farm Credit Act Amendments of 1985. Subsequent to assuming the position at FCA, Dr. Duncan had served as vice president and economist of the Federal Reserve Bank of Kansas City. He has been deeply involved with agriculture all of his life and brings a personal perspective to service on the Board.

I am pleased that the President has nominated two individuals with the qualifications that Mr. Naylor and Dr. Duncan obviously possess. I am equally pleased that Frank Naylor and Marvin Duncan are willing to make the sacrifices necessary to serve in these most difficult positions.

We are all aware that these are not easy times in some segments of the agricultural community. And, in many ways, the toughest job will be to ensure that the Farm Credit System remains a reliable provider of credit to farmers and ranchers all across the country. The responsibility of the Farm Credit Administration is to regulate the banks and associations of the System and will, therefore, play a vital role in its future.

It is absolutely essential that we have persons appointed to these positions who will immediately provide the leadership necessary to resolve the problems confronting the Farm Credit System. I am pleased to support both nominees, and the Senate has acted quickly to confirm them so that they might proceed with the difficult task at hand.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CERTAIN ACTION ON JUNE 2, 1986

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate convenes on June 2, at 2 p.m., the reading of the Journal be dispensed with; that no resolutions come over under the rule; that the call of the calendar be dispensed with; that following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators for not to exceed 5 minutes each: Senators HAWKINS, THURMOND, CRANSTON, PRESSLER, PROXMIRE, MATHIAS, and GORE; to be followed by a period for the transaction of routine morning business not to extend beyond 3 p.m., with Senators permitted to speak therein for not more than 5 minutes each; provided, further, that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR COMMITTEES TO FILE REPORTS ON THURSDAY, MAY 29, 1986

Mr. DOLE. Mr. President, I ask unanimous consent that during the adjournment of the Senate, committees be authorized to file reports between 10 a.m. and 12 noon on Thursday, May 29.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I understand that one report to be filed during that time will be the report on the tax reform bill.

PROGRAM FOR MONDAY, JUNE 2, 1986

Mr. DOLE. Mr. President, to recap for Monday, June 2, 1986, first I remind my colleagues that is the day the Senate goes public as far as televising the Senate proceedings.

We will convene that day at 2 p.m.

ROUTINE MORNING BUSINESS

After the special orders identified earlier for Senators HAWKINS, THURMOND, CRANSTON, PRESSLER, PROXMIRE, MATHIAS, and GORE for not to exceed 5 minutes each, there will be routine morning business not to extend beyond the hour of 3 p.m. with Senators permitted to speak therein for not more than 5 minutes each.

Then we will move to the higher education bill, S. 1965.

It is my understanding after visiting with the chairman and the Secretary of Education today that the bill may be disposed of without too many amendments. I know the Secretary of Education indicated that he had a number of amendments, and they were delivered to the chairman of the Education Committee, Senator STAFFORD.

It is also my understanding that there are 50 cosponsors to the Higher Education Act. It is a bipartisan bill. It is my hope that we can dispose of that bill no later than Tuesday.

It then would be my intention on late Tuesday, or Wednesday, depending upon the wishes of the distinguished chairman of the Finance Committee, Senator PACKWOOD, to turn to the tax reform bill.

That will have given the Budget Committee adequate time to provide the waiver needed to proceed to the tax bill.

I guess they can keep the tax bill for up to 10 days. But I am advised again by the chairman that I believe they can take care of the committee concerns in a matter of 48 hours.

There will be no rollcall votes on Monday.

So, hopefully, on Wednesday, we would be on the historic Tax Reform Act, and then on Thursday under the previous agreement we would set-aside the tax bill on Thursday, the fifth, and proceed to the consideration of the message on the Presidential veto.

Then, after 2 o'clock, after that is disposed of, we will be back on tax reform.

Again, I do not know what the chairman, Senator PACKWOOD, wishes or has in mind for a Friday session. But I assume we will be in a position to indicate that to our colleagues maybe as early as Tuesday, the third.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

DEATH OF EVO ANTON DECONCINI, FATHER OF SENATOR DECONCINI

Mr. BYRD. Mr. President, it is with deep sorrow that I note that Evo Anton DeConcini, the father of our distinguished colleague from Arizona, passed away yesterday at the age of 85.

Born March 25, 1901, he was the son of an immigrant Austrian father and Italian mother.

A graduate of the University of Arizona and the University of Arizona School of Law Mr. DeConcini was successful in building the family's expan-

sive real estate and development business.

He also had an active and successful political career serving as Pima County Superior Court Judge—1941-46—and Arizona Supreme Court Judge (1949-53), positions which earned him the nickname "The Judge." He served as chairman of the Pima County, AZ, Democratic Party—1940—and chairman of the Arizona State Democratic Party—1956-57.

In addition to his business and political careers, Mr. DeConcini was an important and active member of his community. He served as president of the Tucson Community Chest and the Tucson Social Service Exchange, and as chairman of a campaign to raise $1 million for improvements in a local hospital.

Foremost, he was a dedicated family man. Senator DECONCINI said his father "was a role model for his children, and he encouraged us to reach out, to stretch ourselves, when pursuing our goals."

□ 1910

My condolences and my wife's condolences, and I am sure I speak for all of our colleagues in the Senate, go to his wife, Ora, his daughter, Danielle Thu, and son, Dino, as well as to our esteemed colleague, Senator DENNIS DECONCINI.

Mr. President, I ask unanimous consent that an article with regard to Mr. DeConcini from the Arizona Daily Star be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EVO A. DECONCINI, PROMINENT DEMOCRAT, EX-JUSTICE OF SUPREME COURT, DIES AT 85

(By Joe Burchell)

Evo Anton DeConcini, a prominent Democrat, former Arizona Supreme Court justice and the father of U.S. Sen. Dennis DeConcini, died yesterday at age 85.

A family spokesman said DeConcini had been ill from several ailments for about a month. He died in his sleep at 5:30 a.m. at St. Josephs Hospital. The probable cause of death was heart failure.

DeConcini was often called "the judge," a reference to his years as a Supreme Court judge in Pima County, from 1941 through 1946, and a state Supreme Court justice from 1949 through 1953.

He was also the founder of the DeConcini fortune, made in real estate.

Sen. Dennis DeConcini, D-Ariz., was last with his father for several hours on Saturday.

"My father will be missed by many," he said yesterday. "He had a close and loving relationship with his wife and children. He was a role model for his children, and he encouraged us to reach out, to stretch ourselves, when pursuing our goals."

Former Gov. Sam Goddard, a Democrat and former Tucsonan who now lives in Phoenix, remembers DeConcini for more than just his contributions to Arizona's political history.

Goddard was in one of the first post-World War II classes to go through the University of Arizona law school. Rep. Morris K. Udall, D-Ariz. and former Democratic Gov. Raul Castro were in the same class. Former Democratic Congressman Stewart Udall was a year ahead of them.

Morris Udall yesterday described DeConcini as "one of the outstanding Arizonans of his generation."

"He was our patron saint," Goddard said of DeConcini. From his position of influence, DeConcini helped the soldiers-turned-students find jobs, counseled them, and helped them set up a nursery for the families many of them were already raising, Goddard said.

Although DeConcini is most widely recognized for his political and business achievements, U.S. District Judge Richard Bilby said he remembers DeConcini as "a fine lawyer. He knew the law and he knew how to get things done."

As two members of Tucson's tiny legal community of 50 years ago, Bilby's father and DeConcini had been close personal friends for many years and their families spent a great deal of time together since they only lived a few blocks apart.

The only blemish on DeConcini's public image came from an incident that seemed to link his family to the Mafia. In 1954, DeConcini was one of six Tucson residents who testified as character witnesses for Joseph Bonanno, a fellow Tucson resident as well as a reputed Mafia chief.

DeConcini was born March 25, 1901, in Iron Mountain, Mich. He was the son of an immigrant Austrian father and an Italian mother.

He moved to Tucson with his sister Alice in 1921, two years after graduating from high school in Wisconsin. After a brief fling at the hotel business, they moved on to Los Angeles, but returned nine months later to stay.

DeConcini went to work in a service station and started attending the University of Arizona part time.

During this period, he started subdividing and selling land in what has now become the center of the city. That sowed the seeds for the family's expansive real estate and development business.

In 1932, DeConcini graduated from the UA law school and married Ora Webster, a school teacher who had moved to Tucson from Thatcher a few years earlier. In 1933 he was admitted to the bar.

A year later he became involved in politics, working for the election of Democrat John L. Sullivan as attorney general. DeConcini was credited with engineering a successful Sullivan campaign in Pima County and was rewarded with an assistant attorney general's position in 1935.

DeConcini left the Attorney General's Office the next year to run for Pima County attorney.

He lost, finishing third in a Democratic primary.

Until his most recent illness, DeConcini regularly attended Democratic party functions, Democratic National Committeeman, Martin Bacal said.

And many Democratic candidate headquarters, including the county party headquarters, are leased from the DeConcini family, often at favorable rates.

He also passed the political bug along to the other members of his family.

Besides the senator, another son, Dino, was an aid to former Democratic Gov. Raul Castro and an unsuccessful candidate for attorney general. Ora DeConcini is a former Democratic National Committeewoman. His cousin, Evo J. DeConcini, is a hearing officer for the Arizona Corporation Commission.

In 1941, DeConcini received an appointment to the state Board of Regents, but he resigned less than a year later after he was appointed as a Pima County Superior Court judge, a position he held until his term expired in 1946.

Sullivan resigned the attorney general's post in the wake of a bribery scandal in 1947, 13 years after DeConcini helped him to get elected. DeConcini was appointed to serve out the remaining year of his term.

Rather than stay in the Attorney General's Office at the end of that year, DeConcini opted instead to run for a seat on the Arizona Supreme Court in 1948. The campaign was successful.

DeConcini did not seek re-election when he completed his term in 1953. He returned to Tucson to reenter private law practice and manage his real estate investments.

His other political activities included terms as chairman of the Pima County Democratic Party in 1940 and chairman of the state party in 1956-57.

DeConcini also served as director and president of the Tucson Community Chest, and was the first president of the Tucson Social Service Exchange.

In 1948, he was general chairman of a campaign to raise $1 million for improvements at St. Mary's Hospital and also helped raise money for St. Joseph's Hospital and the now defunct Comstock Charity Hospital.

He was active in the Pima County Bar Association and was its president in 1956.

He also was a member of the Fellows of the American Bar Foundation, several state and county bar associations, the American Judicature Society, the legal fraternity Phi Alpha Delta and the Western division board of National Probation and Parole Association.

His club and lodge memberships included Elks, Moose, Old Pueblo Club, Round Table, Sierra Club and the Italian-American Club.

DeConcini was awarded the Star of Solidarity by the Republic of Italy in 1954, the Medallion of Merit by the UA in 1959, and the Award of Merit of the UA alumni in 1963.

He is survived by his wife, Ora; a daughter, Danielle Thu of Tucson; sons Dennis and Dino, of Phoenix, and David of Tucson; and 12 grandchildren.

There will be a rosary for DeConcini at 8 p.m. tomorrow at the Newman Catholic Student Center, 1625 E. Second St.

Funeral services will be at 9 a.m. Friday at SS. Peter and Paul Church, North Campbell Avenue and East Lee Street, followed by a graveside service at Holy Hope Cemetery.

The family requests memorials in DeConcini's name be made to Meals for Millions or the Community Food Bank.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

Mr. DOLE. Mr. President, I certainly want to join the distinguished minority leader in the comments he just made with reference to the father of the distinguished Senator from Arizona [Mr. DECONCINI].

BIG DECISIONS AHEAD

Mr. DOLE. Mr. President, at the close of business today, we reach a key

milestone on this year's legislative journey. We have come a long way, but there are many miles to go. Before us are issues of tremendous importance, some historic in nature. When we return from the Memorial Day recess, my priority will be action on the Senate Finance Committee's revolutionary tax reform package. Working with Chairman BOB PACKWOOD, I hope to be debating this legislation as early as June 3d or 4th. Enacting true tax reform will affect the lives of every American; in my view, for the better. After all, the taxpayers have suffered with the current system of inequity and confusion long enough. During our time back home, we will hear the voice of the people loud and clear on tax reform. Let us bring their common sense back to Washington with us.

At the same time, House and Senate budget conferees will hopefully hammer out a budget- and deficit-reduction plan for 1987. Once that goal is accomplished, we can push ahead with appropriations bills, and committees can begin drafting legislation to achieve their reconciliation savings.

TWO CRITICAL ECONOMIC ISSUES

No two issues are more critical to the health and well-being of the U.S. economy than the tax bill and budget. If Congress can accomplish those twin goals, the amazing period of economic prosperity we have witnessed during the past 4 years, will continue into the foreseeable future.

There is yet another major hurdle in our path—an issue that transcends our own borders and transcends party lines--trade. I am pleased that the Senate Finance Committee opened hearings on the bipartisan omnibus trade bill last week. And I hope that after we finish floor action on the tax bill, the committee can begin serious consideration of major trade reform. We need tough legislation that will guarantee fair trade and fair play overseas. There is simply too much at stake in terms of American jobs to let this issue get away from us.

CONCLUSION

So there it is, Mr. President. As I said at the outset, we have quite a challenge before us. But the potential benefits for the country should be more than enough reason to get us moving. The truth is, we are running short on time. Come June 2, there will be only 65 legislative days before our scheduled adjournment date.

There is one wild card in all of this that just might make the difference—television. When the distinguished Senator from South Carolina [STROM THURMOND] opens this Chamber at 2 p.m. on June 2, America will be watching. For the first time, Senate proceedings will be beamed coast to coast for home viewing and for use on the evening news. This historic breakthrough could be the catalyst for real action. The people will demand nothing less. If they don't like what they are seeing, you can bet we will hear about it—and that is just what we need.

I wish all of my colleagues a safe, happy, and fruitful recess. Spend time with your families, friends, and constituents. Please get some rest. It is going to be a sprint to the finish.

ADJOURNMENT UNTIL MONDAY, JUNE 2, 1986, AT 2 P.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that we stand in adjournment, in accordance with Senate Concurrent Resolution 144, until Monday, June 2, 1986, at 2 p.m.

The motion was agreed to and, at 7:10 p.m., the Senate adjourned until Monday, June 2, 1986, at 2 p.m.

NOMINATIONS

Executive nominations received by the Senate May 21, 1986:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

J. Michael Dorsey, of Missouri, to be an Assistant Secretary of Housing and Urban Development, vice Warren T. Lindquist, resigned.

DEPARTMENT OF JUSTICE

William H. Ewing, Jr., of Tennessee, to be U.S. attorney for the western district of Tennessee for the term of 4 years, reappointment).

CONFIRMATIONS

Executive nominations confirmed by the Senate May 21, 1986:

FARM CREDIT ADMINISTRATION

Marvin Duncan, of Missouri, to be a member of the Farm Credit Administration Board, Farm Credit Administration, for a term of 4 years.

Frank W. Naylor, Jr., of Virginia, to be a member of the Farm Credit Administration Board, Farm Credit Administration, for a term of 6 years.

IN THE COAST GUARD

Vice Adm. Paul A. Yost, Jr., U.S. Coast Guard, to be Commandant, U.S. Coast Guard for a term of 4 years with the grade of admiral while so serving.

Rear Adm. James C. Irwin, U.S. Coast Guard, to be the Vice Commandant, U.S. Coast Guard with the grade of vice admiral while so serving.

Rear Adm. Donald C. Thompson, U.S. Coast Guard, to be the commander, U.S. Coast Guard Atlantic Area with the grade of vice admiral while so serving.

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION

Richard J. Fitzgerald, of Illinois, to be a member of the Board of Trustees of the Harry S. Truman Scholarship Foundation for a term expiring December 10, 1991.

NATIONAL COUNCIL ON THE HANDICAPPED

Nanette Fabray MacDougall, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987.

John F. Mills, of Virginia, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

Robert S. Muller, of Michigan, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

Brenda Premo, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

Phyllis D. Zlotnick, of Connecticut, to be a member of the National Council on the Handicapped for a term expiring September 17, 1988.

DEPARTMENT OF LABOR

Paula V. Smith, of Missouri, to be Administrator of the Wage and Hour Division, Department of Labor.

John A. Pendergrass, of Minnesota, to be an Assistant Secretary of Labor.

Salvatore R. Martoche, of New York, to be an Assistant Secretary of Labor.

RAILROAD RETIREMENT BOARD

Charles J. Chamberlain, of Illinois, to be a member of the Railroad Retirement Board for the term of 5 years from August 29, 1984.

U.S. INSTITUTE OF PEACE

Morris I. Leibman, of Illinois, to be a member of the Board of Directors of the U.S. Institute of Peace for a term of 2 years expiring January 19, 1987.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Phyllis P. Berney, of Wisconsin, to be a member of the National Council on the Arts for a term expiring September 3, 1990.

Lynne Vincent Cheney, of Wyoming, to be chairperson of the National Endowment for the Humanities for a term of 4 years.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify

before any duly constituted committee of the Senate.

IN THE MARINE CORPS

The following-named colonels of the Marine Corps for promotion to the permanent grade of brigadier general, under title 10, United States Code, section 624:

James E. Sniffen
John S. Grinalds
David V. Shuter
Bobby G. Butcher
George L. Cates
Richard H. Huckaby
Jeremiah W. Pearson, III
Walter E. Boomer
Frank A. Huey
John A. Studds
William M. Keys

IN THE COAST GUARD

Coast Guard nominations beginning Alan R. Dujenski, and ending Robert S. Samuelson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 12, 1986.

EXTENSIONS OF REMARKS

FEDERAL COURT STRIKES DOWN PRESIDENTIAL DEFERRAL POWER

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. MORRISON of Connecticut. Mr. Speaker, on Friday May 16, the U.S. District Court for the District of Columbia issued a decision holding that the President lacks the power under the Impoundment Control Act of 1974 to defer spending of appropriated funds.

I am a plaintiff in one of the two consolidated cases, along with my colleagues, Mrs. BOXER, Mr. LOWRY of Washington, and Mr. SCHUMER, the National League of Cities, the U.S. Conference of Mayors, and a number of cities and other beneficiaries of funding under the affected programs. The city of New Haven, CT, in my district, is the plaintiff in the other case.

I want to share this important constitutional decision, which firmly upholds the Congress' power to control spending, with all my colleagues.

[U.S. DISTRICT COURT FOR THE DISTRICT OF COLUMBIA]

CITY OF NEW HAVEN, CONNECTICUT, PLAINTIFF, *v.*

UNITED STATES OF AMERICA, DEFENDANT.

CIVIL ACTION NO. 86-0455

NATIONAL LEAGUE OF CITIES, ET AL., PLAINTIFFS, *v.*

SAMUEL R. PIERCE, JR., ET AL., DEFENDANTS.

CIVIL ACTION NO. 86-0460

THE CITY OF CHICAGO, ET AL., PLAINTIFFS, *v.* UNITED STATES DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, ET AL., DEFENDANTS.

CIVIL ACTION NO. 86-0967

MEMORANDUM AND ORDER

These consolidated cases, now before the Court on the parties' cross-motions for summary judgment, present a challenge to the President's deferral of the expenditure of funds appropriated by Congress for various domestic programs in fiscal 1986.[1] Specifically, plaintiffs contend that the statute pursuant to which the President has acted to defer "budget authority"[2] is unconstitutional by reason of the presence of an inseverable one-House legislative veto provision in the legislation as enacted. For the reasons set forth below, plaintiffs' motions for summary judgment will be granted, defendants' motion for summary judgment denied, and the declaratory and injunctive relief sought will be entered as prayed.

In November, 1985, President Reagan signed the fiscal year 1986 appropriations bill for the Department of Housing and Urban Development ("HUD"), Pub. L. No. 99-160, 99 Stat. 909 (1985), which appropriated funds for certain long-standing local housing and community development programs. On February 5, 1986, the President sent impoundment notices to Congress pursuant to the Budget and Impoundment Control Act of 1974 announcing his deferrals of the expenditure of funds for the four programs at issue here. H. Doc. No. 99-161, 99th Cong., 1st Sess. 246-53 (1986); 51 Fed. Reg. 5829, 553-58 (Feb. 18, 1986). The deferrals were not made in response to the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. No. 99-177, 99 Stat. 1038 (1985), but were, rather, intended by the President to bring 1986 spending levels into line with his 1987 proposed budget. H. Doc. No. 99-161 at 246. The deferrals have been put into effect and are indisputably having a present (and by plaintiffs undesired) impact on the programs, their proponents, and their intended beneficiaries.

Plaintiffs are various representatives of those affected: cities, mayors, community groups, members of Congress, associations of mayors and municipalities, and disappointed expectant recipients of benefits under the programs so diminished. Nominal defendants are the United States, the Secretary of HUD (the "Secretary"), and the Director of the Office of Management and Budget ("OMB").

Of the four programs in jeopardy the first is known as the Section 8 Housing Assistance Payments Program ("Section 8"), established by the Housing and Community Development Act of 1974, amending the Housing Act of 1937. 42 U.S.C. § 1437(f) (1982 & Supp. I 1983 & Supp. II 1984). Section 8's purpose is to assist lower-income families in obtaining housing by, *inter alia*, a direct housing subsidy. The Secretary of HUD disburses funds to state and local housing agencies which, in turn, use the funds to obtain housing for low income families. The HUD appropriations bill for fiscal year 1986 included nearly $2.4 billion for direct housing subsidies, of which the President has deferred all but $184 million.

The second program concerned was created by Section 202 of the Housing Act of 1959, 12 U.S.C. § 1701q (1982 & Supp. I 1983 & Supp. II 1984) ("Section 202"), to assist in housing the elderly and handicapped with direct loans to private non-profit corporations, limited profit sponsors, consumer cooperatives, and certain public agencies for use in constructing or rehabilitating low cost rental units. Section 202 also operates in conjunction with Section 8 to provide a direct subsidy for rental costs incurred by elderly and handicapped people living in Section 202 housing. The fiscal year 1986 HUD appropriations bill included $631 million for the Secretary of HUD to lend under Section 202 and $1.6 billion for rent subsidies under Section 8. The President deferred approximately $600 million in construction loan money and all but $12.8 million of the rent subsidies.

The Community Development Block Grant ("CDBG") program originated in Title I of the Housing and Community Development Act of 1974. 42 U.S.C. § 5301 (1982 & Supp. I 1983 & Supp. II 1984). The CDBG program was designed to consolidate a number of grant programs providing federal assistance to local governments with funds to, *inter alia*, acquire property, construct public facilities, rehabilitate housing, support economic development projects, and extend social and health services to low income people. The CDBG program allocation for fiscal year 1986 was $3.1 billion. The President deferred $500 million.

The final program affected was created by Section 312 of the Housing Act of 1964, as amended, 42 U.S.C. § 1452b (1982 & Supp. I 1983) ("Section 312"). Under Section 312, the Secretary lends funds to assist in the rehabilitation of single- and multi-family residential property in low-income neighborhoods. Typically, cities or local public agencies administer the program, lending money to low- and middle-income people who will occupy the housing they will use the funds to rehabilitate. For fiscal year 1986 Congress appropriated no new funds for the Section 312 program, but instead directed that all funds remaining in the program, $166 million, should be made available for new loans in 1986. The President has deferred $135 million of the sum.

Plaintiffs have submitted numerous affidavits—of mayors, city managers, directors of local public agencies, and intended beneficiaries of the depleted programs—attesting to the observable impact the budget deferrals have had and will have on local affairs. The affidavits assert (presently without contradiction), for example, that only a fraction of the eligible low-income families will receive Section 8 assistance this year; that no elderly or handicapped people will receive rent subsidies; and that no loans to rehabilitate housing in depressed neighborhoods will be made. The mayors and city managers state that they have had to cut their CDBG programs, necessitating the layoff of staff and a substantial reduction in such social and health services as shelters for the homeless, meals to elderly, public transportation for the elderly and handicapped, job training, health and dental care for low-income people, and child care for single parents.

In deferring the expenditure of appropriated funds the President acted pursuant to the Budget and Impoundment Control Act of 1974, Pub. L. No. 93-344, 88 Stat. 297, or

[1] Jurisdiction is predicated upon 28 U.S.C. § 1331. Plaintiffs initially sought a preliminary injunction, and the parties submitted memoranda accordingly. Prior to hearing, however, the parties proposed, and the Court agreed, that the matter be treated as one of cross-motions for summary judgment, the issues being exclusively of law and the merits having been fully briefed. The Court consolidated the hearing on plaintiffs' motion for a preliminary injunction with hearing on the merits pursuant to Fed.R.Civ. P. 65(a)(2), gave the parties additional time to supplement the record as appropriate to cross-motions for summary judgment, and has decided the case on an expedited basis.

[2] "Budget authority" means the "authority provided by law to enter into obligations which will result in immediate or future outlays involving Government funds . . . ." 2 U.S.C. § 622(2) (1982).

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

more precisely, Title X of the Act, also known as the Impoundment Control Act of 1974 (the "Act" or "ICA"), Pub. L. No. 93-344, §§ 1001-1017, 88 Stat. 297, 323-37 (codified at 2 U.S.C. §§ 681-88 (1982 & Supp. II 1984)). Under the Act the President can impound funds in two ways. First, he may propose to "rescind," or cancel, all or part of the budget authority Congress has appropriated for a particular program. 2 U.S.C. § 683. To propose a rescission the President must sent a special message to Congress detailing the amount of the proposed rescission, the reasons for it, and a summary of the effects the rescission would have on the programs involved. Congress then has 45 days within which to approve the proposed rescission by a "rescission bill" that must be passed by both houses. Id. If it fails of approval, the President must allow the full amount appropriated to be spent.

The Act's second device enabling the President to impound funds is one of "deferral," or delay, of the budget authority appropriated. 2 U.S.C. § 684. The President or certain subordinate officers of the Executive Branch may propose to defer the expenditure of funds without advance congressional approval, but the President must promptly notify Congress of the deferral, the reasons for the deferral, the impact the deferral will have on the programs involved, and "any legal authority invoked by him to justify the proposed deferral." 2 U.S.C. § 684(a)(4). The statute as written, however, allows a deferral to be overridden by a resolution of disapproval passed by either House.

It is this latter provision of the Act that plaintiffs challenge as unconstitutional, allowing, as it does, for a so-called one-House legislative veto of impoundments proposed by the President. Defendants concede, of course, that a one-House veto is unconstitutional under the Supreme Court decision in *Immigration and Naturalization Service* v. *Chadha*, 462 U.S. 919 (1983), but they argue that the morbid provision alone may be excised from the Act, leaving the remainder of the statute intact, including the deferral authority itself. Plaintiffs vigorously dispute the severability of the one-House veto from the grant of power it was expected to contain, contending that Congress would never have passed a statute conferring such authority without it. The principal question presented, therefore, is whether the one-House veto is discretely severable from the rest of the ICA, and if not, how much other statutory tissue must accompany it.[3]

II.

In *Chadha*, the Supreme Court ruled that "invalid portions of a statute are to be severed ' "[u]nless it is evident that the Legislature would not have enacted those provisions which are within its power, independently of that which is not." ' " 462 U.S. at 931-32, quoting *Buckley* v. *Valeo*, 424 U.S. 1, 108 (1976), quoting *Champlin Refining Co.* v. *Corporation Comm'n of Oklahoma*, 286 U.S. 210, 234 (1932)). The presence of a severability clause in the legislation creates a presumption of severability, id. at 932, and a "provision is further presumed severable if what remains after severance 'is fully operable as a law.' " *Chadha*, 462 U.S. at 934, quoting *Champlin*, 286 U.S. at 234.[4]

The Court of Appeals for this circuit has recently had occasion to apply *Chadha* in *Alaska Airlines, Inc.* v. *Donovan*, 766 F.2d 1550 (D.C. Cir. 1985), *cert. granted*, 106 S. Ct. 1259 (1986), in a severability case.[5] Holding that the proponents of inseverability had not met their burden of overcoming the presumption of severability, the court articulated the analytical process it would follow:

"Our charge is to save as much of the statute as we can, consistent of course with the underlying legislative intent. Only if we conclude that Congress would not have included a provision absent the constitutionally flawed portion is that provision to fall. The issue cannot be whether Congress preferred the statute with the unconstitutional provision over the same statute without that provision. Manifestly, Congress' preference is abundantly clear from its inclusion of the unconstitutional provision. Nor is the question whether Congress would have passed some alternative version of the statute if it knew that it could not lawfully have included the offending provision. That is, "the question is not whether Congress would have enacted th[is] exact statute[] had it known at the time of enactment that the legislative veto provisions were invalid, but rather, whether Congress would have preferred th[is] statute[], after severance of the legislative veto provision[], to no statute[] at all." *Gulf Oil Corp.* v *Dyke*, 34 F.2d 979, 804 (T.E.C.A.) (emphasis in original), cert. denied — U.S. —, 105 S. Ct. 173, 83 L.Ed.2d 108 (1984)."

766 F.2d at 1560 (footnote omitted).

A similar analysis is apposite here, but it points ineluctably to a contrary conclusion as to the severability vel non of the one-House veto, without more, from the ICA. This case involves a statute vastly different in origin, purpose, and effect. As the very title of the Act suggests, a search for means by which Congress could wrest *control* over the budget from what it perceived as a usurping Executive was the *raison d'etre* of the entire legislative effort. Control—how to regain and retain it—was studied and debated at length, on the floor and in committee, over a period of years by a Congress virtually united in its quest for a way to reassert its fiscal prerogative. A clearer case of congressional intent—obsession would be more accurate—is hard to imagine.

Before examining the documentary legislative history of the ICA, a digression into the historical political context in which it was conceived is necessary. In the early 1970's, President Nixon began to use impoundments as a means of shaping domestic policy to his liking, withholding funds from various programs he did not favor. The legality of these impoundments was repeatedly litigated, and by 1974, impoundments had been vitiated in more than 50 cases and upheld in only four.[6]

Congress was incensed at what many members regarded as an unconstitutional arrogation of budgetary power by President Nixon.[7] Realizing that case-by-case adjudications were both inefficient and unpredictable, it began consideration of definitive legislation for impoundment control. See Abascal and Kramer, *Presidential Impoundment Part II: Judicial and Legislative Responses*, 63 Geo. L.J. 149, 169 (1974). In 1972 Congress established a Joint Study Group on Budget Control to study the matter and make recommendations to Congress; the Group's report, issued the following year, called for wide-ranging reform of the budget process. Joint Study Comm. on Budget Control, 93d Cong., 1st Sess., *Recommendations for Improving Congressional Control Over Budgetary Outlay and Receipt Totals* (Comm. Print 1973). In 1973 both Houses first proposed their own bills.

It is apparent from historical circumstances alone that the legislation to which Congress was building would be designed and expected to mark the limits of Congressional and Presidential power in the matter of impoundments henceforth, beyond the incumbency of the then-President, at the time preoccupied with the aftermath of Watergate, who had, by the time the legislation was being readied, forsworn the use of impoundments for the duration of his administration altogether. Note, Texas Law Review, at 703-04 n.62. Congress was intent upon recovering its primacy in matters of money and spending for all time.

In 1973 the Senate passed a bill that purported to give the President limited authority to impound appropriations for 60 days, provided that the appropriation be available for obligation at the end of 60 days if its im-

---

[3] Defendants also suggest that plaintiffs are without standing to force adjudication of the issue, because not all have demonstrated any direct injuries they have themselves suffered as a result of the deferrals or shown how they would benefit if the relief prayed were granted. It is now well-settled, however, that if one plaintiff has standing to bring an action, a court need not consider the standing of all other plaintiffs before addressing the merits. *See, e.g., Watt* v. *Energy Action Educational Foundation*, 454 U.S. 151, 160 (1981); *Buckley* v. *Valeo*, 424 U.S. 1, 12 (1976) (*per curiam*). The Court's review of the interests asserted in the several cases before it discloses that at least one plaintiff is immediately concerned with each of the programs affected by the deferrals and will likely benefit if the funds are restored.

[4] The statute at issue in Chadha contained a severability clause; the ICA contains no such clause, but its absence is not dispositive, merely evidence of congressional intent. In considering the ICA Congress, anticipating Chadha, recognized that the one-House veto provision might be held unconstitutional, but it did not even discuss the addition of a severability clause. See, e.g., H.R. Rep. 93-658, 1st Sess. 87 (1973) (minority views) (one-House veto was "of doubtful legal effect").

[5] *Alaska Airlines* reversed a district court decision holding the reservation of a one-House veto over agency regulations implementing an employee protection program in deregulatory legislation to be inseverable from the program itself. The court of appeals found the program, as established by the statute, to be fully operable with or without the oversight afforded by the one-House veto, and the program, rather than the oversight, the dominant legislative objective.

[6] *See e.g., Train* v. *City of New York*, 420 U.S. 35 (1975) (municipal waste treatment projects); *Guadamuz* v. *Ash*, 368 F. Supp. 1233 (D.D.C. 1973) (environmental and housing rehabilitation funds); *National Council of Community Mental Health Centers, Inc.* v. *Weinberger*, 361 F. Supp. 897 (D.D.C. 1973) (public health funds). For a complete list of impoundment cases, see Staff of Joint Comm. on Congressional Operations, 93d Cong., 2d Sess., *Special Report on Court Challenges to Executive Branch Impoundments of Appropriated Funds* (Comm. Print 1974); Staff of House Comm. on Government Operations, 93d Cong., 2d Sess., *Report on Presidential Impoundment of Congressional Appropriated Funds: An Analysis of Recent Federal Court Decisions* (Comm. Print 1974). *See also* Note, *Addressing the Resurgence of Presidential Budgetmaking Initiative: A Proposal to Reform the Impoundment Control Act of 1974*, 63 Tex. L. Rev. 693, 697 n.24 (1985) (hereinafter cited as "Note, Texas Law Review").

[7] *See generally Joint Hearings on Impoundment of Appropriated Funds by the President Before the Ad Hoc Subcomm. on Impoundment of Funds of the Senate Comm. on Government Operations and the Subcomm. on Separation of Powers of the Senate Comm. on the Judiciary*, 93d Cong., 1st Sess. (1973); and *Hearings on Executive Impoundment of Appropriated Funds Before the Subcomm. on Separation of Powers of the Senate Comm. on the Judiciary*, 92d Cong., 1st Sess. (1971).

poundment were not approved by Congress by concurrent resolution. S. 373, 93d Cong., 1st Sess., passed Senate, 119 Cong. Rec. 15,255 (1973). That same year the House passed a bill containing anti-impoundment measures giving the President authority to cancel or delay budget authority upon notice to Congress of his action, subject, however, to a one-House veto. H.R. 7130, 93d Cong., 2d Sess., passed House, 119 Cong. Rec. 39,740 (1973). In 1974 the Senate unanimously adopted the House bill after substituting for the one-House veto the language of a new Senate bill, S. 1541, 93d Cong., 2d Sess. (1974), which forbade impoundments altogether. 120 Cong. Rec. 7938 (1974). (S. 1541 would have required the President to propose *rescissions* whether he wished to evade, or merely delay, budget authority.) The bill also purported to amend the Anti-Deficiency Act to eliminate any possible basis for its invocation by a President as authority for impoundments.[8]

In conference committee a compromise was reached that included features of both the House and Senate bills, and the conference committee report makes it clear that the Houses were equally committed to confining a President's power to impound appropriations and to restore to Congress ultimate control over the budget process. See S. Conf. Rep. No. 93-924, 93d Cong., 2d Sess. 49, 76-78 (1974). The compromise bill adopted the Senate approach for rescissions, or permanent impoundments, requiring approval for rescissions, or permanent impoundments, requiring approval through the enactment of legislation. It employed the House approach for deferrals, or temporary impoundments, allowing the deferrals to become effective unless disapproved by either House. The compromise bill also incorporated an amendment to the Anti-Deficiency Act similar to that proposed by the Senate bill.

The ensuing debates upon the compromise conference bill in both Houses demonstrate near-unanimous consensus on the part of the members that total congressional control over the impoundment process would be a legislative *sine qua non*. Without a ready device to quash any impoundment of which it disapproved—temporary or permanent—Congress was of no mind to concede to any President a warrant to impound at all.

Representative Brotzman, for example, said:

"Until now, the President's impoundment of funds has been the only thing keeping this spending under control. I believe that impounding of funds ultimately works to the detriment of every American citizen by weakening the separation of powers between the executive and legislative branches.

"However, if the Congress were to destroy this power to impound funds, without first providing the machinery to responsibly handle the Federal budget, the result would be bankruptcy for the American people.

"There must be a mechanism in the Congress to effectively limit congressional spending and this bill accomplishes the goal. . . .

"The bill permits the President to impound funds solely for contingencies ro to affect [sic] certain savings. The President is required to report any impoundment action to the Congress by means of a deferral message, and the Congress is given the right to pass an impoundment resolution disapproving the deferral, thereby making the funds available for their intended purpose." 120 Cong. Rec. 19,685-86 (1974). Representative Randall termed impoundment control one of the "tools for budget control," and also an important "tool to fight the impoundment process of funds appropriated needed to carry out authorized programs so urgently needed by our people." *Id.* at 19,686-87. Representative Sisk expressed his belief that congressional appropriations needed protection from executive impoundment, stating "the Congress has the opportunity to stop the arrogation of power of the Nation's purse strings," and "[t]here are several significant provisions in the budget control bill, but none are as important as the prohibition against impoundment by executive fiat. . . ." *Id.* at 19,687. Representative O'Neill emphasized the importance of Congress' ability under the compromise bill "to review and terminate the impoundment of funds by the executive branch" and to determine whether impoundments are necessary. *Id.* at 19,689. Numerous statements from other representatives declare support in like terms for the compromise bill and the need for control of Presidential impoundments. *See, e.g., id.* at 19,680 (Rep. Sikes); *id.* at 19,684 (Rep. Pickle); *id.* (Rep. Bingham); *id.* at 19,685 (Rep. Badillo); *id.* at 19,690 (Rep. Annunzio); at 19,695 (Rep. Pepper); *id.* at 19,696 (Rep. Matsunsaga).

Senator Tower also declared his approval of congressional control of impoundments, saying that control of the President's ability to impound "should help restore a better balance between the executive and legislative branches of government." *Id.* at 20,485. Other senators concurred. *See, e.g., id.* at 20,470-71 (Sen. Metcalf); *id.* at 20,472-73 (colloquy between Sen. McClellan and Sen. Ervin): *id.* at 20,476 (Sen. Cranston); *id.* at 20,481 (colloquy between Sen. Humphrey and Sen. Ervin); *id.* at 20,485 (Sen. Tower).

The one-House veto was specifically extolled as an integral component of the control machinery being considered. On the House side numerous statements by representatives illustrate the importance they attached to it. Rep. Bolling's statement in support of the conference bill is an example:

"From the start I have held to the position that impoundment control is an essential component of budget reform. It makes no sense for Congress to establish new procedures for the appropriation of funds if the President can override the will of Congress by means of impoundment. At the same time, the methods used to control Presidential impoundments must be reasonable and appropriate. They should neither deny the President the capability to manage the executive branch nor impose upon Congress the burden of redoing its previous decisions. In line with this position, the House last year passed H.R. 8480 to provide for the veto of any impoundment by either the House or Senate and a similar provision was incorporated into H.R. 7130 when it was approved by the House last December.

"I can report that the conference bill both upholds the position of the House and makes some worthwhile elaborations in the procedures of expenditure control. The bill addresses the various types of impoundments and provides appropriate procedures for each. First, it provides for disapproval by either the House or the Senate of Presidential proposals to defer the expenditure of funds. Analysis has shown that deferrals constitute the lion's share of impoundment actions and many of these are for routine financial purposes and involve neither questions of policy nor attempts to negate the will of Congress. In the case of deferrals, disapproval can be expressed by resolution of either the House or the Senate. Such disapproval will clearly instigate [sic] the view of Congress that the deferral is not merely a routine financial matter. When disapproved by either House or Senate, a deferral must cease at once."

120 Cong. Rec. 19,674 (1974).

Similar sentiments were expressed in the Senate. Senator Ervin, a member of the conference committee, reported his satisfaction with the impoundment control portion of the compromise bill and stated that the "highly controversial issue" of impoundment control "is dealt with by way of an effective compromise." *Id.* at 20,464. He noted that "the President has no power under the Constitution to impound lawfully appropriated funds in the absence of a delegation of such authority by the Congress," but that there were situations in which deferral or rescission of budget authority was the best policy. *Id.* Therefore, he said, the compromise bill addresses "three types of executive actions and places *restrictions on each of them.*" Id. (emphasis added).[9]

Thus, unlike the challenged provision of the statute in *Alaska Airlines*, the one-House veto is not to the ICA merely a superfluous afterthought; it is, rather, the instrument expressly chosen by a nearly unanimous Congress to exert its control over impoundments-by-deferral when proposed by the President.[10]

Defendants' contention that the primary objective of Congress in passing the Act was to improve the quality of the information it would receive about proposed deferrals in the accompanying "message" is simply not

[8] The Anti-Deficiency Act is codified at 12 U.S.C. §§ 1341 and 1512 (1982). Prior to its amendment in 1974, the Anti-Deficiency Act permitted the President to "apportion" funds where justified by "other developments subsequent to the date on which such appropriation was made available." 31 U.S.C. § 665(c)(2) (1970) *amended* by Budget and Impounding Control Act of 1974, Pub. L. No. 93-344, Tit. X. § 1002, 88 Stat. 297, 332. President Nixon relied on this section as authorization for the impoundments he made. Note, Texas Law Review, at 699-700. The Act was amended to limit apportionments to provision for contingencies, to achieve savings made possible by changes in requirements or program efficiency, or as specifically provided by law. 12 U.S.C. § 1512(c)(1). The amendment was part of the overall reform of the budget process, and was intended to prohibit the use of apportionment as an instrument of policy-making. See, e.g., 120 Cong. Rec. 7658 (1974) (remarks of Senator Muskie).

[9] The one-House veto had also been discussed in the floor debates on the original bills, with members expressing similar views. *See, e.g.,* 119 Cong. Rec. 39,341 (1973) (remarks of Rep. Bolling); *id.* at 39,363 (remarks of Rep. Hammerschmidt); *id.* at 39,725 (remarks of Rep. Whitten); *id.* (remarks of Rep. Eckhart); *id.* at 39,725-26 (amendment to replace one-House veto provision with concurrent resolution provision rejected); 120 Cong. Rec. 7657 (1974) (remarks of Sen. Roth); *id.* at 7657-59 (colloquy between Sen. Roth and Sen. Muskie); *id.* at 7659 (amendment to permit one-House veto rejected).

The Court has neither been cited to, nor has found on its own, *any* expressions of support for the proposition that the President be allowed to defer budget authority *without* the check afforded by *at least* a one-House veto.

[10] The compromise bill passed the House 401 to 6, 120 Cong. Rec. 19,698 (1974); the Senate 75 to 0. 120 Cong, Rec. 20,500 (1974). Such opposition as there was came from House members who advocated adoption of the Senate's earlier version refusing all impoundment authority to the President. *See, e.g.,* 120 Cong. Rec. 19,693 (1974) (Rep. Harrington); *id.* at 19,696 (Rep. Drinan).

borne out by the legislative history. To be sure, Congress wanted notice of Presidential budgetary actions, and there are expressions during the debates of dissatisfaction with the sufficiency of Presidential communications under prior law,[11] but it was the notice provision, not the veto, if anything, which was merely incidental. The debates centered upon the issue of whether the President should be able to impound at all, or should be permitted to impound, but with various congressional circumscriptions of his power to do so. It does not appear from the voluminous history of the ICA in its entirety that Congress was very much concerned with, let alone determined to achieve, further detail about future Presidential impoundments absent a mechanism for exercising control over them.

III.

In *Alaska Airlines* the court noted that the statute without the one-House veto would operate as intended. In doing so it distinguished *American Federation of Government Employees* v. *Pierce*, 697 F.2d 303 (D.C. Cir. 1982), an earlier case in which it had found a one-House veto inseverable because severance would have left a legislative result the opposite of that Congress intended.[12] Severance in the instant case, too, would demolish the congressional control over a species of impoundment that was at its heart.

Indeed, if the Court were to find the one-House veto to be serverable from the deferral power itself, not only would it confirm in the President the very power that Congress has never acknowledged him to have at all, it would also enable him to employ it, in effect, as a "line-item veto" (which is, of course, anathema to Congress) by signing an appropriations bill and later "deferring" any and all specific appropriations for agencies or programs he thought underserving. That neither this nor any President has done so to date is irrelevant; the potential for it is, however, most relevant to a retrospective inquiry into Congress' willingness in 1974 to have accepted an ICA shorn of the one-House veto but in all other respects as it appears today.

Defendants point out that the deferral power can never be the true equivalent of a line-item veto, in that an enactment "vetoed" by the President is permanently canceled, whereas an appropriation "deferred" must be available for obligation before the end of the fiscal year. See 2 U.S.C. § 684(a). The argument ignores the practical realities of the budget process, however, for when the expenditure of funds is deferred for one year, those funds remain available and may be used to offset budgetary requirements for the following fiscal year.[13] The argument also ignores economic reality as well; the timing of an expenditure may be as or more important to Congress than the total amount spent.

Plaintiffs postulate two further anomalous, although still hypothetical, consequences of a President uninhibited by the prospect of a one-House veto in his exercise of the deferral authority given him by the ICA. Having no other mechanism at hand, the only way Congress can reverse a Presidential deferral is by enacting new legislation ordering the President to spend the money (an alternative, by the way, Congress specifically considered and discarded when it passed the ICA).[14] If the new legislation were then vetoed by a President determined to prevail, Congress would have to muster a two-thirds majority of each House to vote to override. Plaintiffs also suggest that unconstrained deferral authority pursuant to the ICA would, in effect, nullify Congress' amendment to the Anti-Deficiency Act.[15] The amendment limited the President's ability to "apportion" funds to three carefully-delineated situations in an effort to remove any colorable basis under the Anti-Deficiency Act for his impoundment of appropriated funds in the guise of an "apportionment." To find the President now unchecked in his deferral power by the one-House veto would be to permit him to apportion funds in the guise of a "deferral."

The Court concludes that the legislative history of the ICA demonstrates that Congress would not have conceded any deferral authority to the President at all in the absence of the one-House veto provision. It can be said with conviction that Congress would have preferred no statute to one without the one-House veto provision, for with no statute at all, the President would be remitted to such pre-ICA authority as he might have had for particular deferrals which, in Congress' view (and that of most of the courts having passed upon it) was not much.

IV.

Having found it evident that Congress would not have enacted those provisions of the ICA which are within its power independently of that which is not, under *Chadha* and *Alaska Airlines* this Court must now look to whether the ICA is presently fully operable as a law without the one-House veto provision. In support of their contention that the ICA is a law entire unto itself sans the one-House veto, defendants point to the way in which Congress and the President have operated under the ICA since *Chadha*.[16] But, the fact that both Houses of Congress have either acquiesced in, or passed legislation to overturn, other Presidential deferrals in the three years since *Chadha* does not establish that *the law* is operable. The ICA does not provide the mechanism for the enactment of legislation; the Constitution does. That Congress has done so proves not that the statute is operable, but that Congress has acted outside the confines of the statute and in the exercise of its Article I constitutional powers. The Court finds that the ICA is not fully operable as a statute without the one-House veto provision. The modus vivendi which has evolved between the President and Congress is the years intervening, ostensibly pursuant to the ICA, could in fact have existed in the absence of any statute at all.

V.

Defendants assert that if this Court finds that the one-House veto is inseverable, it must then strike all other impoundment-related provisions of Title X of the ICA, including the amendment to the Anti-Deficiency Act, and thereby return the parties to the *status quo ante* the CIA's enactment in 1974. They argue that to strike only the deferral provision would be to destroy the symmetry of the constitutional accommodation the Act represented between the Executive and Legislative Branches with respect to the whole subject of Predidential impoundments.

The Court of Appeals for this circuit, however, has instructed that courts must "save as much of the statute as we can, consistent with the underlying legislative intent," *Alaska Airlines, Inc.* v. *Donovan*, 766 F.2d at 1560 (footnote omitted), and the excision of more than the deferral authority would constitute unnecessary mutilation. The paramount legislative objective of the ICA, i.e., of controlling impoundments, is best implemented by leaving rescission authority and the Anti-Deficiency Act as written, and as the President and Congress agreed upon them originally.

VI.

Finally, defendants contend that a finding that the one-House veto provision is inseverable will not provide the plaintiffs the relief they seek, viz. the present availability to them of the total appropriations for obligation, because the statutes pursuant to which the appropriations were made do not mandate the expenditure of funds now and, thus, the President may withhold the funds independently of the ICA. *See UAW* v. *Donovan*, 746 F.2d 855 (D.C Cir. 1984). But the President acted pursuant to the ICA in defferring the budget authority at issue here. He did not assert an independent basis for his deferrals, see H. Doc. 99-161; 51 Fed. Reg. 5829 (Feb. 18, 1986), and the Court can decide only the matters presented to it by the actual case or controversy before it. The status of the President's authority to impound funds independently of the ICA will once again have to await yet another case.

For the foregoing reasons, it is, this *16th* day of May, 1986.

Ordered, that plaintiffs' motions for a preliminary injunction are denied as moot; and it is

---

[11] *See* 120 Cong. Rec. 20481-82 (colloquy between Sen. Humphrey and Sen. Ervin). Two years earlier, Congress had passed a law designed to require the President to submit information about impoundments to Congress. Federal Impoundment and Information Act of 1972, Pub. L. No. 92-599, 86 Stat. 1325 (codified at 31 U.S.C. § 581c-1 (1970 & Supp. II 1972), *repealed by* Budget and Impoundment Control Act of 1974, Pub. L. No. 93-344, Tit. X, § 1003, 88 Stat. 297, 332.

[12] In *Pierce*, at issue was a provision of an appropriations act for HUD which provided that no funds could be used for a reorganization of HUD without the prior approval of the Appropriations Committees of both Houses. The court of appeals found the approval clause invalid but inserverable, basing its decision on the act's legislative history from which it derived its belief that "[n]either House . . . would have accepted a complete ban on reorganizing HUD—yet that is precisely the result severance would have brought about." *Alaska Airlines*, 66 F.2d at 1565.

[13] In his Section 8 deferral message to Congress, the President stated that he intended to use appropriations deferred from fiscal year 1986 to offset appropriations for fiscal year 1987. *See* H. Doc. 99-161 at 246; 51 Fed. Reg. 5953. *See also* Summary, Fiscal Year 1987 Budget, U.S. Department of Housing and Urban Development, H-2, H-4, and H-14.

[14] The House Report accompanying H.R. 7130 stated that a one-House veto provision "is suggested on the ground that the impoundment situation established by the bill involves a presumption against the President's refusing to carry out the terms of an already considered and enacted statute. To make Congress go through a procedure involving agreement between the two Houses on an already settled matter would be to require both, in effect, to reconfirm what they have already decided." H.R. Rep. No. 93-658, 93d Cong., 1st Sess. 42 (1973). Ultimately, this objection prevailed with respect to deferrals. See S. Rep. 93-924 (1974) (Conference Committee Report); 2 U.S.C. § 684.

[15] See footnote 8, *supra*.

[16] Through fiscal 1985 the President had proposed 152 deferrals, of which Congress has disallowed 21 by legislation has signed into law.

From 1975 through mid-1983, of over 1,000 Presidential deferrals, Congress rejected 100, by one-House veto or subsequent legislation.

Further Ordered, that plaintiffs' motions for summary judgment is denied; and it is

Further Ordered, that plaintiffs' motion for summary judgment are granted; and it is

Further Ordered, that the one-House veto provision is hereby declared inseverable from the remainder of section 1013 of Pub. Law 93-344, codified at 2 U.S.C. § 684 (1982), and section 1013 is therefore set aside in its entirety; and it is

Further Ordered, that defendants are ordered to make available for obligation the full amount of funds Congress appropriated for (a) the Section 8 Housing Assistance Payments Program, 42 U.S.C. § 1437(f); (b) the Section 202 Program of the Housing Act of 1959, 12 U.S.C. § 1701(g); (c) Title I of the community Development Block Grant Program of the Housing and Community Development Act of 1974, 42 U.S.C. § 5301; and (d) the Section 312 Program of the Housing Act of 1964, 42 U.S.C. § 1452b, which defendants have withheld pursuant to the deferral messages sent by the President to the Congress; and it is

Further Ordered, *sua sponte,* that the injunction hereinabove entered is stayed until completion of appellate proceedings herein.

HONOR YOUR ROOTS

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mrs. COLLINS. Mr. Speaker, during a recent visit to Denver, CO, I met with an Alpha-Kappa Alpha soror, Ms. Patricia Sandersbrown, who impressed me with her strong sense of "remembering from whence one came." As part of her tribute to and remembrance of black American heritage, she wrote a very poignant poem entitled, "Honor Your Roots."

I would like to take this opportunity to share with my colleagues a copy of this poem.

HONOR YOUR ROOTS

(By Patricia Sandersbrown)

It's time we remembered what we've left behind;
We need to honor our roots, keep them in mind.
So come, gather 'round and listen for awhile,
Every man, every woman, and every lil' chile:
I've got some preachin' to do, I've got somethin' to say;
Y'all sit down and hush up! Hear me today!
Now, don't roll your eyes, don't shake your head,
Don't whisper to your neighbor, ". . . should've stayed in bed! . . ."
Don't try to sneak out . . . somebody close that door!
Hey, man, sit up! What ya sleepin' for?
Do you think this story ain't about you?
Check again . . . check your skin . . . it's you!, it's you!
Now, I know this talk about roots might be too tough;
Talkin' 'bout when times were hard and roads were rough!
We may want to forget that long ago time;
Forget 'bout pickin' cotton, sayin' "Shine for a dime?"
We may not want to hear this talk 'bout roots
With our carefree curls and our three-piece suits!
You say, why talk about being colored now that we're BLACK?
And I say 'cause we arrived at our Blackness on our colored kins' backs!
They carried us here, just as sure as we're born;
It was their sweat and tears, ironin' sheets, shuckin' corn.
Oh, I know we've got class now, and all sorts of degrees!
But, our great-grandmamas scrubbed floors on their knees!
We've got to remember, we cannot forget;
We may not be slaves, but we're not free yet!
There's a long way to go and the distance is far;
And we can't make the journey with a luxury car!
Fine clothes, big homes and diamond rings
Are good to have, but they're just things!
Our culture is rich, don't keep it inside;
Don't let things be the basis of your Black pride!
Let us stand tall, Black people, and believe in our worth,
And let our Black pride shine as we strut this earth!
Real pride is not the "what", and it's not the "who",
It's not what you "have", and it's not what you "do"!
Our roots are our heritage, our legacy to uphold;
We must honor them and cherish them, whether young or old.
Well . . . all this talkin' 'bout roots should never end,
But, I'm done with my preachin' . . . y' all can say, "Amen!"

THE 65TH BIRTHDAY OF DR. ANDREI SAKHAROV—LETTER FROM ROBERT L. BERNSTEIN

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. LANTOS. Mr. Speaker, today marks the 65th anniversary of the birth of Soviet scientist and human rights leader Andrei Sakharov. Today, at a special commemoration of this event held by the Committee on Foreign Affairs, Dr. Sakharov's devoted wife Yelena Bonner, American human rights leaders, and distinguished Members of Congress paid tribute to this great man.

In 1975, Dr. Sakharov's Nobel Peace Prize lecture—which he was not allowed to deliver in person—was prophetic in sounding the call for observance of human rights:

Peace, progress, human rights—these three goals are indissolubly linked: it is impossible to achieve one of them if the others are ignored. . . . We must fight for every individual and against every act of injustice and against every violation of human rights. So much in our future depends on this.

Today, Mr. Speaker, a number of individuals paid tribute to Dr. Sakharov. I would like to place in the RECORD a letter from Mr. Robert L. Bernstein to Ambassador Anatoliy F. Dobrynin, former Soviet Ambassador to the United States and now Secretary of the Central Committee. Mr. Bernstein's letter summarizes the abuse and mistreatment that Andrei Sakharov and Yelena Bonner have suffered and calls for their release from exile in Gorki.

Mr. Bernstein speaks with authority on the Sakharovs. He is chairman of the board, president, and chief executive officer of Random House Publishers, which is the publisher of Andrei Sakharov's books: "Sakharov Speaks," "My Country and the World" and "Alarm and Hope." Furthermore, Mr. Bernstein is a committed leader for human rights in the United States. He is chairman of the Fund for Free Expression and the U.S. Helsinki Watch, an organization which he founded in 1979.

Mr. Speaker, I strongly urge my colleagues in the House to read and consider Mr. Bernstein's outstanding letter. One of the highest tributes to the integrity and character of Dr. Sakharov is that men like Bob Bernstein devote their lives and energies to the cause of human rights which Dr. Sakharov exemplifies.

LETTER OF ROBERT L. BERNSTEIN TO AMBASSADOR ANATOLIY F. DOBRYNIN

DEAR AMBASSADOR DOBRYNIN: Today is Andrei Sakharov's sixty-fifth birthday, and I find myself in a United States Congress meeting room with Yelena Bonner Sakharov and a host of American Senators, Representatives, and other dignitaries and friends honoring Andrei and Yelena Sakharov and discussing ways to talk to the Soviets about them.

At the outset, let me outline what has happened to them since the time in 1968 when Andrei expressed national and foreign policy views with which past Soviet general secretaries did not agree.

First, he was removed from all defense work.

Second, he was prevented from doing his own scientific work.

Third, Yelena Bonner Sakharov's children, who have become as close to Andrei Sakharov as any children born to him, and who have stood by him, were forced to leave the country with their children. (Yelena Bonner Sakharov's mother has also left the country and would now like to live out her final years in Moscow, but not if she were separated from her daughter.)

Fourth, in 1980 the Sakharovs were suddenly judged too dangerous to be allowed to speak to anybody, and were removed and confined to the city of Gorky, where Andrei Sakharov remains to this day and where his wife will shortly join him once again.

Fifth, The Sakharovs had to watch, helplessly, as friends, not as honored and protected by past services to the Soviet Union, were sent away to camps and prisons because of their participation in the Helsinki Watch—even though the Soviet Union signed the Helsinki Final Accord on August 1, 1975, and even though the Final Accord confirms, and I quote: "the right of the individual to know and act upon his rights and duties . . . in the field of human rights . . ."

In Gorky, the Sakharovs have been unable to live a normal life. They are under constant surveillance by the K.G.B. Books and writing are repeatedly confiscated. People are warned not to talk with them. They cannot communicate freely. They are not allowed to see friends. A simple phone call is most difficult, as they have no phone available near their home. Yet in an effort to prove that Andrei Sakharov still lives like an average citizen, even his visits to the doctor have been filmed and later released

to the American press. Does this hurt Sakharov or the Soviet Union?

In the last few years, Sakharov has resorted in desperation to hunger strikes, very serious hunger strikes, even though he has a heart condition—first, in order to gain permission for his daughter-in-law to leave to join her husband in the United States, and then, several times, to secure approval so that Yelena Bonner could travel to Italy for badly needed eye treatment and to the United States for a major heart operation.

That is the record, Ambassador Dobrynin. No one denies that your nation is powerful enough to do what it has done to the Sakharovs, or to any human being who lives in the Soviet Union. But surely the unavoidable question is this: What, for all the extraordinary measures you have taken to silence Andrei Sakharov, have you gained?

First, perhaps, Andrel Sakharov's views on foreign policy have not recently been directly expressed to the world, although his ideas, such as nuclear control and disarmament, have now become part of your government's official policy.

Second, he cannot release any military information—though he has been barred from such information for many years, and it is hard to believe data twenty years old would have value in today's fast-moving world.

And third, you may possibly believe (though there is much evidence to the contrary) that you gain from Sakharov's serving as an example of what can happen to one who speaks his thoughts, signaling silence to others who might otherwise wish to speak or write their views.

Now what is it, on the other hand, Ambassador Dobrynin, that you lose by persecuting Andrei Sakharov and Yelena Bonner Sakharov?

All over the world, there are thousands of intelligent and educated people who keep Andrei Sakharov and Yelena Bonner Sakharov in the forefront of their minds and conversation in every contact that they make with representatives of your country. More important, because of the Sakharovs, they believe that none of the Soviet professionals they deal with are free to speak their real thoughts. There is a wariness that has to impede progress between your best minds and the best minds of other nations. These are people who have children and grandchildren and realize there must be international and certainly U.S.-Soviet solutions to world problems.

The National Academy of Sciences has now resumed exchanges, but do you really believe this will continue for long if there is not some change in the status of the Sakharovs? I know too many scientists who feel strongly about their confined colleague to believe that it will.

They will not stop the exchanges as a negotiating ploy. They will only stop because they will feel guilty about not trying to help a colleague, because they will feel frustrated and maybe used. It will be an act of despair. They will be torn between wanting progress and wondering if it is possible with a nation that makes a symbol of persecution of one of its own best minds.

You have maintained exchange with foreign book publishers, while denying some admittance to the Moscow Book Fair for expressing their views freely—and while continuing to silence and exile your own writers whom these very publishers publish. The Sakharovs are the most prominent example. At some point, won't the publishers face the same problems as the scientists?

Other exchanges are now starting in many fields because people want to believe that Mr. Gorbachev does think, particularly after Chernobyl, that exchanges are good, that they do increase understanding between nations and that knowledge can only cross borders where there is a free flow of ideas.

There is, at this moment, great movement among the people of many nations—both private citizens and professional groups—to reach out to the Soviet Union for the sake of all of us.

Ambassador Dobrynin, you have spent many years in the United States. If you are the man I am told you are, you recognize that fair treatment of the Sakharovs would make an enormous psychological difference to many who wish no harm either to the Soviet Union or to the United States—who wish only that the two nations would cease their confrontation, particularly in armaments, and forge a new era of mutual assistance.

Symbolism is important. Releasing the Sakharovs risks so little. Holding them blocks so much. I hope your wisdom and experience will lead you to the same conclusion.

Sincerely,

ROBERT L. BERNSTEIN.

LBJ, CIVIL RIGHTS, AND VIETNAM

HON. J.J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. PICKLE. Mr. Speaker, the decade of the 1960's is remembered for a multitude of reasons. We were a society torn apart; there was violence in our city streets and protests on our college campuses. Our children rejected much that was America, our boys fought an elusive enemy, and America fell victim to social unrest which threatened life as we'd come to know it.

Dr. Walt W. Rostow, aide and confidante of then-President Lyndon B. Johnson, recently spoke on this period and of the forces driving our President to take critical and much-criticized steps. I commend to my collegues the following statement delivered by Walt Rostow at Hofstra University with certainty that you, too, will be enlightened by his analysis. I think it is an accurate and concise analysis, and it should be brought to the attention of our colleagues.

I. INTRODUCTION: THE PROPOSITION

In the short time available I shall confine myself to one proposition and a brief comment on it. The proposition is that President Johnson's perspective on Vietnam and Southeast Asia was strongly affected by his judgment of the greatly increased future importance to the United States of Asia as a whole. But there was a second strand. His vision of a future where Asians and Americans would live and work in increasing intimacy converged, in the late 1950's, with his assumption of leadership in the Senate on the issue of civil rights leading to the legislation of 1957. This convergence accounts for the reversal of his position on statehood for Hawaii. The mixture of races in Hawaii became in his eyes not, as it had been to those who opposed statehood, a dangerous example and precedent, but an asset in our relations with Asia and an asset as we struggled to build a peaceful multiracial society of equal opportunity at home.

Johnson's position on civil rights was, or course, not wholly determined by his view of the future importance of Asia. But the latter reinforced his position on the former. He understood that a segregationist America could not be a valid and effective partner with Asia beginning to demonstrate its dynamism in the second half of the 1950's.

II. THE EAST-WEST CENTER SPEECH, OCTOBER 18, 1966

My first insight into this linkage occurred on October 17, 1966, en route from Washington to Hawaii, on the first leg of his three week tour through Asia. Johnson had worked hard with several of us on his major speech in Honolulu to be delivered at the East-West Center. On Air Force One, however, after reading over the draft, he dictated a passage which included the following:[1]

"My forebears came from Britain, Ireland, and Germany. People in my section of the country regarded Asia as totally alien in spirit as well as nationality. * * *

"We, therefore, looked away from the Pacific, away from its hopes as well as away from its great crises.

"Even the wars that many of us fought here were often with leftovers of preparedness, and they did not heal our blindness * * *

"One consequence of that blindness was that Hawaii was denied its rightful part in our Union of States for many, many years.

"Frankly, for two decades I opposed its admission as a State, until at last the undeniable evidence of history, as well as the irresistible persuasiveness of Jack Burns, removed the scales from my eyes.

"Then I began to work and fight for Hawaiian statehood. And I hold that to be one of the proudest achievements of my 25 years in the Congress."

Later in the speech he referred to Hawaii as "a model of how men and women of different races and different cultures can come and live and work together; to respect each other in freedom and in hope."

There is no doubt that John Burns had a considerable impact on Johnson in this matter. Burns was the Hawaiian Delegate (without voting rights) to the Congress in the late 1950's, and later governor of the state.

Johnson also referred in his Honolulu speech to the East-West Center as "this very special place to me." And, indeed, it was. He initiated the legislation creating the center, nurtured it in the Senate, and was active as Vice President in assuring its funding. It remained to him a living part of his vision of future relations in the Pacific Basin.[2]

---

[1] Public Papers of the Presidents, Lyndon B. Johnson, 1966, Washington, DC: G.P.O., 1967, vol. II, pp. 1220-21 (Item 533).

[2] In the Preface to its 25th anniversary publication, Asia-Pacific Report: Trends, Issues, Challenges, Honolulu: East-West Center, 1986, p. vii, the Center's President, Victor Hao LI, observes: "No one could then [1960] have predicted the scope and rapidity of changes that would occur in the Asia-Pacific region in the next 25 years. Nevertheless, the people who conceived the idea of an East-West Center, including then Senate Majority Leader Lyndon Baines Johnson and Hawaii Congressional Delegate John Burns, recognized the inherent dynamism of the region and appreciated its long-run importance to the United States."

The theme of Johnson's 1966 tour through Asia was not Vietnam. It was the future of Asia; the need for Asia to organize regionally to shape its own destiny; his hope and faith that "sooner or later the pragmatic and compassionate spirit of the Chinese people will prevail * * * and the policies of mainland China will offer and permit * * * reconcilation"; and the future role of the United States as "a neighbor among equals—a partner in the great adventure of bringing peace, order, and progress to a part of the world where much more than half of the entire human race lives." He saw the frustration of aggression in Southeast Asia—with the assistance of New Zealand, Australia, South Korea, the Philippines, and Thailand—as a condition for the vision to come to life.

I can attest that this was a major part of the framework within which he viewed our task in Southeast Asia from April 1, 1966, when I went over to the White House from the State Department, to January 20, 1969.

III. INTERPRETATIONS OF JOHNSON AND VIETNAM

In Asia and the Pacific Johnson's view was fully understood. Indeed, leadership in building Asian regionalism was in the hands of a remarkable group of statesmen in the whole arc from Wellington and Canberra through Djakarta and Bangkok to Tokyo and Seoul. Without their leadership, American advocacy would have been fruitless. But neither at the time nor in retrospect was it widely appreciated in the West that Johnson's approach to the problem of Vietnam was deeply rooted in his vision of the inevitably increasing importance of Asia and the need for the fragmented states of Asia to organize on a regional and sub-regional basis. Among western journals only the London Economist and Fortune, for example, discussed seriously the significance of these themes in reporting his 1966 trip through Asia. As for historical commentary, I would guess that most analysts would accept the central thesis of Leslie Gelb and Richard Betts in their serious study, "The Irony of Vietnam":[3] "U.S. leaders considered it vital not to lose Vietnam by force to communism. They believed Vietnam to be vital not for itself, but for what they thought its 'loss' would mean internationally and domestically."

I have no doubt that there were some officials in the Executive Branch in the 1960's who took precisely the view Gelb and Betts assert. But Lyndon Johnson—and, I would add John Kennedy—was not among them. Johnson did, indeed, consider the impact of failure to honor successfully the Southeast Asia Treaty on other American alliances and on American society. But that treaty unambiguously threw the mantle of U.S. protection and commitment over South Vietnam; and he believed that treaty reflected abiding American interests in Asia. And he did not require a super-computer—or even an abacus—to understand that Asia would soon be at least as important to the United States as Europe—if not more important. Incidentally, he would have chuckled with satisfaction at learning that 25% of the undergraduate students at the University of California at Berkeley are Asian or of Asian extraction.

[3] Leslie H. Gelb with Richard K. Betts, "The Irony of Vietnam: The System Worked, 1950-1975," Washington, DC: The Brookings Institution, 1979, p. 25.

IV. A CONCLUSION

I have chosen this theme today not to argue that President Johnson was correct; although I believe he was. I chose it in the hope that this dimension of his perspective on Vietnam will be understood and taken into account in future analyses of the 1960's.

His perspective may be worth considering for another reason. Southeast Asia as of 1986 is both a hopeful and a precarious place. President Carter and President Reagan have reaffirmed the continued applicability of the Southeast Asia Treaty to Thailand, including the 1962 supplementary U.S. commitment to act in support of the treaty whether or not other signatories respond. It is by no means certain that we shall again confront military crisis in that region: the ASEAN countries used well the time bought between 1965 and 1975 and are much stronger and more confident now than twenty years ago; Hanoi has had great difficulty trying to consolidate its empire in Indo-China as well as in expanding and modernizing the Vietnamese economy; President Ford and his successors did not accept the actions of the Congress in the mid-1970's as determining long run U.S. policy toward Southeast Asia; our relations with China in that region as elsewhere have changed for the better. On the other hand, large Vietnamese forces are on the long and highly vulnerable Thai border; substantial Soviet naval and air forces operate out of the bases we built at Cam Ranh Bay and around Danang just across from Subic Bay and Clark Field in the Philippines; another large port is reported being built in Kampuchea by the Soviet Union. The sea routes of the South China Sea and through the Straits to the Indian Ocean—so literally vital to Japan and China—and to all the other countries of the Pacific Basin—are not as secure as they were.

Not many recall that Franklin Roosevelt cut off from Japan the flow of scrap iron and oil and sequestered their assets when they threatened those routes by moving their forces from northern to southern Indo-China in 1941. And FDR's eight successors—without exception—have all asserted our security interests in the area. The nine presidents may have been wrong; but I suggest that it would be useful, in this period of relative calm and hope for the Pacific Basin, that we as a nation come to a stable consensus on our policy toward the region.

FISCAL YEAR 1987 BUDGET: COMMITMENT TO OUR CHILDREN AND FAMILIES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. MILLER of California. Mr. Speaker, the budget resolution which was passed by the House on May 15 deserves the support of every Member of this House, for several important reasons. This budget makes a serious and immediate downpayment to reduce the deficits that constitute a major threat to the long-term fiscal security of this Nation.

Unlike past budgets, however, the House wrote a budget which equitably reduces Federal spending. Our cuts are divided almost exactly 50-50 between defense and domestic spending, as directed by the deficit reduction law. In the past, our budgets, imposed enormous domestic cuts, awarded huge increases in spending to the Pentagon—but paid for them by increasing the deficit. We are all indebted to former OMB Director David Stockman for his congent analysis of how this deceitful strategy was practiced by the White House and OMB over the last several years.

We should support this budget for another reason, too. For after years of mindless retreat, the Congress is drawing a line in the sand and refusing to ratify additional cutbacks in successful programs that provide essential health, nutrition, and education services to the people we represent, including children, who are the poorest of all Americans.

As the chairman of the Select Committee on Children, Youth and Families, which I am honored to chair, I am especially pleased that the House passed a budget which recommits this Government to intelligent and humane domestic policies that invest in the future instead of stealing from it to pay for the Pentagon and the deficit.

POVERTY, ILLNESS AFFECTING CHILDREN

We are all paying—and we will continue to pay—an enormous price for our habit of stealing from the future:

Three million newly impoverished children since 1979, the greatest 5-year increase in three decades;

Over half of all black preschoolers are inadequately immunized against childhood disease; and

Postneonatal mortality and low birthweight rates are rising, in a country with the most sophisticated medical technology and best trained practitioners in history.

And what was the response of the administration? They proposed cutting children's programs $5 billion below the inadequate services we currently provide.

Those cuts would be in addition to the nearly $3 billion cut from children's discretionary programs in the last 6 years.

The staff of the House Select Committee on Children, Youth and Families has prepared a summary of the real cuts in basic support services for children since 1980, which I am submitting for the record at the end of my remarks today. This analysis demonstrates that each year, our most vulnerable children are protected by a bipartisan Congress from the President's budget.

Mr. Speaker, there is something very wrong when the leaders of this Nation look down from their positions of power and privilege, and tell the poorest, the sickest, the most vulnerable, and powerless among us, that they must sacrifice more.

There is something very wrong, Mr. Speaker, when year after year, the greatest burden for reducing the deficit must fall on those who have given up the most and who have the least.

There is something terribly wrong when the defenseless must sacrifice food, education, and housing so that the Defense Department can spend $800 million of our tax money every day—and far more if the administration gets its way.

This year, we are going to reach different conclusions because of Gramm-Rudman—which I didn't support, but which is the law—

because of the size of the deficits and because of the failure of the administration to propose serious and equitable ways to reduce the deficit.

This year this Congress and the American people are going to have to do something that I have been calling for since I first proposed the "Pay As You Go" budget back in 1981: We are going to have to make tough choices.

And I believe that this Congress, like the Budget Committee, will not abandon our children, our families, and our poor.

One of the important reasons for that change is that these programs make good economic sense, as well as good social policy. All the studies, including those by this administration, prove it.

SOUTHERN GOVERNORS' INITIATIVE

Let me quote from a recent address by the distinguished Governor of the State of South Carolina, Richard W. Riley, who has been an outstanding leader in promoting cost-effective health policies in his State and throughout the South.

[From remarks of Gov. Richard W. Riley (SC) before National Governors' Association Human Resources Committee, February 24, 1986]

In Virginia, women who received comprehensive prenatal care had a low birth weight rate of 73.7 per 1,000 live births, in contrast to 262.5 for those without prenatal care—a three-fold difference.

In Kentucky, the perinatal death rate for women with prenatal care was 15 per 1,000, compared to 77 per 1,000 for those without prenatal care.

In Missouri, babies born to white women who had prenatal care had a prematurity rate of 50 precent lower than those born to white mothers who had prenatal care.

The cost effectiveness is clear.

The American Academy of Pediatrics reported in 1984 that cost effectiveness estimates range from two to ten dollars saved for every dollar spent on prenatal care.

Oregon officials found the cost of treating five high risk babies would pay for providing prenatal care to 149 women.

The Virginia State Perinatal Services Advisory Council found that by providing better prenatal care, the state could save $49.8 million in state expenditures for long term care for the mentally retarded per year.

The California Department of Health Services estimates that $6-7 million in neonatal intensive care expenses for 3,700 low birth weight babies could have been saved if their mothers had had prenatal care. This care would have cost only $2.8 million, less than half of what the immediate intensive care costs were. If one were to include the long term care costs, the savings would be even higher.

Michigan state officials found that over six dollars could be saved on every dollar spent by the state to provide prenatal care to 14,000 uninsured women. Without prenatal care 6,000 of the babies born to these women would need NICU care. With prenatal care, at least 1,500 of these babies would not need neonatal intensive care services, saving over $30 million.

Colorado Department of Health officials, considering the savings prenatal care would bring by prevention of prematurity, estimate that nine dollars would be saved for each dollar spent for prenatal care. If long term costs were included, the savings could be as much as eleven dollars for each one dollar spent on prenatal care.

In order to provide all poor women whose income are below the federal poverty level with access to prenatal care services, we need to amend the Medicaid law so that states may target preventive services to improve birth outcomes. The Medicaid program is currently paying a high cost for illnesses.

This year, our budget includes a "Children's Initiative" to target additional funds to proven programs that save money, and save lives at the same time.

Let us be very clear: Many programs for children and families are still going to be cut in this budget. Under this budget, we will cut an additional $43 billion from the domestic budget over the next 3 years. More than half that amount will come from nondefense discretionary programs; another $18 billion will come from nondefense discretionary programs; another $18 billion will come from entitlements, many of which serve poor, elderly, handicapped, and undernourished people.

But we are going to make a modest effort, because to continue to ignore the growing human need in this country—in order to feed the Pentagon—is unconscionable, as well as bad economics.

THE CHILDREN'S INITIATIVE

In function 400, we add about $25 million for Indian Child Welfare Service about current levels, a tiny effort to address the chronic problems faced by native American children.

In function 500, we support several of the key education programs, because education has lost about 22 percent of its budget since the Reagan administration came to office. So we restore some support to the programs for the handicapped, to disadvantaged children and to Indian children.

We provide an additional $100 million for Head Start, a program the administration loves to compliment but forgets to fund. Head Start is one of those highly successful programs that reaches only a fraction of the eligible population, even though we know that children who participate will perform better in later schooling.

We provide a very modest increase in title IV-B, Child Services, which is the preventive service program which helps prevent unnecessary and excessively long placements in foster care and other types of costly maintenance programs.

And we meet the funding target for Graduate Student Loans which is contained in H.R. 3200, which we have approved.

In function 550, we provide $25 million for an expanded childhood Immunization Program, and $75 million for the Maternal and Child Health block grant. And we adopt the unanimous recommendation of the Southern Governor's Association to expand Medicaid eligibility to families which are below the poverty line. If there is any serious question whether we need this expanded medical coverage, let us recall that one-third of our Nation's poor children either have no medical insurance, or are covered for only a portion of the year.

Medicaid, which provides health care to the poorest children, reached only 49 percent of the poor—compared to 65 percent in 1969.

We provide an increase of about $70 million for WIC, the Women, Infants and Children supplemental feeding program, which today reaches fewer than half the high-risk people who need it. And many States—Florida, Kansas, Washington, Arizona, Idaho, Alaska, Utah, Arkansas, Hawaii, and my own State of California— serve 30 percent or less.

Now this is a very modest and responsible plan. We are investing in successful programs, and we are investing in the future of these families and these children. For we know that if we fail to respond today, they will revisit us for a generation and more to come, costing more each step of the way in remedial, unemployment, health care, and law enforcement.

As the man in the television commercial used to say, "You can pay me now, or pay me later."

To those in the Senate and the administration who say we cannot afford these minor increases, I challenge you to tell us your alternative for avoiding the poverty, the sickness, the illiteracy, the joblessness, the crime, the despair and the social unrest which we know are the inevitable results of Government's indifference: "Growth in the economy," as promised by Mr. Stockman and Professor Laffer? The evidence shows that despite a booming recovery, millions of Americans, especially children, are being left behind, and will stay behind for their entire lifetimes if we leave their well-being to the luck of the marketplace.

CHILDREN NOT A PARTISAN ISSUE

Let us not make this into a Democrat versus Republican, big spender versus deficit cutter, liberal versus conservative, issue. Our research on the select committee shows we can overlook those traditional polarizations and come together behind fiscally sound policies that help kids.

That is the select committee's message in our "Opportunities for Success" report, which was endorsed by committee members of both parties. That is the message of the Southern Governors, Democrat and Republican, who endorsed the health initiative we have incorporated in our budget.

Let's stop the inflamed and inflated rhetoric around this budget. The American people recognize bombast when they hear it. They know tough choices have to be made.

The American people aren't expecting miracles from this Congress, but they are expecting the truth, some compassion and decency, and the courage to say "no" to an insatiable, $800 million a day military machine.

They don't believe that the Pentagon is going to starve to death on the $285 billion this budget will give it next year, and they are right.

And they know that we cannot continue to demand more and more sacrifice from those who have less and less—our schools, our children, our poor, our troubled teenagers, our single parent families, our elderly, and our sick.

So I call upon members of both parties to support the House budget as a responsible, if painful, effort to move this country back to fiscal health. It is a budget which shows compassion, realism, and is honest with the American people about what we must spend and

what we must do to fulfill our promise to every American and to restore this country to greatness.

The report of the staff of the Select Committee on Children, Youth and Families follows:

A 1986 CONSTANT DOLLAR ANALYSIS OF FUNDING FOR PROGRAMS WHICH ASSIST CHILDREN: HIGHLIGHTS OF THE REAGAN RECORD

1980–86: REAL CUTS IN BASIC SUPPORT SERVICES FOR CHILDREN

Total spending on major discretionary programs assisting children declined by (over $2.9 billion) or nearly 15 percent over the last six years.

Social services

Hardest hit among programs for children were those funded through the Social Service Block Grant (SSBG). Over the past six years, the SSBG was cut by over $1.2 billion. Funding in FY 86 was one-third less than in FY 80.

Funding for child abuse prevention and treatment suffered a 19 percent decline between 1980 and 1986.

Education

Compensatory Education Programs for Disadvantaged Children (Chapter I) lost over $870 million since 1980.

In addition to Chapter I cuts, vocational education was cut by $250 million, bilingual education by nearly $100 million, and Indian Education by $40 million. Overall spending for major education programs declined by over $1.25 billion, a 22 percent reduction.

Health

Spending on major health care programs (apart from Medicaid) declined by over $800 million or 32 percent.

Despite a national problem of teenage pregnancy and rising numbers of single parent families, funding for family planning services was cut by nearly one-third between FY 80 and FY 86.

Spending on programs under the Preventive Health Block Grant in FY 86 was less than one-third the amount budgeted for FY 80. Programs under the Alcohol, Drug Abuse, and Mental Health Block Grant were cut by nearly 50 percent over the last six years.

Child nutrition

Child nutrition programs were cut by over $400 million or by nearly 10 percent since 1980. The school lunch program alone was slashed by nearly 50 percent.

Entitlement programs

Since 1980, nearly two million children have fallen into poverty, a 16 percent increase. Yet funding for AFDC, the primary income support entitlement program for children in poor families, declined by nearly $300 million.

Food Stamp benefits rose by only $60 million between 1980 and 1986, an increase of less than 1 percent.

THE PRESIDENT'S FY 1987 BUDGET PROPOSES STILL MORE DEVASTATING CUTS

Funding for all programs assisting children, including entitlement and discretionary programs, would be reduced by over $4 billion in FY 87. The amount budgeted would be $5 billion below the amount needed to maintain current service levels.

Discretionary programs alone would suffer over $1 billion in cuts, bringing the total to over $4 billion through FY 1987, a 20 percent decline since the beginning of the decade.

Social services

FY 87 funding for the Head Start program, proven effective in preventing early school failure among low income children, would be $22 million below the amount needed to maintain current enrollment levels.

Education

Combined with earlier cuts, overall spending on major education programs would be nearly 30 percent lower in FY 87 than FY 80.

Funding for vocational education would be slashed by over 50 percent in FY 87. Total funding for the program would be two-thirds below the FY 80 level.

Child nutrition

The President would further reduce spending on child nutrition by $625 million, bringing the total amount cut from the program to over $1 billion through FY 87. The school lunch program would be targeted for a $500 million cut, reducing spending from FY 86 levels by 95 percent, and effectively eliminating the program for thousands of moderate and low income children.

Entitlement programs

The Reagan budget would cut FY 87 funding for AFDC by over 1.5 billion, the single largest proposed cut in children's programs.

Funding for health care services under Medicaid would be cut by over $700 million in FY 87. The amount budgeted would be 1.2 billion below the amount projected by CBO needed to maintain current service levels.

FY 87 cuts in funding for child nutrition programs combined with a cut of over three quarters of a billion dollars in Food Stamps would reduce spending for the two primary nutrition programs serving children by $1.4 billion.

BLACK HERITAGE DAY PARADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. RODINO. Mr. Speaker, on Sunday, May 25, I will have the honor of once again participating in the Annual Black Heritage Day Parade in Newark, NJ. As in the past 8 years, thousands of people will line the streets to rejoice in the rich contributions Afro-Americans have made to the culture and heritage of our Nation.

The sponsor of this event is the Black Heritage Day Parade Commmittee, a nonprofit organization that was established in 1978 to educate black people in Newark about the richness of their heritage and to foster cooperation and unity among the diverse groups of people who are all committed to equal rights in our society.

In addition, the committee also helps provide seminars in black history for Newark residents, particularly young people, and in other ways build a sense of community pride and awareness in the achievements of black Americans—on both a local and national level.

I would like to express my appreciation and commendation to the many, many people who have worked so hard to make sure that this celebration will be a success. Specifically, I want to recognize the parade officers—Mr. Kurt A. Culbreath, chairperson; Mr. Michael Cook, co-chairman; Ms. Alberta Hunt, treasurer; Ms. Deborah L. Bryant, secretary; and Mr. Shawii Johnson, sergeant at arms.

The marshals of this year's parade represent some of the leading organizations in our community. The grand marshal will be Hon. Larry Hazzard, Commissioner, Boxing and Athletes; and the deputy grand marshal will be Hon. Wyman E. Garrett, MD, Obstetrics and Gynecology. The mistress of ceremonies will be Ms. Edna Bailey, Editor, Newark Star. All of these individuals have played crucial roles in the fight for equal justice and civil rights. They have given a great deal of themselves for the betterment of our entire society, and I salute them for their outstanding work in our community.

The theme of this year's Black Heritage Day Parade is "A Tribute to Black Athletes."

The significant advances black Americans have made are too numerous to be mentioned here, and we all know the names of the laws we worked to pass and the social programs that were implemented as a result. The important thing now is to guard against those who would turn back the clock on civil rights. We cannot afford to let that happen.

While all of these laws and programs may not work perfectly, there can be no doubt that they have made a great improvement in the quality of life of millions of Americans and, more importantly, that they have brought the prospect of opportunities to those to whom the doors were previously closed. But instead of the fine tuning that may be necessary to perfect these programs and laws, we have seen the imperfections being used as an excuse to undercut or abolish them.

And so, while we joyously celebrate 20 years of progress we must be ever vigilant to those who would reverse our successes. We often feel that, instead of moving toward Dr. King's "sunlit path of racial justice," we are merely struggling to mark time.

In the quest for freedom, there will continue to be struggles ahead. Yet I am confident that we shall be on the march again under the banner of equal rights and justice for all of our citizens, and that we shall again prevail.

A TRIBUTE TO THE ALLENTOWN FIRE DEPARTMENT

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. RITTER. Mr. Speaker, I would like to commend the Allentown Fire Department for its efforts in fighting muscular dystrophy every year for the past 4 years, the department has held a Muscular Dystrophy Fun Fair to raise money for the cause. This year, the military joins the effort to raise money during the fair on June 7.

The U.S. Marine Corps, the U.S. Air Force, the U.S. Navy, and the Pennsylvania Army National Guard will be attending the fair and the day will be dubbed Military Appreciation Day in their honor.

I think it is important that a community service joins with the military to fight such a debilitating disease.

A REFORM WORTHY OF THE NAME

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. COURTER. Mr. Speaker, the Senate Finance Committee has put together a tax overhaul plan which would go a long way toward establishing a fairer Tax Code for individual taxpayers which, at the same time, preserves or creates important incentives for economic growth in the private sector.

Indeed, there are areas in the Finance Committee initiative which must be significantly altered. But the following editorial from the Record of Hackensack, NJ, points out that any major changes must maintain the incentives for growth and equitable approach of the overall plan.

A REFORM WORTHY OF THE NAME

The Senate Finance Committee has turned a pumpkin into Cinderella's coach. In the twinkling of an eye the committee's first tax plan, which Chairman Robert Packwood and colleagues had laced with special-interest loopholes, was no more. In its place, a new deal for taxpayers—one of the rare pieces of legislation which actually deserves to be called a reform. But in the fairyland of Washington, alas, all this can disappear as quickly as it took form.

The Committee's proposal, one of the most important economic measures in a decade, offers fairness, efficiency, and, for many taxpayers, more money in their pockets. Rates would be cut and trimmed and 6 million of the nation's wage earners will be dropped from the rolls completely. To pay for the cuts, the committee wants to close many of the loopholes that have allowed countless millionaires and corporations to pay little or no taxes. Tax shelters that have helped clog cities with pointless new office buildings would be abolished, diverting hundreds of millions of dollars to more productive use. Capital gains would be taxed as heavily as other income, and corporate taxes would rise.

Washington's springtime green is about to disappear beneath a flood of corporate blue, however, as thousands of lobbyists and business people mobilize to see that none of these worthwhile changes happens. They have a full month before the Senate votes on the tax bill. That means a month to work the telephone, visit congressional offices, prepare detailed position papers, and speak, more or less indirectly, of campaign contributions. Once the Senate votes, a House-Senate conference committee is still to come. Real-estate agents and home builders will fight for tax breaks traditionally enjoyed by their industry. Companies like General Electric and General Dynamics that pay little or no tax will fight to keep it that way.

The lobbyists can be beaten only if everyone who has ever muttered about tax revolts realizes they have a historic opportunity. There's a good argument for several changes. Individual Retirement Accounts, for example, provide a good way to supplement private pension plans and Social Security, and it's easy to question the committee's decision to end IRA benefits for most taxpayers. But restoring this break, used chiefly by those earning more than $30,000-a-year, will cost the federal government $30 billion over five years. That might lead to a move to raise corporate taxes, which would lead corporations to demand special favors in compensation, and on and on and on. Members of the Senate and the joint committee should close the door on all amendments, for fear of starting a chain reaction that could destroy the bill.

Part of the credit for the tax plan must go to President Reagan, who made tax reform his chief domestic priority for his second term. Part goes to Mr. Packwood, who worked with diligence and imagination.

But the proposal is above all a personal victory for Sen. Bill Bradley. It was Mr. Bradley who first proposed a tax package that is very similar to the one endorsed by the committee, and Mr. Bradley who worked doggedly for five years to sell tax reform to his colleagues. It was Mr. Bradley who, with tact and persistence, helped persuade Mr. Packwood to call a halt to the explosion of giveaways that the chairman first contemplated.

Mr. Bradley says he first realized the unfairness of the tax system when, as a highly paid young superstar for the New York Knicks, he listened to a tax lawyer coach him in ways to avoid taxes. It's a conversation the lawyer has cause to regret. It's likely to mean the demise of a cumbersome tax system that has benefitted only the very wealthy and their highly paid tax experts.

ANDREI SAKHAROV

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. FEIGHAN. Mr. Speaker, this morning, Members of the House had an opportunity to join with Dr. Yelena Bonner and celebrate the 65th birthday of her husband, Nobel Peace laureate, Andrei Sakharov. Dr. Bonner, who this week ends her brief stay in the United States, will shortly return to Dr. Sakharov in the closed city of Gorki, where they have lived in internal exile for the last 6 years.

The inhuman and unjust treatment of these two remarkable human beings has been noted many times on the House floor. The Soviet government deserves the condemnation of all free people for their unconscionable treatment of the Sakharovs. Andrei Sakharov and Yelena Bonner, despite years of torment, psychological and physical torture, and their separation from friends and loved ones, stand as beacons in a dark land. Their determination, their courage, and their love inspire the efforts of all who care about the cause of human liberty and the spirit of freedom.

President Reagan has proclaimed today National Andrei Sakharov Day, in fitting tribute for this remarkable man. Despite his present confinement, we join in praying that the Soviet government will at long last recognize that the exile of Sakharov does nothing to assist the cause of world peace, that it troubles and concerns all of us, and that it reduces the chances for a lasting peace and real cooperation between our two people.

I have written a note to Dr. Bonner, expressing the best wishes of all Americans to her and her family on Dr. Sakharov's birthday. Though he is unable to celebrate with those he loves most, he can be secure in the knowledge that he is not forgotten, that his cause and the cause of liberty for all who are oppressed in the Soviet Union remain in our minds and in our hearts, and that his is a voice that can never be silenced.

Mr. Speaker, I ask that my note to Mrs. Bonner on her husband's 65th birthday be included in the RECORD following my remarks.

HOUSE OF REPRESENTATIVES,
Washington, DC, May 21, 1986.

DEAR MRS. BONNER. I join with all Americans in extending my best wishes to you and your family on the 65th birthday of your husband, Nobel Laureate Andrei Sakharov.

The fate of Dr. Sakharov, a towering figure of the 20th Century, will continue to be of grave concern to us until he receives the freedom for which he has so valiantly struggled.

Please extend to him our admiration and respect and our determination to pressure the Soviet government on your behalf and on behalf of all who seek the truth, fight for justice and inspire the cause of humanity.

Best regards,

EDWARD F. FEIGHAN.

A GERMAN PERSPECTIVE OF AMERICA

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. GRADISON. Mr. Speaker, recently I had the privilege of having a foreign fellow in the 1985–86 Congressional Fellowship Program in my office for 4 months. Mr. Klaus Frankenberger is a doctoral candidate and former research associate at the Institute of American Studies of the University of Frankfurt.

After the completion of his fellowship, Mr. Frankenberger wrote a thoughtful essay on the American constitutional system, challenging some of his previously held assumptions, and comparing the American and European approach to government. I hope my colleagues find his remarks of interest. A somewhat shorter version of this essay recently appeared in the Cincinnati Post. I am glad to report that Mr. Frankenberger is now a member of the professional staff of the American Embassy in Bonn.

GERMAN-AMERICAN PERSPECTIVES

Klaus D. Frankenberger

As a German student of American government and politics, I was granted the opportunity to be immersed in the mechanics, processes, and subtleties of the U.S. Congress. I witnessed firsthand the crucial importance of the personalities of congressional policymakers in shaping issues, debates, and finally, legislation. So I am tempted to reflect upon some selected aspects of my temporary host country from foreigner's perspective. Hopefully, my observations are not excessively biased, and my generalizations do not transcend reasonable limits of validity.

The American government is made up of an elaborate system of institutions competing for legislative authority and political influence. The Constitution provides for a complex system of checks and balances which divides power among (and within) separated governmental institutions, but makes their functional cooperation a prerequisite, without which no policies can be formulated and no legislation passed. This means, of course, that major political issues will usually only be resolved after a time-consuming and protracted bargaining process has produced a viable consensus among the political actors.

The necessity to arrive at a consensus is reflected in the internal structures and arrangements of Congress itself. Open to the influence, and pressure, of outside political and social forces, members of both the House of Representatives and the Senate actively participate in all stages of the decision-making process. Compared to Germany (and other Western democracies), little power is vested in the leadership of both the Senate and House or in the leaders of both parties. Instead, power is dispersed among a plethora of committees and subcommittees which jealously guards their turf. But ultimately, it is the individual elected members who hold the balance of power, as they see to their political interests, and not their party leadership as would be the case in the German Bundestag.

Without question, there are highly visible Congressmen and Senators who set the agenda and channel the flow of congressional activities and, of course, there is the President who is the focus of most of the public and media attention. But to ignore the concerns and reservations of the individual members over a period of time only invites retribution and conflict in the future.

Members of Congress, even though clearly identified as Republicans or Democrats, are political entrepreneurs in their own right. Unlike German political parties which are strong socio-political organizations that have all the necessary instruments to whip wavering members into line, even denying them a slot on the ballot for the next election, American parties reflect the much more heterogeneous nature and diversity of the American society. By comparison, if not design, American political parties display organizational weakness and programmatic ambiguity.

Members of Congress do not rely on their political parties for their mandate to serve in the Congress. They may rely on them for broad ideological perspectives, and look for specific cues when it comes to policy areas that do not fall within the realm of their parochial interests. But their political office is hardly predicated on the parties; rather, it is based on their own campaigns which, in turn, focus almost exclusively on their district or state.

As political entrepreneurs, they constantly seek to reap individual political benefits, the most prized of which is reelection (which will allow the incumbent to climb to the next step on the congressional seniority ladder). The entrepreneurial style is enforced by election campaigns that are managed by the candidates' own campaign organizations. They are exclusively set up for the purpose of devising a campaign strategy, and raising the funds to wage credible campaigns. In Germany, it is the parties that provide the logistics of the campaigns, and elections are publically funded.

To cater to what he perceives are his constituents' interests is the raison d'etre of any members of Congress. These interests are endlessly laid out for him by vocal groups of constituents who do not hesitate to remind him that THEY are the final arbiter. Even though a member's decision might reflect his own principles, his degree of loyalty to his party, to the President, and to the institution in which he serves, the commitment to his district takes precedent.

Members generally follow the same ground rules in that they are trying to distribute as many government benefits as possible among their respective districts, notwithstanding their sometimes contrary ideological beliefs that may point in the direction of leaner government. Because they vigorously articulate and defend their constituents' concerns, the final national policy which Congress and the President agree upon often merely cumulates parochial interests.

The recent examples of tax reform, and pork barrel, and agricultural subsidies, among others, illustrate a general process in which, from a European perspective, the national interest, conceptually transcending pure parochialism, is often ignored, if not seriously compromised. In Europe, the federal government is executing the "national interest" on the basis of party and civil service support. In the U.S., the "national interest" is the result of the political interaction of many independent individuals and groups who usually approach the process from different perspectives. The open state of the American "national interest" in subject to the political interpretation and influence of shifting coalitions which follow their own economic needs, their ethnic heritage, or their moral persuasions.

American policymaking, through protracted bargaining and consensus, is time consuming, prone to stalemate, and even inefficient. Only with a clear sense of urgency and crisis is the process expedited and stripped of its built-in delaying procedures. However, this system is a true expression of a pluralistic and open society guaranteeing participation to the largest possible extent. It is "conservative" in the sense that major policy changes can only be brought about when a substantial majority consents. And, as former Representative Barber Conable often remarked, that's just what the founding fathers intended.

This contrasts with well-entrenched aspects in the German form of government which is also representative in nature, but which discourages a wise use of plebiscitary instruments. Truly a PARTY democracy, it bestows on the PARTIES almost "constitutional" status. They, together with the bureaucracies, shape policies and make decisions. In Germany, and other developed democracies, it is the PARTY, NOT the individual member, which is responsible for the operation of the various branches of government. The distribution of party strength in the German Bundestag shapes almost totally the decision-making process. This makes the decisions highly predictable.

The American and German economies operate under the same broad principles of competition and marked-induced adjustments of economic behavior, but there are substantial differences in the degree of government intervention in the economy and the state of industrial relations which supplement microeconomic policy.

What are the consequences of these differences? One is that the German economy has produced NO net increase in employment since the EARLY 1970s. This, of course, contrasts dramatically with the American experience during the same period in which 26 MILLION new jobs were created. What explains Germany's dismal employment performance (including unemployment rates that have persistently hovered around the 9% mark for the better part of the 1980s)?

The German economy has grown by productivity growth rather than by producing more goods and services by an enlarged workforce. Through productivity growth, the nation increased its wealth and international competitiveness, and bolstered wages. But the German economy did not, however, enhance the chances of those entering the labor market and who do not find gainful employment as readily as in the U.S. This leads to an unemployment situation where up to two-thirds of those who file for unemployment benefits in Germany are longterm unemployed (compared with 28% in the U.S.).

The picture is just the opposite in the U.S. where short-term unemployment predominates. This is not to ignore the regional pockets of serious long-term unemployment which is partly associated with the reduced demand for labor in the manufacturing sector due to automatization and foreign competition. But it does emphasize the highly dynamic nature of the U.S. labor market. Changes in the American economy have wrought a service sector in which, by now, more than 70% of all nonfarm employment is concentrated. The service sector's potential for job creation has been unheard of in Europe.

Germany has tried to restructure and modernize its industrail sector which has bolstered the country's international economic position and served as the key to its economic success and political stability for the past 25 years. Germany's is still an industrial economy, albeit a very modern one. Structural changes in the economy, which can lead to dislocation and frictions do not command an outright enthusiasm among the major players in German politics, even though most will acknowledge the desirability for change.

Unlike Germany's the American economic system provides significant opportunities for those individuals willing to assume risks, and exhibit flexibility and geographic mobility. Social mobility usually follows in lockstep. Risk-taking and the economic appreciation of the flexibility to pursue different careers in various economic fields lie at the heart of the innovation and dynamics in the American economy. Risk-taking and broad-based economic innovation are culturally encouraged in the U.S. In Germany, they are treated with suspicion. In the U.S., material benefits and social recognition are bestowed on entrepreneurs who successfully face competition. That is not the case in Germany.

And unlike Germany, those who fail do not have the advantage of being absorbed by generous and more extensive social-welfare programs as in the German case. In Germany, a vast array of transfer payments, provided for by each level of government, come virtually as entitlements, some of which any citizen is eligible to claim regardless of his or her income. It is one of the modern ironies that European societies have developed into social-welfare states, but are reluctant to embrace the policies that would sustain these benefits in the long run. Compared to the dynamics of the American society, they may be described as status quo oriented. It is often argued that European societies find positive aspects in

their lack of labor mobility because persistent social and economic change undermines social cohesion and threatens the particular fabric and quality of life which they cherish.

Generous social benefits contributed in the past to a remarkable social consensus and stability in Germany. But they also created the expectations of future benefits to come, but at a time when the governments' financial capacities will likely reach limits. These expectations have solidified into attitudes that assign to all levels of government a fundamental role in eliminating any adverse situation in life and, conversely, to an economic structure that minimizes the individual's responsibility to enhance his own potential; they further weaken the notion of individual initiative and entrepreneurial innovation.

Adding to this, German state and local bureaucracies which closely monitor any economic operation, do not encourage initiative and innovation. Perceived as a potential threat to their role, German bureaucracies, to a much greater extent then American ones, deeply mistrust economic, social, and cultural initiatives and new approaches.

In sum, variations in the relationship of government and society distinguish the U.S. from Europe in general, and Germany in particular. In the U.S., the social and economic systems have preserved a good deal of their internal autonomy. In contrast, in Germany, the government has assumed an enormous role for resource allocation and social intervention to the extent that is not politically acceptable in the U.S. Based on a traditional orientation toward the authority of the government, a welfare state paternalism is still strong in Europe, while it seems to be wanning in the U.S.

The U.S. and Germany share the same basic and fundamental values. They protect civil liberties and human rights under constitution and law, they cherish due process; they subscribe to democratic forms of government and organization. But, still, they entertain different concepts of what the role of government should be in the resolution or amelioration of social and economic problems.

Recently, however, Germany is looking more to the individual as the principal actor of social and economic change. And the notion of more flexibility in such diverse areas as the labor market, transportation, education, development, and even the regulation of business hours is favorably received by a growing audience.

EAST END HOSE AND CHEMICAL CO., NO. 1, HONORED

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. RITTER. Mr. Speaker, on June 7, the East End Hose and Chemical Co., No. 1, of Catasaqua, PA, will be 75 years old. On June 7, 1911, 73 people pledged themselves to become members of the company.

In 1912, a hose cart was purchased along with 300 feet of hose. In September of that year, a lot was purchased to house the equipment and by 1913, a contract was awarded to erect a building. With the members furnishing most of the labor, the whole project was completed the next year.

By 1925, the company was ready to buy its first motor-driven vehicle with funds raised by public subscription.

In 1948, a ceremony was held to burn the mortgage for the building and, the next year, a new fire siren was connected to the Borough Hall alarm system.

The company has seen its membership grow from the original 73 back in 1911 to more than 300 this year. It has 19 well-trained firefighters.

I want to take this opportunity to commend the East End Hose and Chemical Co. on 75 years of community service.

INTERNATIONAL PORK BARREL

HON. NEAL SMITH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. SMITH of Iowa. Mr. Speaker, no national defense topic is more publicized and controversial than the President's strategic defense initiative, better known as "Star wars." Editorial comment, pro and con, from across the Nation has appeared in the RECORD. To add to this discussion, with another regional viewpoint, I am submitting three editorials that have appeared in the Des Moines Register in recent months and ask that they be published in the RECORD.

[From the Des Moines Register, Dec. 15, 1985]

INTERNATIONAL PORK BARREL.

Britain's decision to join the United States in Star Wars research holds more political than technological significance, although the British may be ahead of U.S. science in such fields as laser research and optic computers.

The agreement makes it likely that several other European allies, particularly West Germany and Italy, will also fall in line on President Reagan's Strategic Defense Initiative. A German spokesman said the British decision "will certainly play a role for us, because [we have] always said that in no circumstances would we want to be alone."

The Europeans have been reluctant about Star Wars. They see it as defending only the United States (if it works) and not Europe, and they share the fear of Star Wars opponents everywhere that it will speed up the arms race. Moreover, it would force the Soviet Union to build a similar system, and even if that shield were full of holes, it would end whatever deterrent credibility the British and French nuclear arsenals hold.

The British seem to have signed up more for the dollars than for the principle. British Defense Minister Michael Heseltine said the agreement will bring "substantial awards" to British companies from a presumed $26 billion pot and will create "a significant number of jobs."

However, the British failed to obtain a guarantee of $1.5 billion worth of contracts that they were insisting upon last summer. They also wanted to be guaranteed the right to use whatever technology they might develop.

Secretary of Defense Caspar Weinberger said British companies will be allowed to compete for research contracts in 18 specified areas, so they could get more or less than $1.5 billion.

As to sharing the fruits of the research, the American position is that U.S. law is restrictive on this point. But spokesmen for both sides said the agreement "lays down the ground rules" and contains a "political commitment" to give Britain a "significant role."

In addition to bringing Britain some dollars, and encouraging other European allies to join up, the agreement is likely to weaken American opposition to Star Wars by enabling the administration to say: Look, the Europeans know a good thing when they see it.

So do many American scientists and the universities and industries that employ them. Unfortunately, the good thing that they see is $26 billion for research contracts over the next five years—if Congress authorizes it.

Their own lobbying would likely have been sufficient, but approval seems more certain if no one can say that Star Wars is dividing the United States and its allies. The pork barrel has gone international, and the contents will be much more dangerous than dams and inland waterways.

[From the Des Moines Register, Dec. 21, 1985]

THE CHICKENS WILL GET AWAY

"You strap a chicken down and blow it apart with shotguns, and say shotguns kill chickens. But that's quite different from trying to kill a chicken in a dense forest when it's running away."

That's how Dr. Roger Hagengruber, director of systems studies at Sandia National Laboratory, described what has been happening, and will happen more and more, in testing components of the president's "Star Wars" Strategic Defense Initiative.

To retain public and congressional support during the long years when Star Wars will be only a future possibility, developers of the SDI are being asked to concentrate on tests of elements that are likely to show quick, deceptively impressive results.

Meanwhile, in Moscow, word is being spread about Soviet countermeasures to Star Wars. The talk is of space mines, dummy missiles and special coatings on real missiles that would harmlessly deflect Star Wars' radar beams. Some of those things may work, and few American scientists talk anymore about the "perfect" defense to which Ronald Reagan still alludes occasionally.

If such gimmicks don't do the job, there is one thing that will: more missiles. The Kremlin also has that in mind, though it probably would begrudge the cost.

Facing a 99-percent perfect SDI, the Soviets could target 100 warheads on each of the 100 largest American cities. As the tiny (by present standards) Hiroshima bomb proved, the one missile that might reach each targeted city would be more than enough.

In the face of that kind of reality, does it greatly matter whether "strapped-down chicken" tests lead to a 99-percent or a 79-percent perfect SDI—or to one that won't work at all?

Whatever the number, too many of those chickens in the woods are going to get away.

[From the Des Moines Register, Jan. 16, 1986]

MAY NOT BE SCIENCE FICTION

It sounds like science fiction: powerful laser beams from space incinerating cities. In fact, it has been a topic of science fiction. But a study by R&D Associates, a military-

oriented think tank, warns that this could be one consequence of President Reagan's Strategic Defense Initiative.

"Star Wars" would rely on immensely powerful laser beams to destroy enemy nuclear warheads in the air. But a laser is not inherently defensive, the study reminds, and "a laser defense system powerful enough to cope with the ballistic-missile threat can also destroy the enemy's major cities by fire . . . in minutes. Not nuclear destruction, but Armageddon all the same."

The authors of this report are advocates of a strong defense, and their concern was that the "enemy" destroyed could be the United States, if President Reagan went through with his offers to share Star Wars technology with the Soviet Union. Even if he doesn't share it, the Soviets might catch on and make it themselves. They always have done so in the past when the United States has come up with a new weapon.

Just one more reason for a U.S.-Soviet agreement not to put these dangerous (if they work) weapons in the skies. Maybe it is science fiction to destroy cities by laser. But if Stars Wars turns out not to be science fiction, this nightmare is likely to be real, too.

SUPPORT FREEDOM IN NAMIBIA

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. SOLOMON. Mr. Speaker, on December 19 last year the Secretary of State appointed a 12-member Advisory Committee on South Africa to recommend measures the United States can take to encourage peaceful change in South Africa and be most effective in promoting equal rights in South Africa and ending apartheid.

The Namibian Transitional Government of National Unity and the Multi-Party Conference are exercising all powers of local self-government pending genuine independence for Namibia, which since 1920 has been administered by South Africa.

The Namibia TGNU and Multi-Party Conference support the U.S. policy of peaceful change and an end to apartheid in South Africa. Indeed, on April 9 of this year the Namibian National Assembly abolished apartheid de jure in South West Africa/Namibia.

In order to support President Reagan's policy of U.S. Government support for internal political groups opposing the Soviet expansionist campaign in southern Africa, I am introducing the following "sense of Congress" resolution for consideration by the U.S. Congress.

99TH CONGRESS, 2D SESSION

H. RES. ——

IN THE HOUSE OF REPRESENTATIVES

Expressing the support and encouragement of Congress for those working for freedom and against communism in South West Africa/Namibia.

Whereas the President of the United States has expressed U.S. foreign policy as opposing Soviet-backed terrorist campaigns to subvert or seize control of non-Soviet countries and territories in various parts of the world, including Central America, S.E. Asia, the Middle East, Afghanistan and Southern Africa;

Whereas approximately 40,000 Cuban combat soldiers and several thousand Soviet and East German advisors presently occupy Angola and lend support to the Soviet-backed terrorist campaign of SWAPO (South West Africa People's Organization), operating from bases in southern Angola, to seize control of Namibia before that territory can achieve internationally acceptable independence;

Whereas the United Nations General Assembly continues to designate SWAPO as the "sole and authentic" representative of the people of Namibia, accord SWAPO permanent observer status at the U.N., and finance SWAPO propaganda offices and meetings throughout the world, while refusing to recognize the various Namibian parties who make up Namibia's Multi-Party Conference;

Whereas on June 17, 1985, the Republic of South Africa voluntarily and as a result of the peaceful negotiations with Namibia's political leaders of the Namibia Multi-Party Conference, effected a complete transfer of all administrative powers of local self-government that were previously exercised by the Administrator-General for Namibia, an official appointed by South Africa;

Whereas Namibia's political party leaders acting on behalf of the people of Namibia immediately established Namibia's Transitional Government of National Unity and invited all political parties, including SWAPO, to participate in exercising the powers of local self-government enjoyed for the first time since 1884 by the people of Namibia;

Whereas Namibia's Transitional Government of National Unity opposes apartheid in all its forms and has abolished apartheid de jure in Namibia;

Whereas SWAPO, under Soviet direction, has refused to cooperate or participate in any democratic or peaceful process leading to Namibian independence:

Whereas historic U.S. foreign policy has encouraged and aided indigenous political groups and similar organizations in developing countries which seek to establish non-Soviet controlled and democratic governments;

Whereas Namibia's Transitional Government of National Unity and the various political parties comprising Namibia's Multi-Party Conference represent the most hopeful, reasonable and constructive avenue to achieve peace in South West Africa and should be supported by the United States; Now, therefore be it

Resolved, That it is the sense of the U.S. House of Representatives that—

(1) The United States should continue to pursue serious multi-lateral initiatives aimed at achieving removal of all Cuban combat troops now occupying Angola, closure of all SWAPO bases in southern Angola and impartiality by the United Nations in treatment of all Namibian political parties wishing to appear at the United Nations, and

(2) The Department of State should immediately establish contact with the leaders of all political parties who make up the Namibia Multi-Party Conference and Namibia Transitional Government of National Unity, and

(3) The United States Government should implement its support for Namibia's Transitional Government of National Unity pending a negotiated plan for internationally acceptable independence by—

(a) Establishing an interest section in Windhoek.

(b) Dispatching a delegation of officials to Windhoek for bilateral talks.

(c) Including Namibia among African nations receiving aid from the U.S. and international organizations the U.S. supports.

(d) Establishing Peace Corps representation in Namibia.

(e) Encouraging U.S. private investment in Namibia.

(f) Supporting Namibia's control of its fishing industry by requiring other nations to adhere to generally recognized international rules and existing agreements.

(g) Inviting all Namibian political parties, including Namibia's Multi-Party Conference and SWAPO, to meet in an all-parties conference to develop a censensus on the time and method for achieving independence for Namibia free from foreign control.

THE RETURN OF DR. SEUSS TO SPRINGFIELD

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. BOLAND. Mr. Speaker, my hometown of Springfield, MA, is recognized as being the birthplace of many famous people and things. It was in Springfield that the game of basketball was created and the first American automobile assembled. And, as far as notable people, few could compare with the creator of the Lorax, Thidwick the big-hearted moose, and the cat-in-the-hat; the world renowned, and beloved, Dr. Seuss.

Dr. Seuss, otherwise known as Ted Geisel, was raised in Springfield, and even though he now resides in California he has retained a fondness for the "City of Homes". The people of Springfield have been honored to have some of the areas of the their city depicted in certain of his stories, and the other day he returned to Springfield for a visit and to take part in the city's ongoing 350th anniversary celebration. Today's New York Times carried an article about that visit, and I would like to insert it at this point in the RECORD:

[From the New York Times]

AFTER 60 YEARS, DR. SEUSS GOES HOME

(By Larry Rohter)

SPRINGFIELD, MASS.—May 20—Like the Cat in the Hat, Dr. Seuss came back today, back to the schools, libraries, streets and parks of this New England factory town where he was born 82 years ago.

Unlike some of his best-known creations, though, Dr. Seuss did not seem to have mischief in mind. Instead, his was a sentimental visit to a place where, as he put it, "I haven't really spent any time in 60 years" but where he and his family are fondly remembered by three generations of local residents and an assortment of relatives that until today he wasn't even sure he had.

Amid all the testimonials, and receptions in his honor, between the lunch and the dinner with city officials and community leaders, Dr. Seuss managed to find time to stop and take another look at Mulberry Street. It was the street that inspired the man who grew up here as Theodor Geisel to write "And to Think That I Saw It on Mulberry Street" nearly 50 years ago, launching him on a career as the most successful

author of children's books in American history.

"I never really lived on Mulberry Street," he said almost apologetically. "But my mother owned a piece of property on Mulberry Street, and I spend a lot of time there."

OUTPOURING OF AFFECTION

As Dr. Seuss, tanned, bearded and white-haired, pulled up in a small bus in front of the medical center at 39 Mulberry Street, it was as if he had never left. Dozens of excited children surged toward him, waving copies of "Hop on Pop" and "Green Eggs and Ham" and shouting "We love you, Dr. Seuss!"

Adults were a bit more restrained in their outpouring of affection, but just barely. Nurses and office workers began to emerge from the medical center to seek the author's autograph, and a group of teachers quickly gathered around to hug and congratulate him. Perhaps they had heard of his latest effort, "You're Only Old Once," a humorous book about adults that he has been promoting.

"Thank you so much for being so good to the kids," said Gail Watson, a librarian from Chicopee, Mass., who had come with students from the Barry School to catch a glimpse of their idol.

At the next stop, Sumner Avenue Elementary School, which he attended as a child, it was more of the same. Students and teachers poured onto the front lawn, decked out in outlandish haberdashery straight from "The 500 Hats of Bartholomew Cubbins" and waving slightly misspelled banners reading, "Welcome Home Dr. Suess."

"Will you write us a book?" asked one boy as Dr. Suess hugged and squeezed the children.

SESSION WITH CONSTITUENTS

There was no time for that, but Dr. Seuss did take part in a freewheeling session with the constituency that has provided the most avid consumers over the years of his 45 books, which have sold over 100 million copies. At the Springfield City Library, surrounded by images of Horton the Elephant, Yertle the Turtle and other members of the Seuss menagerie, he fielded questions from a group of nine children ages 9 and 10, displaying all the whimsical humor contained in his books.

One child wanted to know if Dr. Seuss had ever acted like any of his characters. "No, because I don't want to get put in jail," he replied, drawing delighted giggles.

His hobbies? "Gardening and climbing Mount Everest, which I don't do very often."

Why do his animals look the way they do? "I can't draw too well, so the knees keep slipping down and the elbows keep slipping up."

On a more serious note, he told them, "All of my books are based on truth, an exaggerated truth." And if any of them plan to become writers or artists, he advised, "you can get help from teachers, but you are going to have learn a lot by yourself, sitting alone in a room."

"He was very exciting and nice," Daniel Santana, 10 years old, said afterward. "I knew he would have glasses and white hair, but I did not know he would have a bow tie and beard."

It has been 20 years since Dr. Seuss last visited his hometown, and that was for the funeral of his father. For years he has lived in La Jolla, Calif, in a Spanish-style ranch house overlooking the Pacific Ocean and equipped with a studio in which he writes and illustrates his books.

But the University of Hartford, just down Interstate 91 from here in Connecticut, awarded him an honorary Doctor of Letters last weekend, and when people in his hometown, which has been celebrating its 350th anniversary all this month, heard about the forthcoming honor some months ago, they began a campaign urging him to pay a visit.

In the end, it was probably not the efforts of Mayor Richard E. Neal or other leading residents that turned the tide and brought him here. More than 600 local schoolchildren wrote letters to Dr. Seuss asking that he visit, including Joel Senez, 8, who now lives in Dr. Seuss's boyhood home at 74 Fairfield Street.

Dr. Seuss stopped by to visit the house and, seated in his boyhood bedroom, told Joel and his younger brother, Aaron, 5, about the life he had led there with his mother, Henrietta, whose maiden name he would take as his pen name, and father, Theodor, whose responsibilities as Superintendent of Parks included the local zoo.

There were no tizzle-topped tufted mazurkas, twiddling umlauts or bee-watching absaloms at the Springfield Zoo, Dr. Seuss admitted today. But he recalled that it was a pleasant place for a boy to spend his time, sketching the rather more conventional beasts that did live there.

"I just stopped by to make sure you're taking proper care of the house," Dr. Seuss told the Senez boys and their father, Ronald, an administrative officer with the National Guard, before departing.

A few grinches in town might argue that Dr. Seuss is not Springfield's most famous son, that the honor belongs to James Naismith, who invented basketball here nearly a century ago. But Dr. Seuss's legion of local fans were having none of that today.

"And to think that we saw him on Mulberry Street," read one large banner displayed by a group of enthusiastic schoolchildren. When it came time for Dr. Seuss to go on his way, they saluted him with a line from one of his own books: "Thank you, thank you, Sam-I-Am."

FRONT-LINE SOLDIERS DESERVE FULLY TESTED WEAPONS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. LEHMAN of Florida. Mr. Speaker, last week the Wall Street Journal printed an opinion page article by our esteemed colleague, CHARLES E. BENNETT. A senior Member both of the House and of the Committee on Armed Services, as well as the dean of the Florida delegation, CHARLIE BENNETT is an authority on military subjects. I urge all my colleagues to read his views on this critical subject—the need to be assured that today's sophisticated weapons actually work in the field as they do in the laboratory. Certainly there is no one in this Congress, whether hawk or dove or somewhere in between, who wants to see American soldiers sent into battle with weapons that fail.

The article follows:

[From the Wall Street Journal, May 15, 1986

FRONT-LINE SOLDIERS DESERVE FULLY TESTED WEAPONS

By Charles E. Bennett

Dateline: The Mediterranean, 1987.

Dawn comes to the American entrenchments astride the road to Tripoli. The men of the U.S. 82nd Airborne have been ordered to prevent Libyan reinforcements from relieving Col. Muammar Qadhafi's troops besieged in the capital.

Cpl. Allen Jackson's stomach tightens at the sight of more than 100 Libyan T-72 tanks in the distance. He checks to see if his Dragon antitank missile is ready to fire. From his foxhole he scans the positions that other Dragon-armed paratroopers have prepared in the rocky ground.

Several Libyan tanks explode in the distance, hit by jeep-mounted TOW antitank missiles. But the remaining tanks keep advancing. As they come within the advertised 1,000 yard range of the Dragon, Cpl. Jackson aims at a lead T-72 and fires. Other paratroopers do the same.

The Dragons blast from their launch tubes. Most merely dive into the desert floor. Others strike the tanks, but fail to penetrate the Soviet-made armor. The Libyan tanks grind forward, toward hundreds of U.S. paratroopers now armed with nothing but rifles and grenades.

Soldiers' lives and possibly American interests, are sacrificed because the Dragon fails to perform in combat as it did in the laboratory. This nightmare could become a reality if the U.S. does not realistically test its weapons.

Conventional wars are fought by exhausted young men amid the chaos and smoke of battle, not by lab-coated engineers in air-conditioned computer rooms. Soldiers fight with weapons they have carried or driven for miles through the rain and mud, not with simulation software. Yet we continue to rely almost exclusively on sterile computer simulations to determine the survivability of our vehicles and the lethality of our arms.

There are many reasons for this. The military services want to get new weapons fielded quickly. The contractors want to see their program go forward with as little interruption as possible. Members of Congress want to see funding flow for both of these reasons, and also they represent workers whose jobs depend on weapons programs.

These are all well-meaning people dedicated to our nation's defense. Yet in their zeal to maintain a program's momentum, they can lose sight of the bottom line: The only way to determine if a weapon will work in combat is to test it under realistic combat conditions.

This is only simple common sense. However, we don't do it. Col. James Burton, director of the Pentagon's Live-Fire Test Program, testified earlier this year before a House Armed Services Subcommittee that "there has never been a program to shoot real Soviet weapons at U.S. vehicles loaded with the dangerous materials they have to carry in combat."

Unrealistic weapons testing is not a new problem. U.S. testing has been inadequate for decades. At the outset of World War II our torpedoes did not work. In Korea, U.S. troops found that their bazooka rounds bounced off enemy tanks. In Vietnam and the Middle East our planes and tanks were

found to be excessively flammable. Men died needlessly in those conflicts.

They may die needlessly in the future. The Maverick guided missile, the Mark 46 torpedo and the Dragon antitank missile are examples of weapons our armed forces rely on to perform vital combat missions. All three might perform satisfactorily. We simply do not know if they will work as advertised because they have not been realistically tested.

Maverick is the primary Air Force antiarmor weapon, an important element of U.S. air power. In Maverick tests two years ago, personnel from the Hughes Corp. monitored the targeting of the weapons, and told the pilot when to fire at targets. In more recent Maverick tests, pilots were told of the precise locations of their targets. The targets, of course, were not allowed to move. The Mark 46 torpedo is the only anti-submarine torpedo used by our surface combatants, helicopters and aircraft. If this one weapon doesn't work, our ability to maintain control over the seas would be in question. The consequences of the Dragon failing in combat have already been illustrated hypothetically. Suffice it to say that Dragon is the individual foot soldier's sole means of killing tanks.

All this paints a bleak picture. But there is hope for the future. The Defense Department has initiated some limited realistic testing under Col. Burton's Live-Fire Test Program. Congress should carefully nurture and expand that program.

The rationale for live-fire testing is simple. Before we put a weapon in the hands of our troops we should ensure that it performs its combat mission, not that it simply meets contract specifications. Our tests should replicate combat conditions as realistically as possible.

This means firing real Soviet weapons at our vehicles configured as they would be in combat. To test our munitions and missiles, we should have real soldiers fire real rounds at combat-loaded-targets of enemy manufacture.

The first round of live-fire tests of the Bradley Fighting Vehicle proved the value of realistic testing. It was learned that, although the Bradley meets all of the Army's technical specifications, it is far more vulnerable than need be. The simulations used to predict the effects of hits were also grossly incorrect 60% of the time.

Fortunately, we learned all of this before men were unnecessarily killed in combat. Unfortunately, we found out only after the taxpayers had bought and paid for more than 2,000 Bradleys.

The second round of Bradley tests began with a disturbing development. Pentagon documents indicate that the first test of this round may have been manipulated. If true, the ammunition box was moved from its original position, where it would have been hit in the tests, and replaced with a water can. This matter is currently under investigation. Movement of the ammo box would be unacceptable only if the test results would be significantly affected by the switch.

The Bradley tests demonstrate two things. First, live-fire testing should be required for all major weapons and munitions before we sign production contracts. Second, such testing should be overseen by an independent test director. That director must have the authority and the resources to conduct his own tests if the uniformed services refuse to conduct their tests realistically.

American soldiers have a right to expect that the government that orders them into combat will provide them with the tools necessary to do the job. Next week, I will try to amend this year's Defense Authorization bill to require live-fire testing so that our government keeps its end of the bargain.

LET'S STOP PLAYING GAMES, MR. GORBACHEV

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. BROOMFIELD. Mr. Speaker, it's time for Mr. Gorbachev to stop playing games. Why is he inviting diplomats to visit Kiev and the area near Chernobyl when there are scientists available to do the same job? The safety of nuclear facilities is no laughing matter. The incident at Chernobyl was a real tragedy. Now is the time to be serious and find out what really happended at Chernobyl. The world doesn't need another nuclear accident.

Just the other day, Soviet officials invited European ambassadors in Moscow to visit Kiev and an area near that city where evacuees from the Chernobyl area are living. Mr. Gorbachev, what do diplomats know about nuclear accidents? What do they know about radiation and its effects on health and the environment?

The Soviet offer was rejected. European governments made it perfectly clear to the Kremlin that they wanted to send experts, not ambassadors, to the affected area. The European governments wanted their experts to visit the plant itself, not just Kiev which is 80 miles from Chernobyl.

If the Soviets are really trying to clean up their image, this is the perfect opportunity. Mr. Gorbachev should invite a team of nuclear experts from the International Atomic Energy Administration to visit the nuclear plant. He should encourage that team to determine exactly what caused that disaster. The Soviet leader should share the findings with the world. Accidents like the one at Chernobyl must not happen again.

With 13 dead and hundreds suffering from radiation sickness, Mr. Gorbachev, you don't need traditional diplomats to visit Kiev. You need a team of real experts.

LOW-INCOME ELDERLY AND DISABLED MEDICAID AMENDMENTS OF 1986 (H.R. 4882)

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 21, 1986

Mr. WAXMAN. Mr. Speaker, I am pleased to introduce, on behalf of myself and Mr. SCHUMER, the Low Income Elderly and Disabled Medicaid Amendments of 1986. We are joined in sponsoring this legislation by a bipartisan coalition of 43 colleagues, including a majority of the members on the Subcommittee on Health and Environment of the Committee on Energy and Commerce, which has legislative jurisdiction over this proposal. In addition, several members from the Committee on the Budget and the Select Committee on Aging are among the cosponsors. We are particularly pleased that the chairman of the Select Committee on Aging, Mr. ROYBAL, the committee's ranking Republican, Mr. RINALDO, and the chairman of the Aging Committee's Subcommittee on Health and Long-term Care, Mr. PEPPER, have joined us in introducing this measure.

Last week the House adopted a fiscal year 1987 Budget Resolution, House Concurrent Resolution 337, which assumes additional Medicaid spending of $38 million in the first year for a low-income elderly and disabled initiative. This bill is that initiative. It will enable the States, with Federal assistance, to protect our most vulnerable senior and disabled citizens from the often devastating health expenses they now face.

This legislation gives the States two broad options to protect their low-income elderly and disabled under the Medicaid Program. First, they could offer the full range of Medicaid coverage to the elderly and disabled with incomes of up to the 100 percent of the Federal poverty level. Or, States could opt for a more limited approach and just pay for Medicare cost-sharing requirements—the part A deductible and coinsurance and the part B premium, deductible, and coinsurance—for elderly and disabled Medicare beneficiaries whose incomes are below the Federal poverty line. In either case, States would receive Federal Medicaid matching payments for their expenditures on behalf of this new population.

NEEDS OF THE ELDERLY AND DISABLED POOR

Extension of Medicaid coverage to poor elderly and disabled Medicare beneficiaries is clearly a pressing priority despite limited Federal resources. On March 26, at a hearing before the Subcommittee on Health and the Environment, the Congressional Budget Office testified that 20 percent of our senior citizens—5 million people—are without Medicaid or private insurance to supplement their Medicare benefits. These beneficiaries, relying on Medicare alone to finance needed health services, are among the sickest and poorest of our senior and disabled citizens. They face substantial out-of-pocket costs for needed care and can incur devastating financial burdens when illness strikes.

Medicare covers less than half of the health expenses of the elderly and disabled and requires substantial cost-sharing. In 1986, Medicare beneficiaries will pay $186 for premiums for part B coverage, a $492 deductible for the first day of hospital care, and a physician deductible of $75 plus 20 percent cost-sharing on all claims and extra billing if the physician does not take assignment. Medicare also fails to cover many services that the elderly and disabled need. Specifically, Medicare does not cover prescription drugs, dental care, extended nursing-home care, or other long-term care services. As a result, out-of-pocket expenses for an elderly person with a moderate spell of illness can easily exceed $2,000. This is a major expense for anyone, but a devastating financial burden for the nearly 4 million elderly poor struggling to live on incomes of less than $5,000 per year.

THE IMPORTANCE OF MEDICAID COVERAGE

Medicaid, the Federal-State program that purchases basic health care coverage for the poor, provides essential assistance to about 3.2 million poor elderly and 3.1 million disabled. It supplements Medicare by filling in the gaps left by Medicare's cost-sharing requirements and by providing additional benefits to complement Medicare's coverage of acute care. Medicaid pays the Medicare part B premium as well as the part A and B cost-sharing and deductibles for Medicare beneficiaries. In 1982, Medicaid paid the Medicare premiums for 9 percent of aged Medicare beneficiaries and 19 percent of disabled Medicare beneficiaries. Medicaid also covers services not covered by Medicare, including prescription drugs, dental care, and nursing-home care. Many frail and low-income elderly and disabled need these services, but cannot afford to purchase them directly.

Medicaid can therefore provide valuable protection for the poor who lack the ability to pay out-of-pocket for health services or purchase private supplemental insurance coverage. Thirty percent of the poor and near-poor elderly have neither Medicaid nor private insurance.

The problem is that Medicaid does not reach all low-income elderly and disabled. In fact, only 36 percent of the elderly with incomes below the Federal poverty line receive benefits from Medicaid today. An estimated 2.2 million elderly individuals with incomes below 100 percent of the Federal poverty level ($4,979 in 1984) are not covered. One of the reasons for this lack of coverage is Federal Medicaid eligibility policy.

Generally speaking, Medicaid coverage is not available to a poor elderly or disabled individual unless he or she is receiving cash assistance under the Supplemental Security Income [SSI] Program, is living in a nursing home, or has very high, recurring medical expenses. The maximum income for eligibility for Federal SSI benefits in 1986 is $356 per month for an individual, or 76 percent of the Federal poverty standard, and $524 for a couple, or 90 percent of poverty. In about half the States the income level for eligibility is somewhat higher because the State supplements the Federal SSI benefit payment. In about 30 States, elderly and disabled poor who are not receiving cash assistance qualify for Medicaid under optional medically needy coverage or under special provisions allowing coverage of individuals in nursing homes.

As a result of these complex rules, many of the poorest elderly and disabled Medicare beneficiaries receive no assistance from Medicaid. Illness strikes at all income levels, but the financial burden of illness is greatest for those with low incomes. When illness strikes, they must choose between obtaining care or doing without other essential services. Too often needed care is foregone because food and shelter must take priority. The poor elderly and disabled who are not eligible for SSI and who do not qualify for Medicaid coverage as medically needy could receive substantial assistance from having Medicaid pick up their Medicare cost-sharing obligations and offer them the protection that more affluent elderly and disabled Medicare beneficiaries obtain from private supplementary insurance plans.

It is precisely those without Medicaid and supplemental coverage that have the greatest health needs and the lowest use of services. The Congressional Budget Office found that the elderly without Medicaid or supplementary private insurance were both older and sicker than other Medicare beneficiaries. Yet, despite their greater health needs, these individuals do not receive care at rates comparable to others. Those elderly with Medicare coverage only are 13 percent more likely to have fair or poor health than those with both Medicare and supplementary insurance, but they receive 35 percent fewer physician visits per capita, 29 percent fewer prescription drugs, and are 18 percent less likely to be admitted to a hospital.

THE PROPOSED LEGISLATION

Title I. Optional Medicaid Coverage of Elderly and Disabled

Allows States, at their option, to extend Medicaid coverage to elderly and disabled individuals (1) whose resources meet the standards under the Supplemental Security Income [SSI] Program (or, at State option, the medically needy program); and (2) whose income is up to 100 percent of the Federal poverty guidelines ($447 per month for an individual, $603 for a couple).

Coverage would include the full range of Medicaid benefits offered by the State to its cash assistance recipients, including payment of Medicare premiums and cost-sharing requirements for individuals eligible for both programs. (Using the option created in title II, States could limit their assistance to payment of Medicare premiums and cost-sharing only.)

States could set the income thresholds at whatever level they choose, up to the Federal poverty level; the thresholds would have to be the same for both the elderly and disabled.

States could not choose as between the elderly or disabled; if they opt to cover one group, they would have to cover the other.

In order to exercise this option, the State would have to extend Medicaid coverage to at least some pregnant women and infants up to age 1 (as per H.R. 4630). The income thresholds established for the aged and disabled could be no higher than those for the pregnant women and infants.

Effective July 1, 1987.

Title II. Optional Coverage of Medicare Premium and Cost-sharing for Elderly and Disabled

Allows States, at their option, to pay the Medicare premium and cost-sharing obligations of elderly and disabled Medicare beneficiaries (1) whose resources meet SSI standards (or, at State option, Medicaid medically needy standards), and (2) whose incomes do not exceed 100 percent of the Federal poverty level.

States could not choose as between elderly and disabled Medicare beneficiaries; if they opt to pay the cost-sharing for one group, they would have to do so for the other.

States could set income thresholds at any level up to 100 percent of poverty; the thresholds would have to be the same for both the elderly and disabled.

Medicare cost-sharing requirements that would be covered under this option are the part A (inpatient hospital) deductible and coinsurance and skilled nursing facility coinsurance, and part B (physician services) premium, deductible, and coinsurance.

In order to exercise this option, the State would have to extend Medicaid coverage to pregnant women and infants up to age 1 (as per H.R. 4630). The income thresholds established for the elderly and disabled could be no higher than those for pregnant women and infants.

Effective July 1, 1987.

CONCLUSION

Mr. Speaker, this legislation is essential to improving the health coverage available to the elderly and disabled poor. It is carefully targeted at the poorest of our elderly and disabled citizens and thus focuses help on those most in need. It does not impose any new burdens on the States, but instead makes Federal financial resources available to those States that decide they want to extend protection to more of their elderly and disabled citizens.

Although a final CBO estimate is not yet available, we anticipate the cost will be extremely modest—about $38 million in the first year. The House version of the fiscal year 1987 budget resolution allows for the enactment of such an initiative, and if the conferees accept the House position—as we hope they will—we would expect the Health and Environment Subcommittee to take up this bill and related Medicaid legislation.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, May 22, 1986, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 29

9:30 a.m.

Joint Economic

Economic Resources, Competitiveness, and Security Economics Subcommittee

To resume hearings to review the effects of legal and illegal immigration on the U.S. economy.

2359 Rayburn Building

JUNE 3

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Energy and Natural Resources
To hold oversight hearings on the implementation of the Public Utility Regulatory Policies Act (P.L. 95-617).
SD-366

Finance
To hold hearings on S. 2331, to assure the quality of inpatient hospital services and post-hospital services furnished under the Medicare program, and related matters.
SD-215

10:00 a.m.
Environment and Public Works
To hold hearings on the expansion of the Pavilion at the Old Post Office Building in the District of Columbia.
SD-406

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold joint hearings with the Committee on Labor and Human Resources' Subcommittee on Aging on statistical policy with regard to older Americans.
SD-430

Labor and Human Resources
Aging Subcommittee
To hold joint hearings with the Committee on Governmental Affairs' Subcommittee on Energy, Nuclear Proliferation and Government Processes on statistical policy with regard to older Americans.
SD-430

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for fossil energy and clean coal technology.
SD-192

JUNE 4

9:30 a.m.
Appropriations
Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the Departments of Commerce, Justice, and State, the Judiciary, and certain related agencies.
S-146, Capitol

Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

10:00 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 1935, to provide for certain vessels to be documented under the laws of the United States to entitle them to engage in domestic coastwise trade.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-336

Labor and Human Resources
To hold oversight hearings to review the imposition of user fees in FDA approval procedures for new drugs.
SD-430

JUNE 5

9:30 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on S. 2256, to remove certain requirements relating to reservations of funds for special alternative instructional programs and transitional bilingual educational programs.
SD-430

10:00 a.m.
Energy and Natural Resources
To resume oversight hearings on the implementation of the Public Utility Regulatory Policies Act (P.L. 95-617).
SD-366

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the National Endowment for the Arts, and the Institute of Museum Services.
SD-192

JUNE 9

10:00 a.m.
Energy and Natural Resources
To hold oversight hearings on clean coal technology development and strategies for acid rain control.
SD-366

JUNE 10

9:30 a.m.
Environment and Public Works
Environment Pollution Subcommittee
To hold oversight hearings on ozone depletion, the greenhouse effect, and climate change.
SD-406

10:00 a.m.
Energy and Natural Resources
To continue oversight hearings on clean coal technology development and strategies for acid rain control.
SD-366

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1987 for the Office of the Secretary and Office of the Solicitor, Department of the Interior.
SD-192

JUNE 11

9:30 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
To continue oversight hearings on ozone depletion, the greenhouse effect, and climate change.
SD-406

Governmental Affairs
Oversight of Government Management Subcommittee
To resume oversight hearings on alleged Department of Defense subcontractor kickbacks.
SD-342

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold hearings on efforts to improve the health status of children.
SD-430

JUNE 12

9:30 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 2204, to permit the use of park entrance, admission, and recreation use fees for the operation of the National Park System, and S. 2130, to preserve, protect and revitalize the National Park System.
SD-366

Select on Indian Affairs
To hold hearings on S. 830, to expand Indian education programs to include Native Hawaiians.
SR-485

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume joint oversight hearings with the House Committee on Education and Labor's Subcommittee on Elementary, Secondary and Vocational Education on illiteracy in America.
2175 Rayburn Building

JUNE 16

1:00 p.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on the second waste repository site selection under the Department of Energy's Office of Civilian Radioactive Waste Management.
SD-366

JUNE 17

9:00 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on S. 1235 and S. 2291, bills to promote more effective and efficient nuclear licensing and regulation.
SD-406

9:30 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 2055, to establish the Columbia Gorge National Scenic Area.
SD-366

10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on S. 525, to provide the Secretary of Health and Human Services the authority to conduct epidemiological studies of the health effects of radiation in places of employment
SD-342

Labor and Human Resources
To resume hearings on S. 1804, to establish a program to provide development and incentive grants to States for enacting medical malpractice liability reforms.
SD-430

Select on Indian Affairs
To resume hearings on S. 902, to establish Federal standards for gaming activities on Indian lands.
SD-106

JUNE 18

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold joint hearings with the House Committee on Post Office and Civil Service on a Postal Rate Commission report on the use and abuse of the preferred mail rate.
SD-342
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

JUNE 19

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on general aviation product liability.
SR-253
Energy and Natural Resources
To hold oversight hearings to review the impact of the explosion of the Soviet nuclear powerplant at Chernobyl on the domestic nuclear industry.
SD-366
10:00 a.m.
Small Business
To hold oversight hearings on the implementation of the Prompt Payment Act (P.L. 97-177).
SR-428A

JUNE 23

2:00 p.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings to review budget requests for the Department of Energy's Office of Energy Research and the Office of Environment, Health and Safety.
SD-366

JULY 25

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366
Labor and Human Resources
To hold hearings on the administration of the Mine Safety and Health Review Commission.
SD-430

JULY 17

9:30 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To hold joint hearings with the Committee on Labor and Human Resources' Subcommittee on Employment and Productivity on work and welfare issues.
SD-430
Labor and Human Resources
Employment and Productivity Subcommittee
To hold joint hearings with the Committee on Finance's Subcommittee on Social Security and Income Maintenance Programs on work and welfare issues.
SD-430
10:00 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S. 2412, to withdraw and reserve certain public lands.
SD-366

JULY 22

9:30 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To resume joint hearings with the Committee on Labor and Human Resources' Subcommittee on Employment and Productivity on work and welfare issues.
SD-430
Labor and Human Resources
Employment and Productivity Subcommittee
To resume joint hearings with the Committee on Finance's Subcommittee on Social Security and Income Maintenance Programs on work and welfare issues.
SD-430

JUNE 24

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 1903, and a related measure to improve the safe operations of commercial motor vehicles.
SR-253

JUNE 25

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for the National Transportation Safety Board.
SR-253

JULY 29

10:00 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review the response for home health care services.
SD-430

JULY 30

10:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

AUGUST 13

10:00 a.m.
Labor and Human Resources
To hold hearings to review the private sector initiatives in human services.
SD-430

SEPTEMBER 10

10:00 a.m.
Labor and Human Resources
To hold hearings to review the human resources impact on drug research and space technology.
SD-430

SEPTEMBER 16

10:00 a.m.
Labor and Human Resources
To hold hearings on pending nominations.
SD-430

SEPTEMBER 24

10:00 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

CANCELLATIONS

JUNE 12

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on proposed legislation authorizing funds for programs of the Hazardous Materials Transportation Act.
SD-253
